In Kumihimo, each thread in one single "slit" is referred to as a warp. Here we will be using the round Kumihimo disk with 32 slits to create an 8 warp basic round braid. A good rule of thumb when measuring stringing material is to multiply the length you want by three. This will accommodate most designs unless you are using larger beads, in which case you may need to adjust the length. Once you have mastered the basic round braid, learn how to add beads to Kumihimo. Discover kumihimo book for beginner 'Complete Guide Kumihimo Beginner to Make Friendship Bracelets'.

Over 3,200 total slides and pages ... INTRODUCTION: Dogs have served in active service at the sides of their handlers for decades. They have been heroes, showing bravery under fire, saving lives (often losing their own), and bringing comfort to the injured and infirmed. The first recorded American use of military dogs was during the Seminole War of 1835 and again in 1842. In Florida and Louisiana, the Army used Cuban bred bloodhounds for tracking. During the US Civil War, dogs were used as messengers, guards, and unit mascots. The Army Quartermaster Corps began the US Armed Forces' first war dog training during World War II. By 1945, they had trained almost 10,000 war dogs for the Army, Navy, Marine Corps, and Coast Guard. Fifteen war dog platoons served overseas in World War II. Seven platoons saw service in Europe and eight in the Pacific. MWDs were trained at Fort Carson, Colorado, organized into scout dog platoons, and used in the Korean conflict for sentry duty and support of combat patrols. In 1957, MWD training moved to Lackland Air Force base (LAFB), Texas, with the Air Force managing the program. Throughout the Vietnam Conflict, the Military Police Corps used dogs with considerable success. Most of these were sentry dogs used to safeguard critical installations such as ports and airfields. A new dimension in canine utilization was realized when marijuana detector dog teams were trained and deployed to assist military police in suppressing illicit drug traffic. Sentry and marijuana detector dog teams were then deployed worldwide in support of military police. An important outgrowth of the conflict was the development of canine research and development efforts. These ongoing efforts were able to initiate the first steps toward developing a more intelligent and stronger military dog, training dogs to detect specific drugs and explosives, developing multiple-purpose dogs, and employing tactical dogs by electronic remote control. In the 1990s and early 2000s, MWDs were deployed around the globe in military operations such as Just Cause, Desert Shield and Desert Storm, Uphold Democracy, and Enduring Freedom and Iraqi Freedom. These teams were effectively utilized to enhance the security of critical facilities and areas, as well as bolster force protection and antiterrorism missions, allowing commanders to use military police

K9 Decoys and Aggression

"K9 Professional Tracking explores the theory and training for clean-scent tracking dogs--those that follow an individual human scent on various ground surfaces. The book explores historical and contemporary research with valuable findings that add to the professional trainer's understanding of how and what dogs smell on a track. This background understanding then helps trainers and handlers troubleshoot when training their dogs to track. Training exercises are covered from early puppy training, sports, and then beginning and advanced clean-scent tracking, including cross-tracks and troubleshooting common issues."--

K9 Schutzhund Training, Updated 2nd Ed.

A good decoy needs to be an expert in canine communication, and needs to know how to use this language to stimulate aggression in the dog. This book explains, step by step, how to understand the canine paralanguage and how to use your own body to communicate with the dog. It then explains the different types of natural dog aggression and how to use its own language to trigger the useful types without being abusive to the dog. Decoys and Aggression also describes drills designed to develop skill in the decoy. Some are designed to be conducted without dogs until the human demonstrates enough body control to work with a live animal without injuring the dog or himself. This book is the first to combine inter-species communication skills with the specific types of aggression known to be useful to police dog trainers. As such, it is essential reading for all decoys, instructors and students alike, as well as for K9 personnel, handlers, and trainers.

Canadian Books in Print

Professional Schutzhund trainers and instructors Resi Gerritsen and Ruud Haak bring their years of knowledge and experience together in this book, K9 Schutzhund Training. Appropriate for training dogs for both protection work and for international sport dog certification and competition, this is designed to be an especially practical training method. Founded on the idea that effective training can only happen when a good bond and good communication exist between handler and dog, this method allows individual handler-dog teams to progress at their own speed. Different breeds and individual dogs may require different lengths of time and repetition to effectively learn to perform the exercises contained in this book. While many trainers claim a dog can be trained to perform to this level in only a few weeks, the authors show that effective, long-lasting results can only be achieved with time and patience. The three sections of this book focus on tracking, obedience and protection.

The Magic of Double Weave

Loom-controlled doubleweave is explored in depth in this handbook of out-of-print articles from textile innovators Weaver's and Prairie Wool Companion. Detailed instructions and gorgeous photographs illustrate how to design and weave 30 different projects including placemats, coverlets, jackets, bags, wall hangings, and throws using four- to sixteen-shaft looms. Instructions on the various ways to produce multiple layers with a loom--block-double weaves, stitched double cloths, and double-layered color effects--are provided alongside basic and intermediate-level drafting illustrations.

The Weaver's Studio: Doubleweave

Doubleweave is the art of weaving two layers of cloth at the same time, one above the other on the loom, creating beautiful cloth that is reversible yet unique on each side. Using pick-up techniques and clever color mixing, patterns emerge that are different but complementary on each side. The Weaver's Studio: Doubleweave begins with a brief history of doubleweave and how it has evolved into the contemporary weaving pieces seen today. Next, you will learn all the basics of doubleweave techniques, as well as tips and tricks of setting up the warp, and a variety of doubleweave specialty techniques all shown through detailed process photography and a wealth of swatches demonstrating different effects. Specialty techniques are shown for 4-shaft and 8-shaft looms. The weaving effects covered include lace, tubular weave, pick-up, color mixing, and more. And since doubleweave showcases color and pattern in unique ways, you will learn how to use these to great effect in your cloth designs. Throughout the book, you will find a wealth of inspiration with many examples of finished cloth and projects, from wall hangings and table runners to scarves and pillows.

The Big Book of Weaving

After a career working and living with American Indians and studying their traditions, Barre Toelken has written this sweeping study of Native American folklore in the West. Within a framework of performance theory, cultural worldview, and collaborative research, he examines Native American visual arts, dance, oral tradition (story and song), humor, and patterns of thinking and discovery to demonstrate what can be gleaned from Indian traditions by Natives and non-Natives alike. In the process he considers popular distortions of Indian beliefs, demystifies many traditions by showing how they can be comprehended within their cultural contexts, considers why some aspects of Native American life are not meant to be understood by or shared with outsiders, and emphasizes how much can be learned through sensitivity to and awareness of cultural values. Winner of the 2004 Chicago Folklore Prize, *The Anguish of Snails* is an essential work for the collection of any serious reader in folklore or Native American studies.

Weaving Iridescence

A tradition that dates back almost ten thousand years, basketry is an integral aspect of Cherokee culture. Cherokee Basketry describes the craft's forms, functions and methods and records the tradition's celebrated makers. In the mountains of Western North Carolina, stunning baskets are still made from river cane, white oak and honeysuckle and dyed with roots and bark. This complex art, passed down from mothers to daughters, is a thread that bonds modern Native Americans to ancestors and traditional ways of life. Anna Fariello, associate professor at Western Carolina University, reveals that baskets hold much more than food and clothing. Woven with the stories of those who produce and use them, these masterpieces remain a powerful testament to creativity and imagination.
