Marion Zimmer Bradley

This literary companion surveys the young adult works of American author Marion Zimmer Bradley, primarily known for her work in the fantasy genre. An A to Z arrangement includes coverage of novels (The Catch Trap, Survey Ship, The Fall of Atlantis, The Firebrand, The Forest House and The Mists of Avalon), the graphic narrative Warrior Woman, the Lythande novella The Gratitude of Kings, and, from the Darkover series, The Shattered Chain, The Sword of Aldones and Traitor's Sun. Separate entries on dominant themes--rape, divination, religion, violence, womanhood, adaptation and dreams--comb stories and longer works for the author's insights about the motivation of institutions that oppress marginalized groups, especially women.

The Field Day Anthology of Irish Writing

Contributions to this book probe the contexts--both social and spiritual--from which select iconic figures emerge and discover how to present themselves as innovators and cultural leaders as well as draw material into forms that subsequent generations consider innovative or emblematic. The overall import of the book is to locate producers of culture such as authors, poets, singers, and artists as leaders

both in their respective genres and of culture and society more broadly through the influence exerted by their works.

Cultural Icons and Cultural Leadership

A telling look at today's "reverse" migration of white, middle-class expats from north to south, through the lens of one South American city. Even as the "migration crisis" from the Global South to the Global North rages on, another, lower-key and yet important migration has been gathering pace in recent years—that of mostly white, middle-class people moving in the opposite direction. *Gringolandia* is that rare book to consider this phenomenon in all its complexity. Matthew Hayes focuses on North Americans relocating to Cuenca, Ecuador, the country's third-largest city and a UNESCO World Heritage Site. Many began relocating there after the 2008 economic crisis. Most are self-professed "economic refugees" who sought offshore retirement, affordable medical care, and/or a lower-cost location. Others, however, sought adventure marked by relocation to an unfamiliar cultural environment and to experience personal growth through travel, illustrative of contemporary cultures of aging. These life projects are often motivated by a desire to escape economic and political conditions in North America. Regardless of their individual motivations, Hayes argues, such North–South migrants remain embedded in unequal and unfair global social relations. He explores the repercussions on the host country—from rising prices for land and rent to the reproduction of colonial patterns of domination and subordination. In Ecuador, heritage preservation and tourism development reflect the interests and culture of European-descendent landowning elites, who have most to benefit from the new North–South migration. In the process, they participate in transnational gentrification that marginalizes popular traditions and nonwhite mestizo and indigenous informal workers. The contrast between the migration experiences of North Americans in Ecuador and those of Ecuadorians or others from such regions of the Global South in North America and Europe demonstrates that, in fact, what we face is not so much a global "migration crisis" but a crisis of global social justice.

In this study, which is first of all a folk-lore study, we pursue principally an anthropo-psychological method of interpreting the Celtic belief in fairies, though we do not hesitate now and then to call in the aid of philology; and we make good use of the evidence offered by mythologies, religions, metaphysics, and physical sciences.

Until the 1960s, the Ayoreo people of Paraguay's Chaco region had remained uncontacted by the world. But as development encroached on their territory, the Ayoreo began to experience rapid cultural change. Paola Canova looks at one aspect of this change in *Frontier Intimacies*: the sexual practices of Ayoreo women, specifically the *curajodie*, or single women who exchange sex for money or material goods with non-Ayoreo men, often Mennonite settlers. Weaving personal anecdotes into her extensive research, Canova shows how the advancement of economic and missionary frontiers has reconfigured gender roles, sexual ethics, and notions of desire in the region. Ayoreo women, she shows, have reappropriated their sexual practices, approaching intimate liaisons on their own terms and seeing the involvement of money not as morally problematic but as constitutive of sexual encounters. By using their sexuality to construct an intimate frontier operating according to their own logics, Canova reveals, Ayoreo women expose the fractured workings of frontier capitalism in spaces of rapid transformation. Inviting broader examination of the ways in which contemporary frontier economies are constructed and experienced, *Frontier Intimacies* brings a captivating new perspective to the economic development of the Chaco region.

Palomitáy is an orphanage in highland Peru that provides a home for unmarried mothers as young as twelve years old. In their ordinary lives, these young women encounter diverse social expectations and face moral dilemmas. They endeavor to create a 'good life' for themselves and their children in a context complicated by competing demands, economic uncertainties, and structured relations of power. Drawing on a year of qualitative on-site research, Krista E. Van Vleet offers a rich ethnography of Palomitáy's young women. She pays particular attention to the moral entanglements that emerge via people's efforts to provide care amid the inequalities and insecurities of today's Peru. State and nonstate participants involved in the women's intimate lives influence how the women see themselves

as mothers, students, and citizens. Both deserving of care and responsible for caring for others, the young women must navigate practices interwoven with a range of a racial, gendered, and class hierarchies. Groundbreaking and original, *Hierarchies of Care* highlights the moral engagement of young women seeking to understand themselves and their place in society in the presence of circumstances that are both precarious and full of hope.

What are the most popular names of the Ambo people in Namibia? Why do so many Ambos have Finnish first names? What do the African names of these people mean? Why is the namesake so important in Ambo culture? How did the nation's long struggle for independence affect personal naming, and what are the latest name-giving trends in Namibia? This study analyses the changes in the personal naming system of the Ambo people in Namibia over the past 120 years, starting with 1883, when the first Ambos received biblical and European names on baptism. The central factors in this process were the German and South African colonisation and European missionary work on the one hand, and the rise of African nationalism on the other. Eventually, this clash between African and European naming practices led to a new, dynamic naming system which includes elements of both African and European origin. "Within the field of onomastics, i.e. the scientific study of names, this study is a remarkable and extremely important one. ... I suspect that it will become a major and standard reference work in the future, not only regarding Ambo anthroponymy, but anthroponymy in general, particularly where cultures interact." Professor S. J. Neethling, University of the Western Cape, South Africa

During the past decade a significant international research effort has been directed towards understanding the composition and regulation of the precocular tear film. This effort has been motivated by the recognition that the tear film plays an essential role in maintaining corneal and conjunctival integrity, protecting against microbial challenge and preserving visual acuity. In addition, research has been stimulated by the knowledge that alteration or deficiency of the tear film, which occurs in countless individuals throughout the world, may lead to desiccation of the ocular surface, ulceration and perforation of the cornea, an increased incidence of infectious disease, and potentially, pronounced visual disability and blindness. 7 To promote further progress in this field of vision research, the International Conference on the Lacrimal Gland, Tear Film and Dry Eye Syndromes: Basic Science and Clinical Relevance was held in the Southampton Princess Resort in Bermuda from November 14 to 17, 1992. This meeting was designed to assess critically the current knowledge and 'state of the art' research on the structure and function of lacrimal tissue and tears in both health and disease. The goal of this conference was to provide an international exchange of information that would be of value to basic scientists involved in eye research, to physicians in the ophthalmological community, and to

pharmaceutical companies with an interest in the treatment of lacrimal gland, tear film or ocular surface disorders (e. g. Sjogren's syndrome).

Hierarchies of Care

This book focuses on the archaeology of the hunter-gatherer societies that inhabited Europe in the millennia between the Last Ice Age and the spread of agriculture, between 10,000 and 5,000 years ago. Traditionally viewed as a period of cultural stagnation, new data now demonstrate that this was a period of radical change and innovation. This was the period that witnessed the colonization of extensive new territory at high latitudes and high altitudes following postglacial climatic change, the development of seafaring, and the synthesis of the technological, economic, and social capabilities that underpinned the later development of agricultural and urban societies.

This work documents Robinson's every known public performance or appearance, listing co-workers, source material, background and critical commentary. The entries include feature films, documentaries, short subjects, cartoons, television and radio productions, live theatre presentations, narrations, pageants, and recordings. The 1960s and 1970s were the heyday of spaghetti westerns--low-budget films about the early American West mostly filmed in Italy. Though sometimes derided as excessively violent imitations of American-made westerns, they attracted a substantial following that has endured. With its classic elements of gunfights, gambling, heroes, sidekicks, love, and death, the genre is now perceived by critics as an intriguing object of study. This book analyzes the construction of the stories presented in spaghetti westerns. It examines the content of the Italian western using concepts and constructs borrowed from scholars studying "pre-industrial" narratives. Plot, the constellation of characters, their relationship to each other, and their motives are studied. Films examined in detail include the seminal *A Fistful of Dollars* as well as *Django*, *For a Few Dollars More* and *The Good, the Bad and the Ugly*. There is also a discussion of the early spaghetti westerns. The study then probes the elements of bounty hunters, the deprived hero, partnerships, betrayal, and comedy. An appendix details the top grossing Italian westerns between 1964 and 1975, including title, director, lead actor and intake. A second appendix provides a list of films quoted by Italian title and then by English title.

A detailed and riveting account of the U.S. Navy's greatest mutiny and its wide-ranging cultural and historical impact The greatest controversy in the history of the U.S. Navy of the early American Republic was the revelation that the son of the Secretary of War had seemingly plotted a bloody mutiny that would have turned the U.S. brig *Somers* into a pirate ship. The plot discovered, he and his co-conspirators were hastily condemned and hanged at sea. The repercussions of those acts brought headlines, scandal, a fistfight at a cabinet meeting, a court martial, ruined lives, lost reputations, and tales of a haunted ship bound for the devil and lost tragically at sea with many of its crew. The *Somers* affair led to the founding of the U.S. Naval Academy and it remains the Navy's only acknowledged mutiny in its history. The story also inspired Herman Melville's *White-Jacket* and *Billy Budd*. Others connected to the *Somers* included Commodore Perry, a relation and defender of the *Somers'* captain Mackenzie; James Fenimore Cooper, whose feud with the captain, dating back to the War of 1812, resurfaced in his reportage of the affair; and Raphael Semmes, the *Somers'* last captain who later served in the Confederate Navy. *The Curse of the Somers* is a thorough recreation of this classic tale, told with the help of recently uncovered evidence. Written by a maritime historian and archaeologist who helped identify the long-lost wreck and subsequently studied its sunken remains, this is a timeless tale of life and death at sea. James P. Delgado re-examines the circumstances, drawing from a rich historical record and from the investigation of the ship's sunken remains. What surfaces is an all-too-human tale that resonates and chills across the centuries.

The Bible has inspired Western art and literature for centuries, so it is no surprise that Christian iconography, characters, and stories have also appeared in many comic books. Yet the sheer stylistic range of these comics is stunning. They include books from Christian publishers, as well as underground comix with religious themes and a vast array of DC, Marvel, and Dark Horse titles, from Hellboy to Preacher. Christianity and Comics presents an 80-year history of the various ways that the comics industry has drawn from biblical source material. It explores how some publishers specifically targeted Christian audiences with titles like Catholic Comics, books featuring heroic versions of Oral Roberts and Billy Graham, and special religious-themed editions of Archie. But it also considers how popular mainstream comics like Daredevil, The Sandman, Ghost Rider, and Batman are infused with Christian themes and imagery. Comics scholar Blair Davis pays special attention to how the medium's unique use of panels, word balloons, captions, and serialized storytelling have provided vehicles for telling familiar biblical tales in new ways. Spanning the Golden Age of comics to the present day, this book charts how comics have both reflected and influenced Americans' changing attitudes towards religion.

A boy raised by wild dogs fights for survival in this gripping post apocalyptic tale by an acclaimed Carnegie Medalist. Jeet is a dogchild, raised by the wild dogs who killed his parents, then recaptured and "rehumanized." He now lives with one of only two remaining human communities in the world, besieged by the much larger enemy clan. In a wasteland shaped by war, starvation, and haunting violence, Jeet grapples with his identity — he misses his wild family, and the people of his clan see dogchildren as less than human. When the human clans begin to prepare for a final, bloody battle against each other, Jeet is at the center. His struggle and his relationship with another rehumanized dogchild shed light on what it means to be human or inhuman — and what it takes to be a survivor. In his most ambitious novel yet, Carnegie Medalist Kevin Brooks offers a breathless work of speculative fiction that will have readers at the edge of their seat.

The New Real Book

While violence runs rampant throughout New York, a teenage girl faces danger within her own home in Meg Medina's riveting coming-of-age novel. Nora Lopez is seventeen during the infamous New York summer of 1977, when the city is besieged by arson, a massive blackout, and a serial killer named Son of Sam who shoots young women on the streets. Nora's family life isn't going so well either: her bullying brother, Hector, is growing more threatening by the day, her mother is helpless and falling behind on the rent, and her father calls only on holidays. All Nora wants is to turn eighteen and be on her own. And while there is a cute new guy who started working with her at the deli, is dating even worth the risk when the killer likes picking off couples who stay out too late? Award-winning author Meg Medina transports us to a time when New York seemed balanced on a knife-edge, with tempers and temperatures running high, to share the story of a young woman who discovers that the greatest dangers are often closer than we like to admit — and the hardest to accept.

Including treatments of two new, exciting topics--Critical Race Feminism and Critical White Studies--this volume is truly on "the cutting edge." Questions for discussion and reading suggestions after each part make this volume essential for those interested in law, the multiculturalism movement, political science, and critical thought. In this wide-ranging second edition, Richard Delgado and Jean Stefancic bring together the finest, most illustrative, and highly accessible articles in the fast-growing legal genre of Critical Race Theory. In challenging orthodoxy, questioning the premises of liberalism, and debating sacred wisdoms, Critical Race Theory scholars writing over the past few years have indelibly changed the way America looks at race. This edition contains treatment of all the topics covered in the first edition, along with provocative and probing questions for discussion and detailed suggestions for additional reading, all of which set this fine volume apart from the field. In addition, this edition contains five new substantive units--crime, critical race practice, intergroup tensions and alliances, gay/lesbian issues, and transcending the black-white binary paradigm of race. In each of these areas, groundbreaking scholarship by the movement's founding figures as well as the brightest new stars provides immediate entry to current trends and developments in critical civil rights thought. Author note: Richard Delgado, Jean Lindsley Professor of Law at the University of Colorado at Boulder, is one of the founding members of the Conference on Critical Race Theory. Winner of the Association of American Law Schools' 1995 Clyde Ferguson Award for outstanding law professor of color, he is the author of over 100 articles in the law review literature on civil rights and of several books, including *Failed Revolutions*, *Words that Wound*, and *The Rodrigo Chronicles*. Jean Stefancic, Research Associate in Law at the University of

Colorado, is the author of leading articles and books on Critical Race Theory, Latino/a scholarship, and social change, including No Mercy: How Conservative Think Tanks and Foundations Changed America's Social Agenda (Temple).

A Man on the Moon

'IMPRESSIVE AND ILLUMINATING' TOM HANKS This is the definitive account of the heroic Apollo programme. When astronauts Neil Armstrong and Buzz Aldrin took their 'giant leap for mankind' across a ghostly lunar landscape, they were watched by some 600 million people on Earth 240,000 miles away. Drawing on hundreds of hours of in-depth interviews with the astronauts and mission personnel, this is the story of the twentieth century's greatest human achievement, minute-by-minute, through the eyes of those who were there. From the tragedy of the fire in Apollo 1 during a simulated launch, Apollo 8's bold pioneering flight around the moon, through to the euphoria of the first moonwalk, and to the discoveries made by the first scientist on the moon aboard Apollo 17, this book covers it all. 'An extraordinary book . . . Space, with its limitless boundaries, has the power to inspire, to change lives, to make the impossible happen. Chaikin's superb book demonstrates how' Sunday Times 'A superb account . . . Apollo may be the only achievement by which our age is remembered a thousand years from now' Arthur C. Clarke 'The authoritative masterpiece' Los Angeles Times

The Last Man on the Moon

The basis of the 2014 award-winning feature-length documentary! A revealing and dramatic look at the inside of the American Space Program from one of its pioneers. Eugene Cernan was a unique American who came of age as an astronaut during the most exciting and dangerous decade of spaceflight. His career spanned the entire Gemini and Apollo programs, from being the first person to spacewalk all the way around our world to the moment when he left man's last footprint on the Moon as commander of Apollo 17. Between those two historic events lay more adventures than an ordinary person could imagine as Cernan repeatedly put his life, his family and everything he held dear on the altar of an obsessive desire. Written with New York Times bestselling author Don Davis, *The Last Man on the Moon* is the astronaut story never before told - about the fear, love and sacrifice demanded of the few men who dared to reach beyond the heavens for the biggest prize of all - the Moon.

Man on the Moon

The American people are frustrated with their government-dismayed by a series of high-profile failures (Iraq, Katrina, the financial meltdown) that seems to just keep getting longer. Yet our nation has a proud history of great achievements: victory in World War II, our national highway system, welfare reform, the moon landing. We need more successes like these to reclaim government's legacy of competence. In *If We Can Put a Man on the Moon*, William Eggers and John O'Leary explain how to do it. The key? Understand-and avoid-the common pitfalls that trip up public-sector leaders during the journey from idea to results. The authors identify pitfalls including: -The Partial Map Trap: Fumbling handoffs throughout project execution -The Tolstoy Syndrome: Seeing only the possibilities you want to see -Design-Free Design: Designing policies for passage through the legislature, not for implementation -The Overconfidence Trap: Creating unrealistic budgets and timelines -The Complacency Trap: Failing to recognize that a program needs change At a time of unprecedented challenges, this book, with its abundant examples and hands-on advice, is the essential guide to making our government work better. A must-read for every public official, this book will be of interest to anyone who cares about the future of democracy.

Moon Man

Don't worry... he's up there! Since time immemorial, humans have looked upward toward the shimmering light of the moon and wondered about the fantastical happenings that were, perhaps, taking place on its craggy surface—a timeless, dreamlike desire personified in the mythic figure of the "Man in the Moon." Even in the decades since humanity has chartered, via man and machine, its once-unknown terrain, the moon still radiates an enduring, alluring mystique for children and adults alike. "The Man in the Moon," a novel by novelist, screenplay and teleplay author Neil Bloom, and the first in the "Man in the Moon" trilogy, chronicles the out-of-this-world adventures of astronaut Philip Brewstow, who is marooned on the moon during a space mission gone awry. Abandoned by his commanding officer and presumed dead by all but his young daughter Angelina, Philip discovers a shocking secret no other human has ever known: the Man in the Moon is real and there's an entire "world" that thrives beneath its surface. But this world—on whose light, whose tidal regulations, whose perpetual presence our own Earth depends—is under grave peril as its energy source is dwindling swiftly, with no solution in sight. Back on Earth, Angelina's unswerving belief in her father's survival is vindicated when she finally opens the letter he left for her years ago. Soon, Philip's best friend and space partner Colonel Adam Trinidad manages to gain access to a top-secret, hidden spacecraft, the untested SK-1 (prototype), which will take him on a perilous unauthorized venture to the moon—accompanied, he'll soon find out, by a young stowaway whose love for her father knows no earthly bounds. But as the potential reward is great, so, too, is the risk.

From earning a pilot's certificate at age 16 to being a test pilot for supersonic jets, Armstrong spent most of the early part of his life perfecting the skills he would need for the historic Moon landing. Calm and collected under pressure, he was an ideal candidate for NASA's astronaut program, and is remembered for his famous words, spoken after he set foot on the Moon: "That's one small step for a man, one giant leap for mankind." Full-color illustrations and historically accurate text make this biography an entertaining, educational, and inspiring read for those who enjoy history and graphic novels.

If We Can Put a Man on the Moon

Everyone knows the story of the first astronauts to step foot on the moon, but what about the astronaut who manned the spaceship orbiting the moon 14 times alone in space while the others walked? Awarded both a Boston Globe–Horn Book Honor and a Batchelder Award Honor, this lauded book describes what Michael Collins did, saw, and thought about during his journey as well as the larger story of how the astronauts prepared for their historic space flight, what they brought with them...and what they left behind. Reminiscent of a scrapbook and featuring drawings as well as photos taken both in space and on Earth, this is a book for anyone who has ever looked at the moon and wondered what it would be like to see it up close.

The Greedy Man in the Moon

"He's a gambler at best. A con artist at worst," her aunt had said of the handlebar-mustached man who snatched Ella Wallace away from her dreams of studying art in France. Eighteen years later, that man has disappeared, leaving Ella alone and struggling to support her three sons. While the world is embroiled in World War I, Ella fights her own personal battle to keep the mystical Florida land that has been in her family for generations from the hands of an unscrupulous banker. When a mysterious man arrives at Ella's door in an unconventional way, he convinces her he can help her avoid foreclosure, and a tenuous trust begins. But as the fight for Ella's land intensifies, it becomes evident that things are not as they appear. Hypocrisy and murder soon shake the coastal town of Apalachicola and jeopardize Ella's family.

Man on the Moon

The world is delighted when a space craft containing a crew made up of the world's astronauts lands on the moon, they think for the first time. But the delight turns to shock when the astronauts discover an old British flag and a document declaring that the moon is taken for Queen Victoria proving that the astronauts were not the first men on the moon. On Earth, an investigation team finds the last of the Victorian crew - a now aged Arnold Bedford and he tells them the story of how he and his girlfriend, Katherine Callender, meet up with an inventor, Joseph Cavor, in 1899. Cavor has invented Cavorite, a paste that will allow anything to deflect gravity and he created a sphere that will actually take them to the moon. Taking Arnold and accidentally taking Katherine they fly to the moon where, to their total amazement, they discover a bee-like insect population who take an unhealthy interest in their Earthly visitors...
