Dreams in Greek Tragedy

This book is the first that describes the practices of any stock exchange; it makes evident a high development of practices, with puts, calls, pools, and manipulations; and it appeared as early as the seventeenth century. Not inappropriately the stock exchange described is that of Amsterdam, a city which at the date of the volume's publication —1688 — was still the leading financial center of the world. The book, to be sure, is hardly a systematic account of the institution; the author pursued moral, philosophical, and rhetorical objectives, and, while saying a lot that seems now to be of little value, manages somehow to leave unsaid a great deal that would be of interest for us. Nevertheless, it represents, even in its peculiar form, a really important source of information about the stock exchange, and indeed about the Dutch business world of that period.

Confusion de Confusiones [1688]

THE Department of Classical Philology of Columbia University has approved this monograph as a contribution to knowledge worthy of publication. We are happy to agree, and we hope that Mr. Messer will be able to fulfill his promise of further contributions to his chosen subject. He was led to the study of the dreams in Greek literature by the discovery -- which every serious student of Latin literature will make -- that without Greek you cannot get far into Latin; for he first set out to investigate Roman dreams (see "Mnemosyne," 45, 78-92). His present work is really introductory to a more general study of the ancient dream, especially as portrayed in Latin literature. It deals particularly with the dreams in Homer, Hesiod, and the Tragedians, (1) as a part of the machinery, a motive force in the development of action, narrative, plot, and (2) as artistic ends in themselves, more or less complete, more or less refined, more or less natural or artificial. The author has collected, for his own purposes, all dreams and references to dreams that he can find in Greek or Latin literature down to the second century A.D., and his footnotes give proof of his wide reading and of the intrinsic interest of his materials. His style is somewhat inelegant, and his arrangement unattractive. His method is to plough solemnly through the

whole field, noting and discussing each dream as it appears. Accordingly there is too much repetition, and a bewildering abundance of cross-references. If only he had added a short chapter summarizing his results, his work would have been more likely to be recognised for what it is -- a very sound and useful piece of not particularly inspired research. That the author is no mere compiler is shown by many touches of just literary appreciation. He is at his best in pointing out that Penelope's dream of geese and eagle (Odyssey XIX.) is unlike other dreams in Homer, an allegorical vision which demands interpretation, "a new departure for the epic, and a model for the allegorical dreams of tragedy." The second part, in which the eagle returns and announces him as Odysseus, is in the manner of the older type, the objective dream which tells its own tale without any mystery; and this addition, Mr. Messer thinks, is an indication that the poet felt uneasy about the introduction of the new technique (pp. 33-4). Excellent, again, is the remark (p. 57) that 'the immediate source of the dream in tragedy is to be found not in religion and cult, but in the literature.' So is the discussion (p. 81 ff.) of the dream in Sophocles' "Electra," where the old literary motif is adapted, not so much for its mechanical effect upon the plot as for its value as a means and an excuse for the portrayal of character. Finally, the description of the dream in Euripides' "Iphigenia in Tauris" as approximating to 'the highly chiseled miniatures in which the Alexandrian period delights,' strikes me as just and illuminating. Where Mr. Messer sticks to the literature and his own commonsense, his work is sound and useful. Sometimes, unfortunately, he is led, like most of us, into the dangerous by-paths of cult-conjecture....--"The Classical Review," Volume 33

Dreams in Late Antiquity

In addition to the apocalyptic prospect of global nuclear destruction, there are other dismal scenarios involving resource and environmental issues that are less imminent but still serious in the long term. Past analyses, seeking remedies, have focused on symptoms rather than causes. They represent extensions and expressions of the same philosophies and strategies that created these situations. This book brings a fresh and optimistic perspective to the problem area. It explores modern consciousness research and transpersonal psychology for practices that accelerate the development of consciousness. It covers a wide range from laboratory techniques of experimental psychiatry, transpersonal psychotherapies, and Jungian psychology to the Oriental and Western mystical traditions.

Human Survival and Consciousness Evolution

One of the great self-help books of all time, How to Live 365 Days a Year has sold more than 1 million copies and has been translated into 13 languages. Author John A. Schindler, M.D. introduced the powerful concept of EII, or "emotionally induced illness," long before most physicians were aware of the connection between emotions and physical health. Our new edition of this 1955 New York Times bestseller, a classic of the genre, has updated health and nutrition information by a leading health and fitness expert. Dr. Schindler's original research explains how prolonged unhappiness sets off negative responses in the nervous and endocrine systems, producing symptoms of disease, and offers techniques for coping with EII. His landmark advice on positive lifestyle, exercise, and nutrition speaks volumes to today's self-aware readers. Topics include achieving emotional satisfaction, attaining sexual maturity, dealing with stress in the workplace, and meeting the challenge of the aging years. John A. Schindler, M.D. co-founded the distinguished Monroe Clinic in 1939, where he advanced his revolutionary theories on psychosomatic medicine. His 1949 radio broadcast, titled "How to Live

a Hundred Years Happily," was so well received that transcripts of the show were printed and sold by the thousands. This led him to write the highly influential bestseller *How to Live 365 Days a Year*. Dr. Schindler died in 1957.

Eleven scholars offer new appreciations of Marguerite de Navarre's rich and varied œuvre: her mystical poetry, plays, and short-story collection, and her efforts to promote a living faith and a renewal of the Church based on Evangelical principles.

The Origin and Meaning of Courtly Love

Walter Benjamin is often viewed as a cultural critic who produced a vast array of brilliant and idiosyncratic pieces of writing with little more to unify them than the feeling that they all bear the stamp of his "unclassifiable" genius. Eli Friedlander argues that Walter Benjamin's corpus of writings must be recognized as a unique configuration of philosophy with an overarching coherence and a deep-seated commitment to engage the philosophical tradition. Friedlander finds in Benjamin's early works initial formulations of the different dimensions of his philosophical thinking. He leads through them to Benjamin's views on the dialectical image, the nature of language, the relation of beauty and truth, embodiment, dream and historical awakening, myth and history, as well as the afterlife and realization of meaning. Those notions are articulated both in themselves and in relation to central figures of the philosophical tradition. They are further viewed as leading to and coming together in *The Arcades Project*. Friedlander takes that incomplete work to be the central theater where these earlier philosophical preoccupations were to be played out. Benjamin envisaged in it the possibility of the highest order of thought taking the form of writing whose contents are the concrete time-bound particularities of human experience. Addressing the question of the possibility of such a presentation of philosophical truth provides the guiding thread for constellating the disparate moments of Benjamin's writings.

This book aims to interpret 'Jewish Philosophy' in terms of the Marrano phenomenon: as a conscious clinamen of philosophical forms used in order to convey a 'secret message' which cannot find an open articulation. The Marrano phenomenon is employed here, in the domain of modern philosophical thought, where an analogous tendency can be seen: the clash of an open idiom and a secret meaning, which transforms both the medium and the message. Focussing on key figures of late modern, twentieth century Jewish thought; Hermann Cohen, Gershom Scholem, Walter Benjamin, Franz Rosenzweig, Theodor Adorno, Ernst Bloch, Jacob Taubes, Emmanuel Levinas and Jacques

Derrida, this book demonstrates how their respective manners of conceptualization swerve from the philosophical mainstream along the Marrano 'secret curve.' Analysing their unique contribution to the 'unfinished project of modernity,' including issues of the future of the Enlightenment, modern nihilism and post-secular negotiation with religious heritage, this book will be essential reading for students and researchers with an interest in Jewish Studies and Philosophy.

Marcel Duchamp's stature in the history of art has grown steadily since the 1950s, as several artistic movements have embraced him as their founding father. But although his influence is comparable only to Picasso's, Duchamp continues to be relatively unknown outside his narrow circle of followers. This book seeks to explain his oeuvre, which has been shrouded with mystery. Duchamp's two great preoccupations were the nature of scientific truth and a feeling for love with its natural limit, death. His works all speak of eroticism in a way that pushes the socially acceptable to its outer limits. Juan Antonio Ramirez addresses such questions as the meaning of the artist's ground-breaking ready-mades and his famous installation *Etant donnés*; his passionate essay reproduces all of Duchamp's important works, in addition to numerous previously unpublished visual sources. *Duchamp: Love and Death*, even is a seminal monograph for understanding this crucial figure of modern art.

Jewish Cryptotheologies of Late Modernity

This collection of thirty-four major essays devoted to the theories, methods, and problems of myth criticism offers a convenient and substantial introduction to one of the most distinctive trends in contemporary literary study. The essays (many of them previously uncollected) are arranged to lead from general considerations to analyses of specific authors. The four Part I selections constitute an informal survey of the views of myth and ritual taken by disciplines other than literature. In Part II the first six essays relate the concept of myth and ritual to general literary theory, while the final three evaluate the uses of myth in critical theory and practice. The twenty-one Part III essays, which apply myth criticism to individual literary works or authors, afford a representative sampling of the mythopoeic patterns discerned in literature from Homer to Faulkner. Among the contributors are: David Bidney, Gáza Róheim, Joseph Campbell, Clyde Kluckhohn, Stanley Hyman, Philip Wheelwright, Richard Chase, Harold Watts, Northrop Frye, Andrew Lytle, Philip Rahv, Francis Fergusson, Marvin Magalaner, John Lydenberg, and Harry Slochower.

Many recent discoveries have confirmed the importance of Orphism for ancient Greek religion, philosophy, and literature. However, its nature and role are still very controversial. The key problem of its relationship to Christianity has been discussed by ancient and modern authors from many different viewpoints, albeit too often tainted with apologetic interests and unconscious projections. This free and thorough study of the ancient sources sheds light on these questions and illuminates the complexity of the encounter between Classical culture and Jewish-Christian tradition. New perspectives on the relationship between Classical and Jewish-Christian culture On the avowed subject of Orphism Author is specialist within the field

Myth and Literature

From the Introduction, by Caroline Walker Bynum: The opportunity to rethink and republish several of my early articles in combination with a new essay on the thirteenth century has led me to consider the continuity-both of argument and of approach-that underlies them. In one sense, their interrelationship is obvious. The first two address a question that was more in the forefront of scholarship a dozen years ago than it is today: the question of differences among religious orders. These two essays set out a method of reading texts for imagery and borrowings as well as for spiritual teaching in order to determine whether individuals who live in different institutional settings hold differing assumptions about the significance of their lives. The essays apply the method to the broader question of differences between regular canons and monks and the narrower question of differences between one kind of monk--the Cistercians--and other religious groups, monastic and nonmonastic, of the twelfth century. The third essay draws on some of the themes of the first two, particularly the discussion of canonical and Cistercian conceptions of the individual brother as example, to suggest an interpretation of twelfth-century religious life as concerned with the nature of groups as well as with affective expression. The fourth essay, again on Cistercian monks, elaborates themes of the first three. Its subsidiary goals

are to provide further evidence on distinctively Cistercian attitudes and to elaborate the Cistercian ambivalence about vocation that I delineate in the essay on conceptions of community. It also raises questions that have now become popular in nonacademic as well as academic circles: what significance should we give to the increase of feminine imagery in twelfth-century religious writing by males? Can we learn anything about distinctively male or female spiritualities from this feminization of language? The fifth essay differs from the others in turning to the thirteenth century rather than the twelfth, to women rather than men, to detailed analysis of many themes in a few thinkers rather than one theme in many writers; it is nonetheless based on the conclusions of the earlier studies. The sense of monastic vocation and of the priesthood, of the authority of God and self, and of the significance of gender that I find in the three great mystics of late thirteenth-century Helfta can be understood only against the background of the growing twelfth- and thirteenth-century concern for evangelism and for an approachable God, which are the basic themes of the first four essays. Such connections between the essays will be clear to anyone who reads them. There are, however, deeper methodological and interpretive continuities among them that I wish to underline here. For these studies constitute a plea for an approach to medieval spirituality that is not now--and perhaps has never been--dominant in medieval scholarship. They also provide an interpretation of the religious life of the high Middle Ages that runs against the grain of recent emphases on the emergence of "lay spirituality." I therefore propose to give, as introduction, both a discussion of recent approaches to medieval piety and a short sketch of the religious history of the twelfth and thirteenth centuries, emphasizing those themes that are the context for my specific investigations. I do not want to be misunderstood. In providing here a discussion of approaches to and trends in medieval religion I am not claiming that the studies that follow constitute a general history nor that my method should replace that of social, institutional, and intellectual historians. A handful of Cistercians does not typify the twelfth century, nor three nuns the thirteenth. Religious imagery, on which I concentrate, does not tell us how people lived. But because these essays approach texts in a way others have not done, focus on imagery others have not found important, and insist, as others have not insisted, on comparing groups to other groups (e.g., comparing what is peculiarly male to what is female as well as vice versa), I want to call attention to my approach to and my interpretation of the high Middle Ages in the hope of encouraging others to ask similar questions.

Tombstones provide the largest single category of epigraphical evidence from the worlds of ancient Greece and Rome, and their inscriptions have been widely studied with reference to art and cultural

history, ancient social history, prosopography and onomastics. But even though students of history and archaeology devote extensive attention to death and burial in antiquity, epigraphy - the study of inscriptions - remains, for many, an abstruse subject.

Roman Rule and Civic Life

This detailed scrutiny of the ancient Greek perception and understanding of life after death is principally concerned with how the Greeks communicated their beliefs. The first part of the book examines the Greek cult of the dead through Homer's works, such as in the presentation of Patroclus' funeral, the hero's 'psyche' and the underworld. Albinus secondly looks at the Orphic mystical tradition which originated in the 7th and 6th centuries BC and offered a more positive view of an individual's fate. The final section briefly examines other mystery cults, such as the Eleusinian cult. The argument, largely based on linguistic details, is aimed more at specialists in Greek mysticism than at a general readership.

After Life in Roman Paganism

Qian Xiaohong is born into a sleepy Hunan village, where the new China rush towards development is a mere distant rumour. A buxom, naïve sixteen-year-old, she yearns to leave behind hometown scandal, and joins the mass migration to the bustling boomtown of Shenzhen. There, she must navigate dangerous encounters with ruthless bosses, jealous wives, sympathetic hookers and corrupt policemen as she tries to find her place in the ever-evolving society. Hardship and tragedy are in no short supply as her journey takes her through a grinding succession of dead end jobs. To help her through this confusing maze, Xiaohong finds solace in the close ties she makes with the other migrant girls – the community of her fellow 'northern girls' – who quickly learn to rely on each other for humour and the enjoyment of life's simple pleasures. A beautiful coming-of-age novel, Northern Girls explores the inner lives of a generation of young, rural Chinese women who embark on life-changing journeys in search of something better.

In Search of Holiness

This book contributes to an understanding of the nature of mid-life transitions and crises by focusing on the unique personal meaning of the transitional experience for the individual. There is an implicit structure to the way in which such a transition is experienced by the individual, and this can be made explicit by the techniques and methods of the approach outlined and illustrated in the book. The value of making this structure explicit is that it enables us to understand and assess the nature and dimensions of the transition, whether or not it will reach crisis proportions, and to assess possible intervention strategies. Meaning in Mid-Life Transitions should be of interest to human service practitioners as well as teachers and students of human development and behavior. It evidences an integrative approach and structural framework, including a series of in-depth clinical and research studies.

The House of Hades

A few words will suffice to justify the preparation of an introduction to English readers of Joseph de la Vega and 's Confusion de Confusiones. His book is the first that describes the practices of any stock exchange; it makes evident a high development of practices, with puts, calls, pools, and manipulations; and it appeared as early as the seventeenth century. Not inappropriately the stock exchange described is that of Amsterdam, a city which at the date of the volume and 's publication — 1688 — was still the leading financial center of the world. The book, to be sure, is hardly a systematic account of the institution; the author pursued moral, philosophical, and rhetorical objectives, and, while saying a lot that seems now to be of little value, manages somehow to leave unsaid a great deal that would be of interest for us. Nevertheless, it represents, even in its peculiar form, a really important source of information about the stock exchange, and indeed about the Dutch business world of that period.

Northern Girls: Life Goes On

This compelling autobiography narrates the story of immigration rights activist Mary Antin, and her enlightening journey from early life in Russia to her migration and Americanisation in late nine-

teenth-century USA. *The Promised Land* is an introspective first-hand account of life as a Jewish American immigrant. Mary Antin was just 12-years-old when she arrived in Boston with her family and she underwent a great deal of change and development before she could call the USA her home. Antin's autobiography details how the young Jewish girl escaped Czarist Russia and adapted to an entirely new culture and lifestyle. Antin explores her memories of public school and accompanies powerful historical context with hard-hitting political commentary. *The Promised Land* is one person's story, but speaks for the millions who have had all too similar experiences. This gripping volume includes fascinating chapters such as: - Children of the Law - Daily Bread - The Exodus - The Initiation - 'My Country' - A Child's Paradise Now in a new edition, Read & Co. Books have republished this illuminating autobiography for a new generation of readers. *The Promised Land* is a great read for those interested in the history of immigration rights and for fans of Mary Antin's work.

Slash and Burn

Studying from the Mycenaean to the late Hellenistic period, this work includes new articles by twenty-seven specialists of ancient Greece, and presents an examination of the Greek cultures of mainland Greece, Asia Minor, Egypt and Italy. With the chapters sharing the theme of social history, this fascinating book focuses on women, the poor, and the slaves – all traditionally seen as beyond the margins of power and includes the study of figures who were on the literal margins of the Greek world. Bringing to the forefront the research into areas previously thought of as marginal, Anton Powell sheds new light on vital topics and authors who are central to the study of Greek culture. Plato's reforms are illuminated through a consideration of his impatient and revolutionary attitude to women, and Powell also examines how the most potent symbol of central Greek history – the Parthenon – can be understood as a political symbol when viewed with the knowledge of the cosmetic techniques used by classical Athenian women. *The Greek World* is a stimulating and enlightening interaction of social and political history, comprehensive, and unique to boot, students will undoubtedly benefit from the insight and knowledge it imparts.

The Meaning of Courtly Love

This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. Violence against women is characterised by its universality, the multiplicity of its forms, and the intersectionality of diverse kinds of discrimination against women. Great emphasis in legal analysis has been placed on sex-based discrimination; however, in investigations of violence, one aspect has been overlooked: violence may severely affect women's health and access to reproductive health, and State health policies might be a cause of violence against women. Exploring the relationship between violence against women and women's rights to health and reproductive health, Sara De Vido theorises the new concept of violence against women's health in international law using the Hippocratic paradigm, enriching human rights-based approaches to women's autonomy and reflecting on the pervasiveness of patterns of discrimination. At the core of the book are two dimensions of violence: horizontal 'inter-personal', and vertical 'state policies'. Investigating these dimensions through decisions made by domestic, regional and international judicial or quasi-judicial bodies, De Vido reconceptualises States' obligations and eventually asks whether international law itself is the ultimate cause of violence against women's health.

Confusion de Confusiones

Annotation This collection challenges the tendency among scholars of ancient Greece to see magical and religious ritual as mutually exclusive and to ignore "magical" practices in Greek religion. The contributors survey specific bodies of archaeological, epigraphical, and papyrological evidence for magical practices in the Greek world, and, in each case, determine whether the traditional dichotomy between magic and religion helps in any way to conceptualize the objective features of the evidence examined. Contributors include Christopher A. Faraone, J.H.M. Strubbe, H.S. Versnel, Roy Kotansky, John Scarborough, Samuel Eitrem, Fritz Graf, John J. Winkler, Hans Dieter Betz, and C.R. Phillips.

The Greek World

Michael Cronin looks at how translation has played a crucial role in shaping debates about identity, language and cultural survival in the past and in the present. He explores how everything from the impact of migration on the curricula for national literature courses, to the way in which nations wage war in the modern era is bound up with urgent questions of translation and identity. Examining translation practices and experiences across continents to show how translation is an integral part of how cultures are evolving, the volume presents new perspectives on how translation can be a powerful tool in enhancing difference and promoting intercultural dialogue. Drawing on a wide range of materials from official government reports to Shakespearean drama and Hollywood films, Cronin demonstrates how translation is central to any proper understanding of how cultural identity has emerged in human history, and suggests an innovative and positive vision of how translation can be used to deal with one of the most salient issues in an increasingly borderless world.

Violence against women's health in international law

Gábor Betegh presents the first systematic reconstruction and examination of the Derveni papyrus and analyzes its role in the intellectual milieu of its age. Found in 1962 near Thessaloniki among the remains of a funeral pyre, it is one of the earliest surviving Greek papyri and is a document of primary importance for understanding religious and philosophical developments of the time of Socrates. The book will appeal strongly to classicists, philosophers and historians of religion.

Essays in Modern Jewish History

In the first comprehensive study of election law since the Supreme Court decided *Bush v. Gore*, Richard L. Hasen rethinks the Court's role in regulating elections. Drawing on the case files of the Warren, Burger, and Rehnquist courts, Hasen roots the Court's intervention in political process cases to the landmark 1962 case, *Baker v. Carr*. The case opened the courts to a variety of election law disputes, to the point that the courts now control and direct major aspects of the American electoral process. The Supreme Court does have a crucial role to play in protecting a socially constructed "core" of political equality principles, contends Hasen, but it should leave contested questions of political equality to the political process itself. Under this standard, many of the Court's most important election law cases from *Baker* to *Bush* have been wrongly decided.

Translation and Identity

What unites and what divides Americans as a nation? Who are we, and can we strike a balance between an emphasis on our divergent ethnic origins and what we have in common? Opening with a survey of American literature through the vantage point of ethnicity, Werner Sollors examines our evolving understanding of ourselves as an Anglo-American nation to a multicultural one and the key role writing has played in that process. *Challenges of Diversity* contains stories of American myths of arrival (pilgrims at Plymouth Rock, slave ships at Jamestown, steerage passengers at Ellis Island), the powerful rhetoric of egalitarian promise in the Declaration of Independence and the heterogeneous ends to which it has been put, and the recurring tropes of multiculturalism over time (*e pluribus unum*, melting pot, cultural pluralism). Sollors suggests that although the transformation of this settler country into a polyethnic and self-consciously multicultural nation may appear as a story of great progress toward the fulfillment of egalitarian ideals, deepening economic inequality actually exacerbates the divisions among Americans today.

Scriptural Examinations on the Church Catechism

Excerpt from Scriptural Examinations on the Church Catechism: Designed as a Plain Manual of Divinity for Sunday-Schools, Catechetical, and Bible Classes, and General Use Besides the notes, there have been in the American edition, occasional, though not frequent nor extensive, additions to the body of the work. The necessary changes of phraseology have been made wherever the American Prayer-book differs from the English, together with occasional alterations or omissions where in the judgment of the editor it was desirable.
