Planets of the Solar System

The eight planets in their increasing order of distance from the Sun are Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus and Neptune.

Mercury is the smallest planet in the solar system.

As Mercury is nearest to the Sun, it is extremely hot during the day and extremely cold during the night.

The second planet Venus, is the hottest and brightest of all planets.

The third planet in the solar system is our planet Earth.

Nearly 70% of the Earth's surface is covered with water, due to which the Earth is also called the blue planet. It is the only planet on which life is known to exist.

The fourth planet is Mars. It is also known as the red planet, because of the presence of red soil and rocks.

The fifth and the largest planet in the solar system is Jupiter.

The sixth planet, i.e. Saturn is the second largest planet in the solar system.

The seventh planet is Uranus. A thick layer of gas covers this planet.

The eighth planet is Neptune.

As this planet is farthest from the Sun, cold winds blow here at very high speeds.

## Unlearn Your Pain

The groundbreaking book that explains Sensory Processing Disorder (SPD)--and presents a drug-free approach that offers hope for parents--now revised and updated. Does your child exhibit... Over-responsivity--or under-responsivity--to touch or movement? A child with SPD may be a "sensory avoider," withdrawing from touch, refusing to wear certain clothing, avoiding active games--or he may be a "sensory disregarder," needing a jump start to get moving. Over-responsivity--or under-responsivity--to sounds, sights taste, or smell? She may cover her ears or eyes, be a picky eater, or seem oblivious to sensory cues. Cravings for sensation? The "sensory craver" never gets enough of certain sensations, e.g., messy play, spicy food, noisy action, and perpetual movement. Poor sensory discrimination? She may not sense the difference between objects or experiences--unaware of what she's holding unless she looks, and unable to sense when she's falling or how to catch herself. Unusually high or low activity level? The child may be constantly on the go--wearing out everyone around him--or move slowly and tire easily, showing little interest in the world. Problems with posture or motor coordination? He may slouch, move awkwardly, seem careless or accident-prone. These are often the first clues to Sensory Processing Disorder--a common but frequently misdiagnosed problem in which the central nervous system misinterprets messages from the senses. The Out-of-Sync Child offers comprehensive, clear information for parents and professionals--and a drug-free treatment approach for children. This revised edition includes new sections on vision and hearing, picky eaters, and disorders such as autism, among other topics.

## The Out-of-Sync Child

Fans of adventure, romance, and a strong heroine will love this action-packed historical trilogy by three-time Newbery Honor winner and New York Times bestselling author Jennifer L. Holm. 1855. The unknown wilds of the Pacific Northwest—a land not yet tamed, and certainly not fitting for a proper young lady! Yet that's just where Miss Jane Peck finds herself. After a tumultuous childhood on the wrong side of Philadelphia high society, Jane is trying to put aside her reckless ways and be accepted as a proper young lady. And so when handsome William Baldt proposes, she joyfully accepts and prepares to join him in a world away from her home in Washington Territory. But Miss Hepplewhite's straitlaced finishing school was hardly preparation for the treacherous months at sea it takes to get there, the haunting loss she'll face on the way, or the colorful characters and crude life that await her on the frontier.

Annawadi is a slum at the edge of Mumbai Airport, in the shadow of shining new luxury hotels. Its residents are garbage recyclers and construction workers, economic migrants, all of them living in the hope that a small part of India's booming future will eventually be theirs. But when a crime rocks the slum community and global recession and terrorism shocks the city, tensions over religion, caste, sex, power, and economic envy begin to turn brutal. As Boo gets to know those who dwell at Mumbai's margins, she evokes an extraordinarily vivid and vigorous group of individuals flourishing against the odds amid the complications, corruptions and gross inequalities of the new India.
