Harvard Business School Career Guide

The how-to guide for your career In his previous book, Lose the Resume, Land the Job, author Gary Burnison exposed the myths and the ineffective thinking around how to land the job you really want. Now, in Advance, he takes readers through the next stage—advancing in their careers. Advance is extremely timely and topical in today’s do-it-yourself career development world. Average job tenure has fallen to about four years on average and often only one or two years for younger professionals. These “career nomads” simply aren’t around long enough to access career development from their employers. On the other end of the workplace spectrum, many employees find themselves stuck in one job without a promotion, without any raise to speak of, and with no opportunities to learn and grow. In Advance, Burnison lays out a mosaic of “how-to” advice that applies every day and at every level—the skills and behaviors that help people navigate their careers and stand out among the crowd. He takes

on a "Top 20" of career must-haves: managing for the first time, engaging in the "money conversation" with your boss, dealing with difficult bosses (without quitting), coping with coworkers (without losing your mind), making presentations (that don't put people to sleep), mastering digital communication (and avoiding emails that will get you fired), thinking globally (without leaving your office), taking an overseas assignment, meeting senior leaders for the first time (without putting your foot in your mouth), navigating political waters (without sinking your career), reading and fitting in with the culture, and more.

- Wisdom on taking your career to the next level
- Career development tips
- Guidance on being seen and heard

• Written by the CEO of one of the world's largest management consulting firms Whether you're just starting your career, high up on the ladder, or "stuck" anywhere in between, Advance gives you the know-how to get on a path to where you want to go.

Just after a promising job interview and before the job offer, many of today's applicants are marched through an unassuming ritual called "the business lunch" so prospective employers can determine whether or not candidates have "the right stuff." And while it may look innocent enough, this one meal often "makes or breaks" the applicant's future with the interviewing corporation. Most college career counselors and many business schools prepare new grads for the job search with good baseline education and technical information, interview techniques, resume-writing skills and corporate research pointers but few of today's job candidates have any guidance about conducting a successful business lunch/second interview.
