science Mineral deposits expressions of multiscale earth processes focussing energy and mass transfer of a range of scales • Process based, rather than analogue based • Substantial predictive power compared to traditional approaches based on analogue deposit models
Mineral Systems - some constraints • Take elements at low concentration from large volumes of rock to high concentration in small volumes of rock Only plausible mechanism is through advective
Many complex natural systems develop structure and patterns, despite a wide range of initial starting conditions and controlling parameters • These patterns are - fractal - Show scale invariant power law distributions . Often show ordering around a critical point or phase transition

A new understanding of physics of complex systems • The tendency of complex systems to order around a critical point is termed self-organised criticality (SOC: Bak et al 1987) • key drivers of SOC behaviour are: - Energy is added slowly over long timeframes

The first step to getting started is to download the app and get setup so you can start taking on jobs.
There are multiple ways to download the app depending on which smartphone you are using.

If you have an iPhone you will access the Apple App store or for Android users, you will go to The
Android Play store.

If your company has a branded app provided by OctopusPro, you should download their app to use
instead of the OctopusPro app.

It is also very important to allow the app to access your location while you are using it.
