

ginzburg landau phase transition theory and superconductivity international series of numerical mathematics

[#Ginzburg-Landau theory](#) [#Phase transition](#) [#Superconductivity](#) [#Numerical mathematics](#) [#International Series](#)

Explore the fascinating world of the Ginzburg-Landau phase transition theory and its applications in understanding superconductivity. This theory, often explored within the context of the International Series of Numerical Mathematics, provides a powerful framework for analyzing and modeling the behavior of superconductors under various conditions, using numerical methods to solve complex equations and gain insights into the intricate properties of these materials.

Seeking Justice

The Westview series Case Studies in International Affairs stems from a major project of The Pew Charitable Trusts entitled "The Pew Diplomatic Initiative." Launched in 1985, this project has sought to improve the teaching and practice of negotiation through adoption of the case method of teaching, principally in professional schools of international affairs in the United States.

Seeking Justice

Ethics and International Relations (IR), once considered along the margins of the IR field, has emerged as one of the most eclectic and interdisciplinary research areas today. Yet the same diversity that enriches this field also makes it a difficult one to characterize. Is it, or should it only be, the social-scientific pursuit of explaining and understanding how ethics influences the behaviours of actors in international relations? Or, should it be a field characterized by what the world should be like, based on philosophical, normative and policy-based arguments? This Handbook suggests that it can actually be both, as the contributions contained therein demonstrate how those two conceptions of

Ethics and International Relations are inherently linked. Seeking to both provide an overview of the field and to drive debates forward, this Handbook is framed by an opening chapter providing a concise and accessible overview of the complex history of the field of Ethics and IR, and a conclusion that discusses how the field may progress in the future and what subjects are likely to rise to prominence. Within are 44 distinct and original contributions from scholars teaching and researching in the field, which are structured around 8 key thematic sections: Philosophical Resources International Relations Theory Religious Traditions International Security and Just War Justice, Rights and Global Governance International Intervention Global Economics Environment, Health and Migration Drawing together a diverse range of scholars, the Routledge Handbook of Ethics and International Relations provides a cutting-edge overview of the field by bringing together these eclectic, albeit dynamic, themes and topics. It will be an essential resource for students and scholars alike.

Routledge Handbook of Ethics and International Relations

This topical and timely book critically explores contemporary liberal international relations theory. In the fifty years since the declaration of human rights, the language of international relations has come to incorporate the language of justice and injustice. The book argues that if justice is to become the governing principle of international politics, then liberals must recognise that their political preferences cannot be the preconditions of global ethics. The hierarchy of international political ethics must be constructed afresh so that the first principles of justice are accessible to all agents as political and ethical equals. This book will be essential reading for students and scholars in politics, international relations, political theory and ethics.

Ethics, Justice and International Relations

While skepticism about the role of moral considerations in international politics has been influential within the discipline of international relations (IR), those writing on topics such as war, peace, rights and trade up until the twentieth century took seriously the importance of ethical values and moral debates. The 1990s and 2000s have seen a substantial growth of attention to the ways in which IR conceives and analyzes themes of an ethical nature, and how issues, problems and policies involving ethics are addressed by a variety of actors within the international system. This indispensable research companion widens the perspective from 'ethics and international relations' to 'ethics in international relations', redressing the (mis)perception that ethical concepts, principles, norms and rules are not in part constitutive of the international system and the agents acting within that system. Necessarily cross-disciplinary, expertise is drawn from IR and also philosophy, political theory, religious studies, history and law, making this an ideal volume for any library reference collection.

The Ashgate Research Companion to Ethics and International Relations

Through an examination of the relationship between ethics and international coercion, *The Sword of Justice* compares the actual practice of the United States to the standards established by the just war framework. Historical cases are considered—from nuclear deterrence, conventional war and humanitarian intervention to covert action, economic sanctions and coercive diplomacy—analyzed from the perspective of the just war tradition to provide practical tools to improve the moral content of policy decisions. An enduring feature of the international system is the use or threat of force. The most systematic critique of this practice is found in the just war tradition, begun by Augustine and further elaborated by Aquinas. This book explores the relationship between ethics and international coercion by presenting historical case studies in which the United States has taken such measures to achieve their goals, and by comparing the actual practice of the United States to the standards established by the just war framework. Based on the comparison, a number of concrete recommendations are made about specific measures that could strengthen the moral content of policy decisions, and at the same time meet tests of political feasibility in the American system of government.

The Sword of Justice

Bridging the contending theories of natural law and international relations, this book proposes a 'relational ontology' as the basis for rethinking our approach to international politics. Amanda Beattie challenges both the conventional interpretation of natural law as necessarily and intractably theological, and the dominant conception of international relations as structurally distinct from the ends of human good, in order to recover the centrality of other-directed agency to the promotion of human development. Offering an important contribution to the study of international political thought, the book contains

a number of challenging and controversial ideas which should provoke constructive debate within international relations theory, political theory, and philosophical ethics.

Justice and Morality

This volume offers a new dimension to realist theories about world politics. It questions both the theoretical and empirical foundations of much of traditional realist thought by offering realist-oriented analyses that emphasize the possibilities of cooperation and accommodation through agreement over common motivations and concerns. The articles in this volume demonstrate that moral considerations can and do play a significant role in shaping state behavior and that despair about the possibility of improving the systems and institutions within which we live is unwarranted. Specific points of normative convergence are raised in some detail, especially on issues of war, membership and authority, humanitarian concern and the social consequences of globalization. Three ethical concepts form the core of the 'realism reconsidered' argued for here, namely, the ideas of pluralism, rights and fairness.

Ethics and International Relations

As the essays in this new collection make clear, the division between what is in the national interest and what can be morally justified is often questionable. One reason is that the citizens who vote for the governments that make and carry out policy are not indifferent to the moral justifiability or lack of it of those policies.

Ethics in International Affairs

This edited volume addresses the key issues of ethics, war and international relations in the post-9/11 world. There is a lively debate in contemporary international relations concerning the relationship between statist obligations to one's own political community and cosmopolitan duties to distant others. This volume contributes to this debate by investigating aspects of the ethics of national military and security and intelligence policies in the post-9/11 environment. The discursive transformation of national militaries into 'forces for good' became normalized as the Cold War subsided. While the number of humanitarian military interventions and operations rose considerably in the immediate post-Cold War period, the advent of the 'war on terror' raised questions about exactly what we mean by ethical behaviour in terms of military and security policies. This volume interrogates this key question via a focus that is both distinctive and illuminating – on national military ethics; femininities, masculinities and difference; and intelligence ethics. The key objectives are to demonstrate the important linkages between areas of international relations that are all too often treated in isolation from one another, and to investigate the growing tension between cosmopolitan and communitarian conceptions of intelligence and security and the use of armed force. This book will be of much interest to students of security studies, ethics, gender studies, intelligence studies, and international relations in general. Mark Phythian is Professor of Politics in the Department of Politics and International Relations at the University of Leicester. He is the author or editor/co-editor of ten books. Annika Bergman-Rosamond is Senior Researcher at the Danish Institute for International Studies in Copenhagen.

War, Ethics and Justice

This new volume moves beyond the limits of current debate to show how today's foreign policy is increasingly about values rather than interests and why ethics are now playing a central role. Rather than counterposing interests and ethics, trying to find 'hidden agendas' or emphasizing the double-standards at play in ethical foreign policy, this book brings together leading international theorists, and a variety of stimulating approaches, to develop a critical understanding of the rise of ethical foreign policy, and to analyze the limits of ethical policy-making on its own terms. They deal with the limits of 'ethical foreign policy' both in the light of the internal dynamic of these policies themselves, and with regard to the often unintended consequences of policies designed to better the world. This book also shows how the transformation of both the domestic and the international spheres of politics means that ethics has become a rallying point for non-state actors and experts who gather around values and norms in order to force institutions to justify their behavior. This process results from different structural changes and the transformation of the international system, the individualization of Western societies and the growing importance of expertise in the justification of decisions in risk adverse societies. It leads to a transformation of norms and to a redefinition of a global ethical framework that needs to be clarified.

This book will be of great interest to all students and researchers of foreign policy formation, politics and international relations.

Ethics and International Relations

The third edition of *Ethics & International Affairs* provides a fresh selection of classroom resources, ideal for courses in international relations, ethics, foreign policy, and related fields. Published with the Carnegie Council for Ethics in International Affairs, this collection contains some of the best contemporary scholarship on international ethics, written by a group of distinguished political scientists, political theorists, philosophers, applied ethicists, and economic development specialists. Each contributor explores how moral theory can inform policy choices regarding topics such as war and intervention, international organizations, human rights, and global economic justice. This book provides an entry point into these key debates and offers a platform for further discussion. Published in cooperation with the Carnegie Council for Ethics in International Affairs

Rethinking Ethical Foreign Policy

Universality Ethics and International Relations introduces students to the key debates about ethics in international relations theory. This book explores the reasons why grappling with universality and ethics seems to be a profound endeavour and where we end up when we do. By offering a new way of thinking about ethics in International Relations, Pin-Fat shows that there are several varieties of universality which are offered as the answer to ethics in global politics; the divine universality of Hans Morgenthau, the ideal universality of Charles R. Beitz and the binary universality of Michael Walzer. Taking the reader on a grammatical odyssey through each, the book concludes that profound searches for the foundations of universality can't fulfil our deepest desires for an answer to ethics in global politics. Pin-Fat suggests that the failure of these searches reveals the ethical desirability of defending universality as (im)possible. An ideal text for use in a wide variety of courses, including ethics in international relations, international relations theory, and international political theory, this work provides a valuable new contribution to this rapidly developing field of research.

Ethics & International Affairs

Arguing for a middle ground between idealism and realism, this book considers the most pressing ethical and moral issues in contemporary international politics, including intervention, human rights and aid, and sets about reasoning how to resolve them in politically realistic ways.

Universality, Ethics and International Relations

This work offers a radical reformulation of the pluralist position in 'English school' theory, providing an account of world politics that is normatively progressive and rooted in the significance of multiple community membership to human lives.

Ethical Reasoning in International Affairs

Offering a new interdisciplinary approach to global justice and integrating the insights of international relations and contemporary ethics, this book asks whether the core norms of international law are just by appraising them according to a standard of global justice grounded in the advancement of peace and protection of human rights.

Ethics, Diversity, and World Politics

This collection of some of the best contemporary scholarship in ethics and international affairs explores the connection between moral traditions and decision making during and after the Cold War. Each author relates the timeless insights of philosophy and our collective historical experience to the hard choices of our own age. This volume should be of special interest to those working and teaching in international relations, diplomatic history, foreign policy, applied ethics, and related fields.

The Thin Justice of International Law

This book examines the international political order in the post-Cold War era, arguing that this order has become progressively more punitive. This is seen as resulting from both a human-rights regime that emphasizes legal norms and the aggressive policies of the United States and its allies in the

'War on Terror'. While punishment can play a key role in creating justice in a political system, serious flaws in the current global order militate against punishment-enforcing global norms. The book argues for the necessary presence of three key concepts - justice, authority and agency - if punishment is to function effectively, and explores four practices in the current international system: intervention, sanctions, counter-terrorism policy, and war crimes tribunals. It concludes by suggesting ways to revise the current global political structure in order to enable punitive practices to play a more central role in creating a just world order. This book will be of much interest to students of International Law, Political Science and International Relations.

Ethics & International Affairs

Ethics and International Relations, Second Edition, offers a comprehensive introduction to the philosophical issues raised by international politics. Presupposing no prior philosophical knowledge and deliberately avoiding the use of technical language, it is ideally suited for political philosophy, applied ethics and international relations courses. Revised and updated, new material includes coverage of the war on terror, the impact of globalization, and ideas of cosmopolitan governance. Clearly and thoughtfully organized, it proceeds logically from general morality and international relations to issues surrounding just war theory and global justice. A crisp, analytical treatment presented with a student-sensitive approach and informed by real world issues. Covers a wide array of subtopics.

Punishment, Justice and International Relations

The truth commission is an increasingly common fixture of newly democratic states with repressive or strife-ridden pasts. From South Africa to Haiti, truth commissions are at work with varying degrees of support and success. To many, they are the best--or only--way to achieve a full accounting of crimes committed against fellow citizens and to prevent future conflict. Others question whether a restorative justice that sets the guilty free, that cleanses society by words alone, can deter future abuses and allow victims and their families to heal. Here, leading philosophers, lawyers, social scientists, and activists representing several perspectives look at the process of truth commissioning in general and in post-apartheid South Africa. They ask whether the truth commission, as a method of seeking justice after conflict, is fair, moral, and effective in bringing about reconciliation. The authors weigh the virtues and failings of truth commissions, especially the South African Truth and Reconciliation Commission, in their attempt to provide restorative rather than retributive justice. They examine, among other issues, the use of reparations as social policy and the granting of amnesty in exchange for testimony. Most of the contributors praise South Africa's decision to trade due process for the kinds of truth that permit closure. But they are skeptical that such revelations produce reconciliation, particularly in societies that remain divided after a compromise peace with no single victor, as in El Salvador. Ultimately, though, they find the truth commission to be a worthy if imperfect instrument for societies seeking to say "never again" with confidence. At a time when truth commissions have been proposed for Bosnia, Kosovo, Cyprus, East Timor, Cambodia, Nigeria, Palestine, and elsewhere, the authors' conclusion that restorative justice provides positive gains could not be more important. In addition to the editors, the contributors are Amy Gutmann, Rajeev Bhargava, Elizabeth Kiss, David A. Crocker, André du Toit, Alex Boraine, Dumisa Ntsebeza, Lisa Kois, Ronald C. Slye, Kent Greenawalt, Sanford Levinson, Martha Minow, Charles S. Maier, Charles Villa-Vicencio, and Wilhelm Verwoerd.

Ethics and International Relations

Global political actors, from states and NGOs to activist groups and individuals, exert influence in societies beyond their own in myriad ways--including via public criticism, consumer boycotts, divestment campaigns, sanctions, and forceful intervention. Often, they do so in the name of justice-promotion. While attempts to promote justice in other societies can do good, they are also often subject to moral criticism and raise several serious moral questions. For example, are there ways to promote one's own ideas about justice in another society while still treating its members tolerantly? Are there ways to do so without disrespecting their legitimate political institutions or undermining their collective self-determination? To understand the ethics of justice-promoting intervention, Lucia M. Rafanelli moves beyond the traditional focus of other scholarship in this area on states waging wars or employing other conventional tools of coercive foreign policy. Specifically, Rafanelli constructs a philosophically-grounded and nuanced ethics of intervention to determine when attempts to promote justice in foreign societies are morally permissible. *Promoting Justice Across Borders* develops ethical standards for justice-promoting intervention that call on us to rethink received notions about the ordinary

bounds of politics, and to abandon the thought that politics does and should take place primarily within the state. These ethical standards also give us a model for how to engage in political struggles for justice on a global scale--not only in conditions of supreme emergency, but in the ordinary circumstances of everyday global politics. They therefore form the basis of a cosmopolitanism that is neither premised upon nor aimed at bringing about the end of politics. Ultimately, Rafanelli shows how the promotion of justice everywhere can be the legitimate (political) concern of people anywhere.

Truth v. Justice

Thomas Pangle and Peter Ahrens Dorf provide a critical introduction to the most important conceptions of international justice, spanning 2,500 years of intellectual history from Thucydides and Plato to Morgenthau and Waltz. Their study shows how older traditions of political philosophy remain relevant to current debates in international relations, and how political thinkers through the centuries can help us deepen our understanding of today's stalemate between realism and idealism. Pangle and Ahrens Dorf guide the reader through a sequence of theoretical frameworks for understanding the moral basis of international relations: the cosmopolitan vision of the classical philosophers, the "just war" teachings of medieval theologians, the revolutionary realism of Machiavelli, the Enlightenment idealism of Kant, and the neo-realism of twentieth-century theorists. They clarify the core of each philosopher's conceptions of international relations, examine the appeal of each position, and bring these alternatives into mutually illuminating juxtaposition. The authors clearly show that appreciating the fundamental questions pursued by these philosophers can help us avoid dogmatism, abstraction, or oversimplification when considering the moral character of international relations. *Justice Among Nations* restores the study of the great works of political theory to its natural place within the discipline of international relations as it retrieves the question of international justice as a major theme of political philosophy. It provides our moral compass with new points of orientation and invites serious readers to grapple with some of the most perplexing issues of our time.

Promoting Justice Across Borders

This is the first comprehensive study of how different ethical traditions deal with the central moral problems of international affairs. Using the organizing concept of a tradition, it shows that ethics offers many different languages for moral debate rather than a set of unified doctrines. Each chapter describes the central concepts, premises, vocabulary, and history of a particular tradition and explains how that tradition has dealt with a set of recurring ethical issues in international relations. Such issues include national self-determination, the use of force in armed intervention or nuclear deterrence, and global distributive justice.

Justice Among Nations

Justice, the State and International Relations offers a review of historical traditions of international ethical and political theory in the light of modern developments in political philosophy. McCarthy provides a defence of natural law tradition, and, in response to the criticism of natural law that, along with Kantianism, it is too abstract to produce a substantive account of justice and rights, constructs an argument for basic, agency-grounded rights. Through his study, the author attacks 'realism' and the modern 'cosmopolitan' theories that until now have been too little debated.

Traditions of International Ethics

Is it justifiable to make any basic moral distinction between 'insiders and outsiders'? Do we have substantive duties of 'justice' to all human beings or merely Humanitarian duties of aid and assistance? These are two of the most crucial questions confronting world politics and the field of international ethics today. *International Ethics: A Critical Introduction* provides an engaging and accessible introduction to these foundational questions. In a cogent and carefully argued analysis, Richard Shapcott critically examines the theories of cosmopolitanism, communitarianism, realism and pluralism and scrutinises their approaches to the various obligations which members of 'bounded' communities, primarily nation-states, have to 'outsiders' and 'foreigners'. He then takes the theoretical approaches in context by discussing the ethics of hospitality and membership of political communities, issues of mutual aid and humanitarianism abroad, the ethics of harm related to interstate international violence, and the challenge of severe global poverty. The book concludes by suggesting that the terms of international ethical life in the 21st century require reframing in a way that focuses more intently on the nature of harm between communities and individuals. This book provides students and scholars with a conceptual

framework with which to analyse the policies, actions and philosophy of governments, NGOs and international corporations. Above all, it offers the means whereby individuals can assess their own positions on contemporary ethical issues such as global poverty, humanitarian intervention, migration and refugees and global warming.

Justice, the State and International Relations

Ethics and International Affairs explores the extent and limits of contemporary international ethics and examines the ways in which the international community has responded to some of its most crucial challenges since the end of the cold war. At the center of the book is a discussion of how responsibility is viewed at individual, national, and international levels when facing the problems of human rights, humanitarian intervention, environmental issues, gender considerations, international economic justice, matters of war and peace, and the plight of refugees. While some authors revisit the conception and interpretation of international ethics, others focus on the necessity to push for the better implementation and improvement of existing international norms. The result is an examination of how ethics are defined in today's specific contexts and how an understanding of the ethical may be developed from the articulation of the dilemmas encountered. The issues tackled in the book were already topical a decade ago, at the time of the first edition. Following the tumultuous first decade of this century, they have only gained in importance.

International Ethics

This volume argues that a wide range of policies in the international system today economic sanctions, military intervention, and counter terrorism policy are part of a punitive ethos' that has arisen since the end of the Cold War. While that ethos is linked to the protection of human rights and the promotion of international liberalism, it violates standards of justice that it should otherwise be protecting. The book is premised on the assumption that while punishment in principle is justifiable, the ways it is being meted out in the current international order are not just. It draws on cases in which members of the international system seek to protect human rights and uphold international law by imposing punishments on those who violate the shared international norms. But while these punitive practices are designed to create a just international order, they tend to be unjust in practice. For Anthony Lang, these unjust punishments result from conceptual confusions about agency, responsibility, legitimacy, and authority. He thus identifies a dilemma in the current international system: attempts to promote human rights and international law through punishment are creating an unjust global order. Punishment, Justice and International Relations will be of much interest to students of international ethics, security and international relations in general.

Ethics and International Affairs

Global justice and international affairs is perhaps the hottest topic in political philosophy today. This book brings together some of the most important essays in this area. Topics include sovereignty and self-determination, cosmopolitanism and nationalism, global poverty and international distributive justice, and war and terrorism.

Punishment, Justice and International Relations

This text presents the concepts, theories, methods, and traditions of ethical analysis and then applies them to case studies in the areas of human rights, military force, foreign intervention, economic statecraft, and global political justice.

Global Justice and International Affairs

'A lucid, comprehensive analysis of normative approaches to international relations, and an original contribution to critical theory' - Andrew Linklater, University of Keele
'Hutchings combines a valuable account of the current state of the art with a lucid exposition of her own, highly distinctive, position. This will be required reading for students in international political theory, and indeed anyone interested in normative issues in international relations' - Chris Brown, London School of Economics and Political Science
Providing an invaluable overview of the competing schools of thought in traditional and contemporary international theory, this book seeks to path the way forward for new ways of thinking about international political morality. First, the role and place of normative theory in the study of international politics is explained before a discussion of mainstream approaches within international

relations and applied ethics. Here the student is introduced to the central debates between realists and idealists, and cosmopolitans and communitarians. Second, the conceptual challenges of contemporary approaches in critical theory, postmodernism and feminism are outlined and then used as a platform to develop the author's own Hegelian-Foucauldian approach for doing normative international theory. Third, the insights drawn from each approach are applied to the study of two key topics in contemporary theoretical debate: the right to self-determination, and the idea of cosmopolitan democracy, and conclusions drawn for transcending the theoretical deadlock in international relations. Accessibly written and wide-ranging, this text will quickly become essential reading for all students and academics of politics and international relations seeking a deeper understanding of the underlying tensions and future potential of international theory today.

International Ethics

This provocative and original book challenges the commonplace that contemporary international interactions are best understood as struggles for power. Eschewing jargon and theoretical abstraction, Mervyn Frost argues that global politics and global civil society must be understood in ethical terms. International actors are always faced with the ethical question: So, what ought we to do in circumstances like these? Illustrating the centrality of ethics to our understanding of global politics and global civil society with detailed case studies, Frost shows how international actors constitute one another in global social practices that are underpinned by specific ethical commitments. Case Studies examined include: The War on Iraq The 'Global War on Terror' Iran Human Rights Globalization and Migration The use of Private Military Companies. Global Ethics forces readers to confront their own necessary ethical engagement as citizens and rights holders in global society. Failure to understand international relations in ethical terms will lead to misguided action. This book should be read by all scholars and students of international relations as well as the general reader seeking an accessible account of the importance of ethical decisions in world affairs.

International Political Theory

1 2 Andreas Follesdal and Thomas Pogge 1 The Norwegian Centre for Human Rights at the Faculty of Law and ARENA Centre for 2 European Studies, University of Oslo; Philosophy, Columbia University, New York, and Oslo University; Centre for Applied Philosophy and Public Ethics, Australian National University, Canberra This volume discusses principles of global justice, their normative grounds, and the social institutions they require. Over the last few decades an increasing number of philosophers and political theorists have attended to these morally urgent, politically confounding and philosophically challenging topics. Many of these scholars came together September 11–13, 2003, for an international symposium where first versions of most of the present chapters were discussed. A few additional chapters were solicited to provide a broad and critical range of perspectives on these issues. The Oslo Symposium took Thomas Pogge's recent work in this area as its starting point, in recognition of his long-standing academic contributions to this topic and of the seminars on moral and political philosophy he has taught since 1991 under the auspices of the Norwegian Research Council. Pogge's opening remarks — "What is Global Justice?" — follow below, before brief synopses of the various contributions.

Global Ethics

This book articulates a systematic vision of an international legal system grounded in the commitment to justice for all persons. It provides a probing exploration of the moral issues involved in disputes about secession, ethno-national conflict, 'the right of self-determination of peoples,' human rights, and the legitimacy of the international legal system itself. Buchanan advances vigorous criticisms of the central dogmas of international relations and international law, arguing that the international legal system should make justice, not simply peace, among states a primary goal, and rejecting the view that it is permissible for a state to conduct its foreign policies exclusively according to what is in the 'the national interest'. He also shows that the only alternatives are not rigid adherence to existing international law or lawless chaos in which the world's one superpower pursues its own interests without constraints. This book not only criticizes the existing international legal order, but also offers morally defensible and practicable principles for reforming it. Justice, Legitimacy, and Self-Determination will find a broad readership in political science, international law, and political philosophy. Oxford Political Theory presents the best new work in political theory. It is intended to be broad in scope, including original contributions to political philosophy and also work in applied political theory. The series contains

works of outstanding quality with no restrictions as to approach or subject matter. Series Editors: Will Kymlicka, David Miller, and Alan Ryan

Real World Justice

The ethics of hospitality – the welcome of the foreigner – is implied in all moral debate in international relations ranging from questions of asylum to those of humanitarian intervention. Why then has there been so little reflection on hospitality in the study of international relations to date? Seeking to correct this striking omission, and making an important and original contribution to debates about ethics in international relations in the process, Baker outlines a theory of cosmopolitanism as hospitality which goes beyond existing cosmopolitanisms. He argues that we must understand cosmopolitanism not as the pursuit of a world in which there are no more foreigners but as the welcome of the foreigner. However, though hospitality calls for a welcome, there is always a decision on the welcome to be made. Cosmopolitanism as hospitality is therefore always as much a politics as it is an ethics. Addressing issues of central concern for those who seek to understand our obligations to strangers, this book will be of interest to students and scholars of international relations, security studies, ethics, and political and international theory.

Justice, Legitimacy, and Self-determination

Ethical constraints on relations among individuals within and between societies have always reflected or invoked a higher authority than the caprices of human will. For over two thousand years Natural Law and Natural Rights were the constellations of ideas and presuppositions that fulfilled this role in the west, and exhibited far greater similarities than most commentators want to admit. Such ideas were the lens through which Europeans evaluated the rest of the world. In his major new book David Boucher rejects the view that Natural Rights constituted a secularisation of Natural Law ideas by showing that most of the significant thinkers in the field, in their various ways, believed that reason leads you to the discovery of your obligations, while God provides the ground for discharging them. Furthermore, the book maintains that Natural Rights and Human Rights are far less closely related than is often asserted because Natural Rights never cast adrift the religious foundationalism, whereas Human Rights, for the most part, have jettisoned the Christian metaphysics upon which both Natural Law and Natural Rights depended. Human Rights theories, on the whole, present us with foundationless universal constraints on the actions of individuals, both domestically and internationally. Finally, one of the principal contentions of the book is that these purportedly universal rights and duties almost invariably turn out to be conditional, and upon close scrutiny end up being 'special' rights and privileges as the examples of multicultural encounters, slavery and racism, and women's rights demonstrate.

Politicising Ethics in International Relations

Lebow shows how and why foreign policies consistent with ethical norms are more likely to succeed, and those at odds with them to fail.

The Limits of Ethics in International Relations

In a time of eroding sovereignty and resurgent nationalism, this collection provides a searching investigation of the moral foundations of the international order. Drawing on diverse philosophical and theological perspectives, the contributors debate the character of international society, the authority of international law and institutions, and the demands of international justice. In a series of philosophical essays, each followed by a critical commentary, the book considers the contributions of legal positivism, natural law, Kantian ethics, contractarian theory, and moral cosmopolitanism to the discussion of law and justice in international society. It also includes commentaries by experts in Jewish, Christian, and Islamic moral theology, and a concluding chapter that compares and contrasts the views presented without seeking to adjudicate their differences. Because of its comprehensive approach and the diversity of its viewpoints, the volume serves as an introduction to the topic and as a resource for scholars, journalists, policy makers, and anyone else who wants to understand better the range of moral perspectives that underlies discussion of the current international order. In addition to the editors, the contributors are Brian Barry, Chris Brown, John Charvet, Richard Friedman, Robert P. George, Sohail Hashmi, Pierre Laberge, David Miller, David Novak, Max L. Stackhouse, Fernando R. Tesón, and Frederick G. Whelan.

Ethics and International Relations

This collection of essays cuts to the quick of the most pressing moral issues facing decision-makers today, from the actions of ordinary soldiers in a combat zone to presidents deciding when and where to use force. Ethics lie at the heart of human and therefore also international affairs, compelling nations to get involved "over there" and dedicate resources to intervention or to justify detachment. The politics and rhetoric of ethics constrain decision-makers, greatly complicating international situations. This third edition of *Ethics and Statecraft* addresses the moral reasoning behind the art of peacemaking as well as the ethics and statecraft of conducting war. The coverage ranges from historical transformations of whole eras of diplomatic and international history to issues of ethics of bombing and the laws of war. Specific attention is paid to emerging issues such as armed humanitarian intervention and sanctions, drone wars, war crimes, and economic justice. The work is ideally suited for undergraduate and graduate students of international relations, history, political science, and ethics. It will also be useful for NGO officials and military officers struggling with these issues in the field. General readers will find illumination of highly relevant historical issues—including Allied bombing of civilians during World War II—that set precedents for both expansion and limitations on the laws of war. They will also encounter pressing modern-day quandaries, such as the conditions that permit or even require military or humanitarian intervention, and the impact of new technologies on old moral problems.

Ethics and Statecraft

Un incroyable voyage autour du monde

Alors qu'ils se promènent tranquillement dans leur village, la famille de Yemaya, Timothée, Luca et Lilli-Fleur rencontre un drôle de personnage. Est-il là pour eux? Qu'est ce que sa venue signifie? Je t'invite à suivre les incroyables aventures autour du monde de cette famille extraordinaire.

Un incroyable voyage autour du monde

Alors qu'ils se promènent tranquillement dans leur village, la famille de Yemaya, Timothée, Luca et Lilli-Fleur rencontre un drôle de personnage. Est-il là pour eux? Qu'est ce que sa venue signifie? Je t'invite à suivre les incroyables aventures autour du monde de cette famille extraordinaire.

Voyage autour du Monde de l'Astrolabe et de la Zélée, sous les ordres du contre-amiral Dumont-d'Urville, pendant les années 1837, 38, 39 et 40. (Complément aux Souvenirs d'un Aveugle)

"Le Tour du Monde d'un Gamin de Paris" est un roman écrit par Louis-Henri Boussenard, un écrivain français du XIXe siècle. Voici un résumé de ce roman : "Le Tour du Monde d'un Gamin de Paris" raconte l'histoire d'un jeune Parisien nommé Gustave qui entreprend un incroyable voyage autour du monde. Le roman suit les aventures passionnantes de Gustave alors qu'il quitte sa vie familière à Paris pour explorer des contrées lointaines et exotiques. Gustave, un gamin des rues de Paris, rêve de découvertes et d'aventures. Avec son ami Anatole, il parvient à monter clandestinement à bord d'un navire en partance pour l'Asie. Le récit emmène les lecteurs dans un voyage riche en découvertes, en rencontres fascinantes et en péripéties palpitantes. Au cours de son périple, Gustave explore des endroits variés, des jungles mystérieuses aux villes animées, des déserts arides aux îles tropicales. Il rencontre des personnages hauts en couleur, certains amicaux et d'autres malveillants, et apprend à naviguer dans des cultures et des environnements différents. Le roman offre une fenêtre sur les réalités et les merveilles du monde à une époque où les voyages étaient plus lents et plus aventureux. Les descriptions vivantes des lieux, des coutumes et des expériences de Gustave ajoutent une dimension immersive à l'histoire. Tout au long de son périple, Gustave évolue, apprend et grandit, développant des compétences et une compréhension du monde qui l'entoure. Le roman explore des thèmes tels que le courage, la détermination, l'amitié et la curiosité. "Le Tour du Monde d'un Gamin de Paris" est une aventure captivante qui transporte les lecteurs dans un voyage inoubliable à travers les continents, offrant une perspective unique sur les défis et les merveilles du monde au XIXe siècle.

Voyage autour du monde

Réimpression inchangée de l'édition originale de 1860.

Voyage autour du monde

UNE AVENTURE... DANS LA NATURE ! Voyageurs d'ici et d'ailleurs, êtes-vous prêts ? Ras Second Edition

We map infrastructure resources to services Is RAS currently on schedule according to the plan? What is the assessment of IT regarding infrastructures to support the centre? Are you buying into a cloud architecture/infrastructure/ service which is not compliant? What tools do you use once you have decided on a RAS strategy and more importantly how do you choose? Defining, designing, creating, and implementing a process to solve a challenge or meet an objective is the most valuable role... In EVERY group, company, organization and department. Unless you are talking a one-time, single-use project, there should be a process. Whether that process is managed and implemented by humans, AI, or a combination of the two, it needs to be designed by someone with a complex enough perspective to ask the right questions. Someone capable of asking the right questions and step back and say, 'What are we really trying to accomplish here? And is there a different way to look at it?' This Self-Assessment empowers people to do just that - whether their title is entrepreneur, manager, consultant, (Vice-)President, CxO etc... - they are the people who rule the future. They are the person who asks the right questions to make RAS investments work better. This RAS All-Inclusive Self-Assessment enables You to be that person. All the tools you need to an in-depth RAS Self-Assessment. Featuring 1186 new and updated case-based questions, organized into seven core areas of process design, this Self-Assessment will help you identify areas in which RAS improvements can be made. In using the questions you will be better able to: - diagnose RAS projects, initiatives, organizations, businesses and processes using accepted diagnostic standards and practices - implement evidence-based best practice strategies aligned with overall goals - integrate recent advances in RAS and process design strategies into practice according to best practice guidelines Using a Self-Assessment tool known as the RAS Scorecard, you will develop a clear picture of which RAS areas need attention. Your purchase includes access details to the RAS self-assessment dashboard download which gives you your dynamically prioritized projects-ready tool and shows your organization exactly what to do next. You will receive the following contents with New and Updated specific criteria: - The latest quick edition of the book in PDF - The latest complete edition of the book in PDF, which criteria correspond to the criteria in... - The Self-Assessment Excel Dashboard, and... - Example pre-filled Self-Assessment Excel Dashboard to get familiar with results generation ...plus an extra, special, resource that helps you with project managing. INCLUDES LIFETIME SELF ASSESSMENT UPDATES Every self assessment comes with Lifetime Updates and Lifetime Free Updated Books. Lifetime Updates is an industry-first feature which allows you to receive verified self assessment updates, ensuring you always have the most accurate information at your fingertips.

Clinical Pediatric Nephrology, Second Edition

Revised in line with feedback from users of the first edition, this practical clinical resource boasts a worldwide array of contributors, including the most prominent pediatric nephrologists in the US. Excellently illustrated with photomicrographs and clinical diagrams supporting the chapters, Clinical Pediatric Nephrology features expanded case histories relating to the discussion and management of

renal disease – thus ensuring that this is a highly useful reference tool for nephrologists and house officers in practice, as well as nephrology fellows in training.

Neuroscience for the Mental Health Clinician, Second Edition

Accessible and succinct, this book has given thousands of clinicians and students the basic understanding of neuroscience that is essential in contemporary mental health practice. Steven R. Pliszka synthesizes current knowledge on the neurobiological bases of major psychiatric disorders. He explores the brain systems that underlie cognition, emotions, and behavior; how disturbances in these systems can lead to psychopathology; and the impact of genetic and environmental risk factors across development. The book also addresses the ways that both pharmacological and psychosocial treatments act on the brain as they bring about a reduction in symptoms. Illustrations include 93 black-and-white figures and 14 color plates. New to This Edition *Incorporates over a decade of important advances in brain science. *Heightened focus on brain networks. *Cutting-edge discussions of genetics and epigenetics, the biological impact of stress, neurotransmitters, novel depression treatments, and other timely topics. *Detailed chapters on autism spectrum disorder and dementia. *Numerous new and revised figures.

Hankey's Clinical Neurology, Second Edition

Since the publication of the highly successful first edition, there has been an explosion of rigorous scientific evidence for interventions in clinical neurology. Hankey's Clinical Neurology, Second Edition is fully updated to accommodate the latest advancements in clinical neuroscience. Designed for students of clinical neurology, neurologists-in-training, and practicing neurologists who need ready access to a comprehensive, evidence-based guide to new and notable neurologic disorders, the Second Edition: Contains a chapter solely dedicated to sleep disorders Introduces a section on neuro-ophthalmology within the cranial neuropathies chapter Reflects a more global approach, as each chapter is written by an international expert in the field Delivers expanded coverage of degenerative diseases of the nervous system, with sections on dementias, Parkinson's disease and Parkinsonian syndromes, and hereditary ataxias Includes 440+ all-new, high-quality illustrations ranging from anatomical drawings to clinical photographs and pathology specimens, with many images taken with permission from the authors' own patients The structured text integrates presentation, pathology, radiology, diagnosis, and treatment options to provide a practical, patient-oriented examination of clinical neurology.

Essential Quantitative Aptitude for Competitive Exams - 2nd Edition

The field of knowledge for development now occupies a top position on the agenda of all Asian governments as well as large development organizations. This book reflects this mega-trend of development towards KBEs (Knowledge Based Economies). For this 2nd edition all chapters have been thoroughly edited and data, tables and graphs have been updated to reflect the latest available statistics. Trends have been re-evaluated and adjusted to reflect recent developments in the fast-moving scene of knowledge governance and knowledge management.

Coding for kids is cool with Raspberry Pi and this elementary guide Even if your kids don't have an ounce of computer geek in them, they can learn to code with Raspberry Pi and this wonderful book. Written for 11- to 15-year-olds and assuming no prior computing knowledge, this book uses the wildly successful, low-cost, credit-card-sized Raspberry Pi computer to explain fundamental computing concepts. Young people will enjoy going through the book's nine fun projects while they learn basic programming and system administration skills, starting with the very basics of how to plug in the board and turn it on. Each project includes a lively and informative video to reinforce the lessons. It's perfect for young, eager self-learners—your kids can jump in, set up their Raspberry Pi, and go through the lessons on their own. Written by Carrie Anne Philbin, a high school teacher of computing who advises the U.K. government on the revised ICT Curriculum Teaches 11- to 15-year-olds programming and system administration skills using Raspberry Pi Features 9 fun projects accompanied by lively and helpful videos Raspberry Pi is a \$35/£25 credit-card-sized computer created by the non-profit Raspberry Pi Foundation; over a million have been sold Help your children have fun and learn computing skills at the same time with Adventures in Raspberry Pi.

Governing And Managing Knowledge In Asia (2nd Edition)

The Great Perfection (rDzogs chen in Tibetan) is a philosophical and meditative teaching. Its inception is attributed to Vairocana, one of the first seven Tibetan Buddhist monks ordained at Samye in the eight century A.D. The doctrine is regarded among Buddhists as the core of the teachings adhered to by the Nyingmapa school whilst similarly it is held to be the fundamental teaching among the Bonpos, the non-Buddhist school in Tibet. After a historical introduction to Tibetan Buddhism and the Bon, the author deals with the legends of Vairocana (Part I), analysing early documents containing essential elements of the doctrine and comparing them with the Ch'an tradition. He goes on to explore in detail the development of the doctrine in the tenth and eleventh centuries A.D. (Part II). The Tantric doctrines that play an important role are dealt with, as are the rDzogs chen theories in relation to the other major Buddhist doctrines. Different trends in the rDzogs chen tradition are described in Part III. The author has drawn his sources mainly from early unpublished documents which throw light on the origins and development, at the same time also using a variety of sources which enabled him to explicate the crucial position which the doctrine occupies in Tibetan religions.

Publishers' circular and booksellers' record

This is a text book for all doctors but especially GPs, appraisers and registrars. It is written by a 40 year plus front line NHS doctor who for most of his career worked twice to three times the current doctors' Working Time Directive limited week. Chris Heath has been a Paediatric Lecturer in a teaching hospital, an Anaesthetist, various junior specialists and a GP over 30 years in 3 different practices. He has been a GP Trainer and Appraiser and has seen politics and political correctness harm patients' interests constantly over the last half of his career. From the way it selects young doctors to the way they are educated and assessed, the best interests of the patient are largely ignored. This is a text book but it also contains home truths, insights and a warts and all appraisal of how to be a good doctor as well

as an unbiased assessment of what is wrong with today's NHS. It also explains why today's politicians, medical schools and doctors will resist the changes that are needed to put the patients' needs first again.

The British Quarterly Review

NEW DIMENSIONS IN ELEMENTARY PARTICLE PHYSICS AND COSMOLOGY summarizes certain results of the author's theoretical research toward developing a mathematically very simple Unified Theory of Elementary Particles and Interactions (UTOEPI.) Here the masses of the particles of the Standard Model, including the Higgs boson (the the socalled God Particle), are directly represented in terms of the interaction. The book introduces a new paradigm of a three-dimensional time, as an essential extension of Einstein's relativity theory. Interrelation between the classical and quantum physics is illustrated. Examples of applications in cosmology and the significance of the neutron decay in the evolution of matter, and of life on the earth, are included.

Process Data in Educational and Psychological Measurement, 2nd Edition

Emergency vascular and endovascular practice comprises almost half the workload undertaken by the majority of vascular surgeons. Most vascular emergencies are characterised by the sudden occlusion, rupture or injury of a blood vessel placing organ, limb and life at risk. An attitude of urgency and of good judgement, both in diagnostic assessment and the application of evidence-based vascular and endovascular techniques, is crucial to the achievement of optimal outcomes. This book is structured with the emphasis on clinical presentation, the objective being to provide accessible and highly practical advice to the vascular surgeon faced with a particular emergency. Distinguished vascular surgeons, vascular radiologists and other specialists around the world have enriched this book with authoritative contributions reflecting their experience and expertise. For ease of reference the text is divided into nine sections, leading with introductory chapters on general considerations such as pathophysiology, preoperative diagnosis, risk assessment and medico-legal aspects of vascular emergencies. That is followed by a series of clinical sections covering acute cerebrovascular syndromes, acute limb ischaemic states, the acutely swollen limb, thoraco-abdominal catastrophes, acute complications of endovascular aortic repair, regional vascular trauma and iatrogenic injuries. It concludes with a section on miscellaneous, but important, acute vascular challenges. Throughout the book, wherever appropriate, modern endovascular techniques are given full coverage. International in its approach, this book will fast become established as the text devoted to the surgical management of vascular and endovascular emergencies. It is essential reading for vascular surgeons and radiologists and a useful reference source for general and trauma surgeons, angiologists and emergency physicians.

Publisher and Bookseller

Since 1982, Ras proteins have been the subject of intense research investigation by the biomedical research community. The wide interest in Ras has been stimulated for three key reasons. This book features chapters contributed by leading investigators in the field that highlight the current state-of-the art in Ras biochemistry, structure and biology. This book is an excellent reference for students in the biomedical sciences and for investigators in the field.

Cyllene; Or, The Fall of Paganism

This book offers an integrated study of the texts and images of illustrated Malay manuscripts on magic and divination from private and public collections in Malaysia, the UK and Indonesia. Containing some of the rare examples of Malay painting, these manuscripts provide direct evidence for the intercultural connections between the Malay region, other parts of Southeast Asia and the rest of the world. In this richly illustrated volume many images and texts are gathered for the first time, making this book essential reading for all those interested in the practice of magic and divination, and the history of Malay, Southeast Asian and Islamic manuscript art.
