"Climate-smart agriculture, forestry and fisheries (CSA), contributes to the achievement of sustainable development goals. It integrates the three dimensions of sustainable development (economic, social and environmental) by jointly addressing food security and climate challenges. It is composed of three main pillars: sustainably increasing agricultural productivity and incomes; adapting and building resilience to climate change; reducing and/or removing greenhouse gases emissions, where possible. The purpose of the sourcebook is to further elaborate the concept of CSA and demonstrate its potential, as well as limitations. It aims to help decision makers at a number of levels (including political administrators and natural resource managers) to understand the different options that are available for planning, policies and investments and the practices that are suitable for making different agricultural sectors, landscapes and food systems more climate-smart. This sourcebook is a reference tool for planners, practitioners and policy makers working in agriculture, forestry and fisheries at national and subnational levels." -- Back cover.

Analysing developments in digital technologies and institutional changes, this book provides an overview of the current frenetic state of transformation within the global automobile industry. An ongoing transition brought about by the relocation of marketing, design and production centres to emerging economies, and experimentation with new mobility systems such as electrical, autonomous vehicles, this process poses the question as to how original equipment manufacturers (OEMs) and newcomers can remain competitive and ensure sustainability. With contributions from specialists in the automobile sector, this collection examines the shifts in power and geographical location occurring in the industry, and outlines the key role that public policy has in generating innovation in entrepreneurial states. Offering useful insights into the challenges facing emerging economies in their attempts to grow within the automobile industry, this book will provide valuable reading for those researching internationalization and emerging markets, business strategy and more specifically, the automotive industry.

UN RETOUR À LA NORMALE (ENFIN PRESQUE) L'Annuel de l'automobile célèbre sa 21^e saison sur le marché. La majorité est atteinte. Après une année de COVID, la planète automobile traverse une année de pénurie de puces électroniques qui affecte le monde entier. Pour bien des constructeurs, le rythme est au ralenti depuis des mois et même des constructeurs qui avaient été jusqu'ici épargnés par la crise ont maintenant de la difficulté. Un cabinet-conseil américain évalue les pertes mondiales à plus de 130 milliards de dollars et cette disette de puces électroniques va se poursuivre pour le reste de 2021. Mais cela n'a pas ralenti les constructeurs automobiles qui continuent de mettre de l'avant les plans d'électrification. De nouveaux joueurs comme Lucid, Rivian, Bollinger et Karma s'ajoutent aux pages du livre cette année. **LES TENDANCES ACTUELLES** Pour suivre les courants les plus forts, L'Annuel de l'automobile offre des reportages exclusifs. Vous retrouverez cette année : L'électrique regarde dans le rétro Renault 5, Volkswagen Microbus, Hummer. Tous ces véhicules et d'autres multiplient les clins d'œil au passé pour mieux « vendre » la conversion à l'électrique. Vous avez même des compagnies qui font la conversion de véhicules classiques en modèle électrique. Le rouage intégral pour les nuls Rouage intégral, 4 roues motrices, prise constante, et maintenant les modèles 4 roues motrices électriques. Notre chroniqueur automobile Michel Crépault résume en termes simples tout ce qui concerne les modèles 4 roues motrices. La collection de voitures de José Gaudet Grand amateur de voitures, José Gaudet aime les voitures de toutes les époques pour peu qu'elles procurent un sentiment dynamique au volant. Il nous présente sa collection avec ses commentaires colorés pour chaque modèle. Sommes-nous dépassés par la technologie? L'électronique règne maintenant sans partage dans les véhicules modernes. Est-ce que la courbe d'apprentissage des automobilistes suit la vitesse de développement des constructeurs? Suivez Alain McKenna qui vous dira comment c'est possible (ou non) d'appivoiser cette technologie.

A Companion to the Anthropology of Europe BLACKWELL COMPANIONS TO ANTHROPOLOGY A Companion to the Anthropology of Europe "The volume also deserves a place on the shelves of academic libraries as well as the larger public library." Reference Reviews "Summing Up: Highly recommended. All academic levels/libraries." Choice "This important collection challenges all anthropologists to re-examine the importance of European perspectives on the most provocative debates of our time. It transcends regional interests to highlight the complex intellectual landscape of our field." Tracey Heatherington, University of Wisconsin, Milwaukee "This significant volume critically interrogates assumptions about Europe as an idea and a place for research. It provides fresh perspectives on the past and future of anthropological studies of Europe." Deborah Reed-Danahay, SUNY at Buffalo, President of the Society for the Anthropology of Europe A Companion to the Anthropology of Europe offers a survey of contemporary Europeanist anthropology and European ethnology, and a guide to emerging trends in this geographical field of research. Utilizing diverse approaches to the anthropological study of Europe, Kockel, Nic Craith, and Frykman provide a synthesis of the different traditions and contemporary practices. Investigating the subject both geographically and thematically, the companion covers key topics such as location, heritage, experience, and cultural practices. Written by leading international scholars in the field, the volume constitutes the first authoritative guide for researchers, instructors, and students of anthropology and European studies.

In Battle for Peace frankly documents Du Bois's experiences following his attempts to mobilize Americans against the emerging conflict between the United States and the Soviet Union. A victim of McCarthyism, Du Bois endured a humiliating trial-he was later acquitted-and faced political persecution for over a decade. Part autobiography and part political statement, In Battle for Peace remains today a powerful analysis of race in America.

This book examines Modern Iran through an interdisciplinary analysis of its cultural norms, history and institutional environment. The goal is to underline strengths and weaknesses of Iranian society as a whole, and to illustrate less prescriptive explanations for the way Iran is seen through a lens of persistent collective conduct rather than erratic historical occurrences. Throughout its history, Iran has been subject to many studies, all of which have diagnosed the country's problem and prescribed solutions based on certain theoretical grounds. This book intends to look inward, seeking cultural explanations for Iran's perpetual inability to improve its society. The theme in this book is based on the eloquent words of Nasir Khusrau, a great Iranian poet: "az mast ki bar mast". The words are from a poem describing a self-adoring eagle that sees its life abruptly ended by an arrow winged with its own feathers—the bird is doomed by its own vanity. The closest interpretation of this idiom in Western Christian culture is "you reap what you sow", which conveys a similar message that underlines one's responsibility in the sense that, sooner or later, we must face the choices we make. This would enable us to confront – and live up to – what Iran's history and culture have taught us.

This pioneering volume of essays explores the destruction of great libraries since ancient times and examines the intellectual, political and cultural consequences of loss. Fourteen original contributions, introduced by a major re-evaluative history of lost libraries, offer the first ever comparative discussion of the greatest catastrophes in book history from Mesopotamia and Alexandria to the dispersal of monastic and monarchical book collections, the Nazi destruction of Jewish libraries, and the recent horrifying pillage and burning of books in Tibet, Bosnia and Iraq.

The Teach Yourself History series offers an alternative to academic historical books, its content being extensive yet extremely accessible and the approach refreshingly different. The books are informative and compelling, and engage the reader from beginning to end. They assume no prior historical knowledge, and are full of anecdotes and details that provide a very personal appeal. Teach Yourself The First World War covers all aspects of the war from an international perspective. It follows its key developments, including the build up to the war, how it developed and the role of the different countries involved. It considers many intriguing aspects of the war, including life in the trenches, spies and espionage, the role of women, propaganda, weapons of war and the loss of life. It looks at the impact of the war on those involved and questions why Germany lost the war. The aim throughout is to give you a better understanding of the events that ultimately led to the slaughter of some nine million men and left a further twenty-nine million either wounded or missing.

The Political Economy of Brexit

Fourteen-year-old Roonie loves hip-hop almost as much as she loves her grandmother. Roonie cannot wait to compete in her school's dance competition. But as her grandmother's health deteriorates, Roonie becomes more and more reluctant to visit her in the care home. These feelings of guilt and frustration cause Roonie to mess things up with her hip-hop dance partner and best friend, Kira. But while doing some volunteer hours in the hospital geriatric ward, Roonie meets an active senior recovering from a bad fall. Their shared love of dance and the woman's zest for life help Roonie face her fears, make amends with Kira and reconnect with Gram before it's too late.

Lance Loud came to represent the gay community, and in addition, embodied the creative spirit and genius of outsider status that became the 1980s and fuelled so much of what has evolved today in our culture in terms of art, music and literature. In 2003, PBS broadcast the program, Lance Loud: A Death in an American Family, which was filmed in 2001 while visiting the family again, at the invitation of Lance before his death at age 50. As seen here, short as Lance's life was, it was a monumental one that continues to resonate to the present day.

American diners began to flock to Chinese restaurants more than a century ago, making Chinese food the first mass-consumed cuisine in the United States. By 1980, it had become the country's most popular ethnic cuisine. Chop Suey, USA offers the first comprehensive interpretation of the rise of Chinese food, revealing the forces that made it ubiquitous in the American gastronomic landscape and turned the country into an empire of consumption. Engineered by a politically disenfranchised, numerically small, and economically exploited group, Chinese food's tour de America is an epic story of global cultural encounter. It reflects not only changes in taste but also a growing appetite for a more leisurely lifestyle. Americans fell in love with Chinese food not because of its gastronomic excellence but because of its affordability and convenience, which is why they preferred the quick and simple dishes of China while shunning its haute cuisine. Epitomized by chop suey, American Chinese food was a forerunner of McDonald's, democratizing the once-exclusive dining-out experience for such groups as marginalized Anglos, African Americans, and Jews. The rise of Chinese food is also a classic American story of immigrant entrepreneurship and perseverance. Barred from many occupations, Chinese Americans successfully turned Chinese food from a despised cuisine into a dominant force in the restaurant market, creating a critical lifeline for their community. Chinese American restaurant workers developed the concept of the open kitchen and popularized the practice of home delivery. They streamlined certain Chinese dishes, such as chop suey and egg foo young, turning them into nationally recognized brand names.
