A Key to the Treasure of the Hak+m

Includes thirteen essays by eminent scholars in the field of Persian Studies, each focusing on different aspects of the Khamsa, which is a collection of five long poems written by the Persian poet Nizami of Ganja. Nizami (1141-1209) lived and worked in Ganja in present-day Azerbaijan.

Thirty Songs from the Panjab and Kshm+r

Text, with musical letter notations; includes translations and notes in English and Hindi.

Saints and Sanctity

Provides insight into a key issue of Christian history which still has a huge influence on ecclesiastical practice and politics.

Of Piety and Poetry

Stories between Christianity and Islam offers an original and nuanced understanding of Christian–Muslim relations that shifts focus from discussions of superiority, conflict, and appropriation to the living world of connectivity and creativity. Here, the late antique and medieval Near East is viewed as a world of stories shared by Christians and Muslims. Public storytelling was a key feature for these late antique Christian and early Islamic communities, where stories of saints were used to interpret the past, comment on the present, and envision the future. In this book, Reyhan Durmaz uses these stories to demonstrate and analyze the mutually constitutive relationship between these two religions in the Middle Ages. With an in-depth study of storytelling in Late Antiquity and the mechanisms of hagiographic transmission between Christianity and Islam in the Middle Ages, Durmaz develops a nuanced understanding of saints' stories as a tool for building identity, memory, and authority across confessional boundaries.

Stories Between Christianity and Islam

The work of Nizami Ganjavi, a classical poet of the twelfth century, is fueling new cultural debate in Iran in recent years. The dominant discourse encourages the reading of the texts in light of biographical or theological conventions and religious motives. These essays explore Nizami's influential role and his portrayal of issues related to love, women, and science, stressing his preoccupation with the art of speech as a major impetus behind his literary activity.

The Poetry of Nizami Ganjavi

"It was a refreshing, old-fashioned pleasure to read Julie Scott Meisami's verse translation of, and introduction and notes to, this twelfth-century Persian allegorical romance." —Orhan Pamuk, in the Times Literary Supplement

Haft Paykar

The collective volume Syriac Hagiography: Texts and Beyond explores several late-antique and medieval Syriac hagiographical works from the complementary perspectives of literature and cult.

Syriac Hagiography

First published in 1986. The present volume is a complete translation of the Sawanih, written by the Persian Sufi master Ahmad Ghazzali with a commentary by the translator. The title of this book, to Sufis, means the inspirations that a mystic experiences on his journey through the world of the Spirit (c?lam-i r?h) or, as it is sometimes called, the world of Pure Spirits (c?lam-i arwah).

Saw nih

This volume opens when the caliph al-Manckr has just defeated the rebellion of Mu%ammad the Pure Soul in 145/762-3 and is now securely established in power. The main concerns of the remaining thirteen years of his reign are the building of his new capital at Baghdad, on which al-al-labar+'s text contains details not previously published in English, and his efforts to have his nephew ُls ibn Mks replaced as heir apparent by his own son Mu%ammad al-Mahd+, a maneuver that required all his political skills. The circumstances of al-Manckr's death in 158/775 are described in vivid detail, and this section is followed by a series of anecdotes, some serious, some humorous, most vivid and lively, that illustrate his character and habits. The last section of the volume describes the reign of al-Mahd+, more pious than his father but also more liberal and open-handed. Along with routine administration, space is devoted to the bizarre intrigues that accompanied the rise and fall of the vizier Ya'qub ibn Dawud and the mysterious circumstances of the caliph's own death in 169/785, followed by a short collection of character stories.

In addition, the volume also contains important information about warfare on the Byzantine frontier and in Khurasan. A discounted price is available when purchasing the entire 39-volume History of al-labar+ set. Contact SUNY Press for more information.

The History of al-labar+ Vol. 29

In the past four decades since the field of late antique studies began to gather real momentum, scholars have debated the place of early Islam within the late antique world, particularly in relation to the issue of where and when 'Late Antiquity' ends. Although the Sasanian empire became an equal rival to the Byzantine empire, and the two often forged their characters and practices on the basis of their relations with each other, that has rarely translated into equal coverage for the eastern part of the late antique world in studies of the period. Late Antiquity: Eastern Perspectives aims to redress this balance and situate Iran with the broader world of this era. Eight papers serve as case studies for considering narratives and perspectives other than those emanating from Byzantium or, more generally, 'the West'. They demonstrate the potential of eastern source-material, including James Howard-Johnston's double-length article which produces a detailed reconstruction of the Sasanian army.

Late Antiquity

Gregory of Nazianzus (ca. 330-390) is one of the three Greek church fathers from Cappadocia. This book explores both his theology and his general importance as an independent thinker, profile writer, orator, and poet. Gregory has often been in the shadow of the other Cappadocians - Basil of Ceasarea and Gregory of Nyssa.

Gregory of Nazianzus

Spoken words process knowledge differently from writing. What happens when speech turns into text? In reappraising literary scholars' propensity to trace Jesus' sayings back to the assumed original version, the author argues that in the oral medium each rendition of a saying is the original. Orality works with multiple originals, rather than with single originality. In what may be the most extraordinary thesis of the book, Kelber argues that the written gospel is related less by evolutionary progression than by contradiction to what preceded it.

The Qur'an, Misinterpreted, Mistranslated, and Misread

Qur' nic Studies Today brings together specialists in the field of Islamic studies to provide a range of essays that reflect the depth and breadth of scholarship on the Qur' n. Combining theoretical and methodological clarity with close readings of qur' nic texts, these contributions provide close analysis of specific passages, themes, and issues within the Qur¼ n, even as they attend to the disciplinary challenges within the field of qur' nic studies today. Chapters are arranged into three parts, treating specific figures appearing in the Qur¼ n, analysing particular suras, and finally reflecting on the Qur' n and its "others." They explore the internal dimensions and interior chronology of the Qur' n as text, its possible conversations with biblical and non-biblical traditions in Late Antiquity, and its role as scripture in modern exegesis and recitation. Together, they are indispensable for students and scholars who seek an understanding of the Qur' n founded on the most recent scholarly achievements. Offering both a reflection of and a reflection on the discipline of qur' nic studies, the strong, scholarly examinations of the Qur' n in this volume provide a valuable contribution to Islamic and qur' nic studies.

The Oral and the Written Gospel

Before it fell to Muslim armies in AD 635-6 Damascus had a long and prestigious history as a center of Christianity. How did this city, which became the capitol of the Islamic Empire and its people, negotiate the transition from a late antique or early Byzantine world to an Islamic culture? In Damascus after the Muslim Conquest, Nancy Khalek demonstrates that the changes that took place in Syria during this formative period of Islamic life were not simply a matter of the replacement of one civilization by another as a result of military conquest, but rather of shifting relationships and practices in a multifaceted social and cultural setting. Even as late antique forms of religion and culture persisted, the formation of Islamic identity was affected by the people who constructed, lived in, and narrated the history of their city. Khalek draws on the evidence of architecture and the testimony of pilgrims, biographers, geographers, and historians to shed light on this process of identity formation. Offering

a fresh approach to the early Islamic period, she moves the study of Islamic origins beyond a focus on issues of authenticity and textual criticism, and initiates an interdisciplinary discourse on narrative, storytelling, and the interpretations of material culture.

Qur'anic Studies Today

A new, aurally attuned reading of the endings of Mark's Gospel, concentrating on the Gospel as ancient popular literature, comparing it with Xenophon of Ephesus' erotic romance, and using speech act theory as a method to illuminate both narratives.

Damascus after the Muslim Conquest

This collection brings together scholars from various disciplines and fields to consider Islamic revelation, with particular focus on the Qur'an. It provides a wide-ranging survey of the development and current state of Qur'anic studies in the Western academy, and shows how interest in the field has recently grown, how the ways in which it is cultivated have changed, how it has ramified, and how difficult it now is for any one scholar to keep abreast of it.

Hearing Mark's Endings

Jacob of Edessa (c.640-708) is considered the most learned Christian of the early days of Islam. In all fifteen contributions to this volume, written by prominent specialists, the interaction between Christianity, Judaism, and the new religion is an important issue. The articles discuss Jacoba (TM)'s biography as well as his position in early Islamic Edessa, and give a full picture of the various aspects of Jacob of Edessaa (TM)'s life and work as a scholar and clergyman. Attention is paid to his efforts in the fields of historiography, correspondence, canon law, text and interpretation of the Bible, language and translation, theology, philosophy, and science. The book, which marks the 1300th anniversary of Jacoba (TM)'s death, also contains a bibliographical clavis.

Islam and Its Past

In recent years, the study of the Qur'an and its interpretation has expanded to incorporate insights gained from historical, biblical, literary and critical studies. A variety of approaches to the Qur'an and the Muslim exegetical tradition are currently available. Approaches to the Qur'an consists of thirteen essays by leading scholars, both Muslim and non-Muslim, in the fields of qur'anic studies and Islamic studies. Taken together, they offer a sample of the aims, methods and topics of enquiry now being pursued. Each study has a full critical apparatus, and the book includes a consolidated bibliography which will be of great value to students and specialists.

Jacob of Edessa and the Syriac Culture of His Day

The Qur'an makes extensive use of older religious material, stories, and traditions that predate the origins of Islam, and there has long been a fierce debate about how this material found its way into the Qur'an. This unique book argues that this debate has largely been characterized by a failure to fully appreciate the Qur'an as a predominately oral product. Using innovative computerized linguistic analysis, this study demonstrates that the Qur'an displays many of the signs of oral composition that have been found in other traditional literature. When one then combines these computerized results with other clues to the Qur'an's origins (such as the demonstrably oral culture that both predated and preceded the Qur'an, as well as the "folk memory" in the Islamic tradition that Muhammad was an oral performer) these multiple lines of evidence converge and point to the conclusion that large portions of the Qur'an need to be understood as being constructed live, in oral performance. Combining historical, linguistic, and statistical analysis, much of it made possible for the first time due to new computerized tools developed specifically for this book, Bannister argues that the implications of orality have long been overlooked in studies of the Qur'an. By relocating the Islamic scripture firmly back into an oral context, one gains both a fresh appreciation of the Qur'an on its own terms, as well as a fresh understanding of how Muhammad used early religious traditions, retelling old tales afresh for a new audience.

Approaches to the Qur'an

This first complete translation of Theodor Nöldeke's *The History of the Qurʾān* offers a foundational work of modern Qur'anic studies to the English-speaking public. Nöldeke's original publication, as revised

and expanded over nearly three quarters of a century by his scholarly successors, Friedrich Schwally, Gotthelf Bergsträsser and Otto Pretzl, remains an indispensable resource for any scholarly work on the text of the Qurʾān.

An Oral-Formulaic Study of the Qur'an

Based on epigraphic and other material evidence as well as more traditional literary sources and critical review of the extensive relevant scholarship, this book presents a comprehensive and innovative reconstruction of the rise of Islam as a religion and imperial polity. It reassesses the development of the imperial monotheism of the New Rome, and considers the history of the Arabs as an integral part of Late Antiquity, including Arab ethnogenesis and the emergence of what was to become Muslim monotheism, comparable with the emergence of other monotheisms from polytheistic systems. Topics discussed include the emergence and development of the Muhammadan polity and its new cultic deity and associated ritual, the constitution of the Muslim canon, and the development of early Islam as an imperial religion. Intended principally for scholars of Late Antiquity, Islamic studies and the history of religions, the book opens up many novel directions for future research.

The History of the Qurʾān

For an entire millennium, Byzantine hagiography, inspired by the veneration of many saints, exhibited literary dynamism and a capacity to vary its basic forms. The subgenres into which it branched out after its remarkable start in the fourth century underwent alternating phases of development and decline that were intertwined with changes in the political, social and literary spheres. The selection of saintly heroes, an interest in depicting social landscapes, and the modulation of linguistic and stylistic registers captured the voice of homo byzantinus down to the end of the empire in the fifteenth century. The seventeen chapters in this companion form the sequel to those in volume I which dealt with the periods and regions of Byzantine hagiography, and complete the first comprehensive survey ever produced in this field. The book is the work of an international group of experts in the field and is addressed to both a broader public and the scholarly community of Byzantinists, medievalists, historians of religion and theorists of narrative. It highlights the literary dimension and the research potential of a representative number of texts, not only those appreciated by the Byzantines themselves but those which modern readers rank high due to their literary quality or historical relevance.

The Emergence of Islam in Late Antiquity

A collection of essays by some of the most accomplished scholars in the field exploring the life and legacy of the Prophet.

The Ashgate Research Companion to Byzantine Hagiography

A bold new religious history of the late antique and medieval Middle East that places ordinary Christians at the center of the story. In the second half of the first millennium CE, the Christian Middle East fractured irreparably into competing churches and Arabs conquered the region, setting in motion a process that would lead to its eventual conversion to Islam. Jack Tannous argues that key to understanding these dramatic religious transformations are ordinary religious believers, often called “the simple” in late antique and medieval sources. Largely agrarian and illiterate, these Christians outnumbered Muslims well into the era of the Crusades, and yet they have typically been invisible in our understanding of the Middle East's history. What did it mean for Christian communities to break apart over theological disagreements that most people could not understand? How does our view of the rise of Islam change if we take seriously the fact that Muslims remained a demographic minority for much of the Middle Ages? In addressing these and other questions, Tannous provides a sweeping reinterpretation of the religious history of the medieval Middle East. This provocative book draws on a wealth of Greek, Syriac, and Arabic sources to recast these conquered lands as largely Christian ones whose growing Muslim populations are properly understood as converting away from and in competition with the non-Muslim communities around them.

The Cambridge Companion to Muhammad

Based on a new source, this study reconstructs for the first time the early development of Islamic jurisprudence at Mecca and challenges the current view of scholarship concerning the origins of Islamic jurisprudence.

The Making of the Medieval Middle East

This book challenges the dominant scholarly notion that the Qur'ān must be interpreted through the medieval commentaries shaped by the biography of the prophet Muhammad, arguing instead that the text is best read in light of Christian and Jewish scripture. The Qur'ān, in its use of allusions, depends on the Biblical knowledge of its audience. However, medieval Muslim commentators, working in a context of religious rivalry, developed stories that separate Qur'ān and Bible, which this book brings back together. In a series of studies involving the devil, Adam, Abraham, Jonah, Mary, and Muhammad among others, Reynolds shows how modern translators of the Qur'ān have followed medieval Muslim commentary and demonstrates how an appreciation of the Qur'ān's Biblical subtext uncovers the richness of the Qur'ān's discourse. Presenting unique interpretations of 13 different sections of the Qur'ān based on studies of earlier Jewish and Christian literature, the author substantially re-evaluates Muslim exegetical literature. Thus *The Qur'ān and Its Biblical Subtext*, a work based on a profound regard for the Qur'ān's literary structure and rhetorical strategy, poses a substantial challenge to the standard scholarship of Qur'ānic Studies. With an approach that bridges early Christian history and Islamic origins, the book will appeal not only to students of the Qur'ān but of the Bible, religious studies and Islamic history.

The Origins of Islamic Jurisprudence

Alexander the Great (356-333 BC) was to capture the imagination of his contemporaries and future generations. His image abounds in various cultures and literatures - Eastern and Western - and spread around the globe through oral and literary media at an astonishing rate during late antiquity and the early Islamic period. The first *Iskandarnama*, or 'The Book of Alexander', now held in a private collection in Tehran, is the oldest prose version of the Alexander romance in the Persian tradition. Thought to have been written at some point between the eleventh and fourteenth centuries by an unknown author, the lively narrative recasts Alexander as Iskandar, a Muslim champion - a king and prophet, albeit flawed but heroic, and remarkably appropriated to Islam, though the historic Alexander lived and died some 1,000 years before the birth of the faith. This new English translation of the under-studied text is the first to be presented unabridged and sheds fresh light onto the shape and structure of this vital document. In so doing it invites a reconsideration of the transformation of a Western historical figure - and one-time mortal enemy of Persia - into a legendary hero adopted by Iranian historiographic myth-making. Evangelos Venetis, the translator, also offers a textual analysis, providing much-needed context and explanations on both content and subsequent reception. This landmark publication will be invaluable to students and scholars of classical Persian literature, ancient and medieval history and Middle East studies, as well as to anyone studying the Alexander tradition.

The Qur'an and Its Biblical Subtext

This volume deals with the origins and rise of Christian pilgrimage cults in late antique Egypt. Part One covers the major theoretical issues in the study of Coptic pilgrimage, such as sacred landscape and shrines' catchment areas, while Part Two examines native Egyptian and Egyptian Jewish pilgrimage practices. Part Three investigates six major shrines, from Philae's diverse non-Christian devotees to the great pilgrim center of Abu Mina and a Thecla shrine on its route. Part Four looks at such diverse pilgrims' rites as oracles, chant, and stationary liturgy, while Part Five brings in Athanasius's and an anonymous hagiographer's perspectives on pilgrimage in Egypt. The volume includes illustrations of the Abu Mina site, pilgrims' ampules from the Thecla shrine, as well as several maps.

The Persian Alexander

Ten revised versions of presentations at an international colloquium held in October 1997 in Nijmegen, the Netherlands, provide a range of methodological approaches and use varying types of evidence to examine issues around the sources for the several biographies of The Prophet written between the end of the second and end of the third Islamic centuries. Five of them look at the development of the *sira* tradition of writing the life of Muhammad; the other five at the historical reliability of the biographical source material, including that used by the earliest Christian writings.
