Master Drawings of the Italian Renaissance

"Beginning with an examination of drawing as part of the creative process, and showing how it reveals the artist's mind at work, the author explains in detail the materials and techniques used in Renaissance drawings. It also considers how drawings were used, how they changed stylistically through the period and how they varied in different regions of Italy. It concludes with a brief look at connoisseurship and collecting."--Amazon.

Master Drawings of the Italian Renaissance

"The exhibition described and fully illustrated in this catalogue is the first in an extended series that will display the resources of collections of master drawings located in New York City and its environs. While the holdings of public institutions are reasonably well known, the drawings in private collections are generally less so, and we therefore hope to perform a service for both the interested public and art scholarship in our projected series of exhibitions and catalogues, which will encompass the drawings of Western European artists from the Italian Renaissance to the end of the nineteenth century. The Metropolitan Museum of Art and The Pierpont Morgan Library possess the two major collections of drawings in the United States, and both are continuing to grow by purchases, gifts, and bequests. Because both institutions are fortunate enough to be in this position, and because both owe an incalculable debt to the vision, the standards of excellence, and the generosity of J. Pierpont Morgan and his son, J.P. Morgan, it has seemed wholly appropriate that they should join forces in presenting these exhibitions to the public. They will alternate between the two institutions, this first exhibition being held at the Metropolitan, and the second in the series, also of Italian drawings, at the Morgan Library during the winter of 1966-1967. New York is a relative newcomer among the world's centers of master drawings collections, and even today the breadth of the city's resources owes much to the continuing activity and the discerning eye of collectors whose initial enthusiasm was nourished abroad. This catalogue and its successors will demonstrate what progress has been made in assembling here representative examples of the work of the leading draughtsmen of the past five centuries"--From foreword.

Master Drawings of the Italian Renaissance

The exhibition described and fully illustrated in this catalogue is the first in an extended series that will display the resources of collections of master drawings located in New York City and its environs. While the holdings of public institutions are reasonably well known, the drawings in private collections are generally less so, and we therefore hope to perform a service for both the interested public and art scholarship in our projected series of exhibitions and catalogues, which will encompass the drawings of Western European artists from the Italian Renaissance to the end of the nineteenth century. The Metropolitan Museum of Art and The Pierpont Morgan Library possess the two major collections of drawings in the United States, and both are continuing to grow by purchases, gifts, and bequests. Because both institutions are fortunate enough to be in this position, and because both owe an incalculable debt to the vision, the standards of excellence, and the generosity of J. Pierpont Morgan and his son, J. P. Morgan, it has seemed wholly appropriate that they should join forces in presenting these exhibitions to the public. They will alternate between the two institutions, this first exhibition being held at the Metropolitan, and the second in the series, also of Italian drawings, at the Morgan Library during the winter of 1966-1967. New York is a relative newcomer among the world's centers of master drawings collections, and even today the breadth of the city's resources owes much to the continuing activity and the discerning eye of collectors whose initial enthusiasm was nourished abroad. This catalogue and its successors demonstrate what progress has been made in assembling here representative examples of the work of the leading draftsmen of the past five centuries. This book was originally published in 1965 and has gone out of print. This edition is a print-on-demand version of the original book.]

Italian Master Drawings of the Renaissance and the Baroque

The Philadelphia Museum of Art is fortunate to have a collection of Italian drawings that encompasses a broad sweep of Italy's art history, ranging from Renaissance and Baroque to Futurist and contemporary works by such famed artists as Parmigianino, Francesco Salviati, Guercino, Giovanni Benedetto Castiglione, Pompeo Batoni, and Amedeo Modigliani. With this publication, eighty of these drawings are provided with commentary, complete scholarly analysis, and biographies of the artists by the renowned scholar Mimi Cazort. The volume opens with an illustrated essay by Ann Percy, the Museum's Curator of Drawings, who offers the first full account of the people and events that shaped the formation of this exceptional but little-published collection.

Master Drawings of the Italian Renaissance

The Renaissance of the 14th–16th centuries was, and forever will be, one of the most pivotal periods in the development of Western art. Its roots spread wide and deep, and much social and intellectual revitalization had begun before this revered time, but the renewed interest in ancient Greek and Roman

texts and the development of expanding trade, which brought greater wealth, meant that classical and humanist thought combined with lavish patronage resulted in major breakthroughs across all spheres of human endeavour – art, architecture, music, literature, science, philosophy and more. And, while it spread across Europe, it was Italy that was to be its crucible. With 2020 marking the 500th anniversary of the death of Raphael, one of the stars of the Renaissance, this sumptuous book celebrates the prolific output of this era. From the radical perspective of Giotto di Bondone (1267–1337), breaking out of the Middle Ages, to the giants of the High Renaissance: Leonardo da Vinci, Michelangelo and Raphael, and many more, the reader will delight in the fascinating insights offered by the text accompanied by lush reproductions.

The Italian Renaissance

This richly illustrated volume offers a new look at the exceptional collection of Italian drawings at the Princeton University Art Museum. An introductory essay by Laura M. Giles chronicles the history and significance of the collection, and nearly one hundred of the collection's masterworks are treated with essay-length entries and full-page images. The first scholarly examination of the collection since Felton Gibbons's comprehensive publication of 1977, the catalogue includes an appendix of more than 150 drawings that have entered the collection since--many previously unpublished, and all fully documented with short entries. Highlights include works by celebrated masters, including Carpaccio and Modigliani, from the early Renaissance through the early Modern periods, with an emphasis on the collection's renowned holdings of works by Luca Cambiaso, Guercino, and the two Tiepolos. With contributions by Alessandra Bigi Iotti, Jonathan Bober, Giada Damen, Diane de Grazia, Rhoda Eitel-Porter, Frederick Ilchman, Anne Varick Lauder, John Marciari, Elizabeth Pilliod, John Pinto, David Stone, Catherine Whistler, and Giulio Zavatta.

Drawings from New York Collections. Vol. 1, The Italian Renaissance

Paintings, sculpture, and classical antiquities are the most valuable resources of any museum, and are the first objects to be published in each museum's own collection catalogue or online inventory. Collection catalogues, however, have customarily included only a small sample of the riches to be found in Midwestern collections of master drawings. This volume of sixteenth-century drawings has been largely the work of Burton L. Dunbar (University of Missouri-Kansas City), director of the project and a specialist in the arts of northern Europe, and Edward J. Olszewski (Case Western Reserve University), co-editor for the series, a well-known authority on drawings of the Italian Renaissance. This volume covers the sixteenth century, including artists born as a rule between 1480 and 1580, with the exception of Giovanni Baglione (ca. 1573-1644) and the Carracci. This study represents a gathering of drawings from forty institutions between Ohio and Oklahoma based on a census of seventy-five museums and art centers. Jacob Burckhardt's contention that the Renaissance was, in many respects, an age of paganism is readily belied here by the 471 Italian drawings, the great majority of which are religious subjects. Antiquity provided a veneer beneath which sixteenth century artists could cloak their Christianity to make it seem fresh, reminding believers of the origins of their faith, and reviving the purity of Christian doctrine in its early years. It is no surprise, then, to find numerous drawings of antiquities, and mythologies among the many subjects. A corpus this large can be representative in many ways, offering a cross-section of media, subjects, drawing types, and collectors. Of the 471 Italian drawings scattered across Midwestern America, here we reassemble many that were at one time in one or more prominent collections. Every drawing was examined for the following information: Artist, place of birth and death with dates, biography, title of drawing, date of drawing, dimensions in mm (and in inches), media, institutional credit line, accession number, technical condition, inscriptions, collectors' marks, watermark, provenance, exhibitions, bibliography, comments

Drawings from New York Collections

"This volume contains works by 134 artists, including Leonardo, Raphael, Pisanello, Tintoretto, Canaletto, Guardi, Piranesi, and Tiepolo, and representatives of every important Italian regional school from the middle of the fourteenth century to the end of the eighteenth. Primarily selected for their aesthetic beauty, the drawings in this book cover a broad range of styles and subject matter." -- Back cover.

Italian Master Drawings at the Philadelphia Museum of Art

This handsome volume brings together an impressive array of scholars, who analyze an outstanding private collection of 171 Old Master drawings that date from the late fifteenth through the early nineteenth century. The collection vibrantly revealed here includes a wide variety of drawings—from sketches and figure drawings to copies after masters and preliminary studies for major compositions—and features the work of many important Italian artists, including Raphael, Andrea del Sarto, Baccio Bandinelli, Pontormo, Perino del Vaga, Gian Lorenzo Bernini, Salvator Rosa, Guercino, and Giovanni Battista Tiepolo, among many others. Each work is reproduced and accompanied by complete documentation: physical description, provenance, bibliography, and exhibition history, as well as background information on the subjects captured in the drawings. Capturing the Sublime opens the beauty of these drawings to a broader public and provides important new attributions and scholarship.

Italian Renaissance Drawings from the Musée Du Louvre, Paris: Roman, Tuscan, and Emilian Schools, 1500-1575

This study employs cognitive theory as a heuristic framework to interrogate the agency of female types in select Italian Renaissance paintings, with emphasis on Venus, Medusa, the Amazon, Botticelli's Lady Fiammetta/Cleopatra, Susanna, the Magdalene, and the Madonna. The study disrupts assumptions about the identity of sitters and readings of paintings as it challenges paradigms of female representation. It interrogates why certain paintings were crafted, by whom and for whom. Works are placed in the context of meta-painting, with stress on the cognitive decisions negotiated between patron and artist. The ludic aspects of several paintings are examined with a fine grain semiotic approach to expand their iconographies. Psychoanalytic readings are unpacked, based on the flawed mythological metaphors and incomplete clinical studies of Sigmund Freud's theorizing. The rubric of female agency is deliberately selected to unify popular but enigmatic master paintings of disparate subjects.

Renaissance Into Baroque

Antonio Allegri da Correggio was the foremost painter of the Parma school of the Italian Renaissance, who was responsible for some of the most forceful and sensuous works of the 16th century. In his use of dynamic composition, perspective and dramatic foreshortening, Correggio prefigured the Rococo art of the 18th century. He had little immediate influence in terms of apprenticed successors, but his works are now considered to have been revolutionary and influential on subsequent artists. A half-century after his death Correggio's work was well known to Vasari. In the 18th and 19th centuries, his works were often noted in the diaries of foreign visitors to Italy, which led to a re-evaluation of his art during the period of Romanticism. Correggio had no direct disciples outside of Parma, where he was influential on the work of Giovanni Maria Francesco Rondani, Parmigianino, Bernardo Gatti, Francesco Madonnina, and Giorgio Gandini del Grano.

Italian Renaissance

This exquisite catalog of sixty-five Italian drawings ranging in date from 1525 to 1835 celebrates the second part of a major acquisition made by the National Gallery of Art in late 2007, the purchase of one of the finest private European holdings of old master drawings, the Wolfgang Ratjen Collection. The drawings presented here and in the accompanying exhibition span the last flowering of the Renaissance to the rise of neoclassicism. Included are works by such luminaries as Guercino, Giorgio Vasari, Carlo Maratta, and Giovanni Battista Tiepolo. The selection juxtaposes remarkable works by masters such as Giulio Romano, Federico Barocci, and Giovanni Battista Piranesi with sheets by less well known artists such as Ambrogio Figino and Antonio Cavallucci. It features an excellent series of religious compositions, fine works by Neapolitan artists, and a rich assemblage of drawings by several Venetian artists. Many individual pieces are of special importance: a mythological composition by Luca Penni, a powerfully sculptural work by Pellegrino Tibaldi, an enchanting nature drawing by Jacopo Ligozzi, and a moving religious piece by Guillaume Courtois. The indisputable star, however, is a beautiful Venetian festival by the great view painter Canaletto.

Italian Master Drawings from the Princeton University Art Museum

This sumptuously illustrated catalogue charts the history of drawing in Italy from 1400, just prior to the emergence in Florence of the classically inspired naturalism of the Renaissance style, to around 1510 when Michelangelo, Raphael and Titian were on the verge of taking the innovations of earlier masters, such as Leonardo and Pollaiuolo, in a new direction. The book highlights the key role played by drawing in artistic teaching and in how artists studied the human body and the natural world. Aspects of

regional difference, the development of new drawing techniques and classes of graphic work, such as finished presentation pieces to impress patrons, are also explored. An extended introduction focusing on how and why artists made drawings, with a special emphasis on the pivotal role of Leonardo, is richly illustrated with examples from the two collections that elucidate the technique and function of the works. This is followed by catalogue entries for just over 100 drawings where discussion of their function and significance is supported by comparative illustrations of related works, such as paintings.

15th and 16th Century Italian Drawings in the Metropolitan Museum of Art

Providing technical studies of 47 Italian Renaissance drawings, this text covers topics such as methodology, drawings in the Renaissance workshop and dry drawing media.

Catalogue Fifty-five

The first catalogue to survey the Morgan's collection of Italian Renaissance drawings, this monumental study also constitutes an introduction to Italian Renaissance draftsmanship for students and enthusiasts. It includes introductory essays on drawing in Renaissance Italy and on the formation of the Morgan's collection. More than 120 detailed catalogue entries offer highly focused explorations of individual sheets, but these are grouped into chapters with introductory essays that provide context on key moments in the evolution of Renaissance drawing and on the distinct characteristics of different regional schools.⁰⁰The related exhibition 'Invention and Design: Early Italian Drawings at the Morgan', organized by John Marciari, is on view February 15 through May 19, 2019. While the newly published catalogue covers drawings from around 1350-1600, the exhibition focuses on the earlier material, illuminating the origins and evolution of Italian drawing by artists born before 1500.⁰⁰Exhibition: Pierpont Morgan Library, New York, USA (15.02.-193.05.2019).

Sixteenth-century Italian Drawings

Focusing exclusively on examples from the 16th century, the great age of Italian drawing, this stunning volume, published to accompany an early-1994 exhibition at The Metropolitan Museum of Art, includes 124 prized works from The Metropolitan, the Pierpont Morgan Library, the Cooper-Hewitt Museum, and some 20 private collections in New York. The catalogue is organized by school and, within each section, chronologically by artist. Each drawing is illustrated and presented with a discussion that places it in the context of the artist's career and explores the purpose for which it was made. Paper edition (unseen), \$35. Annotation copyright by Book News, Inc., Portland, OR

Library of Congress Subject Headings

First published in 2003. Routledge is an imprint of Taylor & Francis, an informa company.

Italian Master Drawings, 1350-1800 from the Janos Scholz Collection

Coloring book for art enthusiasts of all ages featuring portraits from both the Italian Renaissance and the Northern Renaissance. There are 90 amazing paintings from some of the greatest artists of all time, including Leonardo da Vinci, Raphael, Hans Holbein, Jan van Eyck, and Botticelli. Enjoy hours of relaxing and peaceful coloring. Variety. Over a dozen different artists with a range of different styles 90 different portraits, replicated with great attention to detail and proportion. Artwork was chosen so that all ages can enjoy coloring. Single-sided pages so that colors won't bleed onto other drawings. Coloring promotes calmness, peace, and relaxation. Build your ability and skill as a portrait artist by replicating the tones and shading of the original artwork. Wonderful gift idea for the favorite artist in your life.

Capturing the Sublime

Catalog of the exhibition organized by the Grand Rapids Art Museum; held at the museum Nov. 16, 1997-Feb. 1, 1998.

The Agency of Female Typology in Italian Renaissance Paintings

Michelangelo: Sacred and Profane, Master Drawings from the Casa Buonarroti' features a rich and varied selection of 26 works from the master's collection, preserved in the artist's family home, the Casa Buonarroti, in Florence. The exhibition includes many of Michelangelo's (1475-1564) great renowned drawings, which illustrate how he alternated between interpretations of the divine and the worldly, or

profane, throughout his career. His powers to evoke the sacred are fully displayed in his large drawing of the Virgin and Child-one of his most admired images. A worldly image is the imaginary portrait of Cleopatra, a black chalk presentation drawing he made as a gift for his friend Tommaso de' Cavalieri that is considered one of the Renaissance genius's most poetic conceptions. 0Exhibition: Museum of Fine Arts, Boston, USA (21.4.-30.6.2013). 0.

Italian Master Drawings from the Uffizi

The collection of pictures at Wilton has been celebrated since the seventeenth century; and its historic arrangement is uniquely well documented in a series of catalogues of which the first, issued in 1731, was the earliest such publication about any private collection in England. Of successive owners of the house, three made significant contributions: William, 4th Earl of Pembroke, who commissioned van Dyck's monumental portrait of his family that dominates the Double Cube Room he had created; his grandson, Thomas, 8th Earl of Pembroke who assembled what was in some respects a pioneering collection of old master pictures for the house; and his grandson, Henry, 10th Earl of Pembroke, patron of Reynolds and Wilson, among others. Such masterpieces as Lucas van Leyden's Card Players, Cesare da Sesto's Leda - long attributed to Leonardo - and Ribera's Democritus are matched by remarkable portrait drawings by Raphael and Holbein. These are complemented by a substantial deposit of family portraits and other pictures that attest to the tastes and interests of successive generations of the Herbert family.

Old Master Drawings from American Collections

An Exhibition of Early Renaissance Drawings from Collections in Great Britain held at the University Art Gallery, Nottingham, 12 February to 15 May 1983 - Techniques - Modelbooks & sketchbooks - The draped figure - The nude figure - Biographies include: Gozzoli, Leonardo da Vinci, Filippo Lippi, Mantegna, Bellini etc.

Correggio: Master Drawings

Giulio Romano was one of the most important, versatile, and influential artists of the late Italian Renaissance. As the primary protege of Raphael, he inherited his master's studio at the papal court following Raphael's death in 1520. Giulio initially continued to work in Raphael's Roman High Renaissance style, but as his personal style matured, he became one of the great court painters and architects of the 16th century. Shakespeare called him "that rare Italian master." Giulio Roman was a prolific draftsman, and left preparatory drawings for a wide range of projects, including decorative arts, architecture, religious works, frescoes, stuccoes, and the famous series of erotic prints, I Modi. This thorough examination of Giulio's career and drawings celebrates the 500th anniversary of his birth. Janet Cox-Rearick is distinguished professor of art history at Hunter College and the Graduate School, City University of New York.

Documents the arts, crafts and occupations of the prisoner of war in England, France and America, from 1756 to 1816.

Napoleonic and American Prisoners of War, 1756-1816: The arts and crafts of Napoleonic and American prisoners of war, 1756-1816

A study based on the author's thirty-year quest to collect information about a neglected and almost forgotten field of history - the prisoner of war, the conditions under which he was held and how he employed his time during long years of captivity.

Napoleonic and American Prisoners of War

Documents the arts, crafts and occupations of the prisoner of war in England, France and America, from 1756 to 1816.

A History of Napoleonic and American Prisoners of War, 1756-1816

This book explores the history of Dartmoor War Prison (1805-16). This is not the well-known Victorian convict prison, but a less familiar penal institution, conceived and built nearly half a century earlier in the midst of the long-running wars against France, and destined, not for criminals, but for French and later American prisoners of war. During a period of six and a half years, more than 20,000 captives passed through its gates. Drawing on contemporary official records from Britain, France and the USA, and a wealth of prisoners' letters, diaries and memoirs (many of them studied here in detail for the first time), this book examines how Dartmoor War Prison was conceived and designed; how it was administered both from London and on the ground; how the fate of its prisoners intertwined with the military and diplomatic history of the period; and finally how those prisoners interacted with each other, with their captors, and with the wider community. The history of the prison on the moor is one marked by high hopes and noble intentions, but also of neglect, hardship, disease and death

French and American Prisoners of War at Dartmoor Prison, 1805-1816

In the eighteenth century, as wars between Britain, France, and their allies raged across the world, hundreds of thousands of people were captured, detained, or exchanged. They were shipped across oceans, marched across continents, or held in an indeterminate limbo. The Society of Prisoners challenges us to rethink the paradoxes of the prisoner of war, defined at once as an enemy and as a fellow human being whose life must be spared. Amidst the emergence of new codifications of international law, the practical distinctions between a prisoner of war, a hostage, a criminal, and a slave were not always clear-cut. Renaud Morieux's vivid and lucid account uses war captivity as a point of departure, investigating how the state transformed itself at war, and how whole societies experienced international conflicts. The detention of foreigners on home soil created the conditions for multifaceted exchanges with the host populations, involving prison guards, priests, pedlars, and philanthropists. Thus, while the imprisonment of enemies signals the extension of Anglo-French rivalry throughout the world, the mass incarceration of foreign soldiers and sailors also illustrates the persistence of non-conflictual relations amidst war. Taking the reader beyond Britain and France, as far as the West Indies and St Helena, this story resonates in our own time, questioning the dividing line between war and peace, and forcing us to confront the untenable situations in which the status of the enemy is left to the whim of the captor.

The Society of Prisoners

Offering an intimate history of how small things were used, handled, and worn, this collection shows how objects such as mugs and handkerchiefs were entangled with quotidian practices and rituals of bodily care. Small things, from tiny books to ceramic trinkets and toothpick cases, could delight and entertain, generating tactile pleasures for users while at the same time signalling the limits of the body's adeptness or the hand's dexterity. Simultaneously, the volume explores the striking mobility of small things: how fans, coins, rings, and pottery could, for instance, carry political, philosophical, and cultural concepts into circumscribed spaces. From the decorative and playful to the useful and performative, such small things as tea caddies, wampum beads, and drawings of ants negotiated larger political, cultural, and scientific shifts as they transported aesthetic and cultural practices across borders, via nationalist imagery, gift exchange, and the movement of global goods.

Small Things in the Eighteenth Century

How objects associated with the American, French, and Haitian revolutions drew diverse people throughout the Atlantic world into debates over revolutionary ideals “By excavating the power of material objects and visual images to express the fervor and fear of the revolutionary era, Ashli White brings us closer to more fully embodied, more fully human, figures.”—Richard Rabinowitz, author of *Objects of Love and Regret: A Brooklyn Story* “In this important, innovative book, Ashli White moves nimbly between North America, Europe, and the Caribbean to capture the richness and complexity of material culture in the Age of Revolutions.”—Michael Kwass, Johns Hopkins University Historian Ashli White explores the circulation of material culture during the American, French, and Haitian revolutions, arguing that in the late eighteenth century, radical ideals were contested through objects as well as in texts. She considers how revolutionary things, as they moved throughout the Atlantic, brought people into contact with these transformative political movements in visceral, multiple, and provocative ways. Focusing on a range of objects—ceramics and furniture, garments and accessories, prints, maps, and public amusements—White shows how material culture held political meaning for diverse populations. Enslaved and free, women and men, poor and elite—all turned to things as a means to realize their varied and sometimes competing visions of revolutionary change.

Revolutionary Things

Living with the Royal Academy directs attention to the textures of artists' relationships with the Royal Academy in late-eighteenth- and early-nineteenth-century Britain. This essay collection considers the Academy as a lived organism, one whose most effective role was as a reference point around which artists operated in their relationships with each other and with artistic practice itself.

Living with the Royal Academy

The Play World chronicles the history and evolution of the concept of play as a universal part of childhood. Examining texts and toys coming out of Europe between 1631 and 1914, Patricia Anne Simpson argues that German material, literary, and pedagogical cultures were central to the construction of the modern ideas and realities of play and childhood in the transatlantic world. With attention to the details of toy manufacturing and marketing, Simpson considers prescriptive texts about how children should play, treat their possessions, and experience adventure in the scientific exploration of distant geographies. She illuminates the role of toys—among them a mechanical guillotine, yo-yos, hybridized dolls, and circus figures—as agents of history. Using an interdisciplinary approach that draws from postcolonial, childhood, and migration studies, she makes the case that these texts and toys transfer the world of play into a space in which model childhoods are imagined and enacted as German. With chapters on the Protestant play ethic, enlightened parenting, Goethe as an advocate of play, colonial fantasies, children's almanacs, ethnographic play, and an empire of toys, Simpson's argument follows a compelling path toward understanding the reproduction of religious, gendered, ethnic, racial, national, and imperial identities, emanating from German-speaking Europe, that collectively construct a global imaginary. This foundational and deeply original study connects German-speaking communities across the Atlantic as they collectively engender the epistemology of the play world. It will be of particular interest to German studies scholars whose research crosses the Atlantic.

The Play World

The archaeology of war has revealed evidence of bravery, sacrifice, heroism, cowardice, and atrocities. Mostly absent from these narratives of victory and defeat, however, are the experiences of prisoners of war, despite what these can teach us about cruelty, ingenuity, and human adaptability. The international array of case studies in *Prisoners of War* restores this hidden past through case studies of PoW camps of the Napoleonic era, the American Civil War, and both World Wars. These bring to light wide variations in historical and cultural details, excavation and investigative methods used, items found and their interpretation, and their contributions to archaeology, history and heritage. Illustrated with diagrams, period photographs, and historical quotations, these chapters vividly reveal challenges and opportunities for researchers and heritage managers, and revisit powerful ethical questions that persist to this day. Notorious and lesser-known aspects of PoW experiences that are addressed include: Designing and operating an 18th-century British PoW camp. Life and death at Confederate and Union American Civil War PoW camps. The role of possessions in coping strategies during World War I. The archaeology of the 'Great Escape' Experiencing and negotiating space at civilian internment camps in Germany and Allied PoW camps in Normandy in World War II. The role of archaeology in the

memorial process, in America, Norway, Germany and France Graffiti, decorative ponds, illicit saké drinking, and family life at Japanese American camps As one of the first book-length examinations of this fascinating multidisciplinary topic, *Prisoners of War* merits serious attention from historians, social justice researchers and activists, archaeologists, and anthropologists.

Prisoners of War

Norman Cross was the site of the world's first purpose-built prisoner-of-war camp constructed during the Napoleonic Wars. Opened in 1797, it was more than just a prison: it was a town in itself, with houses, offices, butchers, bakers, a hospital, a school, a market and a banking system. It was an important prison and military establishment in the east of England with a lively community of some 7,000 French inmates. Alongside a comprehensive examination of the prison itself, this detailed and informative book, compiled by a leading expert on the Napoleonic era, explores what life was like for inmates and turnkeys alike – the clothing, food, health, education, punishment and, ultimately, the closure of the depot in 1814.

The Napoleonic Prison of Norman Cross

During 1792-1815, the period of the Coalition Wars and the Napoleonic Wars between France and Europe, prisoners were taken on both sides. The majority of them were confined, sometimes for many years, in England and Scotland. Some of the prisoners built ship models from scraps of wood or mutton and beef bones. Rigging was made of silk or whatever other fine material could be obtained. The prisoners developed an art form and the models were sold to the public through the guards. This trade enabled the prisoner to acquire ivory and special tools to make the models all the more decorative. The remain highly sought after and valuable collectors' items to this day. This book shows the beauty of the models selected as the finest in the Peter Tamm Collection in the International Maritime Museum of Hamburg.

Prisoner of War - Bone Ship Models

We know the thrilling, terrible stories of the battles of the Napoleonic wars - but what of those left behind? The people on a Norfolk farm, in a Yorkshire mill, a Welsh iron foundry, an Irish village, a London bank or a Scottish mountain? The aristocrats and paupers, old and young, butchers and bakers and candlestick makers - how did the war touch their lives? Every part of Britain felt the long twenty years of war against the French: one in five families had people in the services and over 300,000 men died. As the years passed, so the bullish, flamboyant figure of Napoleon - Boney, the bogeyman - came to dominate so much that the whole long conflict was given his name. Jenny Uglow, the prize-winning author of *The Lunar Men* and *Nature's Engraver*, follows the gripping back-and-forth of the first global war, but turns the news upside down, seeing how it reached the people. Illustrated by the satires of Gillray, Rowlandson and the paintings of Turner and Constable, and combining the familiar voices of Jane Austen, Wordsworth, Scott and Byron with others lost in the crowd, *In These Times* delves into the archives to tell the moving story of how people lived and loved and sang and wrote, struggling through hard times and opening new horizons that would change their country for a century ahead.

The British National Bibliography

In contrast to the plethora of works focusing on the tragic loss of human lives during the First World War, little is known about the more hopeful realities of thousands of prisoners of war from Britain, France, Germany and Belgium who were sent to Switzerland from 1916. This book explores the everyday lives of these prisoners and their impact on Switzerland. Internees were warmly welcomed by local people and given education, training and employment. Leading relatively free lives, they were able to engage in leisure activities and develop new relationships. However, they also contributed to the country's economy, helping to keep Swiss tourism alive at a time when businesses were struggling and alleviating Switzerland's labour shortage as Swiss men were called-up to defend their borders and preserve the country's neutrality. Drawing on a wide range of sources from official records to magazines and postcards, Susan Barton provides an absorbing account of the social and cultural history of internment in Switzerland.

In These Times

Living with the Royal Academy: Artistic Ideals and Experiences in England, 1768-1848 offers a range of case studies which consider individual artists' personal, professional and artistic relationships with the Royal Academy during the late eighteenth and early nineteenth centuries, bringing together the research of leading historians of British artistic culture during this period. Over its introduction and nine essays, this collection considers the Academy as a lived organism whose most effective role, following its establishment in 1768, was as a reference point towards, around and against which artists operated in their relationships with each other and with artistic practice itself. In so doing, this collection also considers the relationship between Academic ideals and individual practice (as well as lived experience) during this period of art's increasingly public manifestation at the Academy. Individual artists examined include Joshua Reynolds, Joseph Wright of Derby, Benjamin West and William Etty. Thinking beyond the dichotomy of loyalism and rebellion - and complicating notions of the Academy as a monolithic ossifying institution from which progressive artists would be 'liberated' in the wake of the Pre-Raphaelite Brotherhood's emergence in 1848 - this volume investigates the Academy's varied impact upon the lives, experiences and ideals of its diverse artistic communities.

Internment in Switzerland during the First World War

The Routledge Handbook of Global Historical Archaeology is a multi-authored compendium of articles on specific topics of interest to today's historical archaeologists, offering perspectives on the current state of research and collectively outlining future directions for the field. The broad range of topics covered in this volume allows for specificity within individual chapters, while building to a cumulative overview of the field of historical archaeology as it stands, and where it could go next. Archaeological research is discussed in the context of current sociological concerns, different approaches and techniques are assessed, and potential advances are posited. This is a comprehensive treatment of the sub-discipline, engaging key contemporary debates, and providing a series of specially-commissioned geographical overviews to complement the more theoretical explorations. This book is designed to offer a starting point for students who may wish to pursue particular topics in more depth, as well as for non-archaeologists who have an interest in historical archaeology. Archaeologists, historians, preservationists, and all scholars interested in the role historical archaeology plays in illuminating daily life during the past five centuries will find this volume engaging and enlightening.

Living with the Royal Academy

The incarceration of French and American prisoners of war in Dartmoor Prison, at a time when Britain was at war with both its traditional enemy and the young nation of former British colonies, was a dark and unusual episode. Acts of cruelty and degradation were countered by defiance and a spirited loyalty by the prisoners to their respective countries. Much of the story is told firsthand by those who were there, against a background of warfare and glorious victories on all sides. The author relates how a barren landscape that was (and is) subject to the worst of winter weather was transformed into a thriving township by one very determined man, Sir Thomas Tyrwhitt, and why such a place was chosen to build a prison. The design and construction of the prison are described, as are the experiences of the men held in the harsh, overcrowded conditions of Dartmoor. From May 1809 to February 1816, 271 American and more than 1100 French prisoners of war died in confinement.

The Mariner's Mirror Bibliography for ...

Includes, beginning Sept. 15, 1954 (and on the 15th of each month, Sept.-May) a special section: School library journal, ISSN 0000-0035, (called Junior libraries, 1954-May 1961). Also issued separately.

Prisoners of War at Dartmoor

Sea Narratives: Cultural Responses to the Sea, 1600-Present explores the relationship between the sea and culture from the early modern period to the present. The collection uses the concept of the 'sea narrative' as a lens through which to consider the multiple ways in which the sea has shaped, challenged, and expanded modes of cultural representation to produce varied, contested and provocative chronicles of the sea across a variety of cultural forms within diverse socio-cultural moments. Sea Narratives provides a unique perspective on the relationship between the sea and cultural production: it reveals the sea to be more than simply a source of creative inspiration, instead showing how the sea has had a demonstrable effect on new modes and forms of narration across the cultural sphere, and in turn, how these forms have been essential in shaping socio-cultural understandings of the sea. The result is an incisive exploration of the sea's force as a cultural presence.

Prisoners of War in Britain, 1756 To 1815

During the French Revolutionary and Napoleonic Wars, over 200,000 prisoners of war of many nationalities were brought to Britain to be held in the infamous prison hulks, land prisons and parole depots. Many prisoners languished in captivity for over eleven years. This book tells the story of these men and women. Hell Upon Water examines how prisoners of war were acquired by the British, how they were fed, clothed and accommodated by the Transport Board of the Admiralty. The larger prisons such as Dartmoor, Portchester Castle and Norman Cross are described in detail, alongside the smaller lesser known depots of Forton, Stapleton, and Mill Bay. It compares the treatment of French prisoners with that of Britons in France, and also tells the stories of officers who fell in love with local girls and married, and those who fought to escape.

Prisoners of War in Britain 1756 to 1815

"The first comprehensive listing of these ships in English. . . . Profusely illustrated [and] impressively informative." —Midwest Book Review The origins of a permanent French sailing navy can be traced to the work of Cardinal Richelieu in the 1620s, but this naval force declined rapidly in the 1650s and a virtually new Marine Royale had to be re-created by Colbert from 1661. Thereafter, Louis XIV's navy grew rapidly to become the largest and most powerful in the world, at the same time establishing a reputation for the quality of its ship design that lasted until the end of sail. The eighteenth century was to see defeat and decline, revival and victory, but by 1786 the French Navy had emerged from its most successful naval war having frequently outfought or outmaneuvered the British Navy in battle, and in the process making a major contribution to American independence. This book provides significant technical and building data as well as highlights of the careers of each ship in every class. For the first time, it is possible to form a clear picture of the overall development of French warships throughout the whole of the sailing era. "A handy and quick reference to a variety of vessels . . . [A] top notch reference book." —British Tars, 1740-1790

Sea Narratives: Cultural Responses to the Sea, 1600–Present

"Yankee Sailors in British Gaols offers the first comprehensive account of American servicemen detained within the confines of Mill and Forton prisons, the principal land-based detention centers in Britain during the American Revolution. Forton and Mill during the course of the War of Independence held approximately 3,000 American prisoners, almost all of them naval personnel. In a few cases, these American prisoners were incarcerated for more than four years, a longer recorded period of incarceration in overseas prisons than in any United States war prior to Vietnam. Professor Cohen's examination of wide-ranging and widely scattered primary and secondary sources provides an extraordinarily detailed picture of life within the closed society of each prison, as well as insight into the various ways in which Britons and Americans outside the prisons provided legal and extralegal help to the rebel detainees."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Hell Upon Water

Some 12 years ago it was estimated that well over 300,000 works existed on this period and since then several thousand more have appeared. Therefore, it might be reasonably argued that there is little room for another volume. Nonetheless, this vast outpouring of literature has usually dealt with major leaders, specific battles or campaigns, and with certain branches of the service. Moreover, at least in English, the literature tends to concentrate primarily on the French or British armies. There appears to be a lack of works combining a description of the major changes and trends in the art of war, especially at the cutting edge of events, with a discussion of the French military establishment and the armies of the major opponents, British as well as continental. And while this book is only a brief survey, I do believe that it may serve as a contribution towards filling this gap in our historical knowledge of military institutions and fighting men.

Napoleonic Prisoners of War in Ashby de la Zouch

This Is A New Release Of The Original 1914 Edition.

The Depot for Prisoners of War at Norman Cross, Huntingdonshire, 1796 to 1816 (1913)

This is a transcription of War of 1812 prisoner of war records of American sailors, marines and merchantmen which were transcribed from the ledgers of the British Admiralty. These men were either captured off the coast of western Europe or who were taken off British warships and merchant vessels in England at the beginning of the war. The Royal Navy's Plymouth Naval Base was the home of one of the three prisoner of war prison ship facilities which were used during the War of 1812 to house American prisoners of war. The facility had been used since 1796 to intern French prisoners of war during the Napoleonic Wars. A total of 3,568 Americans, including 392 African-Americans, one Indian and one Chinese, were interned at Plymouth for up to three months before being transferred to Ashburton, Portsmouth, Dartmoor, Chatham or Stapleton prison of war facilities. The ledgers from Plymouth include the listing of the crews from the U.S. Brigs Argus and Syren plus a partial crew listing from the U.S. Frigate Chesapeake. Mr. Johnson is a lineal descendant of seven veterans of the War of 1812, and he is the past president of the Society of the War of 1812 in the State of Ohio (2008-2011). He is currently the Registrar General for the General Society of the War of 1812; and has served as the Historian General (2011-2014) and the Archivist General (2014-2017) for this society.

French Warships in the Age of Sail, 1626–1786

Et mindre og summarisk skrift om krigsfangers arbejde under fangenskabet i England under krigene i perioden 1756-1815.

Yankee Sailors in British Gaols

"Waterloo, morne plaine ..." (Waterloo, sad plain). These three words still echo in French people's minds. Beyond Victor Hugo's writings, they remember that it was a defeat rather than a battle and also, depending on where your opinions lie, the final act of a fantastic epic or that of a terrible despot. June 1815, the 18th a day which will give Wellington and Blucher immortal glory and sealed the fate of Europe for decades. Authentic proof of the battle has had to be found at its source. Two centuries afterwards, the only valid proof, in our opinion, was those objects which had really been at Waterloo. Strangely enough, with all the books and publications on the subject, nobody ever seemed to have taken an interest in this aspect. And yet their emotional capital still remains intact, from the very famous hat belonging to Napoleon to the uniform button of an obscure infantry fusilier.

PRISONERS OF WAR IN BRITAIN 1756 TO 1815

A narrative analysis of the complex evolution of the Continental Army, with the lineages of the 177 individual units that comprised the Army, and fourteen charts depicting regimental organization.

The Art of Warfare in the Age of Napoleon

American Military History provides the United States Army-in particular, its young officers, NCOs, and cadets-with a comprehensive but brief account of its past. The Center of Military History first published this work in 1956 as a textbook for senior ROTC courses. Since then it has gone through a number of updates and revisions, but the primary intent has remained the same. Support for military history

education has always been a principal mission of the Center, and this new edition of an invaluable history furthers that purpose. The history of an active organization tends to expand rapidly as the organization grows larger and more complex. The period since the Vietnam War, at which point the most recent edition ended, has been a significant one for the Army, a busy period of expanding roles and missions and of fundamental organizational changes. In particular, the explosion of missions and deployments since 11 September 2001 has necessitated the creation of additional, open-ended chapters in the story of the U.S. Army in action. This first volume covers the Army's history from its birth in 1775 to the eve of World War I. By 1917, the United States was already a world power. The Army had sent large expeditionary forces beyond the American hemisphere, and at the beginning of the new century Secretary of War Elihu Root had proposed changes and reforms that within a generation would shape the Army of the future. But world war-global war-was still to come. The second volume of this new edition will take up that story and extend it into the twenty-first century and the early years of the war on terrorism and includes an analysis of the wars in Afghanistan and Iraq up to January 2009.

Prisoners of War in Britain, 1756 to 1815

This book is the second in a series that looks at how America has cared for its war casualties and veterans, picking up where the first book left off, after World War II and just before the start of the Korean War, and continuing through today.

American Prisoners of War Held at Plymouth During the War of 1812

Prisoners-Of-War Work
