Monty and His Amazing Adventures

"If you ever doubted that your feline companion has her own inner life, just watch what happens when she falls asleep, and loses conscious control of her physical being . . . a twitching of limbs, a quivering of the jaw, sometimes perhaps a snuffling noise or a meow. . . . Cats may indeed be capable of great mindfulness. But we are thinking beings, too. In my own case, unfortunately, a being who thinks rather too much." In the latest installment of the Dalai Lama's Cat series, His Holiness's Cat ("HHC") is on a mission: to think less, to experience more, to live in the moment. She soon learns the proper phrase for this, being mindful, or, a concept better known to her as the power of meow. What ensues is a journey to discover her own true nature, to gain a deeper understanding of her mind, and to experience life's greatest joy, the here and now. Throughout, she shares encounters with familiar inhabitants of Dharamsala, as well as a whole new cast of characters: a senior exec from one of Silicon Valley's most famous social media companies (hint: the name rhymes with "litter"), the Pope's beloved dog (who shares a shockingly similar title: HHD, His Holiness's Dog), and a public health inspector who threatens to have our poor narrator banned from the Himalaya Book Café. In this follow-up to the Dalai Lama's Cat and the Art of Purring, readers escape to the enchanting and exotic world of the Dalai Lama's monastery in the Himalayas, and take a peek inside the mind of a delightfully imperfect creature on the path to enlightenment. By accompanying HHC on her journey, you will learn new ways to relate to

your own mind: slowing down, finding peace, and abiding in the boundless radiance and benevolence that is your own true nature.

Songs written for Disney productions over the decades have become a potent part of American popular culture. Since most Americans first discovered these songs in their youth, they hold a special place in one's consciousness. The Disney Song Encyclopedia describes and discusses hundreds of famous and not-so-famous songs from Disney films, television, Broadway, and theme parks from the 1930s to the present day. Over 900 songs are given individual entries and presented in alphabetical order. The songwriters and original singers are identified, as well as the source of the song and other venues in which it might have been used over the years. Notable recordings of the song are also listed. But most important, the song is described and what makes it memorable is discussed. This is not a reference list but a true encyclopedia of Disney songs. The book also contains a preface describing the criteria for selecting the songs, a glossary of song terms, a list of all the Disney songs and their sources, a songwriter's directory in which every song by each composer/lyricist is listed, a bibliography, a guide to recordings and DVDs of Disney productions, and an index of people and titles.

The Dalai Lama's Cat and the Four Paws of Spiritual Success

As the focus on pharmaceuticals has broadened from concern for their cost and effectiveness to their real and potential risks and benefits, a critical question has been raised: whose responsibility is it to improve drug safety? In April 1990, this question became the theme for a conference at Wolfsberg, Switzerland, near the shores of Lake Constance. Called an "international dialogue conference" by its organizers, the meeting brought together leaders from the pharmaceutical industry, regulatory authorities, academia, medicine, consumer organizations and the media. Opening addresses were given by representatives of the Council for International Organizations of Medical Sciences (CIOMS), the International Federation of Pharmaceutical Manufacturers Associations (IFPMA), the Swiss International Pharmaceutical Agency, and the RAD-AR Consortium. This book documents the papers presented and discussions held at this conference, which took the topic of risks and benefits of drug therapy one step further to responsibility. It includes a rich menu of issues for those who care about the evaluation of drug therapy, the ethics behind it, the expectations of the patient, and the role of traditional and nontraditional drug safety communications. The ideas expressed here come from different parts of the world but relate to common drug safety problems, observations, and scientific assessments; they provide insights into innovative approaches, cautious changes, and desired actions. The papers in this volume are broadly divided into conceptual perspectives (ethics, how the knowledge about drug risks and benefits is generated and appraised, the expectations in drug safety) and operational perspectives (communication, discussion, and action).

Between the two world wars, on a hike in the English countryside, Professor John Hill takes refuge from a violent storm in a cave. There he nearly loses his life, but he also makes an astonishing discovery -- an ancient manuscript housed in a cunningly crafted metal box. Though a philologist by profession, Hill cannot identify the language used in the manuscript and the time period in which it was made, but he knows enough to make an educated guess -- that the book and its case are the fruits of a long-lost, but advanced civilization. The translation of the manuscript and the search for its origins become a life-long quest for Hill. As he uncovers an epic that both enchants and inspires him, he tracks down scholars from Oxford to Paris who can give him clues. Along the way, he meets several intriguing characters, including a man keenly interested in obtaining artifacts from a long-lost civilization that he believes was the creation of a superior race, and will help him fulfill his ambition to rule other men. Concluding that Hill must have found something that may help him in this quest, but knowing not what it is and where it is hidden, he has Hill, his friends at Oxford, and his family shadowed and threatened until finally he

and Hill face off in a final, climatic confrontation. A story that features a giant pirate and slaver, a human chameleon on a perilous metaphysical journey, a mysterious hermit, and creatures both deadly and beautiful, this is a novel that explores the consequences of the predominant ideas of the 20th Century.

Hothouse Flower

If the Chinese people were to file one by one past a given point, the interesting procession would never come to an end. Before the last man of those living to-day had gone by, another and a new generation would have grown up, and so on for ever and ever. The importance, as a factor in the sum of human affairs, of this vast nation,—of its language, of its literature, of its religions, of its history, of its manners and customs,—goes therefore without saying. Yet a serious attention to China and her affairs is of very recent growth. Twenty-five years ago there was but one professor of Chinese in the United Kingdom of Great Britain and Ireland; and even that one spent his time more in adorning his profession than in imparting his knowledge to classes of eager students. Now there are all together five chairs of Chinese, the occupants of which are all more or less actively employed. But we are still sadly lacking in what Columbia University appears to have obtained by the stroke of a generous pen,—adequate funds for endowment. Meanwhile, I venture to offer my respectful congratulations to Columbia University on having surmounted this initial difficulty, and also to prophesy that the foresight of the liberal donor will be amply justified before many years are over. I have often been asked if Chinese is, or is not, a difficult language to learn. To this question it is quite impossible to give a categorical answer, for the simple reason that Chinese consists of at least two languages, one colloquial and the other written, which for all practical purposes are about as distinct as they well could be. Colloquial Chinese is a comparatively easy matter. It is, in fact, more easily acquired in the early stages than colloquial French or German. A student will begin to speak from the very first, for the simple reason that there is no other way. There are no Declensions or Conjugations to be learned, and consequently no Paradigms or Irregular Verbs. In a day or two the student should be able to say a few simple things. After three months he should be able to deal with his ordinary requirements; and after six months he should be able to chatter away more or less accurately on a variety of interesting subjects. A great deal depends upon the method by which he is taught.
