National Geographic Destinations, Antarctica the Last Continent

National Geographic launches a new series--Destinations--that takes readers to some of the world's most fascinating locales for an intimate, "you-are-there" portrait, featuring informative text, up-to-date maps, and lush photography. BEYOND THE HORIZON takes readers to the edge of enchantment--from Iceland to the highlands of Venezuela to the Chinese kingdom of Muli. Over 200 color photos and maps.

Antarctica

Photographs and text profile the geography, wildlife, and landscapes of Antarctica.

Oceania and Antarctica

Examines the dramatically different environments in seven regions around the world. Discusses how elevation and latitude affect the land and its vegetation and wildlife.

Antarctica

Photographs and text profile the geography, wildlife, and landscapes of Antarctica.

Antarctica

This map is enhanced by subglacial information and an inset of territorial claim treaties.

Destination

Follows the British adventurer Robert Swan and two other explorers on an exciting and dangerous 900-mile trek to the South Pole, following in the footsteps of Swan's childhood hero, Robert Falcon Scott, who made the journey exactly seventy-four years earlier.

National Geographic Antarctica Map

This map is enhanced by subglacial information and an inset of territorial claim treaties.

The Last Continent

Thirty years ago, Antarctica was the haunt primarily of explorers, scientists and their support staff. Very few people had yet had opportunities to visit just to say they had been; the continent was too far away, too cold and too expensive to reach. Now things are different. Antarctica is still far away and still

exceedingly cold, but it has become more accessible and known to millions, mainly through television. Antarctica is the world's fifth largest continent. It is not just the snow and ice of popular imagination -- though both are abundant -- but it also has a fascinating wealth of birds and mammals and even plant life. Professor Stonehouse has drawn on more than 50 years experience of Antarctica to produce a guide that will appeal to all. History, geology, wildlife and the environment are here with plenty of jargon-free scientific information and all written in an engaging and refreshing style.

Antarctica

Describes the unique environment of the world's polar regions and the plant and animal life that survives there.

Destination, Polar Regions

The author of "Cold Beer and Crocodiles" now takes readers on a fascinating trek across the icy plains of the coldest and most remote edge of the world.

Life on the Ice

Relates the author's observations of the vast and stark Antarctic region.

South Light

"National Geographic Explorer-in-Residence Enric Sala takes readers on an unforgettable journey to 10 places where the ocean is virtually untouched by man, offering a fascinating glimpse into our past and an inspiring vision for the future. From the shark-rich waters surrounding Coco Island, Costa Rica, to the iceberg-studded sea off Franz Josef Land, Russia, this incredible photographic collection showcases the thriving marine ecosystems that Sala is working to protect. Offering a rare glimpse into the world's underwater Edens, more than 200 images take you to the frontier of the Pristine Seas expeditions, where Sala's teams explore the breathtaking wildlife and habitats from the depths to the surface--thriving ecosystems with healthy corals and a kaleidoscopic variety of colorful fish and stunning creatures that have been protected from human interference. With this dazzling array of photographs that capture the beauty of the water and the incredible wildlife within it, this book shows us the brilliance of the sea in its natural state."--

Alaska's Ring of Fire and Ice

The South Pole is a book by Roald Amundsen and it represents an interesting first-hand account of the Norwegian expedition's successful attempt to reach the South Pole in 1911. Amundsen spends a great deal of time talking about logistics and placing of depots in preparation for his polar attempt all the way from the preparation leading up to the initial sea voyage, the voyage itself and then the establishing of a camp at the Antarctic. Although they were lucky with the weather, and Amundsen attributed the success of the expedition to "good luck\

Pristine Seas

Beautifully designed and user friendly, this definitive, revised edition of the Society's bestselling guide illuminates all 55 of the scenic national parks in the US. Includes detailed descriptions of each park, author-guided tours of personal favorites, excursions to nearby sites, national monuments, wildlife refuges and forests. 76 maps. 45 color photos.

The South Pole

A feel-good rhyming story with a positive message about confidence and self-esteem, from the creators of international bestseller, Giraffes Can't Dance. Little Penguin Pip-Pip would love to join in with all his friends swimming in the sea, but there's just one problem . . . he's scared of water. Can Pip-Pip overcome his fears and finally take the plunge? This irresistible story shows that sometimes all it takes is a little bit of encouragement - and a whole lot of heart - to finally make that leap! This touching tale will soon become a new family favourite. Praise for Giraffes Can't Dance: 'All toddlers should grow up reading this or hearing their parents read it aloud to them' - Daily Telegraph 'A rhyming story with superb illustrations' - Independent 'This delightful picture book is written in lively rhyming text with vivacious illustrations' - Junior

National Geographic's Guide to the National Parks of the United States

Antarctica preserves a rock record that spans three and a half billion years of history and has a remarkable story to tell about the evolution of our Earth, from the hottest crustal rocks yet found in an orogenic system, to the assembly and breakup of Gondwana in the Phanerozoic. This volume highlights our improved understanding of the tectonic events that have shaped Antarctica and how these potentially relate to supercontinent assembly and fragmentation. The internal constitution of the East Antarctic Shield is assessed using information available from the basement geology and from detritus preserved as Mesozoic sediments in the Trans Antarctic Mountains. Accretionary orogenesis along the proto-Pacific margin of Antarctica is examined and the volumes of intracrustal melting compared with juvenile magma additions in these complex orogenic systems assessed. This special volume demonstrates the diversity of approaches required to elucidate and understand crustal evolution and evaluate the supercontinent concept.

Minerals Yearbook

The Intergovernmental Panel on Climate Change (IPCC) is the leading international body for assessing the science related to climate change. It provides policymakers with regular assessments of the scientific basis of human-induced climate change, its impacts and future risks, and options for adaptation and mitigation. This IPCC Special Report on the Ocean and Cryosphere in a Changing Climate is the most comprehensive and up-to-date assessment of the observed and projected changes to the ocean and cryosphere and their associated impacts and risks, with a focus on resilience, risk management response options, and adaptation measures, considering both their potential and limitations. It brings together knowledge on physical and biogeochemical changes, the interplay with ecosystem changes, and the implications for human communities. It serves policymakers, decision makers, stakeholders, and all interested parties with unbiased, up-to-date, policy-relevant information. This title is also available as Open Access on Cambridge Core.

Be Brave Little Penguin

This ultimate hiker's bucket list, from the celebrated Appalachian Trail to Micronesia's off-the-beat-en-path Six Waterfalls Hike, treks through 100 energizing experiences for all levels. Filled with beautiful National Geographic photography, wisdom from expert hikers like Andrew Skurka, need-to-know travel information, and practical wildlife-spotting tips, this inspirational guide offers the planet's best experiences for hikers and sightseers. From short day hikes--California's Sierra High Route, Lake Agnes Teahouse in Alberta, Norway's Mt. Skala--to multiday excursions like Mt. Meru in Tanzania and multi-week treks (Egypt's Sinai Trail, Bhutan's Snowman Trek, and the Bibbulum Track in Australia), you'll find a hike that matches your interests and skill level. Crossing all continents and climates (from the jungles of Costa Rica to the ice fields in Alaska's Kenai Fjords National Parks), as well as experiences (a wine route through Switzerland or moose spotting on the Teton Crest Trail in Wyoming,) there is a trail for everyone in these pages. So pack your gear and lace your boots: this comprehensive and innovative guide will lead you to experience the best hikes of your life!

Antarctica and Supercontinent Evolution

Mobility is fundamental to economic and social activities such as commuting, manufacturing, or supplying energy. Each movement has an origin, a potential set of intermediate locations, a destination, and a nature which is linked with geographical attributes. Transport systems composed of infrastructures, modes and terminals are so embedded in the socio-economic life of individuals, institutions and corporations that they are often invisible to the consumer. This is paradoxical as the perceived invisibility of transportation is derived from its efficiency. Understanding how mobility is linked with geography is main the purpose of this book. The third edition of *The Geography of Transport Systems* has been revised and updated to provide an overview of the spatial aspects of transportation. This text provides greater discussion of security, energy, green logistics, as well as new and updated case studies, a revised content structure, and new figures. Each chapter covers a specific conceptual dimension including networks, modes, terminals, freight transportation, urban transportation and environmental impacts. A final chapter contains core methodologies linked with transport geography such as accessibility, spatial interactions, graph theory and Geographic Information Systems for transportation (GIS-T). This book provides a comprehensive and accessible introduction to the field, with a broad overview of its concepts, methods, and areas of application. The accompanying website for this text contains a useful additional material, including digital maps, PowerPoint slides, databases, and links to further reading and websites. The website can be accessed at: <http://people.hofstra.edu/geotrans> This text is

an essential resource for undergraduates studying transport geography, as well as those interest in economic and urban geography, transport planning and engineering.

The Ocean and Cryosphere in a Changing Climate

The seasonal nature of tourism is increasingly receiving the attention of various actors: tourism destination planners and economic development strategists at all levels, tour operators and the diverse businesses that significantly depend on tourism, and the host communities who negotiate tourism's potential to have both positive and negative impacts. The research report at hand identifies and discusses four main perspectives on the issues of seasonal tourism in the Arctic: local community perspectives; employment and workforce issues; the Arcticification of northern tourism; and global environmental change. These themes form the key issues around which the challenges and opportunities related to seasonality of tourism can be placed and worked with. Based on the discussion, the report outlines recommendations related to developing a thriving and sustainable tourism sector in Arctic Europe.

Estrategia mundial para la conservación

It's time to get off the beaten path. Inspiring equal parts wonder and wanderlust, Atlas Obscura celebrates over 700 of the strangest and most curious places in the world. Talk about a bucket list: here are natural wonders—the dazzling glowworm caves in New Zealand, or a baobab tree in South Africa that's so large it has a pub inside where 15 people can drink comfortably. Architectural marvels, including the M.C. Escher-like stepwells in India. Mind-boggling events, like the Baby Jumping Festival in Spain, where men dressed as devils literally vault over rows of squirming infants. Not to mention the Great Stalacpipe Organ in Virginia, Turkmenistan's 40-year hole of fire called the Gates of Hell, a graveyard for decommissioned ships on the coast of Bangladesh, eccentric bone museums in Italy, or a weather-forecasting invention that was powered by leeches, still on display in Devon, England. Created by Joshua Foer, Dylan Thuras and Ella Morton, ATLAS OBSCURA revels in the weird, the unexpected, the overlooked, the hidden and the mysterious. Every page expands our sense of how strange and marvelous the world really is. And with its compelling descriptions, hundreds of photographs, surprising charts, maps for every region of the world, it is a book to enter anywhere, and will be as appealing to the armchair traveler as the die-hard adventurer. Anyone can be a tourist. ATLAS OBSCURA is for the explorer.

Antarctica and International Law

A co-winner of the 2007 Nobel Peace Prize offers a clear-eyed explanation of the planet's imperiled ice. Much has been written about global warming, but the crucial relationship between people and ice has received little focus—until now. As one of the world's leading experts on climate change, Henry Pollack provides an accessible, comprehensive survey of ice as a force of nature, and the potential consequences as we face the possibility of a world without ice. A World Without Ice traces the effect of mountain glaciers on supplies of drinking water and agricultural irrigation, as well as the current results of melting permafrost and shrinking Arctic sea ice—a situation that has degraded the habitat of numerous animals and sparked an international race for seabed oil and minerals. Catastrophic possibilities loom, including rising sea levels and subsequent flooding of lowlying regions worldwide, and the ultimate displacement of millions of coastal residents. A World Without Ice answers our most urgent questions about this pending crisis, laying out the necessary steps for managing the unavoidable and avoiding the unmanageable.

The Geography of Transport Systems

Old Keb Wisting is somewhere around ninety-five years old (he lost count awhile ago) and in constant pain and thinks he wants to die. He also thinks he thinks too much. Part Norwegian and part Tlingit Native ("with some Filipino and Portuguese thrown in"), he's the last living canoe carver in the village of Jinkaak, in Southeast Alaska. When his grandson, James, a promising basketball player, ruins his leg in a logging accident and tells his grandpa that he has nothing left to live for, Old Keb comes alive and finishes his last canoe, with help from his grandson. Together (with a few friends and a crazy but likeable dog named Steve) they embark on a great canoe journey. Suddenly all of Old Keb's senses come into play, so clever and wise in how he reads the currents, tides and storms. Nobody can find him. He and the others paddle deep into wild Alaska, but mostly into the human heart, in a story of adventure, love, and reconciliation. With its rogue's gallery of colorful, endearing, small-town characters, this book stands as a wonderful blend of Mark Twain's THE ADVENTURES OF HUCKLEBERRY FINN and John Nichols's THE MILAGRO BEANFIELD WAR, with dashes of John Steinbeck thrown in. It

Arctic tourism in times of change: Seasonality

Explores the unprecedented and rapid climate changes occurring in the Arctic environment. Climate change, one of the drivers of global change, is controversial in political circles, but recognized in scientific ones as being of central importance today for the United States and the world. In The Big Thaw, the editors bring together experts, advocates, and academic professionals who address the serious issue of how climate change in the Circumpolar Arctic is affecting and will continue to affect environments, cultures, societies, and economies throughout the world. The contributors discuss a variety of topics, including anthropology, sociology, human geography, community economics, regional development and planning, and political science, as well as biogeophysical sciences such as ecology, human-environmental interactions, and climatology. At the University at Buffalo, State University of New York, Ezra B. W. Zubrow is Distinguished Service Professor of Anthropology. At the University of Buffalo's School of Law, Errol Meidinger is Distinguished Professor and Margaret W. Wong Professor of Law. At the University of Buffalo's School of Law, Kim Diana Connolly is Professor of Law and Vice Dean for Advocacy and Experiential Education.

A World Without Ice

A family reference work containing alphabetically arranged articles, with charts, maps, and photographs, covering physical and human geography.

Mercury as a Global Pollutant

Atlantis was first introduced by the Greek philosopher Plato in two "dialogues" he wrote in the fourth century B.C. His tale of a great empire that sank beneath the waves -- a tale that Plato never even finished -- has sparked thousands of years of debate over whether Atlantis really existed. But did Plato mean his tale as history, or just as a parable to help illustrate his philosophy? In "The Atlantis Dialogue," you'll find everything Plato said about Atlantis, in the context he intended. Now you can read and judge for yourself! //////////////// "An easy read . . . Provides a good starting point for anyone wanting to learn more about the Atlantis myth." -- Judy Justice, Midwest Book Review, Mar. 2002 (Reviewer's Choice) //////////////// SAMPLE CRITIAS: Consider then, Socrates, if this narrative is suited to the purpose, or whether we should seek for some other instead. SOCRATES: And what other, Critias, can we find that will be better than this, which is natural and suitable to the festival of the goddess, and has the very great advantage of being a fact and not a fiction? How or where shall we find another if we abandon this? We cannot, and therefore you must tell the tale, and good luck to you; and I in return for my yesterday's discourse will now rest and be a listener. CRITIAS: Let me begin by

observing first of all, that nine thousand was the sum of years which had elapsed since the war which was said to have taken place between those who dwelt outside the pillars of Heracles and all who dwelt within them; this war I am going to describe. Of the combatants on the one side, the city of Athens was reported to have been the leader and to have fought out the war; the combatants on the other side were commanded by the kings of Atlantis, which, as I was saying, was an island greater in extent than Libya and Asia, and when afterwards sunk by an earthquake, became an impassable barrier of mud to voyagers sailing from hence to any part of the ocean. The progress of the history will unfold the various nations of barbarians and families of Hellenes which then existed, as they successively appear on the scene; but I must describe first of all Athenians of that day, and their enemies who fought with them, and then the respective powers and governments of the two kingdoms.

Jimmy Bluefeather

This book of photography represents National Geographic's Photo Ark, a major cross-platform initiative and lifelong project by photographer Joel Sartore to make portraits of the world's animals -- especially those that are endangered. His message: to know these animals is to save them. Sartore intends to photograph every animal in captivity in the world. He is circling the globe, visiting zoos and wildlife rescue centers to create studio portraits of 12,000 species, with an emphasis on those facing extinction. He has photographed more than 6,000 already and now, thanks to a multi-year partnership with National Geographic, he may reach his goal. This book showcases his animal portraits: from tiny to mammoth, from the Florida grasshopper sparrow to the greater one-horned rhinoceros. Paired with the prose of veteran wildlife writer Douglas Chadwick, this book presents an argument for saving all the species of our planet.

The Big Thaw

The beginning of the new millennium has been particularly devastating in terms of natural disasters associated with tectonic plate boundaries, such as earthquakes in Sumatra, Chile, Japan, Tahiti, and Nepal; the Indian Ocean and the Pacific Ocean tsunamis; and volcanoes in Indonesia, Chile, Iceland that have produced large quantities of ash causing major disruption to aviation. In total, half a million people were killed by such natural disasters. These recurring events have increased our awareness of the destructive power of natural hazards and the major risks associated with them. While we have come a long way in the search for understanding such natural phenomena, and although our knowledge of Earth dynamics and plate tectonics has improved enormously, there are still fundamental uncertainties in our understanding of natural hazards. Increased understanding is crucial to improve our capacity for hazard prediction and mitigation. Volume highlights include: Main concepts associated with tectonic plate boundaries Novel studies on boundary-related natural hazards Fundamental concepts that improve hazard prediction and mitigation Plate Boundaries and Natural Hazards will be a valuable resource for scientists and students in the fields of geophysics, geochemistry, plate tectonics, natural hazards, and climate science. Read an interview with the editors to find out more: <https://eos.org/editors-vox/plate-boundaries-and-natural-hazards>

Can You Find Nemo?

In 1915 Alfred Wegener's seminal work describing the continental drift was first published in German. Wegener explained various phenomena of historical geology, geomorphology, paleontology, paleoclimatology, and similar areas in terms of continental drift. This edition includes new data to support his theories, helping to refute the opponents of his controversial views. 64 illustrations.

Exploring Your World

With stories of 50 incredible hiking routes in 30 countries, from New Zealand to Peru, plus a further 150 suggestions, Lonely Planet's Epic Hikes of the World will inspire a lifetime of adventure on foot. From one-day jaunts and urban trails to month-long thru-hikes, cultural rambles and mountain expeditions, each journey shares one defining feature: being truly epic. In this follow-up to Epic Bike Rides and Epic Drives, we share our adventures on the world's best treks and trails. Epic Hikes is organised by continent, with each route brought to life by a first-person account, beautiful photographs and charming illustrated maps. Additionally, each hike includes trip planning advice on how to get there, where to stay, what to pack and where to eat, as well as recommendations for three similar hikes in other regions of the world. Hikes featured include: Africa & the Middle East: Cape Town's Three Peaks (South Africa) Kilimanjaro (Tanzania) Camp to Camp in South Luangwa National Park (Zambia) Americas:

Angel's Landing, Zion National Park (USA) Skyline Trail, Jasper National Park (Canada) Concepción volcano hike (Nicaragua) Asia: 88 Sacred Temples of Shikoku Pilgrimage (Japan) Markha Valley (India) Gubeikou to Jinshanling on the Great Wall (China) Europe: Wordsworth's Backyard: Dove Cottage and around Rydal and Grasmere (UK) Alpine Pass Route (Switzerland) Camino de Santiago (Spain) Oceania: Sydney's Seven Bridges Walk (Australia) The Routeburn Track (New Zealand) Kokoda Track (Papua New Guinea) About Lonely Planet: Lonely Planet is a leading travel media company and the world's number one travel guidebook brand, providing both inspiring and trustworthy information for every kind of traveller since 1973. Over the past four decades, we've printed over 145 million guidebooks and grown a dedicated, passionate global community of travellers. You'll also find our content online, on mobile, video and in 14 languages, 12 international magazines, armchair and lifestyle books, ebooks, and more. Important Notice: The digital edition of this book may not contain all of the images found in the physical edition.

The Atlantis Dialogue

For more than 50 years, low-cost antimalarial drugs silently saved millions of lives and cured billions of debilitating infections. Today, however, these drugs no longer work against the deadliest form of malaria that exists throughout the world. Malaria deaths in sub-Saharan Africa "currently just over one million per year" are rising because of increased resistance to the old, inexpensive drugs. Although effective new drugs called "artemisinins" are available, they are unaffordable for the majority of the affected population, even at a cost of one dollar per course. *Saving Lives, Buying Time: Economics of Malaria Drugs in an Age of Resistance* examines the history of malaria treatments, provides an overview of the current drug crisis, and offers recommendations on maximizing access to and effectiveness of antimalarial drugs. The book finds that most people in endemic countries will not have access to currently effective combination treatments, which should include an artemisinin, without financing from the global community. Without funding for effective treatment, malaria mortality could double over the next 10 to 20 years and transmission will intensify.
