Writing to Clients and Referring Professionals about Psychological Assessment Results

This book is the first on the craft of effective writing structured expressly for the psychologist-assessor. Author J. B. Allyn, a professional writer who specializes in psychology, combines reference book with tutorial. She blends information on the qualities that create a writer's unique presence on the page with illustrations of correct English grammar. All of the questions, answers, and illustrations evolved from the concerns of psychologist-assessors, as did the examples, which are grounded in their writing and communication needs. The result creates a guide for report writing that can be used by either practicing professionals or graduate psychology students. The book divides into three sections: The first and third sections discuss various aspects of effective communication, while the second is a handbook of common grammar problems. Helpful elements guide the reader through the text, including frequent bullet lists, tables and graphs, and grammar and style examples that are framed around assessment reports. It is also written in a conversational tone, which creates the same style it proposes for effectively written reports, and is a key tool for clear and appropriate communication. Readers will refer back to this book, both for quick tips on style and grammar, which are appropriate for any mental health practitioner, and for more detailed advice on writing and communication in assessment reports.

A patient's personal view of long term care. Seen through the eyes of a patient totally paralyzed with Guillain-Barré syndrome, this moving book takes you through the psychological and physical pain of an eleven month hospital stay. *BED NUMBER TEN* reads like a compelling novel, but is entirely factual. You will meet: The ICU staff who learned to communicate with the paralyzed woman - and those who did not bother. The physicians whose visits left her baffled about her own case. The staff and physicians who spoke to her and others who did not recognize her presence. The nurse who tucked Sue tightly under the covers, unaware that she was soaking with perspiration. The nurse who took the time to feed her drop by drop, as she slowly learned how to swallow again. The physical therapist who could read her eyes and spurred her on to move again as if the battle were his own. In these pages, which reveal the caring, the heroism, and the insensitivity sometimes found in the health care fields, you may even meet people you know.
