## Collective Investment Schemes in Luxembourg

This new edition is the only comprehensive account of the regulation and operation of investment funds under Luxembourg law. Written by practitioners from a leading funds practice, it contains a detailed consideration of the legal environment in Luxembourg.

## Collective Investment Schemes, the Law and Practice

A library of documents and additional clauses, commentary and procedural checklists which make this a practical and wide ranging source giving access to over 300 precedents for almost every aspect of matrimonial proceedings

### The Law of Private Investment Funds

The new edition of *The Law of Private Investment Funds* offers a practical analysis of the legal and regulatory issues that arise in connection with the structuring, formation, and operation of private investment funds, including hedge funds, private equity funds, real estate funds, and other non-retail collective investment vehicles. The book provides a unique analysis of these funds on a pan-asset class basis, as well as from a US, UK, and European perspective. The themes of investor protection and fiduciary challenge are considered in the context of the various sources available for investor protection including the substantive rights and obligations under general law, and voluntary and statutory rights of regulation. The author considers the various aspects of running private investment funds against the backdrop of regulation and investor protection. Issues such as structuring and launching, and marketing private investment funds are considered in full. The author also looks at the governance challenge where limited partnerships and offshore companies are concerned. The book identifies governance as a key issue for private investment fund participants and discusses in depth several ways in which managers and fund participants can improve the governance of their funds. In addition it analyses the consequences and impact of the recent global financial crisis on private funds, and the response of the US, UK, and European regulators. The new edition includes increased coverage of best practice and industry guidelines, including the ILPA Guidelines for private equity funds, and the MFA's Best Practices for hedge funds. It also provides discussion of new regulatory regimes in the US and EU, including the Dodd Frank Act and AIFMD.

### The Alternative Investment Fund Managers Directive

In the ten years since its coming into force, the Alternative Investment Fund Managers Directive (AIFMD), with almost EUR 7 trillion assets under management in its remit, has become an important piece of European regulation complementing the Undertakings for Collective Investment in Transferable Securities (UCITS) and the Markets in Financial Instruments (MiFI) frameworks. This third edition of the most comprehensive and in-depth analysis of the AIFMD and its related European investment fund legislation (including the European Venture Capital Fund Regulation, the European Social Entrepreneurship Fund Regulation, the European Long-Term Investment Fund Regulation and the European Money Market Fund Regulation among others) brings together fund industry experts, fund supervisors, consultants, lawyers and academics to discuss the content and system of the directive from every angle, including its relation not only to the UCITS and MiFI frameworks but also to pension funds, the Sustainable Finance Disclosure Regulation, the Securitization Regulation and the Cross Border Funds Distribution Directive and Regulation, as well as related pieces of tax regulation at the European level. Further, the third edition emphasizes the function of such factors in the financial services value chain as the following: the AIFMD's approach to robo-advisors; digital asset funds; infrastructure investments in the context of real estate and sustainable investments; risk management; transparency; and impact on alternative investment strategies. Five country reports, focusing on the European Union's five most important financial centres for alternative investment funds, deal with the potential interactions among the AIFMD and the relevant laws and regulations of France, Germany, Luxembourg, Ireland and The Netherlands. This thoroughly updated edition elaborates on potential difficulties encountered when applying the directive and provides potential solutions to the problems it raises. The book is sure to be warmly welcomed by fund lawyers and consultants, investors and their counsels, fund managers, depositaries, asset managers and administrators, as well as regulators and academics in the field.

### Alternative Investment Funds in Europe

Asset management has quickly become one of the European Commission's key points on the post-Financial Services Action Plan (FSAP) agenda. The combination of Europe's demographic decline and the poor state of public finances means that asset management will play an increasingly important role in securing retirement income for the masses, as well as in channeling personal savings to productive investments. At the same time, the internal market for asset management is a project still very much under construction. While the commission's work has largely focused on supply-side considerations with a view to improving overall market integration and efficiency, this report tackles

some key demand-side issues. The authors take a longer-term approach to the critical challenges that will arise following release of the European Commission's White Paper in the fall of 2006.

### Pouring Old Wine Into New Skins?

Apart from MiFID, the Alternative Investment Fund Managers Directive (AIFMD) may be the most important European asset management regulation of the early twenty-first century. In this in-depth analytical and critical discussion of the content and system of the directive, thirty-eight contributing authors – academics, lawyers, consultants, fund supervisors, and fund industry experts – examine the AIFMD from every angle. They cover structure, regulatory history, scope, appointment and authorization of the manager, the requirements for depositaries and prime brokers, rules on delegation, reporting requirements, transitional provisions, and the objectives stipulated in the recitals and other official documents. The challenging implications and contexts they examine include the following: – connection with systemic risk and the financial crisis; - nexus with insurance for negligent conduct; - connection with corporate governance doctrine; - risk management; - transparency; - the cross-border dimension; - liability for lost assets; - impact on alternative investment strategies, and - the nexus with the European Regulation on Long-Term Investment Funds (ELTIFR). Nine country reports, representing most of Europe's financial centres and fund markets add a national perspective to the discussion of the European regulation. These chapters deal with the potential interactions among the AIFMD and the relevant laws and regulations of Austria, France, Germany, Italy, Luxembourg, Liechtenstein, The Netherlands, Malta and the United Kingdom. The second edition of the book continues to deliver not only the much-needed discussion of the inconsistencies and difficulties when applying the directive, but also provides guidance and potential solutions to the problems it raises. The second edition considers all new developments in the field of alternative investment funds, their managers, depositaries, and prime brokers, including, but not limited to, statements by the European Securities and Markets Authority (ESMA) and national competent authorities on the interpretation of the AIFMD, as well as new European regulation, in particular the PRIIPS Regulation, the ELTIF Regulation, the Regulation on European Venture Capital Funds (EuVeCaR), the Regulation on European Social Entrepreneurship Funds (EUSEFR), MiFID II, and UCITS V. The book will be warmly welcomed by investors and their counsel, fund managers, depositaries, asset managers, administrators, as well as regulators and academics in the field.

### The Alternative Investment Fund Managers Directive

Given the international nature of the asset management industry, lawyers representing investors, asset managers, and regulators are often confronted with asset management agreements governed by foreign law. This book provides the necessary points of law and practice in the leading jurisdictions allowing lawyers to identify the main pitfalls concerning the foreign law in question. This book is the only comparative analysis of the law of asset manager liability in the major European jurisdictions, the United States, and Canada, each written by specialists from the relevant jurisdiction. This is a much-needed guide on the disparate regulation of asset manager liability in these countries highlighting the absence of uniformity in this area of law despite the implementation of MiFID in Europe. The section on European law provides an overview of the regulation in this field regionally and provides the context in which the national chapters explore the regulation at country level. The comparative evaluation at the end of the book provides a thoughtful assessment of the impact of regulatory frameworks on asset managers private law duties and liabilities. The Introduction situates the country-by-country material within the broader context of questions about regulatory design and effectiveness.

### Liability of Asset Managers

The expansion of the fund industry has been one of the most notable trends in the financial markets of recent years. Not only has the demand for funds among EU investors grown, but both the number and types of investment funds also continue to increase. Since investment funds available in the EU can be established both inside and outside the EU, they may be subject to different investor protection regulations, depending on where the fund is located. Accordingly, different levels of investor protection may exist between investors investing in EU funds and investors investing in non-EU funds, including US funds. This book investigates whether there is a level playing field between EU investors investing in EU funds and EU investors investing in US funds and if not, if there is a legal basis in current EU law for the EU regulator to adopt additional investor protection rules applying to investment funds. The analysis considers the basic characteristics of investment funds, how they function in practice, and how they

are regulated relating to investor protection issues. Factors examined in depth include the following: – features of funds most relevant to the protection of retail investors; – operational structure, investment strategies, fee structure, and legal structure of funds; – internal control systems; – transparency and disclosure rules; – conduct of business rules; and – depositary monitoring rules. The author examines relevant EU directives and rules and the particular remit of each, as well as US law applying to investment funds that are active in the EU. Case law and relevant literature in the field is also drawn on. As an assessment of the current degree of protection applying to funds that are available to EU retail investors – as well as an up-to-date overview of regulatory requirements and procedures concerning the protection of EU investors in investment funds – this book is unsurpassed. Especially valuable is the closing discussion about whether the EU regulatory system provides for a level playing field of protection for EU retail investors, and if not which additional rules can be adopted by the EU regulator in this area. Lawyers and other professionals in all areas of law and policy concerned with investment and finance will find this book of great value.

### Investor Protection

In the wake of the recent global financial crisis regulators and supervisors became aware that the 'risk appetite' of hedge funds and private equity funds was to a significant extent shielded from public scrutiny, as it was only through banks' financing of these funds that public authorities could obtain a view on the role of these funds in the wider financial system. In order to disperse this lack of reliable and comprehensive data, measures were adopted both in the European Union - the Alternative Investment Management Funds Directive - and to a lesser extent in the United States to impose a risk-sensitive framework. Individual EU Member States and other countries followed suit. This book reprints reports delivered by representatives of fifteen countries at the Eighteenth International Congress of the International Academy of Comparative Law, held in Washington on the 29th of July 2010. The reports present a wealth of information on the different approaches and the specific rules that a variety of national legislators have adopted on the regulation of hedge funds and private equity funds. They greatly clarify the current understanding of such factors as the following: the nature of the systemic risk created by these funds; how activist investors challenge the incumbent management of well-established companies; effects of aggressive intervention in the business organization of a firm; how some funds achieve excess returns even during the crisis; ; advance information obtained through insider rings or other social networks; and safeguards that limit the investor's risk (e.g., allowing only "funds of funds"). With its comparative analysis of rules (and their degree of stringency) adopted by states on offering these products to the retail investor, this book is of great importance for legal practice in the areas of investor protection, financial services, and regulation of securities and banking. Although the present crisis has fundamentally challenged public authorities in every country, it is important to know what has been introduced or modified and which pre-existing measures have been retained as a result of new measures. The national reports reproduced in this book provide the clearest and fullest commentary available on this and other aspects of the 'new' global financial regulatory scheme.

### Collective Investments

Commentary on the provisions of Council Directive 85/611/EEC of 20 December 1985.

### Alternative Investment Fund Regulation

Collective Investment Schemes exist in several markets, both emerging and developed. In Uganda, the Capital Markets Authority (CMA) began licensing Collective Investment Schemes after Parliament passed the CIS Act in 2003. This piece of work aims at evaluating the effectiveness of the regulatory framework for Collective Investment Schemes in protecting investors in Uganda. The first chapter presents the risks that the investors participating in CIS may encounter. Chapter two contains the theoretical framework and literature review through an examination of relevant archival resources. The key findings contained in chapters three and four reveal that the laws and regulations governing CIS afford a reasonable degree of protection to investors but there still exist some legal and extra-legal challenges that hinder adequate protection. The Conclusion and Recommendations to address the legal and extra-legal factors inhibiting the efficiency of the law governing CIS are given in chapter five. Policy Makers, Regulators, Practitioners, Investors and Scholars in the Capital Markets will find this book a very useful resource.

### Toward an European Market for the Undertakings for Collective Investment in Transferable Securities

This book is to be placed in an unexploited niche in the fund industry literature: It has first to be distinguished from the main strand of the literature on mutual funds focusing on funds selection's methods and portfolio management strategies available to funds 'managers'. This book aims at providing the readers with a comprehensive overview of the Luxembourg fund industry together with a better understanding of the mechanisms governing the interactions between its different actors. The goal is to enable the readers to better apprehend the functioning of industry as a whole from both a legal and practical perspective and to operate more efficiently within the industry. As a consequence, the book must be distinguished from practitioner-oriented compilations of legal texts and references. The contribution of renowned experts of fund industry in Luxembourg permitted to summarize the operating in Luxembourg. Consequently, this book aspires to become a reference on the topic. Students in Finance, Law and Management considering a career in the fund industry will benefit from this book by gaining a better understanding of fund industry as a whole, which would improve their employability in this sector.

#### Collective Investment Schemes in Emerging Markets

The first detailed analysis of the legal and practical implications of the AIFMD at regional and national level.

#### A Review of Collective Investment Schemes in Overseas Jurisdictions

In 2007, the new Federal Act on Collective Investment Schemes (CISA) entered into force. Since then Switzerland's fund industry has become familiar with the new provisions. The Swiss Financial Market Supervisory Authority has authorized a few of the newly available legal forms of Swiss collective investment schemes, namely investment companies with variable capital (SICAV) and limited partnerships for collective investment schemes (L.P.). Yet, the demand for these new legal entities has been disappointing, and it remains to be seen whether this will change. The new systematic overview in English has been prepared by practitioners of the law firm Baker & McKenzie Zurich. It describes the rules governing Swiss collective investment schemes and foreign collective investment schemes distributed in Switzerland. The booklet is based on the German publication issued by the same authors in 2007.

#### Fund industry in Luxembourg

Enabling power: European Communities Act 1972, s. 2 (2) & European Union (Withdrawal) Act 2018, s. 8 (1), sch. 7, para. 21. Issued: 20.12.2018. Sifted: -. Made: -. Laid: -. Coming into force: In accord. with reg. 1 (2) (3). Territorial extent & classification: E/W/S/NL. EC note: Commission Regulation (EU) 2010/583; 2016/438 amended. For approval by resolution of each House of Parliament

#### Collective Investment Schemes

The Private Equity Review, edited by Stephen L Ritchie of Kirkland & Ellis LLP, reflects the fact the market continues to become more geographically diverse, meaning that private equity professionals need guidance from local practitioners about how to raise money and close deals in multiple jurisdictions. With this need in mind, this book contains contributions from leading private equity practitioners in 29 different countries, with observations and advice on private equity deal-making, investing and fundraising in their respective jurisdictions. Contributors include: Iain McMurdo, Maples and Calder; Christian Hoedl, Uria Menendez.

#### Collective Investment Schemes Regulations in Switzerland

The ASEAN+3 Bond Market Guide series provides country-specific information on the investment climate, rules, laws, opportunities, and characteristics of local bond markets in Asia and the Pacific. It aims to help bond market issuers, investors, and financial intermediaries understand the local context and encourage greater participation in the region's rapidly developing bond markets. This edition focuses on the Inter-Bank Bond Market in the People's Republic of China, which is one of the country's most important bond markets and one of only two that are accessible to foreign investment.

## Alternative Investment Funds in Europe

With fifty trillion in worldwide assets, the growth of mutual funds is a truly global phenomenon and deserves a broad international analysis. Local political economies and legal regimes create different regulatory preferences for the oversight of these funds, and academics, public officials, and legal practitioners wishing to understand the global investing environment will require a keen awareness of these international differences. The contributors, leading scholars in the field of investment law from around the world, provide a current legal analysis of funds from a variety of perspectives and using an array of methodologies that consider the large fundamental questions governing the role and regulation of investment funds. This volume also explores the identity and behavior of investors as well as issues surrounding less orthodox funds, such as money market funds, ETFs, and private funds. This Handbook will provide legal and financial scholars, academics, lawyers and regulators with a vital tool for working with mutual funds.

## Swiss Collective Investment Schemes (CISA)

The paper's analysis underscores the importance of the ongoing Financial Stability Board-led process of identifying policy options, involving national authorities and the International Organization of Securities Commissions and other standard setters. In this context, the global nature of the investment fund business and fungibility of financial flows makes it vital to ensure consistency of global policy choices that can secure financial stability by precluding regulatory arbitrage.

## The Collective Investment Schemes (Amendment Etc. ) (EU Exit) Regulations 2019

This action plan, created in response to a request by the G20, identifies a set of domestic and international actions to address the problems of base erosion and profit sharing.

## Federal Act on collective investment schemes (Collective Investment Schemes Act, CISA) with ordinances

Private investment funds are currently investing more capital than ever and the funds themselves are larger than ever. This practical guide features contributions by leading industry specialists on a wide range of issues arising at all stages of a private investment fund's life cycle.

## Private Equity Review

This paper reviews the coordinated portfolio investment survey (CPIS) guide. The objectives of CPIS are to collect comprehensive information, with geographical detail on the country of residence of the issuer, on the stock of cross-border equities, long-term bonds and notes, and short-term debt instruments for use in the compilation or improvement of international investment position statistics on portfolio investment capital. This paper discusses the scope and modalities of the CPIS. It also presents key findings of the 1997 CPIS and 2001 CPIS.

## The Inter-Bank Bond Market in the People's Republic of China

International Funds will provide readers with: \*A greater understanding of the benefits and limitations of funds to both retail and institutional investors \*An easy-to-read, yet technically comprehensive, insight into fund structures \*An overview of the variety of legal structures, regulatory categories and investment profiles available \*A detailed understanding of the practical aspects of fund valuation and administration, and the role of the various practitioners \*A view of the future of the international funds industry in the light of changing markets, regulation and investor appetite An easy-to-read, yet technically comprehensive, insight into fund structures Provides an overview of the variety of legal structures, regulatory categories and investment profiles available Presents a view of the future of the international funds industry in the light of changing markets, regulation and investor appetite'

## Research Handbook on the Regulation of Mutual Funds

Luxembourg hosts a large international financial center that plays a pivotal role in its economy and in European financial markets. The crisis exposed significant vulnerabilities in Luxembourg's financial system, owing to large cross-border exposures to foreign parent banks. The authorities proceeded with large public support to systemically important financial institutions under stress and with a fivefold increase in the deposit guarantee. Strengthening home-host supervisory collaboration and

cross-border bank resolution frameworks will be of crucial importance for Luxembourg. Financial stability assessment and stress tests are also carried out.

### The Asset Management Review

This report provides a picture of where we stand and what we have learned so far about maternity and paternity rights across the world. It offers a rich international comparative analysis of law and practice relating to maternity protection at work in 185 countries and territories, comprising leave, cash benefits, employment protection and non-discrimination, health protection, breastfeeding arrangements at work and childcare. Expanding on previous editions, it is based on an extensive set of new legal and statistical indicators, including coverage in law and in practice of paid maternity leave as well as statutory provision of paternity and parental leave and their evolution over the last 20 years. The report also takes account of the recent economic crisis and austerity measures. It shows how well national laws and practice conform to the ILO Maternity Protection Convention, 2000 (No. 183), its accompanying Recommendation (No. 191) and the Workers with Family Responsibilities Convention, 1981 (No. 156), and offers guidance on policy design and implementation. This report shows that a majority of countries have established legislation to protect and support maternity and paternity at work, even if those provisions do not always meet the ILO standards. One of the persistent challenges is the effective implementation of legislation, to ensure that all workers are able to benefit from these essential labour rights.

### Investment Funds and Financial Stability: Policy Considerations

This report reflects long-term, in-depth discussion and debate by participants in the Latin American Roundtable on Corporate Governance.

### Action Plan on Base Erosion and Profit Shifting

"In recent years, the concept of fair and equitable treatment has assumed prominence in investment relations between States. While the earliest proposals that made reference to this standard of treatment for investment are contained in various multilateral efforts in the period immediately following World War II, the bulk of the State practice incorporating the standard is to be found in bilateral investment treaties which have become a central feature in international investment relations. In essence, the fair and equitable standard provides a yardstick by which relations between foreign direct investors and Governments of capital-importing countries may be assessed. It also acts as a signal from capital-importing countries, for it indicates, at the very least, a State's willingness to accommodate foreign capital on terms that take into account the interests of the investor in fairness and equity."--Provided by publisher.

### Global Investment Funds

This paper evaluates the stability of the financial system of Luxembourg. Financial soundness indicators for Luxembourg's financial system, which plays a key role in the intermediation of financial capital, have remained relatively robust in recent years. Following rising asset prices and inflows, the investment fund industry has enjoyed strong growth in assets under management, while exposure to liquid assets has remained steady. An assessment of the financial system's ability to withstand severe but plausible shocks suggests a good deal of resilience, albeit with some risks. Insurance stress test results indicate that strong initial levels of capital and low guaranteed product exposure offer insulation against market shocks.

### Coordinated Portfolio Investment Survey Guide (second edition)

Is an addiction ruining your life? Have you tried and failed to defeat your addiction and don't know what to do? Do you need actionable advice to get to the root of your addiction and be happier? Being addicted to anything can mean a lifetime of misery. Identifying your addiction and taking steps to change what you are doing is the first step towards a better life and The Addiction Recovery Workbook is the resource that will help you make that change. Get a copy and see how it could improve your life!

#### International Funds

A must-have book about investments ! UCITS funds today represent a major share of European funds. The European directives started with UCITS I in the mid 1980s, and have been amended up to UCITS IV in 2009, to be followed soon by a UCITS V package. In its first part, this book is summarizing the evolution and features of these successive sets of European regulations. Among others, it covers the UCITS eligible assets, the key parties involved in UCITS funds operations, their reporting and information requirements, taxation and many other useful related subjects, to give a short but useful understanding of the UCITS world. Beside the UCITS IV directive is entering into the risk management field, which is materialized by the issue of a key document entitled Risk Measurement and the Calculation of Global Exposure and Counterparty Risk for UCITS (the famous ref. 10-788 Guidelines of the Committee of the European Securities Regulators "CESR"). The Guidelines require some technical skills: the second part of this book reproduces the CESR's Guidelines, punctuated with comments and prerequisites of quantitative finance, to help for a better understanding of the content and significance of this UCITS IV objective. This book will give you the best keys to invest, avoiding many financial risks.

#### Luxembourg

The financial services sector plays a dominant role in the economy of Guernsey. The report is organized in two volumes. Volume I provides the findings and the Reports on the Observance of Standards and Codes (ROSCs). Volume II provides the detailed assessments of the Basel Core Principles for Effective Banking Supervision, the insurance core principles, the objectives and principles of securities regulation, and the financial action task force recommendations, as well as a review against the Offshore Group of Banking Supervisors (OGBS) statement of best practice for trust and company service providers.

#### Maternity and Paternity at Work

The experience of many countries around the world clearly shows that while financial sector development can spur economic growth, financial fragility and instability can seriously harm growth. Following the financial crises of the late 1990s, there has been increasing interest in the systematic assessment of the strengths and weaknesses of financial systems, with the ultimate goal of formulating appropriate policies to foster financial stability, and stimulate financial sector development. Consequently, there has been an increased demand from financial sector authorities in many countries, as well as from the Bank and International Monetary Fund (IMF) staff for information on key issues, and sound practices in the assessment of financial systems, and in the design of policy responses. This Handbook of Financial Sector Assessment is a response to this demand. The Handbook presents an overall analytical framework for assessing financial system stability and developmental needs, providing broad guidance on approaches, methodologies, and techniques of assessing financial systems. Although the Handbook draws substantially on Bank and IMF experience with the financial sector assessment programs (FSAPs), and from the broader policy and operational work in both institutions, it is designed for generic use in financial sector assessments, whether conducted by country authorities themselves, or by Bank and IMF teams. It is, therefore, hoped the Handbook will serve as an authoritative source on the objectives, analytical framework, and methodologies of financial sector assessments, as well as a comprehensive reference book for training on the techniques of such assessments.
