The Well-Travelled Musician

John Sigismond Cousser, as performer and composer, was a pioneering figure in the musical history of the European Baroque era.

Music, Dance and Franco-Italian Cultural Exchange, C.1700

This study stems from discoveries in a trove of documents belonging to Charles-Henri de Lorraine, prince de Vaudâemont, who served as governor of Milan under the Spanish crown from 1698 to 1706. These documents, together with a mass of other sources - letters, diaries, treatises, libretti, scores - offer a vivid new picture of musical life in Paris and Milan as well as exchanges between France and Italy. The book is both a patronage study and an examination of the contributions by - and the difficulties facing - musicians and dancers who worked across national and cultural boundaries. Music, Dance, and Franco-Italian Cultural Exchange, c.1700 follows the careers of the prince and the French violinist and composer Michel Pignolet de Montâeclair. In the context of a renewed fascination with Italian music in the 1690s, Montâeclair made a name for himself in Paris as a pedagogue and composer who understood both national styles and blended them in a way that was successful on French terms. Vaudâemont hired Montâeclair to direct a French violin band and to compose dance music for a series of new operas that observers declared "the best in Italy" but are virtually unknown today. These productions involved collaborations among a mixed company of French and Italian musicians, dancers, composers, and librettists modeled on the practice of Turinese court operas. The book is an account of the contributions of these figures to the cultural life of Paris, Milan, and other northern Italian states, and to the creative mixing of musical styles, operatic conventions, and dance technique in France and Italy through the 1720s and beyond.

Serenatas for Dublin

Johann Sigismund Kusser (or, as he was known in England and Ireland, John Sigismond Cousser), was a Hungarian-born musician who, after a varied and successful career in the German-speaking lands of the Holy Roman Empire, settled in Ireland in July 1707. In Dublin Kusser composed and directed the performances of at least twenty-one festive serenatas that marked important state occasions in Dublin between 1709 and his death in late 1727. Presented before the elite of local society in semistaged productions featuring costumes, stage machinery, and dancing, these works functioned as something of an operatic substitute in the city's cultural life. The contents of the present volume comprise the three serenatas for which music remains extant. Two of these can be proven definitively to be of Kusser's own composition, and the third, due to its musical style, overall structure, and subject matter, is almost certainly his creation as well. These works provide remarkably rare musical evidence of a key component of the artistic offerings of Dublin's viceregal court during the early decades of the eighteenth century.

J.S. Bach in Australia: Studies in Reception and Performance

This book is the first to be dedicated to a study of the reception of a major European composer in Australia. Each of the eleven essays explores how J.S. Bach's music has enriched Australian cultural life, from private performances in the early nineteenth century to historically informed realisations in recent years. The authors outline the challenges of mounting and sustaining this repertoire in the face of underdeveloped musical infrastructure and limited resources, and how these challenges have been overcome with determination and insight. Championed by imaginative individuals such as Ernest Wood and Leonard Fullard in Melbourne, E.H. Davies in Adelaide and W. Arundel Orchard in Sydney, Bach's music has been a vehicle for the realisation of Australians' cultural aspirations and a means of maintaining connections with traditions that continue to be cherished today.

Exhibitions, Music and the British Empire

"International exhibitions were among the most significant cultural phenomena of the late nineteenth century. These vast events aimed to illustrate, through displays of physical objects, the full spectrum of the world's achievements, from industry and manufacturing, to art and design. But exhibitions were not just visual spaces. Music was ever present, as a fundamental part of these events' sonic landscape, and integral to the visitor experience. This book explores music at international exhibitions held in Australia, India, and the United Kingdom during the 1880s. At these exhibitions, music was codified, ordered, and all-round 'exhibited' in manifold ways. Displays of physical instruments from the past and present were accompanied by performances intended to educate or to entertain, while music was heard at exhibitors' stands, in concert halls, and in the pleasure gardens that surrounded the exhibition buildings. Music was depicted as a symbol of human artistic achievement, or employed for commercial ends. At times it was presented in nationalist terms, at others as a marker of universalism. This book argues, by interrogating the multiple ways that music was used, experienced, and represented, that exhibitions can demonstrate in microcosm many of the broader musical traditions, purposes, arguments, and anxieties of the day. Its nine chapters focus on sociocultural themes, covering issues of race, class, public education, economics, and entertainment in the context of music, tracing these through the networks of communication that existed within the British Empire at the time. Combining approaches from reception studies and historical musicology, this book demonstrates how the representation of music at exhibitions drew the press and public into broader debates about music's role in society"--Page 4 of cover.

The Life and Music of Elizabeth Maconchy

The first full-length biographical study of Elizabeth Maconchy (1907-1994). The British-born Irish composer (Dame) Elizabeth Maconchy (1907-1994) is best known today for her cycle of thirteen string quartets, composed over five decades. And yet, her oeuvre ranges from large scale choral works, to ballets, operas, and symphonic scores. Having studied with Charles Wood and Ralph Vaughan Williams at the Royal College of Music, many of her compositions also garnered accolades from peers and established musical figures such as Gustav Holst, Donald Francis Tovey, and Henry Wood, among others. With access to a wealth of documentation previously unavailable, this book explores Maconchy's life and music within a greater consideration of the social and political context of the world in which she lived. While the influence of Bartók has been well documented, this book reveals the equally potent influence of Vaughan Williams on Maconchy's musical idiom. This book also discusses Maconchy's foray into administration and her advocacy of young composers through her work as the first woman to

be elected Chairman of the Composers' Guild of Great Britain in 1959 and President of the Society for the Promotion of New Music following the death of Benjamin Britten in 1976. It will be required reading for those interested in the lives of women composers, twentieth-century British music, and musical modernism.

Music in Edwardian London

Traversing London's musical culture, this book boldly illuminates the emergence of Edwardian London as a beacon of musical innovation. The dawning of a new century saw London emerge as a hub in a fast-developing global music industry, mirroring Britain's pivotal position between the continent, the Americas and the British Empire. It was a period of expansion, experiment and entrepreneurial energy. Rather than conservative and inward-looking, London was invigorated by new ideas, from pioneering musical comedy and revue to the modernist departures of Debussy and Stravinsky. Meanwhile, Elgar, Holst, Vaughan Williams, and a host of ambitious younger composers sought to reposition British music in a rapidly evolving soundscape. Music was central to society at every level. Just as opulent theatres proliferated in the West End, concert life was revitalised by new symphony orchestras, by the Queen's Hall promenade concerts, and by Sunday concerts at the vast Albert Hall. Through innumerable band and gramophone concerts in the parks, music from Wagner to Irving Berlin became available as never before. The book envisions a burgeoning urban culture through a series of snapshots - daily musical life in all its messy diversity. While tackling themes of cosmopolitanism and nationalism, high and low brows, centres and peripheries, it evokes contemporary voices and characterful individuals to illuminate the period. Challenging issues include the barriers faced by women and people of colour, and attitudes inhibiting the new generation of British composers - not to mention embedded imperialist ideologies reflecting London's precarious position at the centre of Empire. Engagingly written, Simon McVeigh's groundbreaking book reveals the exhilarating transformation of music in Edwardian London, which laid the foundations for the century to come.

Musical Travels Through England

Historical Dictionary of Baroque Music, Second Edition contains a chronology, an introduction, and an extensive bibliography. The dictionary section has more than 500 cross-referenced entries on composers, instruments, cities, and technical terms.

Historical Dictionary of Baroque Music

Explores the political meanings that Italian opera - its composers, agents and institutions - had for audiences in eighteenth-century Britain.

Opera and Politics in Queen Anne's Britain, 1705-1714

In eighteenth-century England, "variety" became a prized aesthetic in musical culture. Not only was variety—of counterpoint, harmony, melody, and orchestration—expected for good composition, but it also manifested in cultural mediums such as songbook anthologies, which compiled miscellaneous songs and styles in single volumes; pasticcio operas, which were cobbled together from excerpts from other operas; and public concerts, which offered a hodgepodge assortment of different types and styles of performance. I call this trend of producing music through the collection, assemblage, and juxtaposition of various smaller pieces as musical miscellany; like a jigsaw puzzle (also invented in the eighteenth century), the urge to construct a whole out of smaller, different parts reflected a growing desire to appeal to a quickly diversifying England. This book explores the phenomenon of musical miscellany in early eighteenth-century England both in performance culture and as an aesthetic. Chapters offer analyses of concert programming, early music criticism, the compilation of pasticcio operas and songbook miscellanies, and even the ways in which composers and performers shaped their freelancing careers. Musical miscellany, in its many forms, juxtaposed foreign and homegrown musical practices and styles in order to stimulate discourse surrounding English musical culture during a time of cosmopolitan transformation as the eighteenth century unfolded.

The Power of Pastiche

Examines the life and work of Scottish cellist and antiquarian John Gunn (1766-1824) through newly discovered sources. The Scottish cellist and antiquarian John Gunn (1766-1824) is unique among British writers on music in the late eighteenth and early nineteenth century. Learned and practical,

at home in classical and modern languages, knowledgeable in a wide range of musical topics and with even wider-ranging interests, and committed to the ideal of progress through rational thought, he typified the Enlightenment. His published output was large and diverse: a cello treatise in two quite different editions; two books on the flute and one on the piano; a treatise on figured bass; a history of the harp in the Highlands; and a translation of a French work of music theory. The list of his unrealised publications is even longer, including a proof of the oriental origins of the Scots. He married Anne Young, a well-known Edinburgh piano teacher, and his letters cast new light on the circumstances and date of her death. Taking account of Gunn's diverse experiences as a musician-scholar in Cambridge, London and Edinburgh, studying his sundry occupations, and exploring his social connections through a recently unearthed cache of his letters, this study moves away from 'treatise archaeology' and offers a broader view than is usually possible with such figures. The book will be of interest to those studying historical performance practice, music education in Enlightenment Britain, and the dissemination of Enlightenment thought.

John Gunn

How was large-scale music directed or conducted in Britain before baton conducting took hold in the 1830s?

Before the Baton

This book provides a critical academic evaluation of the 'music city' as a form of urban cultural policy that has been keenly adopted in policy circles across the globe, but which as yet has only been subject to limited empirical and conceptual interrogation. With a particular focus on heritage, planning, tourism and regulatory measures, this book explores how local geographical, social and economic contexts and particularities shape the nature of music city policies (or lack thereof) in particular cities. The book broadens academic interrogation of music cities to include cities as diverse as San Francisco, Liverpool, Chennai, Havana, San Juan, Birmingham and Southampton. Contributors include both academic and professional practitioners and, consequently, this book represents one of the most diverse attempts yet to critically engage with music cities as a global cultural policy concept.

Music Cities

The Symphonic Poem in Britain 1850-1950 aims to raise the status of the genre generally and in Britain specifically. The volume reaffirms British composers' confidence in dealing with literary texts and takes advantage of the contributors' interdisciplinary expertise by situating discussions of the tone poem in Britain in a variety of historical, analytical and cultural contexts. This book highlights some of the continental models that influenced British composers, and identifies a range of issues related to perceptions of the genre. Richard Strauss became an important figure in Britain during this time, not only in terms of the clear impact of his tone poems, but the debates over their value and even their ethics. A focus on French orchestral music in Britain represents a welcome addition to scholarly debate, and links to issues in several other chapters. The historical development of the genre, the impact of compositional models, issues highlighted in critical reception as well as programming strategies all contribute to a richer understanding of the symphonic poem in Britain. Works by British composers discussed in more detail include William Wallace's *Villon* (1909), Gustav Holst's *Beni Mora* (1909-10),

Hubert Parry's *From Death to Life* (1914), John Ireland's *Mai-Dun* (1921), and Frank Bridge's orchestral 'poems' (1903-15).

The Symphonic Poem in Britain, 1850-1950

Inge van Rij's book demonstrates how Berlioz used the sights and sounds of the orchestra to explore other worlds.

Graphic Showbiz

Germany is considered a lauded land of music: outstanding composers, celebrated performers and famous orchestras exert great international appeal. Since the 19th century, the foundation of this reputation has been the broad mass of musicians who sat in orchestra pits, played in ensembles for dances or provided the musical background in silent movie theatres. Martin Rempe traces their lives and working worlds, including their struggle for economic improvement and societal recognition. His detailed portrait of the profession 'from below' sheds new light on German musical life in the modern era.

The Other Worlds of Hector Berlioz

Gideon Makepeace, a young man of twenty, knows who he is and what he likes: decency, men and women too, horse training, and fun... and in Livingston, Montana, in the lush autumn of 1895, he finds he likes a Lakota Sioux Indian better than he might ought to. Jedediah Buffalo Bird is seriously wounded and seeking medical care, and Gideon helps Jed when some bigoted townsfolk might have done otherwise. Jed, who knows the wild far better than Gideon and feels indebted to him, agrees to repay him by being his guide to San Francisco. Their trip takes them across thousands of wild miles, through the mountains men mine and the Indian reservations dotting the plains. Facing a majestic West, they learn from each other about white folks and Indians alike. Gideon's interest in Jed is clear from the start, but will Jed give up the life he knows for a young, brash white man he has perhaps come to love? Or will he push Gideon away in favor of the peace of nature and the personal freedom of having nothing to lose?

Art, Play, Labour: the Music Profession in Germany (1850–1960)

Tracing the origins, influences and development of falsetto singing in Western music, Simon Ravens offers a revisionist history of high male singing from the Ancient Greeks to Michael Jackson. This history embraces not just singers of counter-tenor and alto parts up to and including our own time but the castrati of the Ancient world, the male sopranists of late Medieval and Renaissance Europe, and the dual-register tenors of the Baroque and Classical periods. Musical aesthetics aside, to understand the changing ways men have sung high, it is also vital to address extra-musical factors--which are themselves in a state of flux. To this end, Ravens illuminates his chronological survey by exploring topics as diverse as human physiology, the stereotyping of national characters, gender identity, and the changing of boys' voices. The result is a complex and fascinating history sure to appeal not only to music scholars but to performers and all those with an interest particularly in early music [Publisher description].

From backpack to bicycle and now on a motorcycle, but still on a budget, the author, a compulsive traveller, embarks on a journey East from England with Mongolian intentions. In possession of a good sense of direction, a vague sense of balance and no sense of proportion; this particular trip is financed by modest winnings from an uncharacteristic appearance on a TV game show. Riding a bargain eBay purchase Kawasaki KLR 650 and travelling solo into places beyond the guide book. A daily diary of achievements and mistakes incurred in a transient lifestyle, with mixed emotions from overawed to just plain bored, and making the best of decisions made while trying not to reflect on the alternatives. This is a refreshingly honest, thought provoking, humorous and informative account based on a lifetime of first hand encounters, anecdotes, wisdom and occasional alcohol induced inspiration. Offering an unavoidable wealth of experience which takes the reader with him, as the journey twists and turns on the road which the author hopes will lead him to greener grass.

The Supernatural Voice

There is an undeniable fascination in reading the words that composers write. Whenever a composer puts finger to typewriter rather than pencil to manuscript paper, we inevitably hope that he might proffer us some insights into the workings of the creative musical mind ? that source of much mystery since the act of composition left the realm of low artisanship for that of High Art some two or three centuries ago. Composers who deal with words as naturally as they write notes are, however, a breed of exceeding rarity. Ronald Stevenson belongs amongst them and the proof of it is to be found amply in this book.

The economic geography of music is evolving as new digital technologies, organizational forms, market dynamics and consumer behavior continue to restructure the industry. This book is an international collection of case studies examining the spatial dynamics of today's music industry. Drawing on research from a diverse range of cities such as Santiago, Toronto, Paris, New York, Amsterdam, London, and Berlin, this volume helps readers understand how the production and consumption of music is changing at multiple scales – from global firms to local entrepreneurs; and, in multiple settings – from established clusters to burgeoning scenes. The volume is divided into interrelated sections and offers an engaging and immersive look at today's central players, processes, and spaces of music production and consumption. Academic students and researchers across the social sciences, including human geography, sociology, economics, and cultural studies, will find this volume helpful in answering questions about how and where music is financed, produced, marketed, distributed, curated and consumed in the digital age.

This monograph investigates the promotion and consumption of high musical culture among leisured society in Victorian London, by focusing on the activities of the concert manager John Ella and his Musical Union. This monograph investigates the promotion and consumption of high musical culture among leisured society in Victorian London, by focusing on the activities of the concert manager John Ella and his Musical Union [1845-81], an eminent, long-lived institution for chamber music, much fêted across Europe in its day. It combines a biography of Ella with a social-economic history of the Musical Union, its players, repertoire and audiences, and sets them against the gradually shifting contexts for London concerts, chamber music and cultural life. Ella's extraordinary life story, which began in provincial, artisan-class obscurity and ended in the upper echelons of London society, shapes thenarrative. Such themes as entrepreneurship, concert management, taste shaping, music appreciation and elite social networks are discussed throughout, as is the curious interplay between the desire to 'sacralize' chamber music, especially Beethoven's, on the one hand, and the need to survive amid the increasing commercial imperatives of London concert life on the other. CHRISTINA BASHFORD is Assistant Professor of Musicology at the University of Illinois at Urbana-Champaign.

With 12 genres and influences, cities, and scenes, Music + Travel Worldwide guides music fans across an insightful, international stage of sounds to help plan where to go and what not to miss. Curated by experts in the industry, the book travels to Russia to experience the country's long and inglorious outlaw culture's sounds of chanson; heads to Buenos Aires to witness the development of cumbia, from the lavish '90s to its latest digital incarnation; goes "underground" to check out Beijing's ever-evolving, highly influential experimental music scene; and gets into Berlin's private clubs that are playing the offspring of techno. Loaded with sidebars and useful trivia about musicians, discography of artists' albums and 100 festival locations, a timeline of historical events for each of the 12 genres, and detailed maps of venue locations, this book is perfect for the travel lover or the musically obsessed.

The Production and Consumption of Music in the Digital Age

During the second half of the twentieth century, musical life in Canada flourished as never before, due in large measure to a generation of European émigrés who worked to establish a uniquely Canadian culture of classical music, teaching, playing, and composing "in the key of Canada." Based on years of detailed and extensive interviews with some seventy people, and supplemented by a wide range of archival material, *Growing with Canada* reveals how these men and women came to Canada And The roles they played in developing musical culture here, weaving the larger story of post-war Canadian music performance, production, and education around their testimony. Paul Helmer shows that émigrés were at the centre of the developing musical milieu, particularly in Toronto and Montreal. They were

able to overcome the dominating British presence in post-secondary music education and vastly expanded the role music played in universities. They also pioneered the performance and production of opera in Canada. From British Columbia to Newfoundland, they served as educators, teachers, and administrators as well as outstanding performers, conductors, composers, music historians, radio and television producers, and benefactors. Growing with Canada provides a personal and lively perspective on one of the most significant eras of musical development in Canadian history. Canadian musicians and audiences continue to benefit from the impressive achievements of the individuals chronicled in this book.

The north-east of England in the eighteenth century was a region where many different kinds of musical activity thrived and where a wide range of documentation survives. Such activities included concert-giving, teaching, tuning and composition, as well as music in the theatre and in church. Dr Roz Southey examines the impulses behind such activities and the meanings that local people found inherent in them. It is evident that music could be perceived or utilized for extremely diverse purposes; as entertainment, as a learned art, as an aid to piety, as a profession, a social facilitator and a support to patriotism and nationalism. Musical societies were established throughout the century, and Southey illustrates the social make-up of the members, as well as the role of Gentlemen Amateurs in the organizing of concerts, and the connections with London and other centres. The book draws upon a rich selection of source material, including local newspapers, council and ecclesiastical records, private papers and diaries and accounts of local tradesman, as well as surviving examples of music composed in the area by Charles Avison, Thomas Ebdon and John Garth of Durham, amongst many others. Charles Avison's importance is focused upon particularly, and his Essay on Musical Expression is considered alongside other contemporary writings of lesser fame. Southey provides a fascinating insight into the type and social class of audiences and their influence on the repertoire performed. The book moves from a consideration of music being used as a 'fashion item', evidenced by the patronage of 'big name' soloists from London and abroad, to fiddlers, ballad singers, music at weddings, funerals, public celebrations, and music for marking the events of the American War of Independence and the French Revolutionary Wars. It can be seen, therefore, that the north east was an area of important musical activity, and that the music was always interwoven into the political, economic, religious and commercial fabric of eighteenth-century life.

Growing with Canada

The British seaside town Brighton, located in the south of England, was in 1979 targeted by a series of robberies mainly aimed against tourists. The crimes were committed by a group of young lads from the area. As the gang performs their heist one night, everything goes wrong. The city's main attraction, the Ferris wheel shut down, due a power outage, which is so extensive that the entire pier and the small amusement park where the Ferris wheel is, are in complete darkness. The situation has dire consequences and cost several of the guests at the pier their lives. After a few days of searching, the old police chief Vince and his people get on the trail of the gang. After they discover they're being chased, the flee to London leaving their old town, family and friends for good. In London, they meet a group of young street musicians with whom they team up to make new, grandiose plans, but the story again takes a very unexpected turn. The second part of the book sees a young professional agent named Tom, being the centre of a scandal involving art and jewellery stolen by the German elite. The Danish agent and his team, finds themselves immersed in something that's deeper than what's just

seen on the surface. A tale of international fraud, scandalous conduct as well as assassinations unfolds. "The Attack on the Ferris Wheel" is a historical thriller at a breakneck pace, which offers ingenious clues to unsolved mysteries from the real world.

Architectural facades now have the potential to be literally kinetic, through automated sunscreens and a range of animated surfaces. This book explores the aesthetic potential of these new types of moving facades. Critique of theory and practice in architecture is combined here with ideas from kinetic art of the 1960's. From this background the basic principles of kinetics are defined and are used to generate experimental computer animations. By classifying the animations, a theory of kinetic form called 'state change' is developed. This design research provides a unique and timely resource for those interested in the capacity of kinetics to enliven the public face of architecture. Extra material including animations can be seen at www.kineticarch.net/statechange

"Martin Taylor: Autobiography of a Travelling Musician is the tale of one of the best in the business, a warm, funny, compassionate and human account of Taylor's life and career. Packed with anecdotes featuring internationally famous figures, it provides an insight into the life not only of a fascinating musician but also into the world that elevated him to his current status of international guitar statesman." --

Designing Kinetics for Architectural Facades

This book considers the activities and writings of early song collectors and proto-ethnomusicologists, memoirists, and other "musical travelers" in 19th-century France. Each of the book's discrete but interrelated chapters is devoted to a different geographic and discursive site of empire, examining French representations of musical encounters in North America, the Middle East, as well as in contested areas within the borders of metropolitan France. Rosenberg highlights intersections between an emergent ethnographie musicale in France and narratives of musical encounter found in French travel literature, connecting both phenomena to France's imperial aspirations and nationalist anxieties in the period from the Revolution to the late-nineteenth century. It is therefore an excellent research tool for scholars in the fields of ethnomusicology, musicology, cultural studies, literary history, and postcolonial studies.

Not illustrated. 1877 edition. Excerpt: ... CHAPTER XXV. FAEWEWELL NIGHT. On my return from Niagara I gave the promised concert. The immense placards with which the walls were covered announced to all that I was to appear for the last time. I had never before seen my name under this aspect; the letters were as tall as I am and four times as broad. The American public showed a due appreciation of these splendid bills. Gilmore's

Garden was filled with the elite of New York society. The moment I appeared I was hailed with cheers, hurrahs, and enthusiastic applause. And they say Americans are a cold-blooded people! I will spare you the particulars of that night, for aside of the fact that I have sworn to speak as little as possible of myself, I must confess that I was so overcome by this unexpected manifestation that I did not very well comprehend what was going on around me. After the concert, I found with difficulty a few words to repeat, once more, my thanks to my musicians for the valuable assistance they had given me during my visit, expressing the wish, of the sincerity of which they could have no doubt, that the success they so well deserved might continue long after my departure. They thanked me for the performance I had given for the benefit of their association, and made me promise to return to America in the course of two or three years. I promised, as people promise at such times; but, should circumstances permit, I assure you that it would be very pleasant to me to return to Yankee-land and to improve my acquaintance with this marvellous country and with this great people, who showed me a degree of sympathy which will ever remain dear to my memory. CHAPTER XXVI. HOMEWARD-BOUND. On the 8th July I sailed on board the *Ganadas* which, to my great satisfaction, happened to be...

Offenbach in America; Notes of a Travelling Musician

Migrating Music considers the issues around music and cosmopolitanism in new ways. Whilst much of the existing literature on 'world music' questions the apparently world-disclosing nature of this genre

– but says relatively little about migration and mobility – diaspora studies have much to say about the latter, yet little about the significance of music. In this context, this book affirms the centrality of music as a mode of translation and cosmopolitan mediation, whilst also pointing out the complexity of the processes at stake within it. Migrating music, it argues, represents perhaps the most salient mode of performance of otherness to mutual others, and as such its significance in socio-cultural change rivals – and even exceeds – literature, film, and other language and image-based cultural forms. This book will serve as a valuable reference tool for undergraduate and postgraduate students with research interests in cultural studies, sociology of culture, music, globalization, migration, and human geography.

Music in Canada

A lively and provocative account of the arts in Britain, *Building Jerusalem* suggests that even after fifty years of state planning of Britain's "leisure industries" the country is nevertheless approaching the millennium in a state of cultural confusion. Drawing on a wealth of historical material from Scotland, Wales, and English provincial towns, as well as the more familiar London story, Pick and Anderton contend that the original meaning of cultural language has been distorted by the fashionable phrase-making of modern government agencies, and by the inaccurate and misleading view of cultural history that is constantly presented to the public. The authors unfold fascinating stories of Britain's cultural past, before state support of the arts. They vividly relate the great changes wrought by the industrial revolution and by the development of the twentieth century media and describe the long history of Church and Royal support for the arts, as well as the long periods when all of the arts
