This fascinating book is the first volume in a projected cultural history of the United States, from the earliest English settlements to our own time. It is a history of American folkways as they have changed through time, and it argues a thesis about the importance for the United States of having been British in its cultural origins. While most people in the United States today have no British ancestors, they have assimilated regional cultures which were created by British colonists, even while preserving ethnic identities at the same time. In this sense, nearly all Americans are "Albion's Seed," no matter what their ethnicity may be. The concluding section of this remarkable book explores the ways that regional cultures have continued to dominate national politics from 1789 to 1988, and still help to shape attitudes toward education, government, gender, and violence, on which differences between American regions are greater than between European nations.

My Brother Ron

America started a grand experiment in the 1960s: deinstitutionalization of the mentally ill. The consequences were very destructive: homelessness; a degradation of urban life; increases in violent crime rates; increasing death rates for the mentally ill. My Brother Ron tells the story of deinstitutionalization from two points of view: what happened to the author's older brother, part of the first generation of those who became mentally ill after deinstitutionalization, and a detailed history of how and why America went down this path. My Brother Ron examines the multiple strands that came together to create the perfect storm that was deinstitutionalization: a well-meaning concern about the poor conditions of many state mental hospitals; a giddy optimism by the psychiatric profession in the ability of new drugs to cure the mentally ill; a rigid ideological approach to due process that ignored that the beneficiaries would end up starving to death or dying of exposure.

The New Sultan

In a world of rising tensions between Russia and the United States, the Middle East and Europe, Sunnis and Shiites, Islamism and liberalism, Turkey is at the epicentre. And at the heart of Turkey is its right-wing populist president, Recep Tayyip Erdoğan. Since 2002, Erdoğan has consolidated his hold on domestic politics while using military and diplomatic means to solidify Turkey as a regional power. His crackdown has been brutal and consistent - scores of journalists arrested, academics officially banned from leaving the country, university deans fired and many of the highest-ranking military officers arrested. In some senses, the nefarious and failed 2016 coup has given Erdoğan the licence to make good on his repeated promise to bring order and stability under a 'strongman'. Here, leading Turkish expert Soner Cagaptay will look at Erdoğan's roots in Turkish history, what he believes in and how he has cemented his rule, as well as what this means for the world. The book will also unpick the 'threats' Erdogan has worked to combat - from the liberal Turks to the Gulen movement, from coup plotters to Kurdish nationalists - all of which have culminated in the crisis of modern Turkey.

The War on Cops

Violent crime has been rising sharply in many American cities after two decades of decline. Homicides jumped nearly 17 percent in 2015 in the largest 50 cities, the biggest one-year increase since 1993. The reason is what Heather Mac Donald first identified nationally as the "Ferguson effect": Since the 2014 police shooting death of Michael Brown in Ferguson, Missouri, officers have been backing off of proactive policing, and criminals are becoming emboldened. This book expands on Mac Donald's groundbreaking and controversial reporting on the Ferguson effect and the criminal-justice system. It deconstructs the central narrative of the Black Lives Matter movement: that racist cops are the greatest threat to young black males. On the contrary, it is criminals and gangbangers who are responsible for the high black homicide death rate. The War on Cops exposes the truth about officer use of force and explodes the conceit of "mass incarceration." A rigorous analysis of data shows that crime, not race, drives police actions and prison rates. The growth of proactive policing in the 1990s, along with lengthened sentences for violent crime, saved thousands of minority lives. In fact, Mac Donald

argues, no government agency is more dedicated to the proposition that “black lives matter” than today’s data-driven, accountable police department. Mac Donald gives voice to the many residents of high-crime neighborhoods who want proactive policing. She warns that race-based attacks on the criminal-justice system, from the White House on down, are eroding the authority of law and putting lives at risk. This book is a call for a more honest and informed debate about policing, crime, and race.

The Diversity Delusion

By the New York Times bestselling author: a provocative account of the attack on the humanities, the rise of intolerance, and the erosion of serious learning America is in crisis, from the university to the workplace. Toxic ideas first spread by higher education have undermined humanistic values, fueled intolerance, and widened divisions in our larger culture. Chaucer, Shakespeare and Milton? Oppressive. American history? Tyranny. Professors correcting grammar and spelling, or employers hiring by merit? Racist and sexist. Students emerge into the working world believing that human beings are defined by their skin color, gender, and sexual preference, and that oppression based on these characteristics is the American experience. Speech that challenges these campus orthodoxies is silenced with brute force. The Diversity Delusion argues that the root of this problem is the belief in America’s endemic racism and sexism, a belief that has engendered a metastasizing diversity bureaucracy in society and academia. Diversity commissars denounce meritocratic standards as discriminatory, enforce hiring quotas, and teach students and adults alike to think of themselves as perpetual victims. From #MeToo mania that blurs flirtations with criminal acts, to implicit bias and diversity compliance training that sees racism in every interaction, Heather Mac Donald argues that we are creating a nation of narrowed minds, primed for grievance, and that we are putting our competitive edge at risk. But there is hope in the works of authors, composers, and artists who have long inspired the best in us. Compiling the author’s decades of research and writing on the subject, The Diversity Delusion calls for a return to the classical liberal pursuits of open-minded inquiry and expression, by which everyone can discover a common humanity.

It's Complicated

Why do underdogs succeed so much more than we expect? How do the weak outsmart the strong? In *David and Goliath* Malcolm Gladwell, no.1 bestselling author of *The Tipping Point*, *Blink*, *Outliers* and *What the Dog Saw*, takes us on a scintillating and surprising journey through the hidden dynamics that shape the balance of power between the small and the mighty. From the conflicts in Northern Ireland, through the tactics of civil rights leaders and the problem of privilege, Gladwell demonstrates how we

misunderstand the true meaning of advantage and disadvantage. When does a traumatic childhood work in someone's favour? How can a disability leave someone better off? And do you really want your child to go to the best school he or she can get into? David and Goliath draws on the stories of remarkable underdogs, history, science, psychology and on Malcolm Gladwell's unparalleled ability to make the connections others miss. It's a brilliant, illuminating book that overturns conventional thinking about power and advantage. 'A global phenomenon... there is, it seems, no subject over which he cannot scatter some magic dust' Observer

From the bestselling author of *The Black Swan*, a bold book that challenges many of our long-held beliefs about risk and reward, politics and religion, finance and personal responsibility 'Skin in the game means that you do not pay attention to what people say, only to what they do, and how much of their neck they are putting on the line' Citizens, artisans, police, fishermen, political activists and entrepreneurs all have skin in the game. Policy wonks, corporate executives, many academics, bankers and most journalists don't. It's all about having something to lose and sharing risks with others. In his most provocative and practical book yet, Nassim Nicholas Taleb shows that skin in the game, often seen as the foundation of risk management, in fact applies to all aspects of our lives. In his inimitable style, Taleb draws on everything from Antaeus the Giant to Hammurabi to Donald Trump, from ethics to used car salesmen, to create a jaw-dropping framework for understanding this idea. Among his insights: For social justice, focus on symmetry and risk sharing. Minorities, not majorities, run the world. You can be an intellectual yet still be an idiot. Beware of complicated solutions (that someone was paid to find). Just as *The Black Swan* did during the 2007 financial crisis, *Skin in the Game* comes at precisely the right moment to challenge our long-held beliefs about risk, reward, politics, religion and business - and make us rethink everything we thought we knew.

Skin in the Game

An "extraordinary" (Nylon) firsthand account of the creation of a modern cult and the costs paid by its young victims: a group of college roommates "Intense . . . [a tale] of hard-won survival, and creating a life after the unimaginable."—Salon The inspiration for the Hulu docuseries *Stolen Youth*, directed by Zach Heinzerling and co-produced by Daniel Barban Levin In September 2010, at the beginning of the academic year at Sarah Lawrence College, a sophomore named Talia Ray asked her roommates if her father could stay with them for a while. No one objected. Her father, Larry Ray, was just released from prison, having spent three years behind bars after a conviction during a bitter custody dispute. Larry Ray arrived at the dorm, a communal house called Slonim Woods 9, and stayed for the whole year. Over the course of innumerable counseling sessions and "family meetings," the intense and forceful Ray convinced his daughter's friends that he alone could help them "achieve clarity." Eventually, Ray and the students moved into a small Manhattan apartment, beginning years of manipulation and abuse, as Ray tightened his control over his young charges through blackmail, extortion, and ritualized humiliation. After a decade of secrecy, Larry Ray was finally indicted on charges of extortion, sex trafficking, forced labor, and money laundering. Daniel Barban Levin was one of the original residents of Slonim Woods 9. Beginning the moment Daniel set foot on Sarah Lawrence's idyllic campus and spanning the two years he spent in the grip of a megalomaniac, this brave, lyrical, and redemptive memoir reveals how a group of friends were led from college to a cult without the world even noticing.

This book presents the new Precariat – the rapidly growing number of people facing lives of insecurity, on zero hours contracts, moving in and out of jobs that give little meaning to their lives. The delivery driver who brings your packages, the uber driver who gets you to work, the security guard at the mall, the carer looking after our elderly...these are The Precariat. Guy Standing investigates this new and growing group, finding a frustrated and angry new underclass who are often ignored by politicians and economists. The rise of zero hours contracts, encouraged by fat cat corporations as risk-free employment, and by silicon valley as a way of outsourcing costs and responsibility, has been exacerbated by the COVID pandemic. At the same time, in its experience of lockdown, the western world is realizing the true value of these nurses, carers and key workers. The answer? The return of income security and meaningful work - the principles 20th century capitalism was built on. By making the fears and desires of the Precariat central to economic thinking, Standing shows how concepts like Basic Income are not just desirable but inevitable, and plots the way to a better future.

Reputation

With *The Firm*, financial journalist Duff McDonald pulled back the curtain on consulting giant McKinsey & Company. In *The Golden Passport*, he reveals the inner works of a singular nexus of power, ambition, and influence: Harvard Business School. Harvard University still occupies a unique place in the public's imagination, but the Harvard Business School eclipsed its parent in terms of influence on modern society long ago. A Harvard degree guarantees respect. But a Harvard MBA near-guarantees entrance into Western capitalism's most powerful realm—the corner office. And because the School shapes the way its powerful graduates think, its influence extends well beyond their own lives. It affects the organizations they command, the economy they dominate, and society itself. Decisions and priorities at HBS touch every single one of us. Most people have a vague knowledge of the power of the HBS network, but few understand the dynamics that have made HBS an indestructible and dominant force for almost a century. Graduates of HBS share more than just an alma mater. They also share a way of thinking about how the world should work, and they have successfully molded the world to that vision—that is what truly binds them together. In addition to teasing out the essence of this exclusive, if not necessarily “secret” club, McDonald explores two important questions: Has the school failed at reaching the goal it set for itself—“the multiplication of men who will handle their current business problems in socially constructive ways?” Is HBS complicit in the moral failings of Western capitalism? At a time of soaring economic inequality and growing political unrest, this hard-hitting yet fair portrait offers a much-needed look at an institution that has had a profound influence not just in the world of business but on the shape of our society—and on all our lives.

The Precariat

Political correctness is one of the primary enemies of freedom of thought in higher education today, undermining our ability to acquire, transmit, and process knowledge. Political correctness limits the variation of ideas by an ideologically driven concern for hue rather than view. This volume is not simply another rant; there are good data here, along with well-crafted, hard-to-ignore logical interpretations and arguments. It is the sort of work that those who adhere to idea-limiting notions of the university will try to trivialize. That alone should make it important reading. --Michael Schwartz, president emeritus, Kent State University and Cleveland State University

This book is an anthology with a difference. It presents a distinctive variety of Anglo-Norman works, beginning in the twelfth century and ending in the nineteenth, covering a broad range of genres and writers, introduced in a lively and thought-provoking way. Facing-page translations, into accessible and engaging modern English, are provided throughout, bringing these texts to life for a contemporary audience. The collection offers a selection of fascinating passages, and whole texts, many of which are not anthologised or translated anywhere else. It explores little-known byways of Arthurian legend and stories of real-life crime and punishment; women's voices tell history, write letters, berate pagans; advice is offered on how to win friends and influence people, how to cure people's ailments and how to keep clear of the law; and stories from the Bible are retold with commentary, together with guidance on prayer and confession. Each text is introduced and elucidated with notes and full references, and the material is divided into three main sections: Story (a variety of narrative forms), Miscellany (including letters, law and medicine, and other non-fiction), and Religious (saints' lives, sermons, Bible commentary, and prayers). Passages in one genre have been chosen so as to reflect themes or stories that appear in another, so that the book can be enjoyed as a collection or used as a resource to dip into for selected texts. This anthology is essential reading for students and scholars of Anglo-Norman and medieval literature and culture. Wide-ranging and fully referenced, it can be used as a springboard for further study or relished in its own right by readers interested to discover Anglo-Norman literature that was written to amuse, instruct, entertain, or admonish medieval audiences.

The Aeneid

The Tempest is a play by William Shakespeare, probably written in 1610-1611, and thought to be one of the last plays that Shakespeare wrote alone. After the first scene, which takes place on a ship at sea during a tempest, the rest of the story is set on a remote island, where the sorcerer Prospero, a complex and contradictory character, lives with his daughter Miranda, and his two servants-Caliban, a savage monster figure, and Ariel, an airy spirit. The play contains music and songs that evoke the spirit of enchantment on the island. It explores many themes, including magic, betrayal, revenge, and family. In Act IV, a wedding masque serves as a play-within-the play, and contributes spectacle, allegory, and elevated language.

An Ordinary Life Revisited

New York Times bestselling author of *Labor Day* With a New Preface When it was first published in 1998, *At Home in the World* set off a furor in the literary world and beyond. Joyce Maynard's memoir broke a silence concerning her relationship—at age eighteen—with J.D. Salinger, the famously reclusive author of *The Catcher in the Rye*, then age fifty-three, who had read a story she wrote for The New York Times in her freshman year of college and sent her a letter that changed her life. Reviewers called her book "shameless" and "powerful" and its author was simultaneously reviled and cheered. With what some have viewed as shocking honesty, Maynard explores her coming of age in an alcoholic family, her mother's dream to mold her into a writer, her self-imposed exile from the world of her peers when she left Yale to live with Salinger, and her struggle to reclaim her sense of self in the crushing aftermath of his dismissal of her not long after her nineteenth birthday. A quarter of a century later—having become a writer, survived the end of her marriage and the deaths of her parents, and with an eighteen-year-old daughter of her own—Maynard pays a visit to the man who broke her heart. The story she tells—of the girl she was and the woman she became—is at once devastating, inspiring, and triumphant.

Challenge and Thrill of Pre-College Mathematics

This new and expanded edition is intended to help candidates prepare for entrance examinations in mathematics and scientific subjects, including STEP (Sixth Term Examination Paper). STEP is an examination used by Cambridge Colleges for conditional offers in mathematics. They are also used by some other UK universities and many mathematics departments recommend that their applicants practice on the past papers even if they do not take the examination. Advanced Problems in Mathematics bridges the gap between school and university mathematics, and prepares students for an undergraduate mathematics course. The questions analysed in this book are all based on past STEP questions and each question is followed by a comment and a full solution. The comments direct the reader's attention to key points and put the question in its true mathematical context. The solutions point students to the methodology required to address advanced mathematical problems critically and independently. This book is a must read for any student wishing to apply to scientific subjects at university level and for anyone interested in advanced mathematics. Knowledge updating is a never-ending process and so should be the revision of an effective textbook. The book originally written fifty years ago has, during the intervening period, been revised and reprinted several times. The authors have, however, been thinking, for the last few years that the book needed not only a thorough revision but rather a substantial rewriting. They now take great pleasure in presenting to the readers the twelfth, thoroughly revised and enlarged, Golden Jubilee edition of the book. The subject-matter in the entire book has been re-written in the light of numerous criticisms and suggestions received from the users of the earlier editions in India and abroad. The basis of this revision has been the emergence of new literature on the subject, the constructive feedback from students and teaching fraternity, as well as those changes that have been made in the syllabi and/or the pattern of examination papers of numerous universities. Problems & Solutions In Business Mathematics And Statistics by Dr. Alok Gupta

This textbook introduces students of economics to the fundamental notions and instruments in linear algebra. Linearity is used as a first approximation to many problems that are studied in different branches of science, including economics and other social sciences. Linear algebra is also the most suitable to teach students what proofs are and how to prove a statement. The proofs that are given in the text are relatively easy to understand and also endow the student with different ways of thinking in making proofs. Theorems for which no proofs are given in the book are illustrated via figures and examples. All notions are illustrated appealing to geometric intuition. The book provides a variety of economic examples using linear algebraic tools. It mainly addresses students in economics who need to build up skills in understanding mathematical reasoning. Students in mathematics and informatics may also be interested in learning about the use of mathematics in economics.

Entrepreneurship is not about breaking free from the 9 to 5 humdrum, not about being your own boss, and definitely not glorious. The entrepreneur shuns the comfort of a cushy corporate job and six figure salaries to set sail on uncharted waters with a single minded zeal and only an idea as an anchor. But it is this idea and passion that makes all the difference and catapults them into a world of infinite possibilities. The Game Changers brings to you 20 success stories of IITians who went on to live the big dream. These include: Suhas Patil, Vijay Kumar, Vinod Gupta, Sam Dalal, Sridhar Mitta, Arjun Malhotra, Kiran Seth, Prabhakant Sinha, Ranbir Singh Gupta, Bikram Dasgupta founder of Globsyn, Praful Kulkarni, Sunil Gaitonde, Anand Deshpande, Arvind Kejriwal, Harish Hande, Anuradha Acharya, Venkata Subramanian, Bikash Barai, Vikram Kumar, and Krishna Mehra. The Black Student's Guide to Colleges

A must for black students, this guide includes profiles of over 200 black and predominantly white colleges, based on interviews, questionnaires, and official college statistics.

Students' Guide to Colleges

College guides are a must for any teenager trying to choose the right school. Unfortunately, most guidebooks are vague, boring tomes written by administrators and journalists, instead of the real experts—the college students that actually go there. Students' Guide to Colleges is different. Entirely student-written and edited, this invaluable resource cuts through the cant with comprehensive listings of the vital statistics and requirements for America's top 100 schools accompanied by three totally honest, fresh, fun-to-read descriptions penned by attending undergrads from different walks of life. Want to know how big classes really are? How rigorous the academics get? Or how greek or granola, chill or up-tight, homogenous or diverse, gay or straight, a campus really is? Lively, irreverent, and insightful, the Students' Guide to Colleges is the only guidebook that offers multiple perspectives on each school and tells it like it is so that college applicants can make the best choice when deciding where they want to spend their college years. The Black Student's Guide to College Success

The landscape of higher education (HE) has dramatically altered in the past 30 years and it continues to evolve and change. More students are entering HE and attending university or college on a global scale than ever before. Supporting and enhancing the undergraduate student experience across the student lifecycle, from first contact through to alumni, is a critical activity in higher education today not only to aid retention and progression but in a highly competitive HE market, the quality of the student experience is pivotal to an institution's ability to attract students. The student experience encompasses all aspects of student life, i.e. academic, social, welfare, with the academic imperative at the heart of it. However, the increasing costs of delivering HE, a reduction in government/ state funding and constraints on resources means delivering a quality student experience has never been more challenging for those working in HE. Staff at all levels, and across all areas within an institution, are developing and implementing initiatives to improve and enhance the student experience whether they are at the coal face or on the periphery thus making them a 'Practitioner' in the student experience. This could include the admissions administrator improving the information available for potential applicants; the academic improving his/her feedback to students or central welfare departments ensuring that their services are being advertised and supported within a student's home unit (faculty/department/school/course). In this book, the Editor, Michelle Morgan describes how her new student experience 'Practitioner Model' provides an organised and more detailed structure; guiding Practitioners in the identification of what they have to deliver, who they need to deliver it to and when they need to deliver it across her six key stages of the student lifecycle: · First Contact and Admissions; · Pre-arrival; · Arrival and Orientation; · Induction to Study; · Reorientation and Reinduction (Returners' Induction) · Outduction (preparation for life after undergraduate study). The Practitioner Model offers a new way of thinking in terms of delivering 'interlinked' academic, welfare and support activities at the home unit and university level to support the student in their university journey. This book also provides working solutions to real problems in the form of exemplar case studies from the UK and internationally, including chapters from Liz Thomas, Di Nutt, Marcia Ody, Chris Keenan(UK), Mary Stuart Hunter, (USA), Kerri-Lee Krause and Duncan Nulty (Australia). Good practice must be adaptable and transferable because one size does not fit all. It must also be cost effective. And here the authors shows how practitioners can adapt and customise the 40 case studies presented to help them not only improve and enhance the experience of their undergraduate students in their own institution (both full and part-time) but also to support their students' progression and retention.
