Study Guide, International Financial Management, 6th Edition [by] Jeff Madura

A new study guide, written by Jeff Madura and Oliver Schnusenberg, now accompanies the text. This study guide focuses on helping students test their knowledge of the material. It simulates text questions for key terms and key concepts, with numerous matching, multiple choice, and true/false questions for every chapter.

International Financial Markets

This text describes financial markets and institutions by providing a conceptual framework to understand why markets exist and what their role is in the financial environment. Each type of financial market is described with a focus on its utilization by financial institutions, its internationalization, and recent events that have affected it. Each type of financial institution is described with a focus on its regulatory aspects, management, use of financial markets, and performance. This edition continues its strong tradition of emphasizing timely examples and practical applications, including Internet materials, and offers a unique tie into Internet resources. This text has the same chapters as the full edition. We placed certain chapters online at <http://madura.swlearning.com>. Many courses do not cover all materials in the text. We placed the chapters on the website to lower the cost and represent the course materials for the majority of Professors teaching this course.

The Handbook of Behavioral Finance is a comprehensive, topical and concise source of cutting-edge research on recent developments in behavioral finance. The Handbook is divided into three areas of interest. The first - Behavioral Biases - includes discussions on herding in the market, information processing and the disposition effect in investment decisions. In the second section - Behavior in the Investment Process - topics explored include the effects of higher transaction costs on traders' behavior, investor sentiment, overconfidence and active management, and behavior effects on forecasts. The

final section - Global Behavior - looks at the effects of various aspects of behavioral finance in international markets including Malaysia, Finland, Australia and Brazil. Consolidating a colossal amount of research into one volume, this Handbook will stimulate new interdisciplinary research for academics, build a body of knowledge about psychological influences on market behavior for finance students, and give practitioners a better understanding of psychological influences on the markets in order to improve investment decision making.

FINANCIAL MARKETS AND INSTITUTIONS, Ninth Edition (with Stock-Trak coupon), provides a conceptual framework to help students understand why financial markets exist, how financial institutions serve those markets, and the various services those institutions offer. In describing each type of market, the text emphasizes the securities traded in that market and how financial institutions participate in it, while descriptions of financial institutions focus on their management, performance, regulatory aspects, use of financial markets, and sources and uses of funds. Following the introduction of key financial markets and institutions, the text explores the functions of the Federal Reserve System, the major debt security markets, equity security markets, and the derivative security market. Numerous pedagogical features, such as Global Aspects (indicating international coverage within the chapter), Point/Counterpoint (discussions presenting both sides of a controversial issue), Interpreting Financial News, and Internet Exercises, reinforce the key concepts of the text. Continuing a strong tradition of timely examples and practical applications, the ninth edition also includes extensive updates on the global financial and credit crisis, revised questions and exercises, and new WALL STREET JOURNAL features. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

FT Guide to Finance for Non-Financial Managers

A succinct, readable, easily-accessed discussion of the benefits, risks, and methods of international portfolio management. Madura's book will be of special value to institutional investors, analysts, corporate CFOs and others who want to tap into the potential of offshore securities markets but who may be restrained by fears of running afoul of prudent man legislation. Madura explains methods to reduce such market risks, and how exchange rates are affected by economic conditions and how their movements affect global portfolio returns, not only in industrialized but also in emerging securities markets. With tables and other figures to illustrate his points, Madura's book will provide needed, reassuring guidance for investors seeking portfolio diversification with lessened risk, and with benefits that may be uncommon in domestic markets. Madura first provides an overview of methods to measure the returns and risks of foreign securities, with an explanation of what portfolio risk is and the factors that determine whether a particular portfolio is sufficiently diversified. In his second chapter he describes the methods used by portfolio managers to invest internationally, the choices that are practical and available to them, and the advantages and disadvantages of each method. In Chapter 3, he discusses ways to value foreign stocks and bonds guidelines to help make purchase decisions. His fourth chapter explains how to hedge a portfolio against market risk and introduces derivative securities and their hedging benefits. Chapter 5 explains factors that affect exchange rate movements and Chapter 6 discusses the methods one can use in hedging. In Chapter 7, Madura describes concepts of asset allocation and the role played by derivative securities. Chapter 8 provides background on emerging markets, which portfolio managers often turn to in efforts to achieve extra returns or more effective diversification. Madura wraps it all up with a sensible explanation of how portfolio managers can realistically evaluate their global investment performance.

Handbook of Behavioral Finance

Combining academic theory with practical case studies, this book helps students understand global financial markets and business management.

Covers managing risk and working as a financial risk manager Provides everything you need to know about measuring financial risk Walks you through working in financial institutions Demonstrates how to communicate risk If you work in the financial sector and want to make financial risk management your mission, you've come to the right place!

Financial Markets and Institutions

A practical and accessible overview of the fundamentals of business finance -- now in its third edition. Managers are constantly expected to make decisions that reflect a full understanding of the financial consequences. In the absence of formal training, few people are prepared for the responsibilities of dealing with management reports, budgets, and capital proposals, and find themselves embarrassed by their lack of understanding. This book is a practical guide to understanding and managing financial responsibilities. Each chapter examines actual tasks managers have to do, from "how to assemble a budget," "how to read variances on a report," to "how to construct a proposal to invest in new equipment," exploring the principles that can be applied to each task, illustrating practical ways these principles are used, and providing guidance for implementation. Guide to Financial Management will help readers understand financial jargon, financial statements, management accounts, performance measures, budgeting, costing, pricing, decision-making, and investment appraisal. This third edition has been fully revised and expanded with detailed examples from 100 leading businesses around the world.

International Adoption

This text presents an argument for a more complex view of transnational adoption, including stranger adoption, kinship adoption, fostering, and informal circulating children.

International Adoption

In the past two decades, transnational adoption has exploded in scope and significance, growing up along increasingly globalized economic relations and the development and improvement of reproductive technologies. A complex and understudied system, transnational adoption opens a window onto the relations between nations, the inequalities of the rich and the poor, and the history of race and racialization. Transnational adoption has been marked by the geographies of unequal power, as children move from poorer countries and families to wealthier ones, yet little work has been done to synthesize its complex and sometimes contradictory effects. Rather than focusing only on the United States, as much previous work on the topic does, *International Adoption* considers the perspectives of a number of sending countries as well as other receiving countries, particularly in Europe. The book also reminds us that the U.S. also sends children into international adoptions--particularly children of color. The book thus complicates the standard scholarly treatment of the subject, which tends to focus on the tensions between those who argue that transnational adoption is an outgrowth of American wealth, power, and military might (as well as a rejection of adoption from domestic foster care) and those who maintain that it is about a desire to help children in need.

Rather than focusing only on the United States, as much previous work on the topic does, *International Adoption* considers the perspectives of a number of sending countries as well as other receiving countries, particularly in Europe. The book also reminds us that the U.S. also sends children into international adoptions—particularly children of color. The book thus complicates the standard scholarly treatment of the subject, which tends to focus on the tensions between those who argue that transnational adoption is an outgrowth of American wealth, power, and military might (as well as a rejection of adoption from domestic foster care) and those who maintain that it is about a desire to help children in need.

Somebody's Children

A feminist historian and an adoptive parent, Laura Briggs gives an account of transracial and transnational adoption from the point of view of the mothers and communities that lose their children.

The Circulation of Children

In this vivid ethnography, Jessaca B. Leinaweaver explores “child circulation,” informal arrangements in which indigenous Andean children are sent by their parents to live in other households. At first glance, child circulation appears tantamount to child abandonment. When seen in that light, the practice is a violation of international norms regarding children’s rights, guidelines that the Peruvian state relies on in regulating legal adoptions. Leinaweaver demonstrates that such an understanding of the practice is simplistic and misleading. Her in-depth ethnographic analysis reveals child circulation to be a meaningful, pragmatic social practice for poor and indigenous Peruvians, a flexible system of kinship that has likely been part of Andean lives for centuries. Child circulation may be initiated because parents cannot care for their children, because a childless elder wants company, or because it gives a young person the opportunity to gain needed skills. Leinaweaver provides insight into the emotional and material factors that bring together and separate indigenous Andean families in the highland city of Ayacucho. She describes how child circulation is intimately linked to survival in the city, which has had to withstand colonialism, economic isolation, and the devastating civil war unleashed by the Shining Path. Leinaweaver examines the practice from the perspective of parents who send their children to live in other households, the adults who receive them, and the children themselves. She relates child circulation to international laws and norms regarding children’s rights, adoptions, and orphans, and to Peru’s history of racial conflict and violence. Given that history, Leinaweaver maintains that it is not surprising that child circulation, a practice associated with Peru’s impoverished indigenous community, is alternately ignored, tolerated, or condemned by the state.

Global Families, Inequality and Transnational Adoption

This book looks at the simultaneous processes of making and un-making of families that are part of the adoption practice. Whereas most studies on transnational adoption concentrate on the adoptive family, the author identifies not only the happy occasion when a family gains a child, but also the sorrow and loss of the child to its family of origin. Situating transnational adoption in the context of the Global North-South divide, Hogbacka investigates the devastating effects of unequal life chances and asymmetrical power relations on the adoption process and on the mothers whose children are adopted. Based on unique primary material gathered in in-depth interviews with South African families of origin and Finnish adoptive families, the book investigates the decision-making processes of both sets of parents and the encounters between them. The first mothers’ narratives are juxtaposed with those of the adopters and of the adoption social workers who act on the principles of the wider adoption system. Concluding with a critique of the Global Northism that exemplifies current practices, Hogbacka sketches the contours of a more just approach to transnational adoption that would shatter rather than perpetuate inequality. The book can also be read as an expose of the consequences of current inequalities for poor families. *Global Families, Inequality and Transnational Adoption* will be of interest to students and scholars of adoption studies, family and kinship, sociology, anthropology, social work and development.

Global Families

In the last fifty years, transnational adoption—specifically, the adoption of Asian children—has exploded in popularity as an alternative path to family making. Despite the cultural acceptance of this practice, surprisingly little attention has been paid to the factors that allowed Asian international adoption to

flourish. In *Global Families*, Catherine Ceniza Choy unearths the little-known historical origins of Asian international adoption in the United States. Beginning with the post-World War II presence of the U.S. military in Asia, she reveals how mixed-race children born of Japanese, Korean, and Vietnamese women and U.S. servicemen comprised one of the earliest groups of adoptive children. Based on extensive archival research, *Global Families* moves beyond one-dimensional portrayals of Asian international adoption as either a progressive form of U.S. multiculturalism or as an exploitative form of cultural and economic imperialism. Rather, Choy acknowledges the complexity of the phenomenon, illuminating both its radical possibilities of a world united across national, cultural, and racial divides through family formation and its strong potential for reinforcing the very racial and cultural hierarchies it sought to challenge.

The Intercountry Adoption Debate

Meaningful discussion about intercountry adoption (the adoption of a child from one country by a family from another country) necessitates an understanding of a complex range of issues. These issues intersect at multiple levels and processes, span geographic and political boundaries, and emerge from radically different cultural beliefs and systems. The result is a myriad of benefits and costs that are both global and deeply personal in scope. This edited volume introduces this complexity an ...

From Intercountry Adoption to Global Surrogacy

Intercountry adoption has undergone a radical decline since 2004 when it reached a peak of approximately 45,000 children adopted globally. Its practice had been linked to conflict, poverty, gender inequality, and claims of human trafficking, ultimately leading to the establishment of the Hague Convention on Intercountry Adoption (HCIA). This international private law along with the Convention on the Rights of the Child affirm the best interests of the child as paramount in making decisions on behalf of children and families with obligations specifically oriented to safeguards in adoption practices. In 2004, as intercountry adoption peaked and then began a dramatic decline, commercial global surrogacy contracts began to take off in India. Global surrogacy gained in popularity owing, in part, to improved assisted reproductive technology methods, the ease with which people can make global surrogacy arrangements, and same-sex couples seeking the option to have their own genetically-related children. Yet regulation remains an issue, so much so that the Hague Conference on Private International Law has undertaken research and assessed the many dilemmas as an expert group considers drafting a new law, with some similarities to the HCIA and a strong emphasis on parentage. This ground-breaking book presents a detailed history and applies policy and human rights issues with an emphasis on the best interests of the child within intercountry adoption and the new conceptions of protection necessary in global surrogacy. To meet this end, voices of surrogate mothers in the US and India ground discourse as authors consider the human rights concerns and policy implications. For both intercountry adoption and global surrogacy, the complexity of the social context anchors the discourse inclusive of the intersections of poverty and privilege. This examination of the inevitable problems is presented at a time in which the pathways to global surrogacy appear to be shifting as the Supreme Court of India weighs in on the future of the industry there while Thailand, Cambodia and other countries have banned the practice all together. There is speculation that countries in Africa and possibly Central America appear poised to pick up the multi-million dollar industry as the demand for healthy infants continues on.

Routledge Handbook of Family Law and Policy

Changes in family structures, demographics, social attitudes and economic policies over the last 60 years have had a large impact on family lives and correspondingly on family law. The Second Edition of this Handbook draws upon recent developments to provide a comprehensive and up-to-date global perspective on the policy challenges facing family law and policy round the world. The chapters apply legal, sociological, demographic and social work research to explore the most significant issues that have been commanding the attention of family law policymakers in recent years. Featuring contributions from renowned global experts, the book draws on multiple jurisdictions and offers comparative analysis across a range of countries. The book addresses a range of issues, including the role of the state in supporting families and protecting the vulnerable, children's rights and parental authority, sexual orientation, same-sex unions and gender in family law, and the status of marriage and other forms of adult relationships. It also focuses on divorce and separation and their consequences, the relationship between civil law and the law of minority groups, refugees and migrants and the movement of

family members between jurisdictions along with assisted conception, surrogacy and adoption. This advanced-level reference work will be essential reading for students, researchers and scholars of family law and social policy as well as policymakers in the field.

The End of International Adoption?

Estye Fenton studies parents in the United States who adopted internationally in the past decade. She investigates the experiences of a cohort of adoptive mothers who were forced to negotiate their desire to be parents in the context of a growing societal awareness of international adoption as a flawed reproductive marketplace.

Empire's Children

A definitive history of child emigration across the British Empire from the 1860s to its decline in the 1960s.

Unequal Motherhoods and the Adoption of Asian Children

This book explores adoption of Asian children by white Americans, looking at multiple ways in which adoptive, birth, and foster mothers experience gender oppression from their different positions of class, race, and nationality and bringing to light the interdependencies and inequalities of the motherhoods of these three groups.

Stories of Culture and Place

Stories of Culture and Place makes use of one of anthropology's most enduring elements—story-telling—to introduce students to the excitement of the discipline. The authors invite students to think of anthropology as a series of stories that emerge from cultural encounters in particular times and places. References to classic and contemporary ethnographic examples—from *Coming of Age in Samoa* to *Coming of Age in Second Life*—allow students to grasp anthropology's sometimes problematic past, while still capturing the potential of the discipline. This new edition has been significantly reorganized and includes two new chapters—one on health and one on economic change—as well as fresh ethnographic examples. The result is a more streamlined introductory text that offers thorough coverage but is still manageable to teach.

Adoption Beyond Borders

This book provides a ringing endorsement of international adoption based on comprehensive evidence from social and biological sciences paired with the author's first-hand experience visiting a Kazakhstani orphanage for nearly a year. A balanced account of the evidence supports international adoption as a viable means of promoting child welfare

The Globalization of Adoption

This book expands our understanding of the growing, yet largely unstudied practice of intercountry adoption.

Working with Adoptive Parents

Practical techniques for guiding parents through the stages of adoption and beyond "This book makes a significant contribution to both a greater understanding of adoption and its complex dynamic constellations as well as to serving those who are or come across adoption families, many of whom count on us adoption-informed mental health professionals to clarify and facilitate the challenges they face." —From the Foreword by Henri Parens, MD, Professor of Psychiatry, Thomas Jefferson University, Training and Supervising Analyst, Psychoanalytic Center of Philadelphia "What most people don't know about adoption could fill a book—and this is the book. Finally sorting myth from science, *Working with Adoptive Parents* will give therapists, and quite a few nonprofessionals considering adoption, the real story of what it means to make this momentous choice. Better yet, it does so without letting the data speak in place of the parents themselves, in all their fear, doubt, and joy." —Jesse Green, author of *The Velveteen Father: An Unexpected Journey to Parenthood* Editors Virginia Brabender and April Fallon are clinical psychologists and also adoptive parents whose families are acquainted with both the uncertainty and joy of adoption. In *Working with Adoptive Parents*, they offer an in-depth treatment of the distinctive needs, feelings, impulses, expectations, and conflicts that adoptive parents experience through the stages of adoption and beyond. This volume offers a comprehensive picture of adoption through an exploration of the experiences and developmental processes of the adoptive parent. Featuring contributions from mental health professionals whose careers have focused on work with families through the adoption process, this unique book: Covers the theory, research, and practice of adoptive parenting throughout the life cycle Explores the issues unique to the adoptive mother and adoptive father as they traverse the stages of parenting Offers a close look at families with special needs children Acknowledges and explores the great diversity among adoptive families and the kinship networks in which they are embedded Examines attachment issues between adoptive parent and child Providing a framework for therapists to conceptualize their work with adoptive parents, *Working with Adoptive Parents* clarifies and facilitates the journey that many of these families face.

Handbook of Cultural Security

This Handbook aims to heighten our awareness of the unique and delicate interplay between 'Culture' and 'Society' in the age of globalization. With particular emphasis on the role of culture in the field of "non-traditional" security, and seeking to define what 'being secure' means in different contexts, this Handbook explores the emerging concept of cultural security, providing a platform for future debates in both academic and policy fields.

The Oxford Handbook of Developmental Psychology and the Law

"In the *Oxford Handbook of Developmental Psychology and the Law*, eminent scholars from varied disciplines detail how developmental science and the law shape one another across the lifespan. The chapters address fundamental questions about how human development influences laws and practices in the legal system and how the law and its practices influence development. The chapters, as well, reveal how the potential for, and consequences of, victimization and perpetration—whether they be criminal or civil acts—are impacted by and impact development. The diversity of topics, range of influences across the lifespan, and complexities of developmental and legal influences are on display throughout the volume. In Section I, which spanned Infancy and Childhood to Adolescence, authors covered such topics as prenatal and infant abuse; the development of antisocial behavior in children and adolescents; questioning of minor victims, witnesses, and suspects; treatment of youth in juvenile, criminal, and specialty courts but also in immigration, custody, and adoption hearings, and finally in schools and prisons. In Section II, which spanned Adulthood to Aging, authors addressed some of the same topics, but here from the perspective of younger and older adults. These include antisocial behavior in adults, the experiences of elder adults as victim/witnesses, and experiences in

prison, especially among parents and the elderly. Other topics were covered as well, including persons with developmental disabilities involvement in the courts, reentry transitions after incarceration, and reproductive and end-of-life legal rights. Across this comprehensive volume, authors demonstrate the immense value of research for policy and practice and viewing legal involvement through the lens of lifespan development"--

A Legal History of Adoption in Ontario. 1921-2015

Lori Chambers' fascinating study explores the legal history of adoption in Ontario since the passage of the first statute in 1921. This volume explores a wide range of themes and issues in the history of adoption including: the reasons for the creation of statutory adoption, the increasing voice of unmarried fathers in newborn adoption, the reasons for movement away from secrecy in adoption, the evolution of step-parent adoption, the adoption of Indigenous children, and the growth of international adoption. Unlike other works on adoption, Chambers focuses explicitly on statutes, statutory debates and the interpretation of statutes in court. In doing so, she concludes that adoption is an inadequate response to child welfare and on its own cannot solve problems regarding child neglect and abuse. Rather, Chambers argues that in order to reform the area of adoption we must first acknowledge that it is built upon social inequalities within and between nations.

Gender, Health, and Society in Contemporary Latin America and the Caribbean

Gender, Health, and Society in Contemporary Latin America and the Caribbean uses case studies, ethnographic research, and theoretical analysis to craft locally defined cultural critiques of gender and health in modern Latin American societies as well as for Latinx peoples in the greater diaspora.

Raising the World

Sara Fieldston shows how humanitarian child welfare agencies sponsored by Americans filtered political power through the prism of familial love after World War II. These well-meaning institutions shaped perceptions of the United States as the benevolent parent in a family of nations, and helped to expand American hegemony around the globe.

Milk Sauce and Paprika

The compelling story of Hungarian children living with Belgian families during the interwar period. Children who migrated without their families were noteworthy participants of interwar European migration history. Milk Sauce and Paprika tells the story of Hungarian children who were sent to Belgium in the framework of a humanitarian project between 1923 and 1927. Based on a wide variety of sources such as official documents, contemporary newspapers, photographs, family correspondences, biographies and interviews, this book examines the history of the Belgian-Hungarian child relief project and describes its social and cultural impacts on the families involved in both countries. This compelling story of one of the first mass European child migration movements offers new insights in the dynamics of national and religious communities. Furthermore, it sheds light on intimate family life and contemporary habits and values regarding parenting and co-parenting in the interwar period. Cutting across national and cultural borders, this monograph connects individual and collective memory with the experiences of childhood and migration.

Cultures in Refuge

New formulations of globalisation have radically altered how people conceptualize the movement of people, ideas and capital throughout the globe, with questions of securitisation and transnational sentiment re-shaping long-standing Western concepts of asylum and human rights. Questioning the

manner in which the reception of sanctuary in modern Australia changes migrants' sense of belonging, this interdisciplinary volume focuses on the disjuncture between receiving sanctuary and feeling secure in one's self and community. With emphasis on the formation and expression of migrant and refugee cultures, the book deliberately blurs the distinction between migrants and refugees, in order to engage more directly with the subjectivities of lived experience and social networks. Presenting research from the fields of sociology, media studies, politics, international relations and history, *Cultures in Refuge* places explores the manner in which notions of asylum and refuge affect the processes of articulating and negotiating identities.

South of the Future

South Asia and Latin America represent two epicenters of migrant care work and the globalized reproductive market. Yet scholars and the media continue to examine them in geographical and conceptual isolation. *South of the Future* closes both these gaps. It investigates nannying, elder care, domestic work, and other forms of migrant labor in the Americas together with the emerging "Wild West" of biotechnology and surrogacy in the Indian subcontinent. The volume is profoundly interdisciplinary and includes both prominent and emerging scholars from a wide variety of fields, including anthropology, law, literary and cultural studies, science and technology studies, and social policy. These contributors speak to the dynamic, continually changing facets of the nexus of care and value across these two key regions of the global south. By mobilizing specific locations and techno-economics and putting them into dialogue with one another, *South of the Future* rematerializes the gendered, racialized bodies that are far too often rendered invisible in structural analyses of the global south, or else are confined to particular geo- and biopolitical paradigms of emerging markets. Instead, these bodies occupy the center of a global, highly financialized economy of creating and sustaining life.

Adoption from Care

EPDF and EPUB available Open Access under CC-BY-NC-ND. This book explores how children's rights are weighed against parents' rights in a range of countries, and examines how governments and legal and welfare professionals balance those rights following the decision that children cannot grow up in their parents' care.

The Market In Babies

The Market in Babies: Stories of Australian Adoption tells the history of adoption in Australia from its beginnings in the nineteenth century to its decline at the beginning of the twenty-first. The authors find that a market in babies has long existed. In the early years supply outstripped demand: needy babies were hard to place. Mid-twentieth century supply and demand grew together, with adoption presented as the perfect solution to two social problems: infertility and illegitimacy. Supply declined in the 1970s and demand turned to new global markets. Now these markets are closing, but technology provides new opportunities and Australians are acquiring babies through the surrogacy markets of India and the United States. As the rate of adoptions in Australia falls to an historic low, and parliaments across the country are apologising to parents and adoptees for the pain caused by past practices, this book identifies an historical continuum between the past and the present, and challenges the view that the best interests of the child can ever be protected in an environment where the market in babies is allowed to flourish. The authors of *The Market in Babies* are long-established scholars expert in the history of the family, welfare history and the making of public policy in Australia.

Adoption, Memory, and Cold War Greece

Reveals the history of how 3,000 Greek children were shipped to the United States for adoption in the postwar period

International Handbook on Gender and Demographic Processes

This handbook presents a comprehensive and up-to-date overview of gender in demography, addressing the many different influences of gender that arise from or influence demographic processes. It collects in one volume the key issues and perspectives in this area, whereby demography is broadly defined. The purpose in casting a wide net is to cover the range of work being done within demography, but at the same time to open up our perspectives to neighboring fields to encourage better conversations around these issues. The chapters in this handbook carefully document definition and measurement issues, and take up parts of the demographic picture and focus on how gender plays a role in outcomes. In other cases, gender often plays a cross-cutting role in social processes; rather than having a single or easily distinguishable role, it often combines with other social institutions and even other statuses and inequalities to affect outcomes. Thus, a key factor in this volume is how gender interacts with race/ethnicity, class, nationality, and sexuality in any demographic setting. While each section contains chapters that are broad overviews of the current state of knowledge and behavior, the handbook also includes chapters that focus on specific cultures or events in order to examine how gender operates in a particular circumstance.

Legitimizing Life

Sonja van Wichelen boldly describes how contemporary justifications of cross-border adoption navigate between child welfare, humanitarianism, family making, capitalism, science, and health. Focusing on contemporary institutional practices of adoption in the United States and the Netherlands, she traces how professionals, bureaucrats, lawyers, politicians, social workers, and experts legitimate a practice that became progressively controversial.

Japan's Imperial Underworlds

Explores Sino-Japanese relations through encounters that took place between each country's people living at the margins of empire.

Transnational Adoption

Each year, thousands of Chinese children, primarily abandoned infant girls, are adopted by Americans. Yet we know very little about the local and transnational processes that characterize this new migration. *Transnational Adoption* is a unique ethnographic study of China/U.S. adoption, the largest contemporary intercountry adoption program. Sara K. Dorow begins by situating the popularity of the China/U.S. adoption process within a broader history of immigration and adoption. She then follows the path of the adoption process: the institutions and bureaucracies in both China and the United States that prepare children and parents for each other; the stories and practices that legitimate them coming together as transnational families; the strains placed upon our common notions of what motherhood means; and ways in which parents then construct the cultural and racial identities of adopted children. Based on rich ethnographic evidence, including interviews with and observation of people on both sides of the Pacific—from orphanages, government officials, and adoption agencies to advocacy groups and adoptive families themselves—this is a fascinating look at the latest chapter in Chinese-American migration.

Modern Families

The kinds of families we see today are different than they were even a decade ago as paths to parenthood have been rejiggered by technology, activism, and law. Gamson brings us extraordinary family creation tales that illuminate this changing world of contemporary kinship. He tells a variety of unconventional family-creation tales-- adoption and assisted reproduction, gay and straight parents, coupled and single, and multi-parent families-- set against the social, legal, and economic contexts in which they were made.

Broken Links, Enduring Ties

Family-making in America is in a state of flux—the ways people compose their families is changing, including those who choose to adopt. *Broken Links, Enduring Ties* is a groundbreaking comparative investigation of transnational and interracial adoptions in America. Linda Seligmann uncovers the impact of these adoptions over the last twenty years on the ideologies and cultural assumptions that Americans hold about families and how they are constituted. Seligmann explores whether or

not new kinds of families and communities are emerging as a result of these adoptions, providing a compelling narrative on how adoptive families thrive and struggle to create lasting ties. Seligmann observed and interviewed numerous adoptive parents and children, non-adoptive families, religious figures, teachers and administrators, and adoption brokers. The book uncovers that adoption—once wholly stigmatized—is now often embraced either as a romanticized mission of rescue or, conversely, as simply one among multiple ways to make a family.

The Globalization of Motherhood

Brings together research from the Global North and the Global South to illuminate how contemporary motherhood is changed by the processes of globalization.

The Traffic in Babies

. Exploring how and why babies were moved across borders, *The Traffic in Babies* is a fascinating look at how social workers and other policy makers tried to find birth mothers, adopted children, and adoptive parents

An Anthropology of Disappearance

All over the world, people disappear from their families, communities and the state's bureaucratic gaze, as victims of oppressive regimes or while migrating along clandestine routes. This volume brings together scholars who engage ethnographically with such disappearances in various cultural, social and political contexts. It takes an anthropological perspective on questions about human life and death, absence and presence, rituals and mourning, liminality and structures, citizenship and personhood as well as agency and power. The chapters explore the political dimension of disappearances and address methodological, epistemological and ethical challenges of researching disappearances and the disappeared. The combination of disappearance through political violence, crime, voluntary disappearance and migration make this book a unique combination.
