

The Role Of China In Global Dirty Industry Migration

[#China](#) [#Dirty Industry](#) [#Industry Migration](#) [#Environmental Outsourcing](#) [#Global Economy](#)

This analysis explores China's significant role in the global migration of dirty industries, examining the drivers behind this phenomenon and its environmental and economic consequences. We delve into how China's policies and economic growth have facilitated the relocation of polluting industries from developed nations, considering the implications for both the environment and international trade. Furthermore, we analyze the long-term impact of this shift on developing countries and the global effort to achieve sustainable development goals.

Dealing in Desire

This captivating ethnography explores Vietnam's sex industry as the country ascends the global and regional stage. Over the course of five years, author Kimberly Kay Hoang worked at four exclusive Saigon hostess bars catering to diverse clientele: wealthy local Vietnamese and Asian businessmen, Viet Kieus (ethnic Vietnamese living abroad), Western businessmen, and Western budget-tourists. *Dealing in Desire* takes an in-depth and often personal look at both the sex workers and their clients to show how Vietnamese high finance and benevolent giving are connected to the intimate spheres of the informal economy. For the domestic super-elite who use the levers of political power to channel foreign capital into real estate and manufacturing projects, conspicuous consumption is a means of projecting an image of Asian ascendancy to potential investors. For Viet Kieus and Westerners who bring remittances into the local economy, personal relationships with local sex workers reinforce their ideas of Asia's rise and Western decline, while simultaneously bolstering their diminished masculinity. *Dealing in Desire* illuminates Ho Chi Minh City's sex industry as not just a microcosm of the global economy, but a critical space where dreams and deals are traded.

Dealing in Desire

"This fascinating ethnography examines one segment of Vietnam's diverse sex industry. Between 2006 and 2010, author Kimberly Kay Hoang was employed at four exclusive Saigon hostess bars catering to high-end clientele: wealthy Asian businessmen, Western expatriates and tourists, local Vietnamese men, and Viet Kieus (ethnic Vietnamese living abroad). Using participant observation and in-depth interviews with the sex workers, bar owners, managers, and mostly rich clients at all four locations,

Hoang argues that Vietnam's high-end sex industry is much more than a byproduct of globalization--it's an integral component of the country's free-market capitalism, including its emergence as a regional economic player. Major business deals in Vietnam often occur within hostess bars, which businessmen use to stage a display of power, forge relationships, and impress clients. Hostesses facilitate these transactions by socializing with clients, as well as fulfilling fantasies of the flesh and of the culture. The author reveals how recent changes in the political economy have shaped the social structure of sex work in the country, just as actors involved in the sex industry have actively shaped Vietnam's political economy. Multiple constructions of gender are emerging across local, national, and global socio-spaces from the bottom up and the top down"--Provided by publisher.

Spiderweb Capitalism

A behind-the-scenes look at how the rich and powerful use offshore shell corporations to conceal their wealth and make themselves richer. In 2015, the anonymous leak of the Panama Papers brought to light millions of financial and legal documents exposing how the superrich hide their money using complex webs of offshore vehicles. *Spiderweb Capitalism* takes you inside this shadow economy, uncovering the mechanics behind the invisible, mundane networks of lawyers, accountants, company secretaries, and fixers who facilitate the illicit movement of wealth across borders and around the globe. Kimberly Kay Hoang traveled more than 350,000 miles and conducted hundreds of in-depth interviews with private wealth managers, fund managers, entrepreneurs, C-suite executives, bankers, auditors, and other financial professionals. She traces the flow of capital from offshore funds in places like the Cayman Islands, Samoa, and Panama to special-purpose vehicles and holding companies in Singapore and Hong Kong, and how it finds its way into risky markets onshore in Vietnam and Myanmar. Hoang reveals the strategies behind spiderweb capitalism and examines the moral dilemmas of making money in legal, financial, and political gray zones. Dazzlingly written, *Spiderweb Capitalism* sheds critical light on how global elites capitalize on risky frontier markets, and deepens our understanding of the paradoxical ways in which global economic growth is sustained through states where the line separating the legal from the corrupt is not always clear.

Cosmopolitan Sex Workers

Analysis of the women who migrate for sex work, the organizations that facilitate these placements and the hierarchies that persist within the trade, all of which unfold in Kuala Lumpur, Malaysia.

Pricing Beauty

Sociologist Ashley Mears takes us behind the brightly lit runways and glossy advertisements of the fashion industry in this insider's study of the world of modeling. Mears, who worked as a model in New York and London, draws on observations as well as extensive interviews with male and female models, agents, clients, photographers, stylists, and others, to explore the economics and politics—and the arbitrariness—behind the business of glamour. Exploring a largely hidden arena of cultural production, she shows how the right "look" is discovered, developed, and packaged to become a prized commodity. She examines how models sell themselves, how agents promote them, and how clients decide to hire them. An original contribution to the sociology of work in the new cultural economy, *Pricing Beauty*

offers rich, accessible analysis of the invisible ways in which gender, race, and class shape worth in the marketplace.

Imperial Citizens

Examines how immigrants acquire American ideas about race, both pre- and post-migration, in light of U.S. military presence and U.S. cultural dominance over their home country, drawing on interviews and ethnographic observations of Koreans in Seoul and Los Angeles.

Hedged Out

A former hedge fund worker takes an ethnographic approach to Wall Street to expose who wins, who loses, and why inequality endures. Who do you think of when you imagine a hedge fund manager? A greedy fraudster, a visionary entrepreneur, a wolf of Wall Street? These tropes capture the public imagination of a successful hedge fund manager. But behind the designer suits, helicopter commutes, and illicit pursuits are the everyday stories of people who work in the hedge fund industry—many of whom don't realize they fall within the 1 percent that drives the divide between the richest and the rest. With *Hedged Out*, sociologist and former hedge fund analyst Megan Tobias Neely gives readers an outsider's insider perspective on Wall Street and its enduring culture of inequality. *Hedged Out* dives into the upper echelons of Wall Street, where elite white masculinity is the standard measure for the capacity to manage risk and insecurity. Facing an unpredictable and risky stock market, hedge fund workers protect their interests by working long hours and building tight-knit networks with people who look and behave like them. Using ethnographic vignettes and her own industry experience, Neely showcases the voices of managers and other workers to illustrate how this industry of politically mobilized elites excludes people on the basis of race, class, and gender. Neely shows how this system of elite power and privilege not only sustains itself but builds over time as the beneficiaries concentrate their resources. *Hedged Out* explains why the hedge fund industry generates extreme wealth, why mostly white men benefit, and why reforming Wall Street will create a more equal society.

Companion to Sexuality Studies

An inclusive and accessible resource on the interdisciplinary study of gender and sexuality *Companion to Sexuality Studies* explores the significant theories, concepts, themes, events, and debates of the interdisciplinary study of sexuality in a broad range of cultural, social, and political contexts. Bringing together essays by an international team of experts from diverse academic backgrounds, this comprehensive volume provides original insights and fresh perspectives on the history and institutional regulatory processes that socially construct sex and sexuality and examines the movements for social justice that advance sexual citizenship and reproductive rights. Detailed yet accessible chapters explore the intersection of sexuality studies and fields such as science, health, psychology, economics, environmental studies, and social movements over different periods of time and in different social and national contexts. Divided into five parts, the *Companion* first discusses the theoretical and methodological diversity of sexuality studies. Subsequent chapters address the fields of health, science and psychology, religion, education and the economy. They also include attention to sexuality as constructed in popular culture, as well as global activism, sexual citizenship, policy, and law. An essential overview and an important addition to scholarship in the field, this book: Draws on international, postcolonial, intersectional, and interdisciplinary insights from scholars working on sexuality studies around the world Provides a comprehensive overview of the field of sexuality studies Offers a diverse range of topics, themes, and perspectives from leading authorities Focuses on the study of sexuality from the late nineteenth century to the present Includes an overview of the history and academic institutionalization of sexuality studies The *Companion to Sexuality Studies* is an indispensable resource for scholars, researchers, instructors, and students in gender, sexuality, and feminist studies, interdisciplinary programs in cultural studies, international studies, and human rights, as well as disciplines such as anthropology, psychology, history, education, human geography, political science, and sociology.

Making Women Pay

In *Making Women Pay*, Smitha Radhakrishnan explores India's microfinance industry, which in the past two decades has come to saturate the everyday lives of women in the name of state-led efforts to promote financial inclusion and women's empowerment. Despite this favorable language, Radhakrishnan argues, microfinance in India does not provide a market-oriented development intervention, even though it may appear to help women borrowers. Rather, this commercial industry seeks to extract the

maximum value from its customers through exploitative relationships that benefit especially class-privileged men. Through ethnography, interviews, and historical analysis, Radhakrishnan demonstrates how the unpaid and underpaid labor of marginalized women borrowers ensures both profitability and symbolic legitimacy for microfinance institutions, their employees, and their leaders. In doing so, she centralizes gender in the study of microfinance, reveals why most microfinance programs target women, and explores the exploitative implications of this targeting.

Making Ends Meet

Welfare mothers are popularly viewed as passively dependent on their checks and averse to work. Reformers across the political spectrum advocate moving these women off the welfare rolls and into the labor force as the solution to their problems. *Making Ends Meet* offers dramatic evidence toward a different conclusion: In the present labor market, unskilled single mothers who hold jobs are frequently worse off than those on welfare, and neither welfare nor low-wage employment alone will support a family at subsistence levels. Kathryn Edin and Laura Lein interviewed nearly four hundred welfare and low-income single mothers from cities in Massachusetts, Texas, Illinois, and South Carolina over a six year period. They learned the reality of these mothers' struggles to provide for their families: where their money comes from, what they spend it on, how they cope with their children's needs, and what hardships they suffer. Edin and Lein's careful budgetary analyses reveal that even a full range of welfare benefits—AFDC payments, food stamps, Medicaid, and housing subsidies—typically meet only three-fifths of a family's needs, and that funds for adequate food, clothing and other necessities are often lacking. Leaving welfare for work offers little hope for improvement, and in many cases threatens even greater hardship. Jobs for unskilled and semi-skilled women provide meager salaries, irregular or uncertain hours, frequent layoffs, and no promise of advancement. Mothers who work not only assume extra child care, medical, and transportation expenses but are also deprived of many of the housing and educational subsidies available to those on welfare. Regardless of whether they are on welfare or employed, virtually all these single mothers need to supplement their income with menial, off-the-books work and intermittent contributions from family, live-in boyfriends, their children's fathers, and local charities. In doing so, they pay a heavy price. Welfare mothers must work covertly to avoid losing benefits, while working mothers are forced to sacrifice even more time with their children. *Making Ends Meet* demonstrates compellingly why the choice between welfare and work is more complex and risky than is commonly recognized by politicians, the media, or the public. Almost all the welfare-reliant women interviewed by Edin and Lein made repeated efforts to leave welfare for work, only to be forced to return when they lost their jobs, a child became ill, or they could not cover their bills with their wages. Mothers who managed more stable employment usually benefited from a variety of mitigating circumstances such as having a relative willing to watch their children for free, regular child support payments, or very low housing, medical, or commuting costs. With first hand accounts and detailed financial data, *Making Ends Meet* tells the real story of the challenges, hardships, and survival strategies of America's poorest families. If this country's efforts to improve the self-sufficiency of female-headed families is to succeed, reformers will need to move beyond the myths of welfare dependency and deal with the hard realities of an unrewarding American labor market, the lack of affordable health insurance and child care for single mothers who work, and the true cost of subsistence living. *Making Ends Meet* is a realistic look at a world that so many would change and so few understand.

Human Trafficking Reconsidered

Human Trafficking Reconsidered is a unique collection of original essays that investigates the issue of sex and labor trafficking. The book has three main objectives: (1) to examine the definition of trafficking; (2) to analyze the effectiveness of current anti-trafficking regimes; and (3) to discuss the challenges faced by anti-trafficking advocates on the ground. The volume reconsiders the problem of human trafficking by rethinking the zealous focus on sex work and by drawing on the current structural regimes that render people legally vulnerable to abuse. This analysis offers readers the critical tools necessary to begin envisioning new solutions to the problem of human trafficking.

Border Politics

In the current historical moment borders have taken on heightened material and symbolic significance, shaping identities and the social and political landscape. "Borders"—defined broadly to include territorial dividing lines as well as sociocultural boundaries—have become increasingly salient sites of struggle over social belonging and cultural and material resources. How do contemporary activists

navigate and challenge these borders? What meanings do they ascribe to different social, cultural and political boundaries, and how do these meanings shape the strategies in which they engage? Moreover, how do these social movements confront internal borders based on the differences that emerge within social change initiatives? *Border Politics*, edited by Nancy A. Naples and Jennifer Bickham Mendez, explores these important questions through eleven carefully selected case studies situated in geographic contexts around the globe. By conceptualizing struggles over identity, social belonging and exclusion as extensions of border politics, the authors capture the complex ways in which geographic, cultural, and symbolic dividing lines are blurred and transcended, but also fortified and redrawn. This volume notably places right-wing and social justice initiatives in the same analytical frame to identify patterns that span the political spectrum. *Border Politics* offers a lens through which to understand borders as sites of diverse struggles, as well as the strategies and practices used by diverse social movements in today's globally interconnected world. Contributors: Phillip Ayoub, Renata Blumberg, Yvonne Braun, Moon Charania, Michael Dreiling, Jennifer Johnson, Jesse Klein, Andrej Kurnik, Sarah Maddison, Duncan McDuie-Ra, Jennifer Bickham Mendez, Nancy A. Naples, David Paternotte, Maple Razsa, Raphi Rechitsky, Kyle Rogers, Deana Rohlinger, Cristina Sanidad, Meera Sehgal, Tara Stamm, Michelle Téllez

Of Love and Papers

A free open access ebook is available upon publication. Learn more at www.luminosoa.org. *Of Love and Papers* explores how immigration policies are fundamentally reshaping Latino families. Drawing on two waves of interviews with undocumented young adults, Enriquez investigates how immigration status creeps into the most personal aspects of everyday life, intersecting with gender to constrain family formation. The imprint of illegality remains, even upon obtaining DACA or permanent residency. Interweaving the perspectives of US citizen romantic partners and children, Enriquez illustrates the multigenerational punishment that limits the upward mobility of Latino families. *Of Love and Papers* sparks an intimate understanding of contemporary US immigration policies and their enduring consequences for immigrant families.

A World Full of Women

Takes a cross-cultural approach to the study of women *A World Full of Women*, 6/e, combines descriptive ethnography, gender theory, and international statistics to present a comprehensive picture of the lives of women. Readers will better comprehend and contextualize women's issues and experiences in today's world. This title explores the diversity of women's lives from class to culture, with examples ranging from women's work to marriage patterns, health issues, violence against women, and grassroots organizing.

Street Corner Secrets

Street Corner Secrets challenges widespread notions of sex work in India by examining solicitation in three spaces within the city of Mumbai that are seldom placed within the same analytic frame—brothels, streets, and public day-wage labor markets (nakas), where sexual commerce may be solicited discretely alongside other income-generating activities. Focusing on women who migrated to Mumbai from rural, economically underdeveloped areas within India, Svati P. Shah argues that selling sexual services is one of a number of ways women working as laborers may earn a living, demonstrating that sex work, like day labor, is a part of India's vast informal economy. Here, various means of earning—legitimized or stigmatized, legal or illegal—overlap or exist in close proximity to one another, shaping a narrow field of livelihood options that women navigate daily. In the course of this rich ethnography, Shah discusses policing practices, migrants' access to housing and water, the idea of public space, critiques of states and citizenship, and the discursive location of violence within debates on sexual commerce. Throughout, the book analyzes the epistemology of prostitution, and the silences and secrets that constitute the discourse of sexual commerce on Mumbai's streets.

The Perfect Fit

Preface: The frailty of commodity chains -- From head to toe -- From the designer's point of view. From "the global" to "the girl" ; When is a shoe a shoe? -- Feet and fit. The world at her fit: scale-making, uniqueness, and standardization ; Cinderella on the Pearl River Delta: who has the power to translate? -- The global in the rearview mirror -- Interlude: a landscape of factories ; The ruins and rubble of

Novo Hamburgo: skill and melancholia in a global shoe town -- Conclusion: what did we learn about globalization by looking at shoes? -- Coda: shoe is a gipsy business.

Rewriting the Victim

The international movement against the trafficking of women, which has gained momentum over the past two decades, is driven largely by the United States, in tandem with state governments and NGO workers. Feminist organizations have played a key role in carrying out anti-trafficking policies, but are increasingly divided over what those policies should look like. The primary divide exists between those feminists who want to abolish prostitution (as a key link to trafficking) and those who argue that what sex workers need is not to have their livelihoods taken away through paternalistic policies, but improved working conditions to alleviate the dangers associated with their work. A primary criticism of US NGO workers, well-intentioned as they may be, is that they misunderstand the cultural and economic conditions of the women they purport to help. This book provides a unique response to this misunderstanding. On one level it shows how this movement is, in fact, based on a Western mindset that problematizes women and puts its own interests before those of the women it is trying to help. But the project's primary innovation is in the method that it develops to explore the conflict of cultural values that gives rise to the aforementioned debates: what Erin M. Kamler calls Dramatization as Research (DAR). Through writing and producing "Land of Smiles," a musical inspired by field research that includes over fifty interviews with female migrant laborers, sex workers, activists, NGO employees, and other members of the anti-trafficking movement, Kamler presents one of the dominant stories about human trafficking and critiques the discourse about the trafficking of women in Thailand. The book examines how the musical aimed to facilitate communication between stakeholders in the anti-trafficking movement in Thailand and prime a dialogue to explore the policies, practices, and outcomes of actions in this environment. Through researching, writing and producing the musical for the individuals on whose experiences the story of the musical is based, Kamler shows how the arts can be used as a feminist communication intervention and a vehicle for understanding the cultural dimension of human rights.

Unbearable Weight

"Unbearable Weight is brilliant. From an immensely knowledgeable feminist perspective, in engaging, jargonless (!) prose, Bordo analyzes a whole range of issues connected to the body—weight and weight loss, exercise, media images, movies, advertising, anorexia and bulimia, and much more—in a way that makes sense of our current social landscape—finally! This is a great book for anyone who wonders why women's magazines are always describing delicious food as 'sinful' and why there is a cake called Death by Chocolate. Loved it!"—Katha Pollitt, Nation columnist and author of Subject to Debate: Sense and Dissents on Women, Politics, and Culture (2001)

Vibrator Nation

In the 1970s a group of pioneering feminist entrepreneurs launched a movement that ultimately changed the way sex was talked about, had, and enjoyed. Boldly reimagining who sex shops were for and the kinds of spaces they could be, these entrepreneurs opened sex-toy stores like Eve's Garden, Good Vibrations, and Babeland not just as commercial enterprises, but to provide educational and community resources as well. In Vibrator Nation Lynn Comella tells the fascinating history of how these stores raised sexual consciousness, redefined the adult industry, and changed women's lives. Comella describes a world where sex-positive retailers double as social activists, where products are framed as tools of liberation, and where consumers are willing to pay for the promise of better living—one conversation, vibrator, and orgasm at a time.

Prostitution, Trafficking and Traumatic Stress

Prostitution, Trafficking, and Traumatic Stress documents the violence that runs like a constant thread throughout all types of prostitution, including escort, brothel, trafficking, strip club, and street prostitution. The book presents clinical examples, analysis, and original research, counteracting common myths about the harmlessness of prostitution. It explores the connections between prostitution, incest, sexual harassment, rape, and battering; looks at peer support programs for women escaping prostitution; examines clinical symptoms common among prostitutes; and much more.

Gringo Gulch

Gringo Gulch is a spot in San Jose, Costa Rica, home of female sex workers who have male clients from abroad (from North America in particular). Rivers-Moore's work leads the way in a burgeoning scholarly initiative to explore global sex tourism based on long-term qualitative research. Her work on the gulch is populated not only by sex workers and their clients, but also by state agents and NGO workers. All of them, she argues, use sex tourism as a strategy for getting ahead. Rivers-Moore addresses central questions: why has Costa Rica (a middle-income country thought to be an exceptional success in Latin America) emerged as a major site of sex tourism? How do sex tourists and sex workers derive meaning from their experiences, in what way do they profit from their encounters with each other? And how has the neoliberal entrenchment of state services and provisions across Latin America affected the role of the nation-state in relation to sexuality? This book shifts the conventional analysis away from questions of whether third world women's participation in sexual exchanges with first world men in tourism economies are exploitative; it asks, instead, new questions about how something is gained by all parties involved (presenting opportunities for economic and social mobility in terms of class positioning for all). Audiences for the book will include anthropologists, sociologists, historians, geographers, as well as scholars in Latin American and Caribbean studies. "

Material Girls

On feminist cultural theory

Mothering through Precarity

In *Mothering through Precarity* Julie A. Wilson and Emily Chivers Yochim explore how working- and middle-class mothers negotiate the difficulties of twenty-first-century mothering through their everyday engagement with digital media. From Facebook and Pinterest to couponing, health, and parenting websites, the women Wilson and Yochim study rely upon online resources and communities for material and emotional support. Feeling responsible for their family's economic security, these women often become "mamapreneurs," running side businesses out of their homes. They also feel the need to provide for their family's happiness, making successful mothering dependent upon economic and emotional labor. Questioning these standards of motherhood, Wilson and Yochim demonstrate that mothers' work is inseparable from digital media as it provides them the means for sustaining their families through such difficulties as health scares, underfunded schools, a weakening social safety net, and job losses.

Global Business Regulation

Across an amazing sweep of the critical areas of business regulation - from contract, intellectual property and corporations law, to trade, telecommunications, labour standards, drugs, food, transport and environment - this book confronts the question of how the regulation of business has shifted from national to global institutions. Based on interviews with 500 international leaders in business and government, this book examines the role played by global institutions such as the WTO, the OECD, IMF, Moody's and the World Bank, as well as various NGOs and significant individuals. The authors argue that effective and decent global regulation depends on the determination of individuals to engage with powerful agendas and decision-making bodies that would otherwise be dominated by concentrated economic interests. This book will become a standard reference for readers in business, law, politics and international relations.

The Far Right Today

The far right is back with a vengeance. After several decades at the political margins, far-right politics has again taken center stage. Three of the world's largest democracies – Brazil, India, and the United States – now have a radical right leader, while far-right parties continue to increase their profile and support within Europe. In this timely book, leading global expert on political extremism Cas Mudde provides a concise overview of the fourth wave of postwar far-right politics, exploring its history, ideology, organization, causes, and consequences, as well as the responses available to civil society, party, and state actors to challenge its ideas and influence. What defines this current far-right renaissance, Mudde argues, is its mainstreaming and normalization within the contemporary political landscape. Challenging orthodox thinking on the relationship between conventional and far-right politics, Mudde offers a complex and insightful picture of one of the key political challenges of our time.

Everyday Life in Southeast Asia

This lively survey of the peoples, cultures, and societies of Southeast Asia introduces a region of tremendous geographic, linguistic, historical, and religious diversity. Encompassing both mainland and island countries, these engaging essays describe personhood and identity, family and household organization, nation-states, religion, popular culture and the arts, the legacies of war and recovery, globalization, and the environment. Throughout, the focus is on the daily lives and experiences of ordinary people. Most of the essays are original to this volume, while a few are widely taught classics. All were chosen for their timeliness and interest, and are ideally suited for the classroom.

The Specter of Global China

China has recently emerged as one of Africa's top business partners, aggressively pursuing its raw materials and establishing a mighty presence in the continent's booming construction market. Among major foreign investors in Africa, China has stirred the most fear, hope, and controversy. For many, the specter of a Chinese neocolonial scramble is looming, while for others China is Africa's best chance at economic renewal. Yet, global debates about China in Africa have been based more on rhetoric than on empirical evidence. Ching Kwan Lee's *The Specter of Global China* is the first comparative ethnographic study that addresses the critical question: Is Chinese capital a different kind of capital? Offering the clearest look yet at China's state-driven investment in Africa, this book is rooted in six years of extensive fieldwork in copper mines and construction sites in Zambia, Africa's copper giant. Lee shadowed Chinese, Indian, and South African managers in underground mines, interviewed Zambian miners and construction workers, and worked with Zambian officials. Distinguishing carefully between Chinese state capital and global private capital in terms of their business objectives, labor practices, managerial ethos, and political engagement with the Zambian state and society, she concludes that Chinese state investment presents unique potential and perils for African development. *The Specter of Global China* will be a must-read for anyone interested in the future of China, Africa, and capitalism worldwide.

Asia Rising

'This book provides a coherent and current account of how India, Indonesia, Malaysia, Thailand, the Philippines and the People's Republic of China coped with the Asian financial crisis of the 1990s and the recent global economic recession, and how they may address future challenges in maintaining growth in difficult times. It features a valuable overview of issues from a regional perspective, five chapters on general elements and obstacles in development, and individual chapters on the experience of each of the six countries. Every chapter is replete with relevant institutional and statistical data. The volume fills a void in the literature and is highly recommended for graduate students and for economists concerned with contemporary Asia.' – Peter Drake, The University of New England and Australian Catholic University, Australia 'To understand what makes Asia tick in the face of continuing global uncertainty and instability one has to go beyond numbers into the region's psyche and idiosyncrasies. This volume provides an interestingly intrusive and refreshingly insightful analysis of a highly complex phenomenon that defies generalizations as shown by the diversity of individual country experiences.' – Mohamed Ariff, International Centre for Education in Islamic Finance (INCEIF), Malaysia The center of global economic activity is shifting rapidly towards Asia, driven by a combination of the economic dynamism of the People's Republic of China, India, and other middle-income Asian countries, and sluggish growth in the OECD economies. The rapid growth and rising global prominence have raised a range of major challenges for Asia and for the rest of the world. This comprehensive, forward-looking book examines these issues through in-depth studies of major Asian economies and an analysis of the key development policy options. The contributors, leading international authorities in their field, explore cross-cutting thematic issues with special reference to developing Asia. They address a broad range of subjects including: investment and productivity, savings and the savings–investment relationship, financial development, the provision of infrastructure, and governance and institutions. Detailed country studies focusing on the People's Republic of China, India, Indonesia, Malaysia, the Philippines, and Thailand not only provide an analytical narrative for each case study, but also draw attention to the similarities and diversity within the region. This challenging and thought-provoking book will prove an important point of reference for scholars, researchers, and students in the fields of economics, development economics, and Asian studies.

Masculinities

This is an exciting new edition of R.W. Connell's ground-breaking text, which has become a classic work on the nature and construction of masculine identity. Connell argues that there is not one masculinity, but many different masculinities, each associated with different positions of power. In a world gender order that continues to privilege men over women, but also raises difficult issues for men and boys, his account is more pertinent than ever before. In a substantial new introduction and conclusion, Connell discusses the development of masculinity studies in the ten years since the book's initial publication. He explores global gender relations, new theories, and practical uses of masculinity research. Looking to the future, his new concluding chapter addresses the politics of masculinities, and the implications of masculinity research for understanding current world issues. Against the backdrop of an increasingly divided world, dominated by neo-conservative politics, Connell's account highlights a series of compelling questions about the future of human society. This second edition of Connell's classic book will be essential reading for students taking courses on masculinities and gender studies, and will be of interest to students and scholars across the humanities and social sciences.

Contesting Intersex

"When sociologist Georgiann Davis was a teenager, her doctors discovered that she possessed XY chromosomes, marking her as intersex. Rather than share this information with her, they withheld the diagnosis in order to "protect" the development of her gender identity; it was years before Davis would see her own medical records as an adult and learn the truth. Davis' experience is not unusual. Many intersex people feel isolated from one another and violated by medical practices that support conventional notions of the male/female sex binary which have historically led to secrecy and shame about being intersex. Yet, the rise of intersex activism and visibility in the US has called into question the practice of classifying intersex as an abnormality, rather than as a mere biological variation. This shift in thinking has the potential to transform entrenched intersex medical treatment. In *Contesting Intersex*, Davis draws on interviews with intersex people, their parents, and medical experts to explore the oft-questioned views on intersex in medical and activist communities, as well as the evolution of thought in regards to intersex visibility and transparency. She finds that framing intersex as an abnormality is harmful and can alter the course of one's life. In fact, controversy over this framing continues, as intersex has been renamed a 'disorder of sex development' throughout medicine. This happened, she suggests, as a means for doctors to reassert their authority over the intersex body in the face of increasing intersex activism in the 1990s and feminist critiques of intersex medical treatment. Davis argues the renaming of 'intersex' as a 'disorder of sex development' is strong evidence that the intersex diagnosis is dubious. Within the intersex community, though, disorder of sex development terminology is hotly disputed; some prefer not to use a term which pathologizes their bodies, while others prefer to think of intersex in scientific terms. Although terminology is currently a source of tension within the movement, Davis hopes intersex activists and their allies can come together to improve the lives of intersex people, their families, and future generations. However, for this to happen, the intersex diagnosis, as well as sex, gender, and sexuality, needs to be understood as socially constructed phenomena." -- Publisher's description

Gender in Cross-cultural Perspective

Gender in Cross-Cultural Perspective is a one-volume reader built on classic contributions to gender and anthropology, incorporating recent literature on gender roles and ideology around the world. It combines theoretically and ethnographically-based essays and is appropriate for undergraduate and beginning graduate students.

Bandage, Sort, and Hustle

What is the role of the ambulance in the American city? The prevailing narrative provides a rather simple answer: saving and transporting the critically ill and injured. This is not an incorrect description, but it is incomplete. Drawing on field observations, medical records, and his own experience as a novice emergency medical technician, sociologist Josh Seim reimagines paramedicine as a frontline institution for governing urban suffering. *Bandage, Sort, and Hustle* argues that the ambulance is part of a fragmented regime that is focused more on neutralizing hardships (which are disproportionately carried by poor people and people of color) than on eradicating the root causes of agony. Whether by compressing lifeless chests on the streets or by transporting the publicly intoxicated into the hospital, ambulance crews tend to handle suffering bodies near the bottom of the polarized metropolis. Seim illustrates how this work puts crews in recurrent, and sometimes tense, contact with the emergency

department nurses and police officers who share their clientele. These street-level relations, however, cannot be understood without considering the bureaucratic and capitalistic forces that control and coordinate ambulance labor from above. Beyond the ambulance, this book motivates a labor-centric model for understanding the frontline governance of down-and-out populations.

Comedy and Distinction

This book was shortlisted for the 2015 BSA Philip Abrams Memorial Prize. Comedy is currently enjoying unprecedented growth within the British culture industries. Defying the recent economic downturn, it has exploded into a booming billion-pound industry both on TV and on the live circuit. Despite this, academia has either ignored comedy or focused solely on analysing comedians or comic texts. This scholarship tends to assume that through analysing an artist's intentions or techniques, we can somehow understand what is and what isn't funny. But this poses a fundamental question – funny to whom? How can we definitively discern how audiences react to comedy? *Comedy and Distinction* shifts the focus to provide the first ever empirical examination of British comedy taste. Drawing on a large-scale survey and in-depth interviews carried out at the Edinburgh Festival Fringe, the book explores what types of comedy people like (and dislike), what their preferences reveal about their sense of humour, how comedy taste lubricates everyday interaction, and how issues of social class, gender, ethnicity and geographical location interact with patterns of comic taste. Friedman asks: Are some types of comedy valued higher than others in British society? Does more 'legitimate' comedy taste act as a tangible resource in social life – a form of cultural capital? What role does humour play in policing class boundaries in contemporary Britain? This book will be of interest to students and scholars of sociology, social class, social theory, cultural studies and comedy studies.

Food and Femininity

Over the space of a few generations, women's relationship with food has changed dramatically. Yet – despite significant advances in gender equality – food and femininity remain closely connected in the public imagination as well as the emotional lives of women. While women encounter food-related pressures and pleasures as individuals, the social challenge to perform food femininities remains: as the nurturing mother, the talented home cook, the conscientious consumer, the svelte and health-savvy eater. In *Food and Femininity*, Kate Cairns and Josée Johnston explore these complex and often emotionally-charged tensions to demonstrate that food is essential to the understanding of femininity today. Drawing on extensive qualitative research in Toronto, they present the voices of over 100 food-oriented men and women from a range of race and class backgrounds. Their research reveals gendered expectations to purchase, prepare, and enjoy food within the context of time crunches, budget restrictions, political commitments, and the pressure to manage health and body weight. The book analyses how women navigate multiple aspects of foodwork for themselves and others, from planning meals, grocery shopping, and feeding children, to navigating conflicting preferences, nutritional and ethical advice, and the often-inequitable division of household labour. What emerges is a world in which women's choices continue to be closely scrutinized – a world where 'failing' at food is still perceived as a failure of femininity. A compelling rethink of contemporary femininity, this is an indispensable read for anyone interested in the sociology of food, gender studies and consumer culture.

Other, Please Specify

"Located within the critical conversation about what it might mean to 'queer' research methods that has developed over the past decade in conference panels, workshops, edited volumes, and journal symposia, *Other, Please Specify: Queer Methods in Sociology* presents an array of experiences, insights, and approaches that show the power of queer investigations of the social world and of the disciplinary conventions of sociology. Incorporating the experiences of sociologists who utilize a range of interpretative and statistical methods, this volume offers methodological advice and practical strategies for getting queer research off the ground and for building a collaborative community within this emerging subfield"--Provided by publisher.

Coming Out to the Streets

Lesbian, gay, bisexual, transgender, and queer (LGBTQ) youth are disproportionately represented in the U.S. youth homelessness population. In *Coming Out to the Streets*, Brandon Andrew Robinson examines their lives. Based on interviews and ethnographic fieldwork in central Texas, *Coming Out to the Streets* looks into the LGBTQ youth's lives before they experience homelessness—within their families, schools, and other institutions—and later when they navigate the streets, deal with police, and access shelters and other services. Through this documentation, Brandon Andrew Robinson shows how poverty and racial inequality shape the ways that the LGBTQ youth negotiate their gender and sexuality before and while they are experiencing homelessness. To address LGBTQ youth homelessness, Robinson contends that solutions must move beyond blaming families for rejecting their child. In highlighting the voices of the LGBTQ youth, Robinson calls for queer and trans liberation through systemic change.

Disposable Domesticity

The book that “has helped to make transnational analyses of reproductive labor central to our understanding of race and gender in the twenty-first century” (Angela Y. Davis, author of *Freedom Is a Constant Struggle*). *Illegal. Unamerican. Disposable.* In a nation with an unprecedented history of immigration, the prevailing image of those who cross our borders in search of equal opportunity is that of a drain. Grace Chang’s vital account of immigrant women—who work as nannies, domestic workers, janitors, nursing aides, and homecare workers—proves just the opposite: the women who perform our least desirable jobs are the most crucial to our economy and society. *Disposable Domesticity* highlights the unrewarded work immigrant women perform as caregivers, cleaners, and servers and shows how these women are actively resisting the exploitation they face. “As timely and relevant now as it was when it was first written . . . reveals a long history of collusion between the U.S. government, the IMF and World Bank, corporations, and private employers to create and maintain a super-exploited, low-wage, female labor force of caregivers and cleaners.” —Robin D. G. Kelley, author of *Hammer and Hoe* “Grace Chang’s nuanced analysis of our immigration policy and the devastating consequences of global capitalism captures the experiences of poor immigrant women of color. *Disposable Domesticity* reveals how these women, servicing the economy as domestics, nannies, maids, and janitors, are vilified by politicians and the media.” —Mary Romero, author of *The Maid’s Daughter* “Refusing to segregate people, places, or processes, *Disposable Domesticity* reorganizes our capacity to think powerfully about the world in which the struggle for social justice is too often imperiled by certain kinds of partiality.” —Ruth Wilson Gilmore, author of *Change Everything*

Philosophy of Globalization

Not so long ago, it seemed the intellectual positions on globalization were clear, with advocates and opponents making their respective cases in decidedly contrasting terms. Recently, however, the fronts have shifted dramatically. The aim of this publication is to contribute philosophical depth to the debates on globalization conducted within various academic fields – principally by working out its normative dimensions. The interdisciplinary nature of this book’s contributors also serves to scientifically ground the ethical-philosophical discourse on global responsibility. Though by no means exhaustive, the

expansive scope of the works herein encompasses such other topics as the altering consciousness of space and time, and the phenomenon of globalization as a discourse, as an ideology and as a symbolic form.
