Ouvrage de référence devenu le grand classique de son domaine, ce manuel professionnel s'applique à un secteur du BTP peu décrit dans le détail alors qu'il est indispensable. Les voiries, les réseaux (enterrés ou aériens) et les aménagements extérieurs qui composent le paysage sont autant d'ouvrages d'un tout autre aspect visuel - leur étendue est linéaire - qu'un bâtiment, un quartier ou un village - généralement perçus par leur volume. Ils exigent pourtant une intervention constante, de leur conception à leur gestion en passant par leur réalisation, entre bâtiment et travaux publics. L'auteur nous procure ici une vue globale de la coordination technique des travaux. Terrassements généraux, assainissements, voiries, distribution de l'eau, du gaz, de l'électricité et espaces verts: la prestation de chacun des corps d'état intéressés est décrite séparément. L'ensemble des connaissances nécessaires à la mise en oeuvre des procédures d'appel d'offres incluant dessins, détails d'exécution et devis descriptif dans le respect des démarches administratives sont décrites avec précision dans la première partie du livre. Rédigée sous forme de devis descriptif, la seconde partie donne à ce manuel sa dimension d'aide-mémoire. En suivant article par article les éléments du descriptif-type, le professionnel sera entièrement en mesure de rédiger un texte adapté au projet. Tous les éléments sont réunis pour permettre au concepteur de réaliser le dossier de consultation des entreprises (DCE). Dessinateurs, métreurs et ingénieurs pourront ainsi acquérir une vue d'ensemble des problèmes de terrassement et de VRD pour rendre des études complètes.

If you are intrigued by all the possibilities of human behaviour, exploring it through writing has been our task. This book is an Anthology of short stories written by The Writing Quartet. It has four distinct styles, four different minds working on Borders, Friends and Strangers. This allows for diversity but at the same time to identify the one common aim which was to find ways of exploring, through our writing, all the shades of human behaviour that inspired us. Here are stories that show the comic, tragic, baffling and often frustrating aspects of life and people.

L'agence DGLA est connue des professionnels de l'architecture et de l'urbanisme pour ses travaux de grande ampleur dans le domaine des centres commerciaux et de l'architecture événementielle (dont les gares et les quartiers de gare). Son travail se trouve au centre de préoccupations urbaines, âprement débattues dès lors que l'on touche aux sites de grande échelle. C'est donc sans occulter l'âpreté des arguments invoqués par les « penseurs urbains » que les fondateurs de l'agence ont lancé ce projet de livre, en voulant inscrire une réflexion autour des thématiques particulières auxquelles ils se confrontent (architecture objet, architecture spectacle, design). Dans cette réflexion viennent s'inscrire nombre de problématiques dont la ville contemporaine est le théâtre : devenir de l'hyper centre, dégénérescence des entrées de ville, prolifération des «boîtes» commerciales ; viennent s'inscrire également toutes les questions de connexion et de déplacement, vues à l'échelle macroscopique de l'interconnexion des équipements ou à l'échelle microscopique des flux piétonniers. Dans le milieu de l'urbanisme, on a tendance à considérer que, en matière d'architecture commerciale, la rédemption sera médiatique ou ne sera pas (au travers des vertus supposées des grosses agences ou des stars de la profession). Pour DGLA, c'est un faux-semblant contre lequel il faut s'élever en interrogeant les enjeux de cette architecture autour de quelques problématiques telles que : la pérennité (obsolescence, éternité), la mise en scène (décor, spectacle, destination), la mode (universalité, frénétisme, diffusion), la temporalité (vitesse, propagation), l'attraction (popularité, relégation, primauté). L'organisation du livre n'est pas pensée en termes programmatiques (DGLA construit aussi des logements ou des bureaux), mais plutôt comme un continuum d'idées sur lequel la cinquantaine de différents projets (réalisés ou pas) viennent se greffer comme supports-acteurs de la réflexion.

Catastrophes, it seems, are becoming more frequent in the twenty-first century. According to UN statistics, every year approximately two hundred million people are directly affected by natural dis-

asters seven times the number of people who are affected by war. Discussions about global warming and fatal disasters such as Katrina and the Tsunami of 2004 have heightened our awareness of natural disasters and of their impact on both local and global communities. Hollywood has also produced numerous disaster movies in recent years, some of which have become blockbusters. This volume demonstrates that natural catastrophes earthquakes, hurricanes, floods, etc. have exercised a vast impact on humans throughout history and in almost every part of the world. It argues that human attitudes toward catastrophes have changed over time. Surprisingly, this has not necessarily led to a reduction of exposure or risk. The organization of the book resembles a journey around the globe from Europe to North Africa, the Middle East, and Asia, and from the Pacific through South America and Mexico to the United States. While natural disasters appear everywhere on the globe, different cultures, societies, and nations have adopted specific styles for coping with disaster. Indeed, how humans deal with catastrophes depends largely on social and cultural patterns, values, religious belief systems, political institutions, and economic structures. The roles that catastrophes play in society and the meanings they are given vary from one region to the next; they differ and this is one of the principal arguments of this book from one cultural, political, and geographic space to the next. The essays collected here help us to understand not only how people in different times throughout history have learned to cope with disaster but also how humans in different parts of the world have developed specific cultural, social, and technological strategies for doing so.

How to Grow a Playspace takes you through a global perspective of the different stages of child development and the environments that engage children in play around the world. From the urbanity of Mumbai; to rainbow nets in Japan; nature play in Denmark; recycling waste in Peru; community building in Uganda; play streets in London; and gardens of peace in Palestine, it proves that no matter where play occurs, it is ubiquitous in its resourcefulness, imagination and effect. Written by international leaders in the field of play including academics, designers and playworkers, How to Grow A Playspace discusses contemporary issues around children and play, such as risk benefit in play, creativity and technology, insights into children's thinking, social inclusion and what makes a city child-friendly. With its own 'Potting Shed', this text is also a practical guide to support playspace projects with advice on teams, budgets, community engagement, maintenance and standards. How to Grow a Playspace is a comprehensive 'go-to' guide for anyone interested or involved in children's play and playspaces.

The title Archigram came from the notion of a more simple and urgent item than a Journal, like a telegram or aerogramme - hence, "archi(itecture)-gram.""

Natural Disasters, Cultural Responses

"With a sure, steady hand Lindsey ratchets the suspense and sexual tension tighter and tighter, page by merciless page. The only mercy you'll get is the word on the cover."—Stephen Conts Houston is shattered by a shock wave of unbelievably vicious sex killings. And this time the pattern is unique—way out of line with traditional violent-crime psychology. In Detective Carmen Palma's experience, a psychopath always chooses anonymous targets. But the Houston victims know and trust their killer: They meet willingly in hotel rooms, even in their homes. They don't fight when the leather cuffs are fastened to their wrists and ankles. They don't even struggle when the first blows fall . . . Palma's first lightning instinct is that the victims expected their torture. They were practicing masochists, apart of a secret clique that includes some of the city's most prominent women. They helped choreograph their own punishments—every blow. They just didn't expect to die. . .
