Divine Intelligence

Divine Intelligence does not belong to any religious ideology. Its focus is personal transformation and spiritual advancement. DI is an awareness of the unlimited, creative potential within you, and it infers a deep connection between our minds and the fundamental makeup of the Universe.

The Incorporeal God

The Incorporeal God: An insight into the higher realms This is an awakening collection of essays, lucidly manifested to discern fact from fiction, where epistemology and the innate knowledge of the higher parameter are truly cultivated. The Incorporeal God insightfully delves into the nature of God, existence, consciousness, the fine-tuning of the universe, and faith-oriented phenomena. The Incorporeal God is an eye-opening masterpiece that insightfully covers spirituality, psychology, morality, and expressing on the essential merits, but is not coerced or deliberate in provoking conflict. It penetrates socio-cultural, socio-economic, and socio-political renditions of our contemporary lifestyle. Compellingly enough, it quenches the thirst of those inquisitive minds and gratifies the curiosity of the intellectuals that are apt to acknowledge the authenticity of the magnificent traces of God that is explicit and evidenced to the human mind and the nervous system via our senses. Present-day attainment is in modern science, in the quantum world, the world of string theory and the like have astonished even the most scholarly minded scientists and prominent philosophers beyond the times of Sir Isaac Newton and Albert Einstein, placing them in awe. So many show reverence for the subatomic particles, the unseen

world, as most attesting to what we do not see, manages what we see, leaving no chance to sustain ideologies infested with superstition and construed with the idolatrous reasoning for upholding the truth behind existence. It tackles the ambiguities head-on, facing God and existence, where the immaculate traces of our phenomenal universe can solely lead to a supreme being and infinitely intelligent designer. As scientists tell us, even mass energy wears out, which calls for a creator to harness and deal with it, since with energy depletion, no life, from its infinitesimal to cosmically macro-level, is ever possible. "Superstition sets the whole world in flame, philosophy quenches them" (Voltaire). we live in an awakening era, it seems that beautiful minds are influenced with premonition as if they are mandated with a mission to perform gynecology into the womb of Mother Nature and give birth to yet another treasure, leaping into unveiling the mysteries of nature's obscurities to emancipate man from the clutches of ignorance.

The Book of Light

The Book of Light, shows you the complete truth about God,the universe, and you. Within the grounded and elegant pages of this book, you will find the answers to top level theological/cosmological questions like "what is the nature of God and consciousness?"

Sun of gOd

In Sun of gOd, cultural pioneer and philosopher Gregory Sams takes a fresh look at our solar benefactor. As Sams sees it cultures throughout the ancient world were right to recognize the Sun as a living, conscious being. The implications of a conscious provider in the sky are startling, though often obvious and in harmony with science, logic and common sense. Sun of gOd explores exciting new ground, adding a crucial piece to the jigsawpuzzle picture we have of the cosmos. In the light of a conscious Sun, Sams looks at our hardwired tendency for religion, notions of god and divinity, our place in the firmament, star formation, intelligent light, electromagnetism, feedback, chaos theory, free

will, the four elements, and the nearuniversal selforganization of systems from the bottom up. "Could it really be that the universe waited 13.7 billion years until we came along to manifest the phenomenon of consciousness and made ours the only type of vessel able to experience it?" Sams thinks not. Citing David Bohm's discovery that even on the subatomic level of electrons there appears to be intention and choice, Sams goes on to suggest that creative intelligence may be a bot-tomup system in which "everything, from a molecule of water to a neuron in our brain to the Sun itself, is a part of the bottom that is subtly steering a greater whole." From this perspective, he smoothly joins the microcosm to the macrocosm, revealing a Universe incorporating both intelligence and design, with no need for an Intelligent Designer.

Diamond Mind

As an established international speaker and consciousness facilitator, Dr. Nightingale Florence combines her wisdom and understanding of quantum mechanics and spiritual science, as they apply to educational programming, personal well-beingness, consciousness, and the creation of preferred realities. Having the mind of a globalist, she supports the public with dynamic comprehension of the new sciences related to mind mechanics and consciousness. She upholds the power of collective intention as synergistic catalyst, as well as dynamic initiatory and awakening force, needed in the construction of a new consciousness grid matrix for the acceleration of personal and planetary well-being. She reveals the inherent capacity in all humans, irrespective of creed or planetary geography as resident potential, awaiting a corresponding consciousness state to mine forth the Diamond within. With the planet's evolutionary agenda in mind and expanded sense of awareness, she uncovers the reality effects of consciousness upon personal and planetary evolution, when science meets spirituality. As an accomplished educator, she offers intelligent understanding from a wealth of experience including counseling consulting. She has more than 22 years of experience working with clients in health and transformation. She holds a Ph. D in Counseling and a Masters in Education degree from Cambridge College in Massachusetts.

The Divine Matrix

The New York Times best-selling author of *The God Code* and *Resilience from the Heart* Are the miracles that we see in the quantum world actually showing us our greatest possibilities rather than our scientific limits? Could the spontaneous healing of disease, an instant connection with everyone and everything, and even time travel, be our true heritage in the universe? There is a place where all things begin, the place of pure energy that simply "is." In this quantum incubator for reality, everything is possible. In 1944, Max Planck, the father of quantum theory, shocked the world by saying that this "matrix" is where the birth of stars, the DNA of life, and everything between originates. Recent discoveries reveal dramatic evidence that Planck's matrix—The Divine Matrix—is real. It is this missing link in our understanding that provides the container for the universe, the bridge between our imagination and our reality, and the mirror in our world for what we create in our beliefs. To unleash the power of this matrix in our lives, we must understand how it works and speak the language that it recognizes. For more than 30 years, Gregg Braden, a former senior aerospace computer systems designer, has searched for the understanding to do just that. From the remote monasteries of Egypt, Peru, and Tibet to the forgotten texts that were edited by the early Christian church, the secret of the Divine Matrix was left in the coded language of our most cherished traditions. It is verified in today's science. In this paradigm-shattering book, Gregg shares what he's found. Through 20 keys of conscious creation, we're shown how to translate the miracles of our imagination into what is real in our lives. With easy-to-understand science and real-life stories, Gregg shows us that we're limited only by our beliefs, and what we once believed is about to change!

The God Code

A scholar and New York Times—bestselling author shares his shocking theory of an ancient language—found in the decoded elements of our DNA—that shines new light on the mysteries of existence
What would it mean to discover an ancient language—a literal message—hidden within the DNA of

life itself? What we once believed of our past is about to change. A coded message has been found within the molecules of life, deep within the DNA in each cell of our bodies. Through a remarkable discovery linking Biblical alphabets to our genetic code, the “language of life” may now be read as the ancient letters of a timeless message. Regardless of race, religion, heritage, or lifestyle, the message is the same in each cell of every woman, child, and man, past and present. Sharing all-new, fascinating research, Gregg Braden discusses the life-changing discovery that led him from a successful career in the aerospace and defense industries to an extensive 12-year study of the most sacred and honored traditions of humankind.

Awaken The World Within

1963 This course of study, 58 wonderful lessons, contains a clear and simple exposition of what all must learn, if they would get out of the fog of false teaching and travel the great way of regeneration and redemption. Now you can learn the message of.

A Dictionary of Science

The scientific world appears highly evolved. But in the absence of some vital facts and Truth, the very Purpose of Science is being defeated. The world is endangered, physically, and spiritually. Physically we see energy in the environment peaking and falling violently bringing huge destructions and upsetting the climatic cycles. We see ecologies and the biosphere collapsing. In the spiritual realm, in the last century, the world experienced an awakening. This has empowered religions and they are emerging as a great threat. Religious fanatics in the absence of Truth of oneness are taking control. In ignorance, they are pushing society into commotion and a possible Great War where all weapons of mass destruction would come into play. Jesus Christ and the Spirit of God that He released is at the center of the New Spiritual Awakening. Religious/spiritual institutions are very powerful. Unless they are illuminated with Truth, the Earth and Humanity are doomed. There is a necessity to discover Calvary as a Science beyond Religions, such that humanity as a whole comes out of the bondage to religions and know Life or God Force within and know their Oneness. Classical science assumed the universe is material and built a machine view. It kept aside God. There was no place for life. Max Planck and Einstein, called attention to the role of the mind and thus brought life into science. Since then the world has shifted to visualize the universe as a living one. Physicists today even tell us that the universe could be a giant mind. Research on consciousness in the modern west is mind centered and is aimed at developing intelligent supercomputers. Consciousness in the spiritual east is understood as a base field that creates and sustains the material world. Here the mind is not given importance. However, how creation happens is not explained. Creation according to science comes from Big Bang from the black hole from a Seed Atom and Particle. A black hole is known to destroy space-time, matter, and even energy, leaving the question of what banged at Big Bang? Time and death are a throne in the flesh of both scientists and spiritualists. Explaining the conquering of time and death and eternal existence in simplicity and sensibly has become Inevitable for both scientists and spiritualists. Both seem to fail. Life is known to be a conscious and intelligent system. It has parallel worlds [Male and female] and it has mechanisms by which it conquers time and death. Here the dominant male conceives in the recessive

female to develop a New Physical Body and emerges to start a New Time Cycle. The east visualizes Universe as a Living Being [Lord Shiva] in whom both Masculine and feminine exist as one. He is understood as Lord of Meditation and source of Knowledge of Rishis. One can find many parallels between Lord Shiva and Jesus Christ. India has a Unique and profound knowledge of Life and Nature. The God of the East seems to be incarnated as God of the West [Jesus Christ] and is striving to bring back the memory of the lost knowledge. But some forces are resisting this leading the world into the destructive path. The Spirit of God or Creator that Jesus released is leading humanity into New Life and the illumination of his Mind such that we humans gain the lost Knowledge and Wisdom and emerge from darkness to light, from death to life. A Divine Plan is unfolding from Calvary for the Restoration of we humans back into the Golden Age. Calvary is a science of Conscious Creation. It is well in line with the First and Second law of Energy. The Physical reality remains largely the same but the Spiritual Backbone of the Universe shrinks to conceive and manifest in the physical as a UNIQUE PERSON [Jesus]. As he sacrifices His, Life, New Template is exposed into a creative state with free will to all souls- What Banged at Big Bang is the Consciousness and Intelligence of the Creator. We are Called to Transform and Translate into it.

The Philosophic and Scientific Ultimatum

Are you aware that a man utilized only 3% of his natural capabilities from birth to death? Are you seeking to release the other 97% in order to master your own life? If your answer is "Yes," then this is a perfect book for you. This is a book of self-help and self-empowerment with Divine Intelligence. It presents the knowledge, perceptions and guidance from GOD Force to our daily life by means of conversation. It demonstrates you your natural capabilities and how to release them. It shows you that you have the power to: Influence a mass event, such as natural disasters or critical events Create a great financial abundance Turn around crises and difficulties in life Gain clarity and understanding in unwanted situations Rise from depression to expression Heal an illness with Ether energy in matter of minutes Keep youth and vitality along with age Lose weight in ease and pleasure with a simple mind game Make your natural environment collaborate with your plan Ultimately, live a happy life that you desire and deserve. The author, Ella Wei, grew up in a family where religions and power were never introduced. Her both parents were engineers before their retirement. She was trained in Information Technologies and E-Business Systems. She worked as Web programmer, business analyst and project manager in the same domain. After ten years of work, she was laid off. A lot of effort on job search was done, but a perfect job never came. In her later life, she has been seeking for truth and power to enhance her state of being. And now in her crisis, Divine Intelligence came to her and guided her.

"You are seeking for great financial abundance and expensive personal development. There is no job that provides you this. I will guide you to your great success in your life." She has been happy and joyful ever since. She wants everyone to know that the above announcement from GOD Force is for everyone on this planet. Divine Intelligence wants to lead you to your desired life. The guidance is from the voice beyond our visible world. The broad view, intelligence, love, and clarity are undeniable. She combined the knowledge she had learnt before and the intelligence she received after being laid-off, developed a series of methods to overcome challenges, to turn around depression, and to create new life experience. With time, she has found herself living in what man calls "Fairy Tales." "Indeed," she concluded, "This planet is set up to serve mankind." This is a book of power, a book of love and clarity. It shows you the true nature of life on this planet from standpoint of Divine Intelligence; it answers the following questions that have been held in the mind of many. Who am I? Why did I come here to this Earth environment? Where am I going to? Am I only a tiny specs in the vast existence, nothing significant? How can I have power? The book will open a door for you to discover your natural capabilities, and expose to you endless possibilities in life, and assure you that it is up to you to choose the kind of experience you want to live. The vast knowledge is presented regarding physical and non-physical realms and the connections between. Reading through this book, you will have no doubt that you are absolutely loved, assisted, and you came to this world for goodness and happiness.

Classical Christian theologies came to expression at a time when the universe seemed relatively fixed and unchanging. The otherworldly spiritual instincts of many religions reflected a static, vertical, and hierarchical understanding of the natural world. Today, however, especially because of developments in the sciences, it appears that the universe is still coming into being. The writings offered in this book reflect their author's belief that if the universe is unfinished, new thoughts about God and all the traditional theological topics are essential to make sense of it all. John Haught argues that the universe is best understood according to the metaphor of drama rather than design. This means that the most important question in science and theology today is not whether the intricate complexity of life points to a deity, or even how God acts in nature, but whether the cosmic drama as a whole carries a meaning. Unfortunately, the devotional life of most religious people on our planet still presupposes an essentially immobile universe. Christian instruction, for example, continues to nurture an otherworldly piety that estranges nature unnecessarily from God. The readings in this book, however, suggest that the ancient Abrahamic hope for the coming of God from out of the future may now become the foundation of a scientifically up-to-date theology of nature that affirms divine transcendence without robbing nature of its significance.

Are We Living in the Field of Christ Consciousness?

This book is aimed at those Christians who have begun to question the conventional understandings of Jesus, and Christianity, and even of what we mean by "God," and have become discomforted by the dissonance between their own thinking and the church's stance. A critical thinker by inclination and education, Jack Bowers explored Celtic Christian spirituality for a decade. That taught him there are other ways to live out the Christian faith than what we have been told by Rome and Protestantism. Upon retirement in 1998, no longer professionally required to reflect conventional theology, his belief structure began to wander, seriously re-examining all he had taught and believed. Having heard whispered rumors in younger years of priests "losing their faith," instead he felt he was not losing his theology but growing it. This volume leads you through the evolution of his beliefs to what he can speak out with confidence right now, understanding that as he continues to grow and experience this world, and hopefully get a little wiser, his beliefs will evolve yet farther. He invites you into this challenging spiritual pilgrimage to discover what you can confidently believe in 2016 AD.

AARP The Seven Spiritual Laws of Yoga

There's a timeless legacy about Man's Divinity echoing from the ruins of Ancient temples and monuments around the globe. The Great Pyramids of Africa (Egypt and Nubia) speak of this legacy as an Arabic Proverb utters, "Man fears time, but time fears the Pyramids." Who built these monuments of Eternity that express a Supreme Intelligence of Man that outshines our present day Genius? Who is the Father of Ancient civilization? Written in stone are divine scripts (Medu Netcher commonly called Hieroglyphics) detailing an ancient legacy of Supreme Beings (Human Beings of High Intelligence and Consciousness) who preserved a sacred science and divine teaching that enlightens Man to live in harmony with all of humanity and nature. This timeless wisdom reveals a history of Man/Woman that trails back to the creation of stars. Scribed on the walls of ancient tombs are memories of a spiritual technology and higher consciousness that was responsible for Man understanding the mysteries of the universe and erecting high level civilization. The light of this Divine Truth illuminates the pages of Ancient and Modern books, yet the Religious, Scientific, and Academic world consider this knowledge forbidden and won't reveal it. Reading religious scriptures we observe how Man is made in the image of God, exists outside of Man. According to science and reality it is revealed that the Creator is the life-force of all organisms because Supreme Intelligence and the Power of Creation radiates from the core of our DNA and our cellular functions. "Know ye not that ye are the Spirit of God," the scriptures manifest. Challenging this truth, the academic world and scientists rather have us believe creation randomly happened and Man evolved from an Ape. Who came up with this negative doctrine that separated God from reality and subconsciously influences the savage and criminal mentality we see in today's world. From Police Brutality and murder, rape, robbery, and ignorance, how did the human race which was created in the image of God lose the consciousness of our Divinity? Like the Ancients of long ago who lived in harmony with the universe, how do we spiritually develop ourselves beyond the wickedness of the world and find peace amongst the chaos we live in? In Children Of The Stars we will explore how religious scriptures, sciences, and ancient wisdom reveals a reality that Man's oldest Ancestor is the Creator of the universe and explore the inner depths of consciousness and journey through the dimensions of the time and history to discover who and what we are, our origins of life, where we have been, and how to reach our destination in life, where we have been and, how to reach our destination in life as Children of The Stars where the sky isn't the limit as many believe, "The Kingdom of Heaven is within."

Voice from Beyond

GOD Among Us explains the process by which divine beings - those we call Sons of God or Ascended Masters - awaken to their divinity while in the flesh. Through her own "initiation" experience and her ability to communicate with Source Energy, author Caroline Cory accesses the mind of these extraordinary beings and reveals, in intimate detail, their internal turmoil as they gradually remember their pre-natal agreement and earthly mission. The author describes such topics as: * The process of

discerning and mastering the divine mind * The process of merging with the Divine Creator and our Spirit Family * The universal organization and Earth's place within the cosmic order* The structure of intelligent beings - visible and invisible - involved the divine plan unfolding on this Earth nowGOD Among Us also offers practical tools that will empower you to master the human condition and realize your ultimate potential and divinity in physical form.

A John Haught Reader

Having experienced profound awakenings at an early age, Chireya has prepared herself for this time of service as an Orator and Scribe for the Divine Creator within us all. Her calling is to ensure each and every being on earth has the opportunity to awaken to the Truth of ourselves as One with Love. In love with the Law and Divine Principle, Chireya brings profound clarity to our comprehension of the Creative Process, and a perspective that takes us all the way back, before the beginning of time, helping us resolve our greatest esoteric perplexities as we usher in a new era of co-creative potential on earth.

One Priest's Wondering Beliefs

An astoundingly informative and deeply moving work, God and the System is absorbingly intense, with a stunningly descriptive narrative that chronicles the terrifying condition of huge masses of the Earth's inhabitants, where billions have to die every day to live. The book, God and the System, brilliantly anatomizes the corporate villains motives and divulges the clandestine behaviors of the moguls of our times. Worldwide financial tyrants have managed to choke off and control more than 90 percent of the global resources through force and collusion (to manifest fear, panic, and uncertainty), disseminating tears of silence, hopelessness, and complacency. Since the corporate monarchs relentlessly drool to manufacture abstract conditions to certify themselves as the sole profiteers of this hodgepodge we call living, and for ratifying the status quo as the corporate empires have managed to silence the actual landlords, the people, God and the System wisely nudges the reader and reveals beastly occasions that are conducive to human demise, questioning why, amidst all the light, we cannot see the real truth.

THE WORKS

In "Decoding the Mind of God" author O. M Kelly delves into the unconscious mind and discovers the secrets of the collective consciousness, showing how we can realize the potential of the human mind through belief in ourselves. The Laws of the universe are identical to the collective consciousness, they reveal an answer to every question we are capable of asking. We constantly receive these answers through the vibrations of the energy fields through our being, all without us knowing how to realign our intelligence with our unconscious mind. The truth remains hidden to us. Surprising as it may seem, the key to understanding ourselves lies in a mathematical language, which is the make-up of the unconscious mind. Kelly explores this language through the texts and myths of myriad cultures and belief systems, notwithstanding the truth of the science behind the Egyptian Hieroglyphs and the stories collected in the Bible. As we read this volume we realize that all of these stories are connected to our own story within. Kelly 's perceptions of the order of higher consciousness are framed by stories from her experiences of personal discovery and over twenty years of researching, lecturing and teaching all around the world. Once these codes are unveiled, we earn our freedom where we can release the

fear in which humanity habitually traps itself, creating our accidents, diseases, why we die, right up to explaining extra terrestrial intelligence. This book exposes the secret codes of the universal language that will help us achieve the divine unity with the universe and ourselves.

Awaken The Inner Messiah

Acclaimed intuitive and teacher Michal Levin shows the transformation that spirituality and intuition can bring to your everyday life

Children of the Stars

For thousands of years the concept has existed that the true nature of the universal creative forces, we call God, is intelligent energy, or pure consciousness. Unfortunately the idea of pure consciousness is very hard to grasp and despite the efforts of mystics to explain it for thousands of years, it has remained on the edges of traditional religious thinking. Although kept alive in eastern religions and mysticism it has been largely ignored by western religions and science, except for one small flicker when Rene Descartes declared "I think, therefore I am." Only in the last few years has it been possible to clarify the concept somewhat, and for this book to be written. Ironically it is western science that is providing the opportunity. After being forced to junk its insistence on the universe being composed of matter operating in machine-like precision, western science has been forced to accept a universe of energy operating according to as yet unknown causes. Science is now establishing that the organizations of energy that constitute our world have infinite possibilities. This raises the question of why anything is what it is and what is the cause. As science struggles to answer this question the author dares to preempt it. His answer, of course, is intelligent design implemented by a God of intelligent conscious energy. The net result is that modern science is beginning to verify this ages old concept and the foundation for tomorrow's science based religion is being constructed. With the exponential speed modern technology is developing it may come very soon.

GOD Among Us

This book is second part of the Kundalini science series. First and second parts are also available. It is the compiled form of blog-posts. Those posts are written by Premyogi vajra, a mystic yogi. He is enlightened as well as he has his kundalini awakened. These all posts are related to kundalini. One post corresponds to one chapter. Premyogi vajra is writing about Kundalini since 3 years ago, when his kundalini awakened after one year long continued kundalini yoga meditation. He became amazed on seeing that nowhere Kundalini had been mentioned or described completely. Even Kundalini had not been defined properly. He searched and read many kundalini awakening experiences, but he found none as genuine and complete. Although he found Samadhi as mentioned in Patanjali Yoga Sutras as equivalent to Kundalini, but that was described in a mystic and ancient way that was difficult to be understood by the laymen type general public. Therefore inspired by these shortcomings, he decided to present every know-how about kundalini in very simple or childish way keeping everything at ground level, true, experiential, scientific, original, practical and intuitive. That genuine, honest and humane effort resulted into the origination of this wonderful book. That is why this book appears as a blessing for kundalini seekers. Because it is not comfortable to read so many blog posts together on glare producing screens, therefore those posts were presented in the form of a kindle e-book that is comfortable and enjoying to read. As a result, it is fully hoped that readers will find this book spiritually uplifting and comfortable to read.
