Imminent Danger (Mills & Boon Vintage Intrigue)

I've seen the evil in human nature, the horror an accident or an intentional act can cause so many people. I have seen the happiness of hope and prayers finally come true for people lost in desperation and sorrow. I have felt that same pain in my heart as people I knew and respected died in the line of duty to make this world a safe place for all. My heart is complete and happy because of all the years in this profession. I plan on working six more years and then I will walk away and turn it over to all I have mentored over the past years. May God watch over all law enforcement officers everywhere!

Imminent Danger

As a Weapons Master, Eli has the ability to summon any weapon that he has ever touched at will, and master it within the first few minutes of its summoning. Now old enough to join the Academy, Eli and his best friend Jude, who is heir to the Combat Specialist bloodline, believe that their dreams of becoming an Operative in Kismet's armed forces may finally be coming true. However after a brief time at the Academy, Eli discovers that Kismet's ruler is hosting the Trials of Magic, Might and Lineage—an ancient tradition that pits heirs of all three bloodlines in three rounds of sudden death. But when a powerful and faceless enemy rises out of the shadows of vengeance and treachery, Eli begins to believe that there may be more to his bloodline than he is aware of. Will Eli be able to master his abilities in time to survive the Trials, as well as expose and neutralize the threat that holds his city and the rest of Kismet in jeopardy?

Search and Rescue

High school junior Eris Miller thinks she's having a bad day when her roommate's boyfriend catches her stepping out of the shower wearing nothing but a towel. Then she gets abducted by scaly six-armed aliens with a strange fondness for the color blue, and her day suddenly gets a whole lot worse. Trapped on a spaceship bound for the slave markets of Sirius B, Eris fears she'll never see her home again. But then fate whisks her away from her reptilian captors and into the arms of Varrin, a fast-talking space pirate who promises to deliver her safely back to Earth. He claims to have her best interests at heart, but Eris soon discovers that her charming rescuer has a hidden agenda. As they race across the galaxy, outrunning a villainous figure from Varrin's past, Eris begins to realize that their relationship is putting her planet, her life and her heart in imminent danger. She knows that trusting Varrin could prove deadly ... but what other choice does she have?

Imminent Danger

A family of spies. A network of killers. A treacherous, planned attack on the world's most powerful leaders—and the final countdown to Armageddon . . . Jacobslav Scarvan is supposed to be dead. Once a ruthless assassin for the KGB, he went too far when he burned a family alive for the sheer pleasure of it—and became a target himself. Both the CIA and Russian intelligence wanted him eliminated. CIA agent Scott Roberts was the man to do it. Three bullets should have been enough to kill Scarvan. But it only forced the rogue agent deeper underground—to places that will forever haunt him . . . Twenty years later Scott and his daughter Mara are working for the US president, using their joint experience to form an elite Alpha Team of highly skilled operatives. Their mission is to hunt down and destroy the apocalyptic shadow organization known as Omega. But when they learn that Scarvan is still alive—plotting revenge after undergoing a twisted radicalization that makes him more dangerous than ever—Scott and Mara must race across the globe to prevent an epic disaster. This time, when the clock runs out, the end times begin . . . “With an alpha female heroine and a tantalizing premise, this hard-edged, gripping thriller matches wits and wiles, delivering an entertaining romp.”—Steve Berry, New York Times bestselling author on *Silent Threat* Visit us at www.kensingtonbooks.com

This collection is based on the required reading list of Yale Department of Classics. Originally designed for students, this anthology is meant for everyone eager to know more about the history and literature of this period, interested in poetry, philosophy and rhetoric of Ancient Rome. Latin literature is a natural successor of Ancient Greek literature. The beginning of Classic Roman literature dates to 240 BC. From that point on, Latin literature would flourish for the next six centuries. Latin was the language of the ancient Romans, but it was also the lingua franca of Western Europe throughout the Middle Ages. Consequently, Latin Literature outlived the Roman Empire and it included European writers who followed the fall of the Empire, from religious writers like Aquinas, to secular writers like Francis Bacon, Baruch Spinoza, and Isaac Newton. This collection presents all the major Classic Roman authors, including Cicero, Virgil, Ovid and Horace whose work intrigues and fascinates readers until this day. Content: Plautus: Aulularia Amphitryon Terence: Adelphoe Ennius: Annales Catullus: Poems and Fragments Lucretius: On the Nature of Things Julius Caesar: The Civil War Sallust: History of Catiline's Conspiracy Cicero: De Oratore Brutus Horace: The Odes The Epodes The Satires The Epistles The Art of Poetry Virgil: The Aeneid The Georgics Tibullus: Elegies Propertius: Elegies Cornelius Nepos: Lives of Eminent Commanders Ovid: The Metamorphoses Augustus: Res Gestae Divi Augusti Lucius Annaeus Seneca: Moral Letters to Lucilius Lucan: On the Civil War Persius: Satires Petronius: Satyricon Martial: Epigrams Pliny the Younger: Letters Tacitus: The Annals Quintilian: Institutio Oratoria Juvenal: Satires Suetonius: The Twelve Caesars Apuleius: The Metamorphoses Ammianus Marcellinus: The Roman History Saint Augustine of Hippo: The Confessions Claudian: Against Eutropius Boethius: The Consolation of Philosophy Plutarch: The Rise and Fall of Roman Supremacy: Romulus Poplicola Camillus Marcus Cato Lucullus Fabius Crassus Coriolanus Cato the Younger Cicero

The Chronicles of a Teenage Zombie

Ed never believed that he would have to live through a zombie apocalypse. One day he was Ed Kirk, a normal sixteen-year-old boy with a loving family, a beautiful girlfriend, and a full life ahead of him.

Now he's on the run from zombies, being hunted by a dark force that threatens his very existence, all the while trying to escape his hometown and find help. Oh, yeah, one more thing: Ed is a zombie too! "Ed Undead: The Chronicles of a Teenage Zombie is a strong story that never bores, and Ed, the 16 year old almost zombie, shows us what true courage is. I give it 4 stars and a place in the Awesome Indies listing. Ed and Lisa are great characters to spend time with, even if it is in a zombie infested town." AvidReader "I loved this book. Ed is an everyday guy who has hidden leadership abilities that are developing throughout the story. When placed into a bad situation with the zombies he still keeps it together because Ed is a hero. Lisa Jane is strong, smart and a very good second who can kick butt all by herself. This book was a page turner because I couldn't wait to read what happened next and I cheered them on throughout the story. It is a book that anyone can read and I would read it again this time next year." Cloey.k "This book was captivating. I was drawn in from the first page and found it hard to put down. This is a definite must read even if you aren't a zombie fan." m pollard Grab your copy today! The Zombie Chronicles - Book 6 - Revelation

A collection of zombie fiction from British journalist and dark fiction writer C.M. Saunders, featuring two complete novellas alongside short stories previously published in the likes of *Morpheus Tales* and *Crimson Streets*, plus a brand-new novelette. Also includes an exclusive introduction and artwork by the award-winning Greg Chapman. Featuring: *Dead of Night*: young lovers Nick and Maggie go camping in the woods, only to come face-to-face with a group of long-dead Confederate soldiers who don't know, or care, that the war is over. *Human Waste*: Dan Pallister wakes up one morning to find the zombie apocalypse has started. Luckily, he's been preparing for it most of his life. He just needs to grab some supplies from the supermarket... *'Til Death do us Part*: When the world as we know it comes to an abrupt end, an elderly couple are trapped in their apartment. They get by as best they can, until they run out of food. *Roadkill*: A freelance ambulance crew are plunged into a living nightmare when a traffic accident victim they pick up just won't stay dead. He has revenge on his mind. *Plague Pit*: A curious teenager goes exploring the Welsh countryside one summer afternoon and stumbles across a long-abandoned chapel. What he finds there might change the world, and not for the better. *Dead Men Don't Bleed*: A gumshoe private eye is faced with his most challenging case yet when a dead man walks into his office and asks for help solving his own murder. Drawn from a variety of sources, all these tales have one thing in common; they explore what might happen if our worst nightmares are realized and people came BACK FROM THE DEAD. Praise for the stories in this book: "This is very well written and not to ruin anything but the ending is amazing! Definitely check this one out. I am now a fan!" (*Dead of Night*) "C. M. Saunders does a fine job here with these long-lost Confederate dead in the North Carolina Piedmont. He manages a winning balance between gory horror and interpersonal relationship, between splatter and genuine human emotions." (*Dead of Night*) "It's a zombie story with an original twist that I appreciated. It's well written, flows nicely, and both of the (live) characters are well developed and believable. Let's face it - The woods are a creepy place even in the daylight sometimes and thanks to CM Saunders I won't be camping anytime soon." (*Dead of Night*) "Dan Pallister woke up one morning to find the world had gone to hell over night. The zombie apocalypse has arrived without warning. But wait... there is something odd about these zombies. Why do some of them seem to be going about their usual human habits? Oh well, Dan doesn't have time to ponder all the gruesome details!" (*Human Waste*) "Freaky." (*'Til Death do us Part*) "Awesome read, a great story with a huge twist which I shall not reveal. Very enjoyable, very entertaining for lovers of splatterpunk and a great tale that draws the reader in as we see through the eyes of the zombie killer... I'm saying no more, find out yourself." (*Human Waste*) "I found this story riveting." (*Dead Men Don't Bleed*)

Back from the Dead

The zombie apocalypse just got real. Zombies rule. Almost everybody in the world has turned into one, thanks to a nifty little disease called Necropoxy. Sixteen year old twins, Tripp and Trina Light, however, are among the rare humans who are not only immune to Necropoxy--they're super immune. Even a bite from a zombie won't infect them. Great, right? Yeah, but . . . researchers are capturing every immune human they can find--and experimenting on them like lab rats. Just yesterday, the twins and their friends narrowly escaped. The researchers will do anything to get them back. That means Tripp, Trina, and their small band of survivors are on the run from zombies, mad scientists, and who knows what else. What's worse, some people in their group are starting to act funny, which isn't funny at all. This is so not how they planned to spend the beginning of their junior year of high school in Massachusetts. Everyone is dead. Everyone is wicked dead. Author and playwright Howard Odentz is a lifelong resident of the gray area between Western Massachusetts and North Central Connecticut. His love of the region is evident in his writing as he often incorporates the foothills of the Berkshires and the small towns of the Bay and Nutmeg states into his work. In addition to *The Dead (A Lot) Series*, he has written the horror novel *Bloody Bloody Apple*, the short story collection *Little Killers A to Z*, and a couple of horror-themed, musical comedies produced for the stage.

The Zombie Apocalypse Survival Guide for Teenagers isn't a normal book. It's not even a normal Zombie survival guide. It's a story of three teenagers enduring and surviving against the odds, adapting where many adults failed. Not many teenagers survived "The Havoc," probably because most didn't acclimate and learn like these three. So what's the secret to their survival? Good question. The answer lies in these pages, a journal written by a teenager named Chris. Each section includes some discussion questions to help you digest what you just read. These questions will point to the Bible here and there for some wisdom that has stood the test of time: wisdom for surviving your real world.

Welcome to the Apocalypse Infection Unleashed Series. Prequel - Val Book 1 – The Zombie Chronicles Book 2 – Race for the Cure Book 3 – Deadly City Book 4 – Poisonous Serum Book 5 – Undead Nightmare Book 6 – Revelation Book 7 – Trepidation (due out in Jan.) Book 8 – Impact (due out in spring) This is the longest book in The Zombie Chronicles so far. It is almost 80,000 words. My name is Dean Walters and I'm eighteen years old. We had saved Val, Jackie, and Claire with the precious vials in our possession, but they weren't 100 percent effective. Those who had taken the serum, the so-called miracle cure for zombie-itis, were easy enough to spot, since they had glowing green eyes and were suddenly equipped with night vision that would have made the average bat jealous, but that was only one side effect. Much to our dismay, the other side effect wasn't quite so tolerable. Some cured people turned back into zombies but retained control of their reasoning, logical minds, virtually turning them into cannibals capable of thinking, calculating, stalking, and killing their victims. We'd decided to call them hybrids, and I feared that my sister, my girlfriend, and my potential future cousin-in-law were about to morph into just that. Is it only a matter of time? Does that happen to everyone who takes the serum, or are some immune to that side effect? Our only hope for answers was to go to the lab, and I hoped the answers we'd finally get would be honest—and good news. The Zombie Chronicles - Book 5 - Undead Nightmare

The disease takes the world by storm. Ravaging the living, it takes no survivors. The end of the world comes swiftly and silently without much noise or fuss. It sneaks up on a group of neighbors who must bind together in order to survive. Alice is caught by surprise when the dead begin to rise. She's a paralegal: not a warrior. She's comfortable with paperwork and filing, but killing? That's not exactly in her job description. Soon Alice learns there's more to the end of the world than fighting the undead, though, and she realizes that if she's not careful, her companions are going to learn her secret. Mark is a soldier. He thought he'd left the pain of war behind, but now he knows that soldiers never really leave the battlefield. Even when your physical wounds heal, there's always some remnant of horror left behind. There's always something terrifying you. Kyle isn't afraid of the dark. At least, that's what he tells himself. He's an IT guy. He's not a fighter. He has no place in the zombie apocalypse, so he has to craft one for himself. Together, they'll make or break their own survival. Together, they'll figure out whether or not they can make this work. After all, it's just another day in the zombie apocalypse.

Zombie Apocalypse

What would you do if a mysterious plague began to devour your city and the dead started banging on your door? Fifteen-year-old Liam Peters is spending the summer with his great-grandmother (not by choice) when the authorities of St. Louis spin up the tornado sirens to announce a civic emergency. Police robocalls declare mass disturbances throughout the city, suggesting citizens try to escape to safer jurisdictions. Radio offers contradictory instructions: stay inside, hunker down, ride it out. The President tries to convey a message of hope to calm a scared populace, but the tone is interpreted as a goodbye. The mixed messaging sends society--already on the verge of panic--into a tailspin. When the President signs off, half the city hunkers down while the other half dashes for the interstate. Now Liam is faced with his first dilemma of an increasingly complicated morning. Should he stay with Grandma and attempt to defend her urban home against both the living and the dead, or should he try to get her out of the city to his parents' home in the suburbs? Nothing is ever as simple as it sounds when life and death are on the line. As an avid reader of zombie literature, Liam realizes you go into the zombie apocalypse with the army you have, not the one you want. He sees himself as an unlikely savior, with an unlikely ally, but he embarks on the hero's journey nonetheless. As the city implodes, they race against the clock to outpace desperate refugees, gang violence, criminal opportunists, overzealous military units, scared civilians, and a growing horde of bloodthirsty zombies. He does it while burdened with a woman who is unable to walk more than ten feet without help. As they chase the elusive vision of safety, Liam comes to appreciate why there are no atheists in foxholes. This book is part one of the Sirens of the Zombie Apocalypse series.

The Zombie Chronicles - Book 2 - Race For The Cure

The end of the world just might be their perfect beginning... Glenview, North Carolina. Also known—at least to sixteen-year-old Ava Pegg—as the Land of Incredibly Boring Vacations. What exactly were her parents thinking when they bought a summer home here? Then the cute-but-really-annoying boy next door shows up at her place in a panic...hollering something about flesh-eating zombies attacking the town. At first, Ava's certain that Cole spent a little too much time with his head in the moonshine barrel. But when someone—or something—rotted and terrifying emerges from behind the woodpile, Ava realizes this is no hooch hallucination. The undead are walking in Glenview, and they are hungry. Panicked, Ava and Cole flee into the national forest. No supplies, no weapons. Just two teenagers who don't even like each other fighting for their lives. But that's the funny thing about the Zombocalypse. You never know when you'll meet your undead end. Or when you'll fall dead over heels for a boy...

Return of the Dead

Felix is an average teenager whose favorite past time is reading and learning about zombies with his friends. His near obsession of the topic often prompts comments that he should spend less time learning about zombie lore and more of his time on practical things that could be applied to the real world. All of that changes when the dead begin to rise and the living start to die and the world around him starts to resemble one of his zombie novels or movies. Suddenly he finds himself the unlikely hero in a world where reality has become stranger than fiction and where his hobby of planning for a zombie apocalypse becomes vital to the survival of those around him. As he and his friends struggle to fight against death itself they realize that truth is often much stranger than fiction..... and allot more deadly. ** This novel is a horror story which includes scenes of death and violence. It may be too intense and graphic for younger or more sensitive readers. Parental discretion is advised.

Realms of Time

"Definitely the best of the series!""Felt like I was part of the team--so much flippen fun.""Devoured it. Ready for the next book, like right NOW."-----Welcome to the fourth installment of the Scrapyard Ship series, Realms of Time. Captain Jason Reynolds and his team are up against a new, and unexpected foe--an adversarial force that has every intention of aligning with the powerful and dreaded Craing Empire. The enemy strikes from Earth's high orbit, deploying five time-shifting spheres. The spheres are strategically positioned to link-up and set Earth's clock back 100 years, erasing present time. But when that course of action is interrupted by The Lilly's crew, the results become far worse. Fluctuating time realms rapidly spread across the globe and threaten to rip the planet apart. Join Jason, Billy, Traveler, Ricket and Dira on their mission as they literally travel to the ends of time to bring Earth back to the twenty-first century.

Hab 12

"Buckle up--this is another crazy ride!" The Scrapyard Ship sci-fi "cliff-hanger" adventures continue with HAB 12, the second book in the series: Captain Jason Reynolds faces new challenges, not only on Earth but from the far side of the universe as well. The only way to stop the Craing this time will be to square off with them on their home turf. Jason's been informed that three powerful Craing warships, having similar technology as The Lilly, will soon be en route to Earth. The Alliance must destroy the Craing's wormhole means of distant space travel to avert Earth's total annihilation. Unfortunately, there's no way to reach the Craing worlds in time, at least not through conventional means. It's up to Jason and his hand-picked assault team to traverse, by advanced phase-shifting means, through the hazardous environment of HAB 12. This is an adventure fraught with carnivores of a Jurassic Age magnitude, and a terrain so deadly that turning back may be their only hope of survival. Note from the author: Don't be surprised by cliff-hanger endings. I'll do my best to keep Scrapyard Ship as well as the Tapped In series books coming so you won't have long to wait for the next book. Enjoy!

Scrapyard Legacy

Better buckle up ... the Scrapyard Ship gang is back for a new interstellar romp!... Over the past year, things have been relatively peaceful within the Planetary Alliance. Captain Jason Reynolds is looking forward to a fishing trip in the deep wilderness on Alantia Dastile with Michael, his six-year-old son. His wife, Dira, and his father, the Fleet Omni, are away on a diplomatic mission to the Sommis of Adriark. It's the perfect time for an interstellar getaway. Or is it? Jason just needs to check on one thing first--a flurry of mechanical issues recently plaguing the Parcical, the Omni's Rogue Class spacecraft--something about a Zoo habitat using increasing amounts of the vessel's memory, that and a flurry of malfunctions with onboard Caldurian technologies. Caught off guard, it's soon discovered; a different kind of war is

coming. The Alliance is not prepared. The U.S. Fleet is not prepared. A new enemy rears its ugly head and quickly becomes the dominant force within the sector. For those who survive the coming rampage -- the coming war -- everything will change. The Scrapyard Ship gang unites one more time for this action-packed adventure. Together, they will endeavor to give the Planetary Alliance a fighting chance against almost certain devastation that's heading toward the Sol system.

Space Vengeance

"I LOVED this book!" "Great Book!" "Get Another Fix!" "Fun and Great Series!" "The crazy ride continues... and never lets up!" Captain Jason Reynolds is back! In the third installment of the Scrapyard Ship sci-fi adventure series, Space Vengeance, Jason, his family, and The Lilly's crew face the impending destruction of their internal nano-devices. What's worse, what remains of the Craing fleet, some 1500 warships, is back and headed straight toward the already decimated planets within Allied space. In what looks to be a one-way suicide mission, Jason must leave Nan and Mollie behind on Earth and out of harm's way. While war rages on sixty light years from Earth, maniacal space raider Captain Stalls and hundreds of his pirated warships close in on Earth. Stalls knows exactly what he wants: to find and kill Captain Reynolds and take the beautiful Nan Reynolds for his own. Note from the author: If you've made it to this third installment, you already realize this is an ongoing series. With that said, more often than not these books have cliff-hanger endings!

Plague Ship

Chairman Juan Cabrillo and the rest of the Corporation's mercenaries fight to stop a corrupt activist group from unleashing a viral attack in this #1 New York Times-bestselling adventure from the Oregon Files. Captained by the rakish, one-legged Juan Cabrillo and manned by a crew of former military and spy personnel, the Oregon is a private enterprise, available for any government agency that can afford it. They've just completed a top secret mission against Iran in the Persian Gulf when they come across a cruise ship adrift at sea. Hundreds of bodies litter its deck, and, as Cabrillo tries to determine what happened, explosions rack the length of the ship. Barely able to escape with his own life and that of the liner's sole survivor, Cabrillo finds himself plunged into a mystery as intricate -- and as perilous -- as any he has ever known and pitted against a cult with monstrously lethal plans for the human race. . . plans he may already be too late to stop

Strengthening Forensic Science in the United States

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Starship Alexander

A washed-up captain. A worn-out ship. A crew of green cadets. And they're Earth's only hope. The Alexander is the last true warship, a relic from the days of interstellar war. She's destined for the scrapyard, and her captain, Richard Hammett, is about to retire. Their last mission is a training run with a ship full of cadets. It's supposed to be a routine hop through a wormhole Gate. But Gates have been going offline, one after another, and Hammett knows in his bones it means trouble. The kind of trouble only a real warship can handle. Defying orders, he takes the Alexander through another Gate, and puts the ship smack dab in the path of an alien invasion. Now a captain at the end of his career will

have to take dozens of terrified cadets and forge them into a crew of warriors, because the Alexander is all that stands between the Earth and the swarming ships of the Hive.

Fifty years have passed since the first Earth Day, on 22 April 1970. This accessible, incisive and timely collection of essays brings together a diverse set of expert voices to examine how the Earth's environment has changed over this past half century, and what lies in store for our planet over the coming fifty years. *Earth 2020: An Insider's Guide to a Rapidly Changing Planet* responds to a public increasingly concerned about the deterioration of Earth's natural systems, offering readers a wealth of perspectives on our shared ecological past, and on the future trajectory of planet Earth. Written by world-leading thinkers on the front-lines of global change research and policy, this multi-disciplinary collection maintains a dual focus: some essays investigate specific facets of the physical Earth system, while others explore the social, legal and political dimensions shaping the human environmental footprint. In doing so, the essays collectively highlight the urgent need for collaboration across diverse domains of expertise in addressing one of the most significant challenges facing us today. *Earth 2020* is essential reading for everyone seeking a deeper understanding of the past, present and future of our planet, and the role of humanity in shaping this trajectory.

A mission that will test the limits of Mitchell's mind, body, and soul, and force him to make an impossible choice that could cost the lives of millions. This is war, and if he can't win a battle for a single planet, how can he possibly change the outcome of a conflict that has raged beyond eternity?

A funny, colorful, fascinating tour through the work and life of one of today's most influential graphic designers. Esquire. Ford Motors. Burton Snowboards. The Obama Administration. While all of these brands are vastly different, they share at least one thing in common: a teeny little bit of Aaron James Draplin. Draplin is one of the new school of influential graphic designers who combine the power of design, social media, entrepreneurship, and DIY aesthetic to create a successful business and way of life. *Pretty Much Everything* is a mid-career survey of work, case studies, inspiration, road stories, lists, maps, how-tos, and advice. It includes examples of his work—posters, record covers, logos—and presents the process behind his design with projects like Field Notes and the “Things We Love” State Posters. Draplin also offers valuable advice and hilarious commentary that illustrates how much more goes into design than just what appears on the page. With Draplin's humor and pointed observations on the contemporary design scene, *Pretty Much Everything* is the complete package.

Ascent (The Invasion Chronicles—Book Three): A Science Fiction Thriller

The Hidden Ship - Blurb I am Brian Polk, a captain in the U.S. Air Force. Was already back stateside for close to a year when all hell broke loose--otherwise I'd be dead right now--like the tens of millions of other poor souls lost. Military installations worldwide were the first targets hit. It was a reign of terror--an interstellar invasion--the beginning of the end of civilization as we knew it. The largest cities were turned to rubble. Government centers were laid to waste, then law enforcement resources were targeted. Finally, the aliens eliminated humanity's means to electronically communicate. The Earupitan's technology, their weaponry, was so remarkable and advanced that we never had a chance. But now, two years later, we're long past self-incrimination--playing the blame game. Today they walk brazenly among us--their reptilian eyes always watchful, always scrutinizing. At their discretion they drag any of us into their headquarters. Most seized never see the light of day after that. Many of us live in fear, wondering what's next for humanity. Then again, there are some amongst us who have befriended the enemy. But not me. I'm far more interested in killing them, maybe a lot of them. Luckily, I possess something of theirs. Something dangerous. So in my own small way I just might make a difference--that, or die trying.

The Hidden Ship

For the first time ever, Bill Willingham's acclaimed, Eisner Award-winning series *FABLES* is presented in a deluxe hardcover edition collecting issues #1-10. When a savage creature known only as the Adversary conquered the fabled lands of legends and fairy tales, all of the infamous inhabitants of

folklore were forced into exile. Disguised among the normal citizens of modern-day New York, these magical characters have created their own peaceful and secret society within an exclusive luxury apartment building called Fabletown. When Snow White's party-girl sister, Rose Red, is apparently murdered, it's up to Fabletown's sheriff, the reformed and pardoned Big Bad Wolf, to find the killer. Meanwhile, trouble of a different sort brews at the Fables' upstate farm where non-human inhabitants are preaching revolution – and threatening Fabletown's carefully nurtured secrecy.

Fables: The Deluxe Edition Book One

First Contact: Assess human with the flawed, rudimentary, mind ... It's a moonless summer night when a severely damaged intergalactic spacecraft enters Earth's upper orbit. The alien pilot is desperate. Needs to hold up long enough to make repairs--do so before his pursuers find him. Cuddy Perkins lives a simple life with his mother, his dog Rufus, and a scattering of farm animals that still inhabit their old, dilapidated, Woodbury Tennessee ranch. He was used to the insults; retard ... simpleton ... village idiot. Momma says to just ignore them ... people can be heartless. But Cuddy already knew he was different. Ever since the accident back when he was seven. He didn't know how long ago that was, exactly, but he did know he was pretty big now--he was taller than his older brother, Kyle ... who was in prison, as well as the Woodbury Sherriff--the man who put him there. Unbeknownst to Cuddy Perkin's, his simple, uneventful, life was about to be turned completely upside down.

The Simpleton

This is a study of the material life of information and its devices; of electronic waste in its physical and electronic incarnations; a cultural and material mapping of the spaces where electronics in the form of both hardware and information accumulate, break down, or are stowed away. Where other studies have addressed "digital" technology through a focus on its immateriality or virtual qualities, Gabrys traces the material, spatial, cultural and political infrastructures that enable the emergence and dissolution of these technologies. In the course of her book, she explores five interrelated "spaces" where electronics fall apart: from Silicon Valley to Nasdaq, from containers bound for China to museums and archives that preserve obsolete electronics as cultural artifacts, to the landfill as material repository. Digital Rubbish: A Natural History of Electronics describes the materiality of electronics from a unique perspective, examining the multiple forms of waste that electronics create as evidence of the resources, labor, and imaginaries that are bundled into these machines. Ranging across studies of media and technology, as well as environments, geography, and design, Jennifer Gabrys draws together the far-reaching material and cultural processes that enable the making and breaking of these technologies.

Digital Rubbish

Focusing on the arcades of 19th-century Paris--glass-roofed rows of shops that were early centers of consumerism--Benjamin presents a montage of quotations from, and reflections on, hundreds of published sources. 46 illustrations.

In the depths of a winter's night, the heart of Simon Limbeau is resting, readying itself for the day to come. This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. *Beyond Observation* is structured by the argument that the 'ethnographicness' of a film should not be determined by the fact that it is about an exotic culture – the popular view – nor because it has apparently not been authored – a long-standing academic view – but rather because it adheres to the norms of ethnographic practice more generally. On these grounds, the book covers a large number of films made in a broad range of styles across a 120-year period, from the Arctic to Africa, from the cities of China to rural Vermont. Paul Henley discusses films made within reportage, exotic melodrama and travelogue genres in the period before the Second World War, as well as more conventionally ethnographic films made for academic or state-funded educational purposes. The book explores the work of film-makers such as John Marshall, Asen Balikci, Ian Dunlop and Timothy Asch in the post-war period, considering ideas about authorship developed by Jean Rouch, Robert Gardner and Colin Young. It also discusses films authored by indigenous subjects themselves using the new video technology of the 1970s and the ethnographic films that flourished on British television until the 1990s. In the final part of the book, Henley examines the recent work of David and Judith MacDougall and the Harvard Sensory Ethnography Lab, before concluding with an assessment of a range of films authored in a participatory manner as possible future models.

When a cluster of blazingly fast meteorites strikes Earth's upper stratosphere in the year 2129, they release three destabilizing elements into the atmosphere-Strongzine, Stradamine, and Starlox-which encircle the Earth's surface in a thick, partially solidified layer of cloud and begin to spew a constant stream of acid rain onto the surface below. Organic life forms are all but obliterated, and the human race is reduced to a tiny fraction of its population. This event is known as the Ruin. But five centuries later, humanity still survives. Cloudwalkers tells the story of Conn Brataich, a young man who lives a privileged life above the cloudbank, relying on his noble heritage-and the abilities it provides-to guide him through his beautiful but treacherous realm in the New York skylands, and Misty Casper, a Grounder who lives an arduous and somber life hundreds of feet below in the former subway tunnels of crumbling midtown Manhattan. Their two cultures live in uneasy, segregated codependence, rarely interacting until late one fall evening when, mysteriously, an experienced Cloudwalker of noble blood falls five hundred feet to his death. Conn is sent to recover the body in secret, but he doesn't expect to encounter Misty on the dangerous streets of the dying city. Their chance encounter triggers a domino effect that throws them both headlong into a struggle for their very survival. Conn and Misty soon discover that only by working together can they succeed, but first they'll have to put aside their preconceived notions about one another. Dark forces, long thought to have been expunged, have returned and are threatening to destroy both their ways of life. Through love, loss, and the looming threat of war, Misty and Conn will be forced to face their greatest fears for the sake of their very world and each other.

Shipping and Logistics Management serves to consolidate the knowledge its authors have acquired from being educators and observers of the shipping industry. Against the background of a global business environment, it explains how the shipping market functions, examining the strategic and operational issues that affect entrepreneurs in this industry. The authors discuss global trends and strategies in the shipping business, looking at the role of logistics service providers and at how the use of information technology can help shipping operations. Shipping and Logistics Management also aims to answer several important questions in the shipping industry, including: what are the shipping cost structures?, what are the patterns of sea transport? and how do companies in the shipping industry operate? An invaluable source of information for researchers and advanced, or graduate, students, Shipping and Logistics Management is also a useful reference for shipping practitioners and consultants.

This updated edition of *The Secret State* revises Hennessy's picture of the Soviet threat that was presented to ministers from the last days of the Second World War to the 1960s. He maps the size and shape of the Cold War state built in response to that perceived threat, and traces the arguments successive generations of ministers, the military and civil servants have used to justify the British nuclear capability. He also adds new material exploring the threats presented by the IRA and radical Islamic terrorists post 9/11. In what circumstances would the Prime Minister authorize the use of nuclear force and how would his orders be carried out? What would the Queen be told and when? In this captivating new account, Peter Hennessy provides the best answers we have yet had to these questions.

Earth First! Direct Action Manual

Now available for the first time—more than 50 years after it was written—is the memoir of Michael Dillon/Lobzang Jivaka (1915–62), the British doctor and Buddhist monastic novice chiefly known to scholars of sex, gender, and sexuality for his pioneering transition from female to male between 1939 and 1949, and for his groundbreaking 1946 book *Self: A Study in Ethics and Endocrinology*. Here at last is Dillon/Jivaka's extraordinary life story told in his own words. *Out of the Ordinary* captures Dillon/Jivaka's various journeys—to Oxford, into medicine, across the world by ship—within the major narratives of his gender and religious journeys. Moving chronologically, Dillon/Jivaka begins with his childhood in Folkestone, England, where he was raised by his spinster aunts, and tells of his days at Oxford immersed in theology, classics, and rowing. He recounts his hormonal transition while working as an auto mechanic and fire watcher during World War II and his surgical transition under Sir Harold Gillies while Dillon himself attended medical school. He details his worldwide travel as a ship's surgeon in the British Merchant Navy with extensive commentary on his interactions with colonial and postcolonial subjects, followed by his "outing" by the British press while he was serving aboard *The City of Bath*. *Out of the Ordinary* is not only a salient record of an early sex transition but also a unique account of religious conversion in the mid-twentieth century. Dillon/Jivaka chronicles his gradual shift from Anglican Christianity to the esoteric spiritual systems of George Gurdjieff and Peter Ouspensky to Theravada and finally Mahayana Buddhism. He concludes his memoir with the contested circumstances of his Buddhist monastic ordination in India and Tibet. Ultimately, while Dillon/Jivaka died before becoming a monk, his novice ordination was significant: It made him the first white European man to be ordained in the Tibetan Buddhist tradition. *Out of the Ordinary* is a landmark publication that sets free a distinct voice from the history of the transgender movement.
