Intro.

Tools needed including partner's Toothbrush.

Found out?

Lovely cup of tea before we start.

Remove & clean Dispenser Drawer and inside Detergent Drawer Area. This is why many people use the Pods which go directly into the Drum to avoid the Dispensing Drawer getting mouldy and full of gunk.

Check & clean Washing Machine Drum Rubber on the inside.

Remove Bosch Washing Machine Pump Filter \ Coin Catcher to check for debris (and I did find something).

Check the Aqua inlet filter on the mains cold water feed. This will affect water flow and pressure if it is blocked. (Some models have an AquaStop filter, this one does not).

Check Drainage Hose & Drainage U Bend hoses (you may only want to do this if your Washing Machine is not draining water properly or is smelling).

Push Washing Machine back into position and adjust legs.

Run the Bosch Washing Machine Drum Cleaning cycle to keep it hygienically fresh. I am using Dr.Beckmann's Washing Machine Cleaner but there are other brands available.

The Sniff test!

Put your Partner's toothbrush back and hope they don't notice!
