Based on extensive original research amongst small and medium sized enterprises in Saudi Arabia, it shows how businesses are started and how they grow in the context of an Islamic economy and society. It argues that as specific Islamic approaches to a wide range of economic activities are being formulated and implemented, there is indeed a particular Islamic approach to entrepreneurship. Examining the relationship between Islamic values and entrepreneurial activity, the book considers whether such values can be more effectively used in order to raise the profile of Islamic entrepreneurship, and also to promote alternatives to development in the contemporary business environment. A chronicle of recent events that have shaken the world, from the author of *Capital in the Twenty-First Century* "What makes this manifesto noteworthy is that it comes from . . . an economist who gained his reputation as a researcher with vaguely left-of-center sensibilities but was far from a radical. Yet the times are such . . . that even honest moderates are driven to radical remedies."—Robert Kuttner, *New York Times* As a correspondent for the French newspaper *Le Monde*, world-renowned economist Thomas Piketty has documented the rise and fall of Trump, the drama of Brexit, Emmanuel Macron's ascendance to the French presidency, the unfolding of a global pandemic, and much else besides, always from the perspective of his fight for a more equitable world. This collection brings together those articles and is prefaced by an extended introductory essay, in which Piketty argues that the time has come to support an inclusive and expansive conception of socialism as a counterweight against the hypercapitalism that defines our current economic ideology. These essays offer a first draft of history from one of the world's leading economists and public figures, detailing the struggle against inequalities and tax evasion, in favor of a federalist Europe and a globalization more respectful of work and the environment.

Why does capitalism triumph in the West but fail almost everywhere else? Elegantly, and with rare clarity, Hernando de Soto revolutionizes our understanding of what capital is and why it has failed to benefit four-fifths of mankind -- and explains the solution. 'A revolutionary book . . . may not be in the class of *Das Kapital*, Adam Smith's *Wealth of Nations* or Keynes's *General Theory*. But if the criteria for joining that exclusive club is a capacity not only to change permanently the way we look at the world, but also to change the world itself, then there are good grounds for thinking that this book is surely a contender.' Donald Macintyre, *The Independent* 'Few people in Britain have heard of Hernando de Soto . . . but *The Mystery of Capital* has already led the cognoscenti to put him in the pantheon of great progressive intellectuals of our age.' Mark Leonard, *New Statesman* 'A crucial contribution. A new proposal for change that is valid for the whole world' - Javier Perez de Cuellar (Former Secretary United Nations)

Updated with new findings on Gen Z! With five generations in the workplace at once, there's bound to be some sticking points. This is the first time in American history that we have five different generations working side-by-side in the workplace: the Traditionalists (born before 1945), the Baby Boomers (born 1946-1964), Gen X (born between 1965-1980), Millennials (born 1981-2001) and Gen Z (born 1996-present). Haydn Shaw, popular business speaker and generational expert, has identified 12 places where the 5 generations typically come apart in the workplace (and in life as well). These sticking points revolve around differing attitudes toward managing one's own time, texting, social media, organizational structure, and of course, clothing preferences. If we don't learn to work together and stick together around these 12 sticking points, then we'll be wasting a lot of time fighting each other instead of enjoying a friendly and productive team. Sticking Points is a must-read book that will help you understand the generational differences you encounter while teaching us how we can learn to speak one another's language and get better results together.

It is taken for granted in the knowledge economy that companies must employ the most talented performers to compete and succeed. Many firms try to buy stars by luring them away from competitors. But Boris Groysberg shows what an uncertain and disastrous practice this can be. After examining the careers of more than a thousand star analysts at Wall Street investment banks, and conducting more than two hundred frank interviews, Groysberg comes to a striking conclusion: star analysts who change firms suffer an immediate and lasting decline in performance. Their earlier excellence appears to have depended heavily on their former firms' general and proprietary resources, organizational cultures, networks, and colleagues. There are a few exceptions, such as stars who move with their teams and stars who switch to better firms. Female stars also perform better after changing jobs than their male counterparts do. But most stars who switch firms turn out to be meteors, quickly losing luster in their new settings. Groysberg also explores how some Wall Street research departments are successfully growing, retaining, and deploying their own stars. Finally, the book examines how its findings apply to many other occupations, from general managers to football players. *Chasing Stars* offers profound insights into the fundamental nature of outstanding performance. It also offers practical guidance to individuals on how to manage their careers strategically, and to companies on how to identify, develop, and keep talent.

The Book of Squares by Fibonacci is a gem in the mathematical literature and one of the most important mathematical treatises written in the Middle Ages. It is a collection of theorems on indeterminate analysis and equations of second degree which yield, among other results, a solution to a problem proposed by Master John of Palermo to Leonardo at the Court of Frederick II. The book was dedicated and presented to the Emperor at Pisa in 1225. Dating back to the 13th century the book exhibits the early and continued fascination of men with our number system and the relationship among numbers with special properties such as prime numbers, squares, and odd numbers. The faithful translation into modern English and the commentary by the translator make this book accessible to professional mathematicians and amateurs who have always been intrigued by the lure of our number system.

Ladybird Tales: Classic Stories to Share

In September of 1893, Norwegian zoologist Fridtjof Nansen and a crew manned the schooner Fram, intending to drift, frozen in the Arctic pack-ice, to the North Pole. When it became clear that they would miss the pole, Nansen and his companion Hjalmar Johansen struck off by themselves. Racing the shrinking pack-ice, they attempted, by dog-sled, to go "farthest north." They survived a winter in a moss hut eating walrus and polar bears, and the public assumed they were dead. In the spring of 1896, after three years of trekking, and having made it to within four degrees of the pole, they returned to safety. Nansen's narrative stands with the best writing on polar exploration.

Twee dinge gebeur daardie dag met my: Ek kry die vreeslike nuus, en ek kry 'n groot geskenk. Ma het my my hand gevat en dit sag aan my probeer verduidelik: "Elmar, sulke dinge gebeur maar tussen grootmense. Ek en jou pa het gedink ons het mekaar lief, maar dinge het verander." Maar toe ontdek ek die rooi vlieër ...

Keith Gottschalk is one of very few English language poets after Walt Whitman to compose poems celebrating engineers, inventions, and scientists. With wit and paradox, these poems explore our solar system, and celebrate astronomers and spaceflight. This collection opens with an imaginary trip through time from Copernicus to Einstein those who literally made space as we conceptualise it today. It closes with an imaginary trip through our solar system. In between, we find moving elegies to astronauts who lost their lives, and celebrations of a glittering international constellation of engineers, inventors, mathematicians, and researchers. Irony, allusions, double-entendres, and wonderment are always looking over the readers shoulder. Many of these poems, composed over thirty-four years, have already been individually published to acclaim in literary and other magazines.

Nadia het 'n geheim. Dit is die rede waarom sy by haar ouma in die Magoebaskloof moet gaan bly. Hier ontmoet sy vir Poenk. Bos-Poenk. Geheimsinnige Poenk. Poenk wat haar leer hoe paddaeiertjies ruik. Wat haar wys dat daar kleure soos ritselgroen, bangmaakgroen, fluistergroen, kieliegroen en flikkergroen bestaan. Poenk wie se naam sy oor en oor in haar huiswerkboek skryf. Wat vir haar gedigte lees en vir haar sprokies vertel. Poenk wat self 'n geheim in hom rond dra.

Destructive forces have been eroding the University of Cape Town, Africa's leading university. This book tells the sad, true tale of what has been transpiring. It is a saga of lunacy, criminality, pandering, and identity politics. The mad and the bad - the deranged, deluded, the depraved - have been granted endless latitude in bullying and abusing others. The decline began in 2015 with the Rhodes Must Fall protest that resulted in the offending statue's removal within a month, and which spawned similar protests abroad. Emboldened by their local success, the protestors issued new and ever-increasing demands later that year and then again in 2016 and 2017. Their methods also became criminal - including intimidation, assault, and arson. The university leadership capitulated to this behaviour, and this fostered a broader and now pervasive toxic environment within the institution. These developments offer important lessons for universities around the world that are yielding to the forces of a faux "progressivism".

Set in South Africa, MindF**k is a powerful, disturbing, and at times frightening story. Chris Burns, and his friends - Kerbs and Sky Eyes - take to the road, heading for the MindF**k rock festival. Along the way they pick up the gorgeous Partygirl. Burns and Partygirl connect immediately. But on the first night, while the rockmusic blasts from the stage, something unexpected happens - Burns's world gets turned on its head as one of the boys emerges from the tent with blood on his hands. MindF**k is a real page-turner. The gripping, character-focused, first-person narrative delves right to the heart of a life on-the-edge and virtually out of control. Gritty, hard-hitting, and often shocking, it is packed with drama, emotion, suspense and intrigue from one page to the next. And there is a serious sting in the tail. MindF**k is part of the Cutting Edge series: fast-paced, quick reads for teens and young adults looking for fiction which chimes with their perspective on life. Mindf**k is a title in the highly contemporary Cutting Edge fiction series for young adults. The series features fast-paced quick reads. Each book focuses on difficult topics and situations that many teenagers will have experienced first-hand or through friends. Cutting Edge is ideal for readers aged 14+ with a reading age of 12+.

Origins of the Cold War 1941-1949 covers the formative years of the momentous struggle which developed between two superpowers, the Soviet Union and the United States. It not only involved these titans but also the rest of the globe; many proxy wars were fought much to the detriment of the developing world. In a clear, concise manner, this book explains how the Cold War originated and developed between 1941 and 1949. The fourth edition is revised, updated and expanded to include new material on topics such as the culture wars and Stalin's view of Marxism. The introduction looks at the various approaches which have been adopted to analyse the Cold War and the challenges to arrive at a theory which can explain it. The book explores questions such as: - Who was responsible for the Cold War? - Was it inevitable or could it have been avoided? - Was Stalin genuinely interested in a post-war agreement? Illustrated with maps and figures and containing a chronology and who's who of key individuals, Origins of the Cold War 1941-1949 incorporates the most recent scholarship, theories and information to provide students with an invaluable introduction to a fascinating period that shaped today's world.

Las investigaciones científicas indican que el ejercicio moderado, practicado con regularidad varias veces por semana, añade años a la vida humana, rebaja significativamente los riesgos de padecer un gran número de enfermedades, y es una herramienta eficaz en el tratamiento de muchas patologías. Este es el marco general en el que se engloba la presente obra, fruto del trabajo de un amplio grupo de expertos en actividad física aplicada a las enfermedades prevalentes que más pueden beneficiarse de ella, coordinados por José López Chicharro y Luis Miguel López Mojares. Después de una introducción preliminar, se analizan las principales patologías cardiovasculares, pulmonares, neuromusculares, metabólicas, oncológicas y locomotoras. Seguidamente se estudian las poblaciones especiales que requieren una aplicación especial del ejercicio físico, como niños, ancianos o mujeres embarazadas. Se concluye con un módulo dedicado a los trastornos psicológicos. Todos estos aspectos se explican con un lenguaje accesible pero riguroso, con el que se describen las limitaciones al ejercicio de cada caso, el modo de llevar a cabo la evaluación funcional y la aplicación correcta del ejercicio físico más adecuado en cada caso, para obtener los mejores beneficios y minimizar así el riesgo.

La cineantropometría debe entenderse como el vínculo entre las medidas corporales, estimaciones de la composición corporal, la morfología del cuerpo humano y su proporcionalidad para entender los cambios en el crecimiento, el ejercicio, el rendimiento y la maduración biológica, en resumen, en la función orgánica y física. Gracias a su técnica sencilla, económica, asequible e inocua, supone un gran avance en el estudio de la ciencia. Sus aplicaciones principales se desarrollan en los campos de la salud y las ciencias del deporte desde la nutrición y la endocrinología, hasta la composición corporal y la fisiología del ejercicio. José Enrique Sirvent Belando es doctor en Ciencias de los Alimentos, químico, farmacéutico y máster en Nutrición y Dietética. Además, es profesor en el Departamento de Química Analítica, Nutrición y Bromatología de la Universidad de Alicante. El liderazgo es un elemento clave para alcanzar la excelencia en las organizaciones sanitarias, por tanto su desarrollo e implantación por parte de los responsables gestores guiará al éxito de todos los profesionales de la salud, buscando escenarios de trabajo motivadores, generando confianza, potenciando la creatividad, transformando a los profesionales y optimizando los recursos. El liderazgo se caracteriza por una serie de habilidades, no es cuestión de tener un título o un cargo, sino de influir sobre los demás para conseguir un resultado positivo. Los profesionales sanitarios, tanto clínicos como gestores, deben asumir su responsabilidad en la solución de los retos que actualmente afronta la sanidad, y dar un paso adelante en los aspectos relacionados con el liderazgo. En este libro se abordan herramientas estratégicas con un enfoque multidisciplinar para alcanzar el liderazgo, como son la creatividad, la comunicación interna, la motivación, el trabajo en equipo, el coaching, la gestión por competencias, la innovación tecnológica, la formación continuada o la investigación, todo ello fundamental para liderar en entornos sanitarios excelentes.

Fisiología clínica del ejercicio

Este libro atiende a la historia del Cuerpo Jurídico Militar con dos partes, un completo e ilustrativo proemio –casi un libro independiente– en el que se desentrañan los datos y circunstancias esenciales de su desenvolvimiento histórico, y una segunda, la sustancial, una ristra biográfica con más de quinientos de sus miembros. Sobre la materia existen varias aproximaciones, parciales o muy sintéticas, por lo que hacía falta un trabajo como el que nos ocupa, que hiciera justicia a un cuerpo del Estado que, bien en los ámbitos que le son propios o bien en su proyección en otras áreas de la Administración, de la política o de la sociedad civil, ha puesto su grano de arena en la forja de la trabazón del Estado y, aún más allá, en la de la propia dinámica nacional. Como se señala en la primera parte, auditores en los ejércitos ya existían antes de la creación de los Cuerpos Jurídicos Militares, por eso no debe olvidarse que las raíces corporativas van más allá de las normas en su momento publicadas en la Gaceta de Madrid del siglo XIX. En esta segunda edición se han realizado una serie de precisiones que afectan al contenido de la obra, se ha actualizado la normativa vigente y se han añadido 38 nuevas biografías en su segunda parte. © Los autores: Fernando García-Mercadal y García-Loygorri y Joaquín Ruiz Diez del Corral © Real Academia de Jurisprudencia y Legislación de España © Agencia Estatal Boletín Oficial del Estado NIPO (formato impreso): 090-23-003-5 NIPO (formato electrónico-PDF):

Manual CTO de medicina y cirugía

Las Reglas de Rotterdam (RR) regulan el contrato de transporte internacional de mercancías puerta a puerta o marítimo plus. La relevancia de este tipo de contrato para el comercio mundial, la coexistencia de convenios unimodales vigentes y su estrecha relación con el contrato de transporte multimodal invitan a su estudio detallado. Con esa finalidad, el presente trabajo sitúa primero al lector en los antecedentes inmediatos a las RR, para así introducir las propias RR y el contrato de transporte puerta a puerta regulados en ellas. A continuación se identifican sus seis pilares, empleados por la autora como estructura explicativa de esta materia. Mas estos pilares se sostienen en un estudio pormenorizado de los convenios unimodales, así como de la evolución del contrato de transporte multimodal: tanto de su noción, como de los diferentes intentos por regular este tipo de contrato. A través de este estudio se alcanza el siguiente esquema: noción-conflicto-régimen jurídico. A su vez este esquema sirve para comprender el estado de la cuestión y alcanzar conclusiones de cara a analizar la regulación propuesta en las Reglas de Rotterdam sobre el contrato de transporte internacional de mercancías puerta a puerta. De este modo, se puede entender la opción legislativa adoptada por las RR, que pasa por la parcialización del contrato de transporte multimodal y el establecimiento de una cooperación entre las convenciones unimodales (art. 26 RR), al tiempo que resuelve los conflictos entre convenciones (art. 82 RR).
