This book reverses everything you believed about the brain and aging. The brain doesn't deteriorate as you get older: your brain can improve with age. It makes sense: older people have experienced more in life than younger people. They've had to adapt to many more changes, so older brains are potentially more flexible. Your brain has virtually infinite possibilities for learning and making connections, and this capacity can increase as you age. This book shows you how. It will enable you to become a much better thinker and communicator as you progress through life. You will be able to: Remember names, facts, and figures using easy to learn memory techniques. Achieve higher levels of creativity, clearer organization of thoughts, increased concentration, better communications, and dramatically improved memory and creativity. Read more rapidly and with greater retention. Learn principles and techniques used by great minds in the business, sports, and creative worlds. This book will show you how to apply these principles for success. With this knowledge, you will be able to achieve just about anything you want and do it progressively better as you mature!

Initially associated with hi-tech irrigated agriculture, drip irrigation is now being used by a much wider range of farmers in emerging and developing countries. This book documents the enthusiasm, spread and use of drip irrigation systems by smallholders but also some disappointments and disillusion faced in the global South. It explores and explains under which conditions it works, for whom and with what effects. The book deals with drip irrigation 'behind the scenes', showcasing what largely remain 'untold stories'. Most research on drip irrigation use plot-level studies to demonstrate the technology's ability to save water or improve efficiencies and use a narrow and rather prescriptive engineering or economic language. They tend to be grounded in a firm belief in the technology and focus on the identification of ways to improve or better realize its potential. The technology also figures prominently in poverty alleviation or agricultural modernization narratives, figuring as a tool to help smallholders become more innovative, entrepreneurial and business minded. Instead of focusing on its potential, this book looks at drip irrigation-in-use, making sense of what it does from the perspectives of the farmers who use it, and of the development workers and agencies, policymakers, private companies, local craftsmen, engineers, extension agents or researchers who engage with it for a diversity of reasons and to realize a multiplicity of objectives. While anchored in a sound engineering understanding of the design and operating principles of the technology, the book extends the analysis beyond engineering and hydraulics to understand drip irrigation as a sociotechnical phenomenon that not only changes the way water is supplied to crops but also transforms agricultural farming systems and even how society is organized. The book provides field evidence from a diversity of interdisciplinary case studies in sub-Saharan Africa, the Mediterranean, Latin America, and South Asia, thus revealing some of the untold stories of drip irrigation.

This is a systematically arranged, annotated collection of outstanding literary works dealing with drink. It centers on some of the most enduring themes in both literary depictions of drinking and alcohol research: causes of drinking; effects of drinking; the tavern; drinking and family life; drinking and gender; and the spiritual dimension of drinking. Organized into chapters reflecting these themes, it encourages readers to think about drinking alcohol as a practice that is deeply cultural as well as biochemical. After a comprehensive introduction, the anthology provides informative headnotes to each selection, and ranges broadly across different cultures and periods, thus providing insights into patterns of similarity

and difference in literature's treatment of a controversial, pervasive aspect of human experience. Instructors considering this book for use in a course may request an examination copy [here](#).

Ski Europe takes skiers step by step through planning the winter vacation of their dreams in the Alps in Austria, Italy, Switzerland or France as well as major resorts in Spain and Andorra. Just like here in the United States or Canada, every European resort has its quirks and specialties, notes Leocha. Seasoned skiers know that some resorts are better for singles, others better for families. Some offer cozy chalets, others feature modern hotels right on the slopes. And while one resort may be heaven for beginning skiers it may be boring for the expert. Ski Europe organizes all the necessary information to make intelligent choices and provides the phone numbers to make reservations and plans. Over more than a decade Ski Europe has become known for its no-holds-barred, brutally honest reports on reality at ski resorts. Ski Europe takes no advertising, has no ax to grind, and, like Ski America and Canada, is written by Leocha together with an international team of prize-winning ski and snowboard journalists.
