Have you ever wondered how our bodies work inside?

Immune, Lymphatic, Renal (or Urinary)

Endocrine and Integumentary!

I'm your Skeleton! My bones support you.

Protect your organs from things that could hurt you!

I'm your Muscles and I help you move!

Circulatory here, with blood vessels and heart.

I'm a system that may seem a little nervous...

We're Digestive and Excretory! Welcome to the intestine loop

We're the Reproductive Systems, and here's what we're doin

Take a breath! Respiratory System's on your side.

Airways bring in oxygen and let go of carbon dioxide!

I'm your Immune System, and I fight off disease!

I protect you better when you wash your hands, so wash your hands...

I'm Lymphatic, I drain and kill toxins, and help with immunity...

I'm the Renal! I clean your blood, and make pee.

Oh, come on... everybody pees!

I'm the Endocrine! My glands send hormones in.

Integumentary means nails, hair and skin, from your head to your toe!

Keeping you going takes cooperation!

In Battle for Peace frankly documents Du Bois's experiences following his attempts to mobilize Americans against the emerging conflict between the United States and the Soviet Union. A victim of McCarthyism, Du Bois endured a humiliating trial-he was later acquitted-and faced political persecution for over a decade. Part autobiography and part political statement, In Battle for Peace remains today a powerful analysis of race in America.

It was early 1993 and id Software was at the top of the PC gaming industry. Wolfenstein 3D had established the First Person Shooter genre and sales of its sequel Spear of Destiny were skyrocketing. The technology and tools id had taken years to develop were no match for their many competitors. It would have been easy for id to coast on their success, but instead they made the audacious decision to throw away everything they had built and start from scratch. Game Engine Black Book: Doom is the story of how they did it. This is a book about history and engineering. Don't expect much prose (the author's English has improved since the first book but is still broken). Instead you will find inside extensive descriptions and drawings to better understand all the challenges id Software had to overcome. From the hardware -- the Intel 486 CPU, the Motorola 68040 CPU, and the NeXT workstations -- to the game engine's revolutionary design, open up to learn how DOOM changed the gaming industry and became a legend among video games.

In Battle for Peace: The Story of My 83rd Birthday

Taryn Clark thought she'd outgrown the need to find her birth mother. She thought that a successful career and a comfortable life in the city were enough to be happy. Did she really need to know about the woman who had given her away? Adopted at birth, her first few years were happy. It hadn't mattered that she didn't know her heritage; she had parents who loved her and wanted her. But divorce, and then death, ripped their tiny family apart, and at the tender age of six, she entered the foster care system. Over the next dozen years, she shuffled from home to home. Finding her roots seemed an impossible dream. But dreams are resilient. An unexpected discovery awakens old yearnings of belonging to a family, of being part of something bigger than herself. Finding the brief, ambiguous note from her birth mother is enough to unfurl the ribbons of hope still binding her heart. Her quest takes her to Lancaster County, Pennsylvania and the heart of the Plain community. Aided by her unique eye color, a healthy dose of luck, and the private investigator she hires, Taryn finds her birth family easily enough, but finding the truth is another matter. In all her musings, she never imagined a scenario where her mother might be Amish. She never imagined that the fabric of her life might be a patchwork of faith and fear, stitched together with a dark family secret. Taryn is determined to trace her roots, even if it means digging in the mud to do so. Now she's caught in the quicksand of a shocking discovery and the consequences of choices made, almost forty years ago. She'll risk everything to uncover the truth and to claim the family--and the roots--she so desperately craves.

5ä:03Cart starts to chatter or shudder issue - Carryall: as you showed me, I checked the batts all 6 show 8.2, ok, after charge I slowly ease into the gas(power) and it just barely starts to tug. Move forward. And as I push on the pedal it starts to chatter or shudder (trying to move) and every now and then when I do this it will catch and take off. New solenoid and of course clicks before trying to move. Please point this disabled vet in the right direction, it's the only way I can get around my yard.

5ä:04Cart rear brake light issue - I have a 2014 RXV with a Madjax light kit. The right rear brake light stays on all the time. Any idea what might be causing the issue?

5ä:07Cart A-arm bushings issue - When should A-arm bushings be replaced?

5ä:08Cart power loss issue - My 2007 club car precedent 48V sometimes just loses power and locks up the drive wheels jarring the cart, then most of the time continues on. Sometimes it will not restart and I have to do several things to try to get it going again. I go from run to tow and back, I stomp on the accelerator, and sometimes that is what it takes other times I just let it sit for a while and it comes back.
