Shattering Glass by Gail Giles - Shattering Glass by Gail Giles by bcplweb 5,540 views 16 years ago
1 minute, 4 seconds - A book trailer for **Shattering Glass by Gail Giles**,.

Simon Glass is the class nerd.

Pants too short, goofy hair, pocket protector...

Someone everyone makes fun of

That is until new student Rob becomes the leader of the senior class.

Rob has plans for Simon.

Plans to make him popular.

You know... a challenge

Have you ever done something with your friends you know is wrong?

How do you stop a chain of events before someone is hurt?

Shattering Glass bu

No one could have imagined the brutal results.

Reading Don't Fix No Chevys

The problems of boys in schools, especially in reading and writing, have been the focus of statistical data, but rarely does research point out how literacy educators can combat those problems. That situation has changed. Michael Smith and Jeff Wilhelm, two of the most respected names in English

education and in the teaching of reading, worked with a very diverse group of young men to understand how they use literacy and what conditions promote it. In this book they share what they have learned. Through a variety of creative research methods and an extended series of interviews with 49 young men in middle and high school who differ in class, race, academic achievement, kind of school, and geography, the authors identified the factors that motivated these young men to become accomplished in the activities they most enjoyed-factors that marked the boys' literate activities outside of school, but were largely absent from their literate lives in school. Their study questions the way reading and literature are typically taught and suggests powerful alternatives to traditional instruction. Building their findings on their understanding of the powerful and engaging experiences boys had outside of school, Smith and Wilhelm discuss why boys embrace or reject certain ways of being literate, how boys read and engage with different kinds of texts, and what qualities of texts appeal to boys. Throughout, the authors highlight the importance of choice, the boys' need to be shown how to read, the cost of the traditional teaching of difficult canonical texts, and the crucial place of meaningful social activity. The authors' data-driven findings are provocative, explaining why boys reject much of school literacy and how progressive curricula and instruction might help boys engage with literacy and all learning in more productive ways. Providing both challenges and practical advice for overcoming those challenges, Smith and Wilhelm have produced a book that will appeal to teachers, teacher educators, and parents alike.

Reading Don't Fix No Chevys

The first comprehensive research handbook of its kind, this volume showcases innovative approaches to understanding adolescent literacy learning in a variety of settings. Distinguished contributors examine how well adolescents are served by current instructional practices and highlight ways to translate research findings more effectively into sound teaching and policymaking. The book explores social and cultural factors in adolescents' approach to communication and response to instruction, and sections address literacy both in and out of schools, including literacy expectations in the contemporary workplace. Detailed attention is given to issues of diversity and individual differences among learners. Winner--Literacy Research Association's Fry Book Award!

Handbook of Adolescent Literacy Research

"Drawing on the research that won 'Reading Don't Fix No Chevys' the NCTE David H. Russell Award, Smith and Wilhelm take Chevys out of the showroom onto the road, presenting classroom-tested units, lessons, and activities that get boys reading and writing and keep them involved in literacy learning. Going with the Flow fully illustrates their approach to designing and sequencing instruction, taking you from developing activities that prepare students for success before they are even given assignments to fostering meaningful classroom discussions. Even if you haven't read 'Reading Don't Fix No Chevys,' Smith and Wilhelm provide a succinct summation of their research to get you started, then give you classroom transcripts, lesson-planning tips, and strategies for interacting with students to help you implement their ideas--Amazon.com.

Going with the Flow

Everyone knows that boys are falling behind in education. Largely left out of the discussion are parents of boys, who are most aware that their bright, eager sons hit an invisible wall somewhere near fourth grade, after which they become disengaged, discouraged, and disaffected. There are dozens of books on underachieving boys, but most parents brave enough to lift one off the shelf are instantly intimidated by the footnotes, graphs, case studies, and academic-speak addressed almost entirely to educators. What about the average guilt-ridden, frustrated mother or father of an underachieving boy? Jump-Starting Boys is the first book on the market that empowers parents, helping them reclaim the duties and rewards of raising their children and navigate the influences of school and media. Filled with reassurance and support, the authors turn fear and guilt into can-do confidence. Through easy tips and action list sidebars, this is the most practical, readable book on the topic.

Jump-Starting Boys

Challenges an autonomous model of literacy instruction in favor of one that recognizes and builds on students' facility in navigating other rhetorical contexts.

The Way Literacy Lives

Shows teachers how to meet the challenges of teaching literacy in today's classroom This book provides educators with the historical and theoretical foundations necessary for becoming a reading, writing, and literacy teacher and helps them understand the broader, more complete picture of the reading process and what it means to be a teacher of readers. It covers the major theories and application strategies of the reading process, and teaches how to organize for literary instruction in a classroom. As educators learn to recognize and draw upon the multiple literacies that children bring to the classroom, they will: become skilled problem-solvers as they work through real-world examples and study the classroom experiences of others; discover how to dig deeper into literacy instruction and decide on what actions to take; and explore ways to drive and teach literacy with such tools as children's toys and familiar characters.

Literate Lives

Thorough and accessible, this professional resource and text shows how the latest research in adolescent literacy can be translated into effective practice in middle and high school classrooms. Leading authorities discuss findings on the adolescent learner, addressing such essential topics as comprehension, content-area literacy, differentiated instruction, gender differences in literacy learning, and English language learners. With a focus on evidence-based methods, coverage ranges from techniques for building digital literacy and comprehension skills to strategies for flexible grouping and writing instruction. Ideal for courses in adolescent literacy, each chapter includes guiding questions, discussion questions, and classroom examples.

Literacy Instruction for Adolescents

Reissue of ILA bestseller. To become truly college and career ready, students need to be able to communicate effectively in writing, and teachers need to be confident and prepared to teach writing in ways that motivate, encourage, and challenge students to higher levels. In this practical volume, a stellar group of researchers and classroom educators come together to provide instructional strategies that can increase student engagement and motivation to write. Write Now! empowers K–6 classroom teachers to make key instructional decisions that benefit all learners. This user-friendly e-book includes practical tips, strategies, techniques, and concrete examples to help expand the writing expertise of both typical and challenged learners. Contributors: Rose Cappelli, Amber B. Chambers, Lynne R. Dorfman, Kathy Ganske, Matt Glover, Steve Graham, Dana L. Grisham, Karen R. Harris, Julia D. Houston, Jon-Philip Imbrenda, Carol Jago, Karen A. Pelekis, Carole C. Phillips, Timothy Shanahan, Linda Smetana, Michael W. Smith, Jeffrey D. Wilhelm, Thomas DeVere Wolsey “Writing fluently and with cohesion is essential for all young children to master because it is a gateway skill for higher learning. Ganske’s approach makes the most of current research on writing and makes it instantly applicable to the classroom.” —Nancy Frey, San Diego State University

Write Now!

Teaching students specific literacy skills is important--but equally critical, and often overlooked, is giving them the time and opportunity to read actual texts. Bringing together leading scholars, this book focuses on how teachers can improve both the quality and quantity of reading experiences in K-12 classrooms. Essential topics include factors that make reading tasks more or less productive for different types of learners, ways to balance independent reading with whole-class and small-group instruction, how to choose appropriate texts, and the connections between reading engagement and proficiency. The relevant research literature is reviewed, and exemplary practices and programs are described.

Reading More, Reading Better

Renita Schmidt and P. L. Thomas The guiding mission of the teacher education program in the university where we teach is to create teachers who are scholars and leaders. While the intent of that mission is basically sound in theory—we instill the idea that teachers at all levels are professionals, always learning and growing in knowledge—that theory, that philosophical underpinning does not insure that the students who complete our program are confident about the act or performance of teaching. In our unique program, students work closely with one teacher and classroom for the entire senior year and then are supervised and mentored during their first semester of teaching; the program is heavily field-based, and it depends on the effectiveness of mentoring throughout the methods coursework and the first semester of full-time teaching. Students tell us this guidance and support is invaluable,

and yet we feel the disjuncture between university and school just as many of you in more traditional student teaching settings. Students hear “best practice” information from us in methods classes and they receive ample exposure to the research supporting our field, but have a hard time implementing research-based practices in their classroom settings and an even harder time finding it in the classrooms around them.

21st Century Literacy

Now more than ever, the roles and responsibilities of today's literacy professionals are expanding. Many recent developments require a closer look at the changing careers of reading specialists, coaches, and administrators leading to an emphasis on increased collaboration and coaching, integration of standards, and student improvement initiatives. Both scholarly and practical, *Reading Specialists and Literacy Coaches in the Real World* provides the support and guidance both literacy and content area teachers need. The learning goals and outcomes in each chapter are aligned with ILA's Standards for the Preparation of Literacy Professionals 2017, providing opportunities for group inquiry and new perspectives on professional learning. The authors examine the historical, political, and social forces that shape evidence-based practice and incorporate significant developments in intervention, assessment, and adolescent literacy. Their impact on instruction and the needs of students are studied in conjunction with RtI/MTSS programs, progress monitoring and differentiation, instructional technologies related to twenty-first century literacies, updated information about effective academic language instruction for English learners, and a moral imperative for fostering equity, social justice, and global perspectives. The Fourth Edition also provides Resource Materials to support the text, giving it a great deal of flexibility to explore projects for portfolios and self-assessment. In the real world, as learners among learners, literacy professionals use their experiences and voices for advocacy to help prepare students for success in their lives and careers.

Reading Specialists and Literacy Coaches in the Real World

The 3rd Edition of *Literacy & Learning in the Content Areas* helps readers build the knowledge, motivation, tools, and confidence they need as they integrate literacy into their middle and high school content area classrooms. Its unique approach to teaching content area literacy actively engages preservice and practicing teachers in reading and writing and the very activities that they will use to teach literacy to their own students in middle and high school classrooms. Rather than passively learning about strategies for incorporating content area literacy activities, readers get hands-on experience in such techniques as mapping/webbing, anticipation guides, booktalks, class websites, and journal writing and reflection. Readers also learn how to integrate children's and young adult literature, primary sources, biographies, essays, poetry, and online content, communities, and websites into their classrooms. Each chapter offers concrete teaching examples and practical suggestions to help make literacy relevant to students' content area learning. Author Sharon Kane demonstrates how relevant reading, writing, speaking, listening, and visual learning activities can improve learning in content area subjects and at the same time help readers meet national content knowledge standards and benchmarks.

Literacy and Learning in the Content Areas

This volume of PISA 2009 results examines 15-year-olds' motivation, their engagement with reading and their use of effective learning strategies.

PISA 2009 Results: Learning to Learn Student Engagement, Strategies and Practices (Volume III)

Emotion in Texts for Children and Young Adults: Moving stories takes up key issues in affect studies while putting forward new approaches and ways of thinking about the intricate entanglements of emotion, affect, and story in relation to the functions, processes, and influences of texts designed for youth. With an emphasis on national literatures and international scholarship, it examines a variety of storytelling forms, formats, genres, and media crafted for readers ranging from the very young to the newly adult. Layering recent cognitive approaches to emotion, affect studies, and feminist perspectives on emotion, it investigates not only what texts for children and young adults have to say about emotion but also how such texts try to move their readers. In this, the chapters draw attention to the ways narrative literary texts address, elicit, shape, and/or embody emotion.

Emotion in Texts for Children and Young Adults

Teaching English language arts at grades K-5 is both a science and an art. Educators must teach literacy skills and content with best practices, while also keeping focus on each student's individual needs. They are challenged to monitor students working independently while also conducting small group instruction. And they must focus on providing differentiated support with a rather complicated text. With increased attention to rigor, requirements, and personalized instruction, it can be a challenge to make sure all students are receiving instruction that is just right. *Comprehensive Literacy Basics: An Anthology* by Capstone Professional contains useful tips to support educators. Chapters focus on each part of the literacy and language arts block, including whole group, small group, writing, and differentiation. A collection of expert authors specializing in literacy and language arts instruction contributed chapters to the book. The quick tips and suggestions within will reinforce current practices while providing an invaluable go-to reference.

Comprehensive Literacy Basics

Today's youth have available an unprecedented array of information and media, and today's literacy must extend well beyond decoding the printed page. As the keepers of information, how do librarians help boys and girls separate relevant from irrelevant, important from unimportant, helpful from harmful? How can librarians help students become self-sufficient learners? This book addresses today's need for literacies in technology, reading, information, and numbers, as well as visual, aural, and media literacy. With thorough consideration of the latest research, it focuses on how gender affects the way these literacies are learned, experienced, and used. Exercises are recommended to help students of both genders become effective learners and managers of their environment. After delving into issues of gender, such as differences and similarities in the way boys and girls learn, discussion concentrates on how librarians and other educators can design learning activities with gender and technology issues in mind. Individual chapters deal with each type of literacy, and the concluding chapter discusses the interdependence of all. This book demonstrates that the era of "one size fits all" literacy is behind us, and argues for the library as an optimal learning environment for exploring literacies holistically.

Librarians, Literacy and the Promotion of Gender Equity

Many agree that engaging in research is what makes a teacher's professional development sustainable, and *Researching and Teaching Reading* studies the ways in which research and teaching are entwined both within and beyond the classroom. Gabrielle Cliff Hodges encourages readers to deepen their understanding of reading through high-quality teaching and research activities designed to engage young learners and generate rich research data, in the expectation that teachers will wish to adapt or develop them further within their own contexts. The author explores how teachers' research and critical reading can further develop their understanding of their students' reading practices and argues that innovative approaches to teaching integrated with research enable English teachers to re-construct ideas and change how reading is taught. Key issues considered in this book include: Studying reading in terms of extending young people's ability to interpret and enjoy texts; The idea of reading as a social practice; The concept of culture in relation to reading; Why historical and spatial theoretical perspectives matter when researching and teaching reading. This book is a valuable resource for any student teachers or practising English teachers wishing to learn more about the connection between researching and teaching reading, how to combine them in the classroom and the positive effect bringing the two together can have on their own professional development.

Researching and Teaching Reading

The *International Handbook of Research in Children's Literacy, Learning and Culture* presents an authoritative distillation of current global knowledge related to the field of primary years literacy studies. Features chapters that conceptualize, interpret, and synthesize relevant research Critically reviews past and current research in order to influence future directions in the field of literacy Offers literacy scholars an international perspective that recognizes and anticipates increasing diversity in literacy practices and cultures

International Handbook of Research on Children's Literacy, Learning and Culture

The generation of readers most heavily impacted by J.K. Rowling's Harry Potter series--those who grew up alongside "the boy who lived"--have come of age. They are poised to become teachers, parents, critics and writers, and many of their views and choices will be influenced by the literary revolution in which they were immersed. This collection of new essays explores the many different ways in which

Harry Potter has shaped this generation's views on everything from politics to identity to pedagogical spaces online. It seeks to determine how the books have affected fans' understanding of their place in the world and their capacity to create it anew.

The Harry Potter Generation

Explains how Victorian women readers strategically identified with literature to defy stereotypes and inspire their action and creativity.

Victorian Women and Wayward Reading

Now in its second edition, this book explores a great variety of genres and formats of young adult literature while placing special emphasis on contemporary works with nontraditional themes, protagonists, and literary conventions that are well suited to young adult readers. It looks at the ways in which contemporary readers can access literature and share the works they're reading, and it shows teachers the resources that are available, especially online, for choosing and using good literature in the classroom and for recommending books for their students' personal reading. In addition to traditional genre chapters, this book includes chapters on literary nonfiction; poetry, short stories, and drama; and film. Graphic novels, diversity issues, and uses of technology are also included throughout the text. The book's discussion of literary language—including traditional elements as well as metafictional terms—enables readers to share in a literary conversation with their peers (and others) when communicating about books. This book is an essential resource for preservice educators to help young adults understand and appreciate the excellent literature that is available to them. New to the second edition: New popular authors, books, and movies with a greater focus on diversity of literature Updated coverage of new trends, such as metafiction, a renewed focus on nonfiction, and retellings of canonical works Increased attention to graphic novels and multimodal texts throughout the book eResources with downloadable materials, including book lists, awards lists, and Focus Questions

Literature for Young Adults

This book addresses the issue of preadolescent boys literacy practices and the social construction of their identities as they navigate multiple classroom literacies. Exploring the role of the teacher, the role of multiple literacies and the way they “count” or do not count in the classroom curriculum through qualitative and quantitative findings, allows educators to rethink and reflect upon current instructional beliefs and practices. As educators align their curriculum with the Common Core Standards it is imperative for them to consider how they will meet each students' individual learning styles. Demonstrating growth across time through artifact collection, and analysis and teacher research inquiries, will demand that teachers release pre-conceived notions concerning gender and literacy practices. At the end of each chapter there is a self-reflection as transformative practice, teacher research questionnaire that invites the opportunity to take what is shared in each chapter and apply it immediately to instructional practices and classroom environment decisions.

Boys will be boys?

Whitehots May 14/04.

Even Hockey Players Read

The racial achievement gap in literacy is one of the most difficult issues in education today, and nowhere does it manifest itself more perniciously than in the case of black adolescent males. Approaching the problem from the inside, author Alfred Tatum brings together his various experiences as a black male student, middle school teacher working with struggling black male readers, reading specialist in an urban elementary school, and staff developer in classrooms across the nation. His book, *Teaching Reading to Black Adolescent Males: Closing the Achievement Gap* addresses the adolescent shift black males face and the societal experiences unique to them that can hinder academic progress. With an authentic and honest voice, Tatum bridges the connections among theory, instruction, and professional development to create a roadmap for better literacy achievement. He presents practical suggestions for providing reading strategy instruction and assessment that is explicit, meaningful, and culturally responsive, as well as guidelines for selecting and discussing nonfiction and fiction texts with black males. The author's first-hand insights provide middle school and high school teachers,

reading specialists, and administrators with new perspectives to help schools move collectively toward the essential goal of literacy achievement for all.

Teaching Reading to Black Adolescent Males

Bringing together a wide range of research on reading disabilities, this comprehensive Handbook extends current discussion and thinking beyond a narrowly defined psychometric perspective. Emphasizing that learning to read proficiently is a long-term developmental process involving many interventions of various kinds, all keyed to individual developmental needs, it addresses traditional questions (What is the nature or causes of reading disabilities? How are reading disabilities assessed? How should reading disabilities be remediated? To what extent is remediation possible?) but from multiple or alternative perspectives. Taking incursions into the broader research literature represented by linguistic and anthropological paradigms, as well as psychological and educational research, the volume is on the front line in exploring the relation of reading disability to learning and language, to poverty and prejudice, and to instruction and schooling. The editors and authors are distinguished scholars with extensive research experience and publication records and numerous honors and awards from professional organizations representing the range of disciplines in the field of reading disabilities. Throughout, their contributions are contextualized within the framework of educators struggling to develop concrete instructional practices that meet the learning needs of the lowest achieving readers.

Handbook of Reading Disability Research

Many reading programs today overlook an essential component of literacy instruction—helping children develop an enduring love of reading. This authoritative and accessible guide provides a wealth of ideas for incorporating high-quality children's books of all kinds into K–6 classrooms. Numerous practical strategies are presented for engaging students with picturebooks, fiction, nonfiction, and nontraditional texts. Lively descriptions of recommended books and activities are interspersed with invaluable tips for fitting authentic reading experiences into the busy school day. Every chapter concludes with reflection questions and suggestions for further reading. The volume also features reproducible worksheets and forms.

Children's Literature in the Classroom

“This book provides a theoretical and empirical foundation for the development of new and exciting pedagogical approaches to the teaching and learning of digital literacies in the earliest years of schooling... researchers, educators, and policymakers alike ignore its key messages at their peril in the decades ahead.” —From the Foreword by Jackie Marsh, the University of Sheffield, UK “Play, too often in the past, has been seen as a four-letter word by those who wish to raise academic standards. Wohlwend shows why this position is untenable and why play is a curricular necessity in kindergarten and beyond. This is a must read for anyone worried about what parents and administrators will say about the infusion of play in their curriculum.” —Jerome C. Harste, Indiana University, Bloomington Karen Wohlwend provides a new framework for rethinking the boundaries between literacy and play, so that play itself is viewed as a literacy practice along with reading, writing, and design. Through a variety of theoretical lenses, the author presents a portrait of literacy play that connects three play groups: the girls and, importantly, boys, who played with Disney Princess media; “Just Guys” who used design and sports media to make a boys-only space; and a group of children who played teacher with big books and other school texts. These young children “play by design”—using play as a literacy to transform the texts that they read, write, and draw—but also as a tactic to transform their relational identities in the social spaces of peer and school cultures. Emphasizing the importance of play despite current high-stakes testing demands, this book: Provides an argument for re-centering play in early childhood curricula where play functions as a literacy in its own right. Offers cutting-edge analyses and examples of new literacies, popular culture, and multimodal discourses. Illustrates how children’s play can both produce and challenge normative discourses regarding ethnicity, gender, and sexuality. Examines the multimodal, multimedia textual practices of young children as they play across tensions among popular media, peer relationships, and school literacy. Features vivid descriptions, examples of young children in action, and photographs. Karen E. Wohlwend is an assistant professor in Literacy, Culture, and Language Education at Indiana University. The research in this book was awarded the 2008 International Reading Association Outstanding Dissertation Award.

Playing Their Way into Literacies

"This Is a Great Book!" is rooted in the belief that having a wide range of "great" books to read is essential to student success as readers inside the classroom ... and beyond. Based on extensive research, this highly readable book explores a wide range of recommended titles that cover a spectrum of developmental stages for readers of chapter books to young adult novels. It presents novels around popular themes and features guest voices that include innovative teachers, librarians, booksellers, and students. Numerous activities and literacy events form the core of this valuable resource. Reproducible pages include response activities, reflection tools, assessment profiles, and inventories for easy classroom use. Committed to nurturing the love of reading, the book invites readers to dig deeper in their understanding and appreciation of books by responding through writing, discussion, the arts, media, and more. Special attention is given to the world of independent leisure reading, where students make choices based on their preferences and tastes. Experienced and new teachers will find fresh ideas and the tools they need to guide students to "great" books that will make a difference in their lives.

This Is a Great Book!

"As elegantly practical as it is theoretically elegant. It is a guided tour, as one examines the tools of expert teachers as they engage students in a journey that is aptly dubbed Reading Apprenticeship?learning how to become a savvy, strategic reader under the tutelage of thoughtful, caring, and demanding teachers.? P. David Pearson, University of California, Berkeley, and founding editor of the Handbook of Reading Research. Reading for Understanding is a monumental achievement. It was a monumental achievement when it came out as a first edition in 1999, bringing years of rigorous reading research together in a framework for teaching that made sense in actual secondary school classrooms. Now, just thirteen years later, Schoenbach and Greenleaf have several randomized clinical trials and multiple on-going studies at their fingertips to demonstrate the effects of this approach for developing the reading and thinking of young people in our nation?s middle and high school classrooms, as well as in community college classrooms. Their careful work on developing disciplinary literacy among all students represents a passion for and commitment to supporting students?and their teachers?in reading for understanding, which translates to reading for enjoyment, self-awareness, learning, and for purposeful and informed action in our society. ?Elizabeth Moje, Arthur F. Thurnau Professor and Associate Dean for Research, School of Education, University of Michigan Reading Apprenticeship has proven to be an inspiration to Renton Technical College faculty and students alike. They have learned together to view themselves as readers in transformative ways, as they embrace powerful techniques to increase reading comprehension. The ideas and strategies in Reading for Understanding anchor this new and broad-based energy around reading and an enthusiasm among our faculty to model effective reading strategies for our students. ?Steve Hanson, President, Renton Technical College, Renton, Washington Reading for Understanding has the finest blend I have seen of research, strategies, and classroom vignettes to deepen teacher learning and help them connect the dots between theory and practice. ?Curtis Refior, Content Area Literacy Coach, Fowlerville Community Schools, Fowlerville, Michigan A teacher-tested, research-based resource for dramatically improving reading skills Published in partnership with WestEd, this significantly updated second edition of the bestselling book contains strategies for helping students in middle school through community college gain the reading independence to master subject area textbooks and other material. Based on the Reading Apprenticeship program, which three rigorous "gold standard" research studies have shown to be effective in raising students' reading achievement Presents a clear framework for improving the reading and subject area learning of all students, including English learners, students with special needs, as well as those in honors and AP courses Provides concrete tools for classroom use and examples from a range of classrooms Presents a clear how-to for teachers implementing the subject area literacies of the Common Core Standards Reading for Understanding proves it's never too late for teachers and students to work together to boost literacy, engagement, and achievement.

Reading for Understanding

The rise of New Literacy Studies and the shift from studying reading and writing as a technical process to examining situated literacies—what people do with literacy in particular social situations—has focused attention toward understanding the connections between reading and writing practices and the broader social goals and cultural practices these literacy practices help to shape. This collection brings together situated research studies of literacy across a range of specific contexts, covering everyday, educational, and workplace domains. Its contribution is to provide, through an empirical framework, a larger cumulative understanding of literacy across diverse contexts.

Literacy in Practice

With rapid technological and cultural advancements, the 21st century has witnessed the wide scale development of transnationalist economies, which has led to the concurrent evolution of language and literacy studies, expanding cross-cultural approaches to literacy and communication. Current language education applies new technologies and multiple modes of text to a diverse range of cultural contexts, enhancing the classroom experience for multi-lingual learners. The Handbook of Research on Cross-Cultural Approaches to Language and Literacy Development provides an authoritative exploration of cross-cultural approaches to language learning through extensive research that illuminates the theoretical frameworks behind multicultural pedagogy and its myriad applications for a globalized society. With its comprehensive coverage of transnational case studies, trends in literacy teaching, and emerging instructive technologies, this handbook is an essential reference source for K-20 educators, administrators in school districts, English as a Second Language (ESL) teachers, and researchers in the field of Second Language Acquisition (SLA). This diverse publication features comprehensive and accessible articles on the latest instructional pedagogies and strategies, current empirical research on cross-cultural language development, and the unique challenges faced by teachers, researchers, and policymakers who promote cross-cultural perspectives.

Handbook of Research on Cross-Cultural Approaches to Language and Literacy Development

A collection of articles written by leading experts in the school library field that explain how school teachers, librarians, and administrators can work together to improve library services and meet the needs of all students.

Toward a 21st-Century School Library Media Program

Designed to introduce prospective English teachers to current methods of teaching literature in middle and high school classrooms, this popular textbook explores a variety of innovative approaches that incorporate reading, writing, drama, talk, and media production. Each chapter is organized around specific questions that English educators often hear in working with preservice teachers. The text engages readers in considering the dilemmas and issues facing literature teachers through inquiry-based responses to authentic case narratives. A Companion Website, <http://teachingliterature.pbworks.com>, provides resources and enrichment activities, inviting teachers to consider important issues in the context of their own current or future classrooms. New in the second edition: more attention to the use of digital texts from use of online literature to digital storytelling to uses of online discussion and writing tools incorporated throughout new chapter on teaching young adult literature new chapter on teaching reading strategies essential to interpreting literature more references to examples of teaching multicultural literature.

Teaching Literature to Adolescents

The Common Core State Standards have put close reading in the spotlight as never before. While middle and high school teachers want and need students to connect with, analyze, and learn from both literary and informational texts, many are unsure how to foster the skills students must have in order to develop deep and nuanced understanding of complicated content. Is there a process to follow? How is close reading different from shared reading and other common literacy practices? How do you prepare students to have their ability to analyze complex texts measured by high-stakes assessments? And how do you fit close reading instruction and experiences into an already crowded curriculum? Literacy experts Barbara Moss, Diane Lapp, Maria Grant, and Kelly Johnson answer these questions and more as they explain how to teach middle and high school students to be close readers, how to make close reading a habit of practice across the content areas, and why doing so will build content

knowledge. Informed by the authors' extensive field experience and enriched by dozens of real-life scenarios and downloadable tools and templates, this book explores • Text complexity and how to determine if a particular text is right for your learning purposes and your students. • The process and purpose of close reading, with an emphasis on its role in developing the 21st century thinking, speaking, and writing skills essential for academic communication and college and career readiness. • How to plan, teach, and manage close reading sessions across the academic disciplines, including the kinds of questions to ask, texts to use, and supports to provide. • How to assess close reading and help all students—regardless of linguistic, cultural, or academic background—connect deeply with what they read and derive meaning from complex texts. Equipping students with the tools and process of close reading sets them on the road to becoming analytical and critical thinkers—and empowered and independent learners. In this comprehensive resource, you'll find everything you need to start their journey.

A Close Look at Close Reading

Connecting the constructs of meaning and experience in the fields of English education, teacher education, literacy and narrative inquiry, *Making Meaning with Readers and Texts* broadens understandings of teachers' use of literacy practices for making meaning from classroom events.

Making Meaning with Readers and Texts

Now in its third edition, the *Handbook of Research on Teaching the English Language Arts*—sponsored by the International Reading Association and the National Council of Teachers of English—offers an integrated perspective on the teaching of the English language arts and a comprehensive overview of research in the field. Prominent scholars, researchers, and professional leaders provide historical and theoretical perspectives about teaching the language arts focus on bodies of research that influence decision making within the teaching of the language arts explore the environments for language arts teaching reflect on methods and materials for instruction Reflecting important recent developments in the field, the Third Edition is restructured, updated, and includes many new contributors. More emphasis is given in this edition to the learner, multiple texts, learning, and sharing one's knowledge. A Companion Website, new for this edition, provides PowerPoint® slides highlighting the main points of each chapter.

Handbook of Research on Teaching the English Language Arts

Motivation to engage in reading is a consistent problem for students in general and boys in particular. To solve this problem, we often seek answers from everyone but those we are hoping to motivate. We read the latest article on motivation and think we have finally come up with the recipe that will motivate all of the boys in our class. When it doesn't work for everyone, we go back to the drawing board and try something else until we finally understand that all boys are motivated by different things. That is the basis of this book: nothing will work for ALL boys, but there are ways to equip teachers to find out how the boys in their classes are motivated. It provides them with a direction to go once they've established the needs of their students and offers suggestions for how to meet individual motivational needs. Each chapter addresses a different motivational need, providing background information and practical classroom applications.

Listening to the Voices of Boys

Mirroring worldwide debates on social class, literacy rates, and social change, this study explores the intersection between reading and social class in Singapore, one of the top scorers on the Programme for International Assessment (PISA) tests, and questions the rhetoric of social change that does not take into account local spaces and practices. This comparative study of reading practices in an elite school and a government school in Singapore draws on practice and spatial perspectives to provide critical insight into how taken-for-granted practices and spaces of reading can be in fact unacknowledged spaces of inequity. Acknowledging the role of social class in shaping reading education is a start to reconfiguring current practices and spaces for more effective and equitable reading practices. This book shows how using localized, contextualized approaches sensitive to the home, school, national and global contexts can lead to more targeted policy and practice transformation in the area of reading instruction and intervention. Chapters in the book include: • *Becoming a Reader: Home-School Connections* • *Singaporean Boys Constructing Global Literate Selves: School-Nation Connections* • *Levelling the Reading Gap: Socio-Spatial Perspectives* The book will be relevant to literacy scholars

and educators, library science researchers and sociologists interested in the intersection of class and literacy practices in the 21st century.

The Space and Practice of Reading

Imagine a classroom where all students are engaged in highly rigorous and fun learning every single day. That classroom can be yours starting tomorrow. You don't have to be a reading specialist to pick up this book. Anyone who wants to dramatically improve reading achievement will find helpful suggestions. You might be a third grade teacher whose students have mastered decoding, and you are ready to build their comprehension. Or you might be a high school science teacher whose students aren't yet reading on level with deep critical thinking. This book is for you. It doesn't matter whether you are a public, charter, private, or alternative education teacher: the Reading Without Limits program works in each one. Along with hundreds of ready-to-use teaching strategies, Reading Without Limits comes with a supplemental website where teachers can download even more resources for free! Reading Without Limits is the first book offered in the KIPP Educator Series. KIPP, or the Knowledge is Power Program, began in 1994. As of Fall 2012, there are 125 KIPP schools in 20 states and the District of Columbia serving nearly 40,000 students climbing the mountain to and through college.
