In the summer of 1855, when the nineteen-year-old Sam Clements traveled from Saint Louis to Hannibal, Paris, and Florida, Missouri, and then to Keokuk, Iowa, he carried with him a notebook in which he entered French lessons, phrenological information, miscellaneous observations, and reminders about errands to be performed. This first notebook thus took the random form which would characterize most of those to follow. About the text: In order to avoid editorial misrepresentation and to preserve the texture of autograph documents, the entries are presented in their original, often unfinished, form with most of Clemens' irregularities, inconsistencies, errors, and cancellations unchanged. Clemens' cancellations are included in the text enclosed in angle brackets, thus ; editorially-supplied conjectural readings are in square brackets, thus [word]; hyphens within square brackets stand for unreadable letters, thus [--]; and editorial remarks are italicized and enclosed in square brackets, thus [blank page]-. A slash separates alternative readings which Clemens left unresolved, thus word/word. The separation of entries is indicated on the printed page by extra space between lines; when the end of a manuscript entry coincides with the end of a page of the printed text, the symbol [#] follows the entry. A full discussion of textual procedures accompanies the tables of emendation and details of inscription in the Textual Apparatus at the end of each volume; specific textual problems are explained in headnotes or footnotes when unusual situations warrant.

## North American Review

In this magisterial book, William St Clair unfolds the history of the Parthenon throughout the modern era to the present day, with special emphasis on the period before, during, and after the Greek War of Independence of 1821–32. Focusing particularly on the question of who saved the Parthenon from destruction during this conflict, with the help of documents that shed a new light on this enduring question, he explores the contributions made by the Philhellenes, Ancient Athenians, Ottomans and the Great Powers. Marshalling a vast amount of primary evidence, much of it previously unexamined and published here for the first time, St Clair rigorously explores the multiple ways in which the Parthenon has served both as a cultural icon onto which meanings are projected and as a symbol of particular national, religious and racial identities, as well as how it illuminates larger questions about the uses of built heritage. This book has a companion volume with the classical Parthenon as its main focus, which offers new ways of recovering the monument and its meanings in ancient times. St Clair builds on the success of his classic text, *The Reading Nation in the Romantic Period*, to present this rich and authoritative account of the Parthenon's presentation and reception throughout history. With weighty implications for the present life of the Parthenon, it is itself a monumental contribution to accounts of the Greek Revolution, to classical studies, and to intellectual history.

This book further develops both the traditional and the behavioural approach to competition law, and applies these approaches to a variety of timely issues. It discusses several fundamental questions regarding competition law and economics, and explores the applications of competition law and economics. In turn, the book analyses the interplay of intellectual property rights and patents in various aspects of competition law, and investigates the impacts that developments in information technology, such as big data analytics, have on competition law. The book also discusses the impact of energy law reforms on energy markets from a competition law perspective. Competition law is a classic field of economic analysis. This is largely due to the fact that competition law uses terms such as market, price, and competition and must therefore rely on economic know-how and analyses. In the United States, economic analysis has greatly influenced not just the scholarship on antitrust law, but also judicial decisions and agency enforcement. Antitrust law and economics are based on the traditional paradigm of neoclassical economics, which relies on the assumption that the market players, i.e. consumers and producers, are rational. This approach to competition law was later received in Europe under the banner of a "more economic approach". For the past two decades, behavioural law and economics, which seeks to generate better insights into legal phenomena by providing more realistic psychological foundations for economic models, and to offer a multitude of applications in legislation and legal adjudication, has challenged the traditional economic approach to law in general and, more recently, to competition law specifically.

## An Introduction to Moroccan Arabic

Following the 1979 Iranian Revolution, Iran's film industry, in conforming to the Islamic Republic's system of modesty, had to ensure that women on-screen were veiled from the view of men. This prevented Iranian filmmakers from making use of the desiring gaze, a staple cinematic system of looking. In *Displaced Allegories* Negar Mottahedeh shows that post-Revolutionary Iranian filmmakers were forced to create a new visual language for conveying meaning to audiences. She argues that the Iranian film industry found creative ground not in the negation of government regulations but in the camera's adoption of the modest, averted gaze. In the process, the filmic techniques and cinematic technologies were gendered as feminine and the national cinema was produced as a woman's cinema. Mottahedeh asserts that, in response to the prohibitions against the desiring look, a new narrative cinema emerged as the displaced allegory of the constraints on the post-Revolutionary Iranian film industry. Allegorical commentary was not developed in the explicit content of cinematic narratives but through formal innovations. Offering close readings of the work of the nationally popular and internationally renowned Iranian auteurs Bahram Bayza'i, Abbas Kiarostami, and Mohsen Makhmalbaf, Mottahedeh illuminates the formal codes and conventions of post-Revolutionary Iranian films. She insists that such analyses of cinema's visual codes and conventions are crucial to the study of international film. As Mottahedeh points out, the discipline of film studies has traditionally seen film as a medium that communicates globally because of its dependence on a (Hollywood) visual language assumed to be universal and legible across national boundaries. *Displaced Allegories* demonstrates that visual language is not necessarily universal; it is sometimes deeply informed by national culture and politics.

## A Vedic Grammar for Students

Filmalized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

The treasure that ignites greed and folly in this parallel world is not petroleum, but beserite—a mineral of immeasurable value. Captivated by an ancient prophecy and the call of adventure, inexperienced nobleman and scholar Peter Harmon (think of a young Winston Churchill-like naif) joins an expedition

to stake his nation's claim to a global empire. Harmon's destination is a vast and inhospitable desert halfway around the world, dominated by the iron-fisted Grand Vizer Jemojeen Jongdar. A tyrant on a mission to secure the ancient and supernatural Staff of the Ram, the Lion, and the Serpent, Jongdar knows the truth that others can only imagine: The one who controls the staff will possess the power to rule the world. Before he can seize his destiny, Jongdar must find and destroy the one person capable of thwarting his ambition, the rightful heir to the Sand Sea realm, an innocent woman named Selena Savanar. Can the brave and indomitable Selena accept her true destiny and rally her people in the eye of a gathering storm? To do so will require her to outwit the man who burned her father alive and left her an orphan and beggar a lifetime ago. Or will Peter Harmon and the cadre of opportunists he rides with conquer the divided empire? With the mythic structure of J.R.R. Tolkien's *The Lord of the Rings* trilogy in a world as rich and real as George R.R. Martin's Westeros, *The Sand Sea* is an immersive experience made to order for epic fantasy fans and anyone who enjoys grand-scale historical fiction.

### Sound Structure in Music

Police-citizen relations are in the public spotlight following outbursts of anger and violence. Such clashes often happen as a response to fatal police shootings, racial or ethnic discrimination, or the mishandling of mass protests. But even in such cases, citizens' assessment of the police differs considerably across social groups. This raises the question of the sources and impediments of citizens' trust and support for police. Why are police-citizen relations much better in some countries than in others? Are police-minority relations doomed to be strained? And which police practices and policing policies generate trust and legitimacy? Research on police legitimacy has been centred on US experiences, and relied on procedural justice as the main theoretical approach. This book questions whether this approach is suitable and sufficient to understand public attitudes towards the police across different countries and regions of the world. This volume shows that the impact of macro-level conditions, of societal cleavages, and of state and political institutions on police-citizen relations has too often been neglected in contemporary research. Building on empirical studies from around the world as well as cross-national comparisons, this volume considerably expands current perspectives on the sources of police legitimacy and citizens' trust in the police. Combining the analysis of micro-level interactions with a perspective on the contextual framework and varying national conditions, the contributions to

this book illustrate the strength of a broadened perspective and lead us to ask how specific national frameworks shape the experiences of policing.

#### The New Universal Gazetteer

A "wide-ranging, vivid" narrative history of one of the most coveted and complex regions of the world: the Caribbean (The Observer). Ever since Christopher Columbus stepped off the Santa Maria and announced that he had arrived in the Orient, the Caribbean has been a stage for projected fantasies and competition between world powers. In *Empire's Crossroads*, British American historian Carrie Gibson offers a panoramic view of the region from the northern rim of South America up to Cuba and its rich, important history. After that fateful landing in 1492, the British, French, Spanish, Portuguese, Dutch, Danish, and even the Swedes, Scots, and Germans sought their fortunes in the islands for the next two centuries. These fraught years gave way to a booming age of sugar, horrendous slavery, and extravagant wealth, as well as the Haitian Revolution and the long struggles for independence that ushered in the modern era. Gibson tells not only of imperial expansion—European and American—but also of life as it is lived in the islands, from before Columbus through the tumultuous twentieth century. Told "in fluid, colorful prose peppered with telling anecdotes," *Empire's Crossroads* provides an essential account of five centuries of history (Foreign Affairs). "Judicious, readable and extremely

well-informed . . . Too many people know the Caribbean only as a tourist destination; [Gibson] takes us, instead, into its fascinating, complex and often tragic past. No vacation there will ever feel quite the same again.” —Adam Hochschild, author of *To End All Wars* and *King Leopold's Ghost*

These recent contributions incorporate substantial information on the preexisting knowledge on these subjects every year. # Ecological Geography of the Sea

Set in Hyderabad in the mid-nineteenth and early twentieth centuries, this book, a study of the cultural world of the Muslim soldiers of colonial India, focuses on the soldiers' relationships with the faqir holy men who protected them and the British officers they served. Drawing on Urdu as well as European sources, the book uses the biographies of Muslim holy men and their military followers to recreate the extraordinary encounter between a barracks culture of miracle stories, carnivals, drug-use and madness with a colonial culture of mutiny memoirs, Evangelicalism, magistrates and the asylum. It explores the ways in which the colonial army helped promote this sepooy religion while at the same time attempting to control and suppress certain aspects of it. The book brings to light the existence of a distinct 'barracks Islam' and shows its importance to the cultural no less than the military history of colonial India.

## Behaviour and Ecology of Spiders

For reasons of language and history, the United States has prized its Anglo heritage above all others. However, as Carrie Gibson explains with great depth and clarity in *El Norte*, America has much older Spanish roots - ones that have long been unacknowledged or marginalized. The Hispanic past of the United States predates the arrival of the Pilgrims by a century and has been every bit as important in shaping the nation. *El Norte* chronicles the sweeping and dramatic history of Hispanic North America from the arrival of the Spanish to the present - from Ponce de Leon's initial landing in Florida in 1513 to Spanish control of the vast Louisiana territory in 1762 to the Mexican-American War in 1846 and up to the more recent tragedy of post-hurricane Puerto Rico and the ongoing border acrimony with Mexico. Interwoven in this stirring narrative of events and people are cultural issues that have been there from the start and remain unresolved: language, belonging, community, race and nationality. Seeing them play out over centuries provides vital perspective at a time when it is urgently needed. In 1883, Walt Whitman wrote 'to that composite American identity of the future, Spanish character will supply some of the most needed parts.' That future is here, and *El Norte*, an emotive and eventful history in its own right, will have a powerful impact on our perception of the United States.
