Love the 80s? A laugh out loud, coming-of-age comedy with a heartwarming conclusion you won't see coming! Hold on for the ride as these bodacious, bubblegum-pop princesses skate you back through the days of bad perms, bathroom bullies, bogus curfews, boy crushes, and burping contests! The Economist

The Crescent Beach Mall of South Carolina was your basic modern shopping center—boutiques, eateries, movie theaters, and a packed parking lot—until the very fabric of reality unraveled. Now the mall is a supernatural oddity known worldwide as “Pandora’s Box.” People travel from miles around to have their chance inside: some emerge with amazing stories, some leave the mall insane, and many are simply never seen again. Sebastian makes a bundle offering tours into the bowels of Pandora. To assuage his conscience, he gives visitors fair warning: if they have personal demons, they should not go inside. Problem is, the Box, as the locals call it, is most seductive to the worst kind of customers—haunted, twisted and desperate misfits—people who should never be allowed to visit a world that reflects their warped souls. The locals of Crescent Beach realize the magical effects are spreading beyond the confines of the haunted shopping complex. Children’s toys become weapons, pets mutate into monsters, and the flow of time itself is corrupted. Sebastian is no longer the only one in over his balding head. Sheriff Valerie Dunn is there to back up the morally bankrupt tour guide, but can they withstand the power—and temptation—of Pandora’s Box? Time to hit the mall; check your psychological baggage at the door.

Pandora 2011

This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria

for assessing evidence on causation. This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to identifying those who may be particularly susceptible, and to assessing the potential risks of tobacco products.

Have you been putting bullion in your soup? Is incorrect spelling starting to have a negative affect on your term papers? Do you wonder what someone is inferring when they tell you to pick up a dictionary? These are just a few of the commonly misunderstood words discussed and explained in *Abused, Confused, and Misused Words*, an entertaining and informative look at the ever-changing nature of the English language. An alphabetical list of words that are frequently misspelled or misused is accompanied by a style guide to usage rules that tells you how and why they can be broken. Also included is a collection of 1,000 new and inventive words, and nearly 30,000 more words are discussed in a section dealing with word roots and how they are used in modern language. Anyone who is intrigued by language, who is fascinated by words, or who simply wants to use our language clearly and effectively will enjoy this delightful, eye-opening collection.

Inspired by a meeting with Tennessee Williams, American playwright William Inge found success early, winning a Pulitzer for drama and an Academy Award for best screenplay. His small-town upbringing profoundly influenced his writing, and one of his major recurring themes was the traditional roles of gender. This close study of Inge's work focuses particularly on his technique of "gendermandering," patterns of gender-role reversals which Inge exploits not only for dramatic effect but also to subvert social expectations. Fully considered are stereotypes and established gender roles, especially as they were reinforced socially during the 1940s and 1950s. The author concentrates largely on material that is strictly Inge's, not adaptations or collaborations, and on work that has been published and is readily available to the general public. All major plays; a collection of his short plays; the screenplay of *Splendor in the Grass* (1961); and his novel *Good Luck, Miss Wyckoff* are covered. Some of Inge's more inaccessible material, including a few short published plays as well as some of the unpublished manuscripts held in the Inge Collection at Independence Community College in Independence, Kansas, is also addressed.

Abused, Confused, and Misused Words

An intellectual memoir by the author of the acclaimed *Imagined Communities* Born in China, Benedict Anderson spent his childhood in California and Ireland, was educated in England and finally found a home at Cornell University, where he immersed himself in the growing field of Southeast Asian studies. He was expelled from Suharto's Indonesia after revealing the military to be behind the attempted coup of 1965, an event which prompted reprisals that killed up to a million communists and their supporters. Banned from the country for thirty-five years, he continued his research in Thailand and the Philippines, producing a very fine study of the Filipino novelist and patriot José Rizal in *The Age of Globalization*. In *A Life Beyond Boundaries*, Anderson recounts a life spent open to the world. Here he reveals the joys of learning languages, the importance of fieldwork, the pleasures of translation, the influence of the New Left on global thinking, the satisfactions of teaching, and a love of world literature. He discusses the ideas and inspirations behind his best-known work, *Imagined Communities* (1983), whose complexities changed the study of nationalism. Benedict Anderson died in Java in December 2015, soon after he had finished correcting the proofs of this book. The tributes that poured in from Asia alone suggest that his work will continue to inspire and stimulate minds young and old.
