The Lover's Seat. Kathemérina Or Common Things in Relation to Beauty, Virtue, and Truth

Schott's Original Miscellany was a publishing phenomenon. It sired a host of sequels and parodies. But no matter how patiently and for how many years they waited, the potential feline readership was overlooked. Until now. A Cat-Lover's Miscellany is how the original would have appeared had its creator been an obsessive cat owner. Or, indeed, a very curious cat. It parodies the randomness of entry and stylishness of design of the original, but is created entirely for cats and their obedient owners and admirers. The result is an irresistible outpouring of feline facts, embracing the essential, the trivial, the intriguing, and the extraordinary. Named in tribute to the Clintons' White House moggy (and every other cat that inherited the presidential moniker), this is the perfect laptop or coffee-table book to give as a gift for cat lovers. Herein you will discover such treats as Sir Isaac Newton's invention of the cat flap or kitty door; the origins and popularity of cat names; the power of catmint; how long cats spend asleep

each day; T.S. Eliot's Practical Cats; and the famous Chopin waltz that was in fact composed by the composer's cat.

A Cat-Lover's Miscellany

After a brief biography of Rousseau and his influence on educational methods, chapters explore the progressive education movement in the 19th century, effects of the Romantic movement, and concepts of citizenship that led to the American and French revolutions. To Right the Wrong

Part of the Pet Lover's Guide series, this volume presents detailed information on alternative therapies for both dogs and cats. Written in a clear, simple manner, the book is divided into three main parts. Part 1, on diet and natural therapies, addresses the importance of diet for pets, and discusses the pros and cons of both commercially available and homemade diets. It also covers the basic explanations of the various alternative therapies widely used by holistic veterinarians and readily available to pet owners (e.g., supplements and herbs, acupuncture, homeopathy, chiropractic and other manual healing). Part 2 makes recommendations for specific health conditions, such as skin problems or digestive tract problems, and describes how various alternative therapies are used alone or in combination with allopathic therapies to treat or relieve the condition. Finally, Part 3 offers an overview of health maintenance and preventive health, and includes information about vaccinations, flea and tick control, weight control, and caring for the aging pet. Full-color line art and photographs illustrate various plants and herbs, and also techniques such as manual therapies, massage, and other hands-on healing techniques in a user-friendly and easily identifiable manner. Special boxes labeled "Where We Stand" present the author's strong opinions on specific (sometimes controversial) issues in a highlighted, easy-to-find format. Key terms are highlighted, making them easy to locate and reference - these terms are also included in the glossary with clear, simple definitions. Important information is bulleted and placed in a shaded box, bringing the main points to the reader's attention in a quick and useful way. Clear readability makes information easily accessible to pet owners, helping them to better understand natural therapies and their uses in treating pets. It also enables veterinarians to carry the book in their practices and recommend it to clients. Written by established, recognized veterinarians, this book is a reliable source for veterinary professionals.

The Food Lover's Trail Guide to Alberta

Although Greek society was largely male-dominated, it gave rise to a strong tradition of female authorship. Women poets of ancient Greece and Rome have long fascinated readers, even though much of their poetry survives only in fragmentary form. This pathbreaking volume is the first collection of essays to examine virtually all surviving poetry by Greek and Roman women. It elevates the status of the poems by demonstrating their depth and artistry. Edited and with an introduction by Ellen Greene, the volume covers a broad time span, beginning with Sappho (ca. 630 b.c.e.) in archaic Greece and extending to Sulpicia (first century B.C.E.) in Augustan Rome. In their analyses, the contributors situate the female poets in an established male tradition, but they also reveal their distinctly "feminine" perspectives. Despite relying on literary convention, the female poets often defy cultural norms, speaking in their own voices and transcending their positions as objects of derision in male-authored texts. In their innovative reworkings of established forms, women poets of ancient Greece and Rome are not mere imitators but creators of a distinct and original body of work.
