Communication Skills For Children'S Nurses

This guide will help children's nurses to communicate with confidence, sensitivity and effectiveness; to meet the individual needs of children and their families. The book explores different aspects of communicating in this challenging environment using vignettes, examples, practice insights and tips. The book emphasises the importance of listening to and respecting children's views and rights, in addition to respecting parent responsibility, rights and duty to act in the child's best interests. The authors show how a balance between protective exclusion and facilitated inclusion is core to communicating with children and families.

Communication Skills for Children's Nurses

Survive placements and practice with this essential guide for all student nurses. Providing words of wisdom and advice from real-life student nurses, Communication Skills for Nurses is a handy, portable, and fun introduction to the key communication and interpersonal skills you'll need on placement and as a registered nurse. Special features: Developed by students, for students Clear, straightforward, and jargon-free Explains how to use your interpersonal skills effectively, communicate with patients with specific conditions, and handle both criticisms and compliments Features tips and advice from real life nursing students Examples and questions based on real life nursing and healthcare situations

Communication Skills for Nurses

"This book is a real gem - useful not only for nurses, but for all healthcare professionals, students and educators wanting to develop their communication skills. One is reminded that it is not always about 'what' is said, but 'how' it is said. This book will be a great resource for those advocating interprofessional working, while keeping the patient's perspective in the reader's mind throughout." Dr Susanne Lindqvist, Senior Lecturer in Interprofessional Education, University of East Anglia, Norwich, UK. "This book is slim line and concise but covers a lot of vital points that all nurses and students of nursing should be aware of. It is well laid out with activities, case studies and vignettes to illustrate key issues... I thoroughly recommend this book to nursing students and those who work with people in any context." Jo Parham, third year adult nursing student at the University of the West of England. "From a Nursing Student perspective this book is excellent. It deals with every aspect of communication from the

fundamental skills, through the use of technology, challenging situations, communication in teams, to the legal and ethical aspects of communication." Conor Hamilton, Nursing student. Queens University, Belfast. An essential guide for all nurses!! With an emphasis on practical application, this lively and accessible guide will help nurses to hone and develop their communication skills. Full of examples from both a patient and a nurse perspective, the book covers: Barriers to communication Communication in teams The patient's perspective Making good use of email and phone Managing difficult conversations How good communication underpins the essence of care Examples of both good and poor practice, taken from the real-life experiences of the authors, are included to encourage reflection and integration of theory and practice. The book includes common scenarios, activity points and suggestions for practice, to give nurses the tools to continue to develop and apply effective communication skills. Communication Skills for Adult Nurses will support both student nurses learning their craft and also offer a suitable handy reference for qualified nurses undertaking continuing professional development, or acting as mentors. Contributors: Bernard Anderson, Jayne Crow, Graham Harris, Vivian Jellis, Mary Northrop, Paula Sobiechowska, Jill Toocaram

You will learn: Why communication is fundamental to nursing and health care How to communicate in assessing, planning, providing and managing care How to communicate in promoting health and in therapeutic interventions How to communicate in difficult situations How to communicate with a diverse range of people How communication is used to improve patient safety This book will help you to demonstrate your communication skills and develop your proficiency in nursing and health care. Essentials is a series of accessible, introductory textbooks for students in nursing, health and social care. New and forthcoming titles in the series: The Care Process Communication Skills Leadership Mental Health Promoting Health and Wellbeing Study Skills

Communication Skills

Written specifically for student nurses developing their communication and interpersonal skills in any field of nursing. The book addresses all the competencies for communication skills outlined in the 2018 NMC standards and features insightful contributions from experienced nurses and healthcare leaders across different clinical fields. As communication and interpersonal skills have become essential to modern nursing, this book will focus on demonstrating how the theory behind these skills can be successfully applied in practice. Helping students to become confident, assured communicators when interacting with patients, whilst on placement and into their post-registration nursing career. The new edition includes the following updates: · A new chapter on person-centred care and intercultural communication. · Further content on modern forms of communication such as social media and other new technologies. · A new theme 'Emotional intelligence' integrated throughout the book.

Communication Skills in Nursing Practice

Communication is an essential skill for nurses, midwives and allied health professionals when delivering care to patients and their families. With its unique and practical approach, this new textbook will support students throughout the three years of their degree programme and on into practice, focussing on how to develop person-centredness and compassionate and collaborative care. Key features include: * students' experiences and stories from service users and patients to help readers relate theory to practice * reflective exercises to help students think critically about their communication skills * learning objectives and chapter summaries for revision * interactive activities directly linked to the Values Exchange Community website

Communication in Nursing and Healthcare

Nursing students require a unique guide to communication and interpersonal skills to help them succeed on both placement and in academic work. This text presents the theory and practice of communication for all care settings, and professional needs during the pre-registration course.

Nursing: Communication Skills in Practice

"An extremely informative and useable book covering many aspects of communication ... highly recommended for students and practitioners in the mental health field, whether nurses or not." Mental Health Practice "Learning to communicate effectively is vital for all nurses ... This exciting new book, with an accessible and engaging style, provides nurses working in mental health, with a valuable and comprehensive introduction to successful communication." Martina Mc Guinness, Nurse Practice Development Co-ordinator, HSE Dublin, Ireland "The book is thought provoking and provides examples not only of what we should be doing but also examples of what we should not to be doing. It is a text that I would have loved to have had access to in my student days and early practice and would therefore strongly recommend this book to students and indeed beginner mental health practitioners of any discipline." Sinead Frain, Clinical Nurse Specialist - Home Care Ballyfermot/Lucan Mental Health Service "This accessible book takes you through the core communications skills required as a novice through to a more advanced level... The inclusion of clinical scenarios and practice exercises demonstrate clearly how to apply theoretical elements whilst working in a clinical situation ... It is a very good read and a valuable tool for anyone stepping out into the world of mental health nursing!" Antony Johnson, Mental Health Nursing Student, University of Salford, UK "The combination of knowledgeable discussion and richly illustrated case examples makes this an innovative text and an essential resource for those who are challenged with delivering mental health care. A must read for all students." Allison Tennant, Nurse Consultant and Psychotherapist, Rampton Hospital, UK "This useful book focuses on the skills that are absolutely central and essential to all mental health nursing, from basic communication skills to specific interventions and approaches." Dr Neil Brimblecombe, Director of Nursing/Chief Operating Officer, South Staffordshire & Shropshire Healthcare NHS Foundation Trust "This is a fantastic book, absolutely packed with just about everything a mental health nurse needs to know about communication skills ... The succinctly written chapters cover a wide range of key communications skills and each provides clear explanations, examples from 'everyday' life and clinical practice, with opportunities to reflect on your own experiences. Highly recommended." Alan Simpson, Professor of Collaborative Mental Health Nursing, City University London, UK This practical book provides a comprehensive guide to communication in mental health nursing, with an emphasis on demonstrating the use of different skills in various clinical settings. Written by experienced mental health professionals, the book is richly illustrated with a range of clinical case examples that will be recognisable to all nurses. Centred on the communication process as a whole, the topics are carefully presented through the use of patient-nurse dialogues and exchanges which bring the subject to life. This will help you to: Develop essential communication skills Communicate confidently Use phatic communication effectively Use self-reflection in your practice Develop the ability to deal with conflict Develop empathic helping relationships Draw upon various therapeutic models of communication Communication Skills for Mental Health Nurses is ideal for all nurses and healthcare professionals seeking to improve the skills required to communicate confidently and effectively with patients, their carers and other key people involved within the care environment.

Communication Skills

The new edition of this well regarded book introduces the underpinning theory and concepts required for the development of first class communication and interpersonal skills in nursing. By providing a simple to read overview of the central topics, students are able to quickly gain a solid, evidence-based grounding in the subject. Topics covered include: empathy; building therapeutic relationships; using a

variety of communication methods; compassion and dignity; communicating in different environments; and culture and diversity issues. Three new chapters have been added that point readers towards further ways of approaching their communication skills that are less model and technique driven and focusing more on therapeutic considerations, as well as looking at the politics of communication.

Communication and Interpersonal Skills in Nursing

Acclaimed for its strong theoretical framework and consistent organization, Arnold and Boggs' *Interpersonal Relationships: Professional Communication Skills for Nurses*, 6th Edition, remains the definitive resource in developing effective communication with clients, families, and colleagues in order to achieve treatment goals in health care. This two-time AJN Book of the Year award-winner is thoroughly updated and includes current references describing how to modify communications strategies for various populations and situations including children, the elderly, end of life, health teaching, stress, crisis, and colleagues. Two new chapters address issues in contemporary health care related to promoting health safety and supporting continuity of care. Not only does this book present proven communications strategies and principles in nursing, psychology, and related theoretical frameworks, but also it challenges you to apply these strategies and principles to numerous exercises and practical nursing case studies. Written in terms of the nurse-client relationship, the cutting-edge communications strategies presented are key for nursing students and professional nurses. Covers all mandated topics for nursing professionals, from beginning students to staff development in a variety of settings, including professional collaboration, health team communication, patient-centered care, safety, and hand-off communication. Discusses nursing, behavioral, developmental, family, and communication theories, providing an essential foundation and a theoretical perspective of effective communication. Offers basic concepts first, followed by applications with emphasis on assessment, providing a sound framework as you prepare for nurse-client interactions. Experiential exercises offer the opportunity to practice, observe and critically evaluate your professional communication skills in a safe learning environment. Critical Thinking Exercises promote critical thinking processes essential for effective communication in nursing practice. Includes case examples throughout, creating empathy for clients' perspectives and needs. Offers Ethical Dilemma and Developing an Evidence-Based Practice boxes in each chapter. Describes how best to use the electronic health record for clear communication with current information on classification systems, standards of documentation, and telehealth technologies used in nursing. Acknowledges humor, gender, and touch as important means of communication in interpersonal relationships. Increases awareness of the issues involved in communicating with individuals of various stages of life, clients with special needs, and colleagues in all areas of health care. Provides learning objectives, chapter overviews, and a detailed glossary -- all designed to focus your learning and help you organize key content.

Communication Skills For Mental Health Nurses

Over a third of all consultations in general practice are now conducted by nurses. The consultation is the key element of primary care, with patients being more satisfied with the care given by clinicians who have good communication skills. Poor communication or dissatisfaction with a consultation is reported to be one reason why patients decide not to attend or do not take a prescribed treatment. Patients need to be satisfied with the consultation, understand their condition and understand the reasons for their treatment or management plan. This book has been written to reinforce good consultation and communication skills and highlights areas where readers might wish to review and improve their own consultation techniques. This is done through case studies and scenarios that are likely to be common in many practices. Although the text and scenarios relate to practice nurse consultations, the content can be transferred to all primary care nursing settings.

Compassion and caring are at the very heart of nursing – possibly that's why you were attracted to the nursing profession in the first place. But what does compassionate caring really mean in nursing practice? Compassion, Caring and Communication: Skills for Nursing Practice is a practical book that guides you through the complex dimensions of caring. It considers the ways in which you connect with patients, families and co-workers, and the long-lasting impact of emotions and feelings. Using real-life narratives, case studies and reflection activities, the authors demonstrate how you can develop and maintain the empathy and communication skills you need to create effective, compassionate and caring partnerships. New to the second edition: Comprehensively updated throughout to reflect and highlight current professional pressures and public concerns around nursing practice. Includes a broader range of relevant case studies, discussions and scenarios to engage students and qualified nurses at all levels. Contains new content about the impacts of recent government reports and policies on nursing care, developing an awareness of contemporary issues and debates. The BOND caring framework has been revised and updated alongside new 'caring indicators', to support the development of compassionate caring skills. All references have been updated using the latest sources and evidence-based studies.

Communication for Nurses: Talking with Patients

A significant body of knowledge is the basis for a holistic, caring and scientific evidence-based nursing education in practice for professional development. Quality teaching leads to good learning and both aspects are two of the main issues of quality assurance in nursing education today. To begin with, not all nursing students have the same levels of motivation or learning abilities. It is with cognisance of providing quality care for patients that the role of the nurse educator has to be to enhance nursing students' learning using scientific evidence based teaching. Research around teaching and learning processes is an important part of the delivery of quality education, which in turn impacts on students' learning results and experiences, thereby, ensuring holistic biopsychosocial care to patients. The main aim of teaching and learning in nursing, at all levels, is to enhance the nurses' contribution to assist the individuals, families and communities in promoting and preserving health, well-being and to efficiently respond to illnesses. We hope that this book can be used as a resource to increase the body of knowledge in teaching and learning in nursing, thereby enhancing the role and contribution of health care professionals to clinical practice.

A Guide for International Nursing Students in Australia and New Zealand

"This book is easy to read and has relevant content for student midwives, with inclusion of reflective activities which are clear and appropriate. I particularly like the vignette's which are relevant and explore the challenges that midwives face. The script-like format of these adds a further layer to the narratives, and the inclusion of non-verbal communication as well is excellent. This will be an essential text for all student midwives." Mary Beadle, Midwifery Lecturer, Faculty of Health and Social Care, University of Hull, UK "Communication Skills for Midwives is a unique book that focuses not only on fundamental communication issues, but goes much further by including the many difficult and tricky issues experienced within contemporary midwifery practice. This much needed text provides detailed and comprehensive information which is reinforced by illustrations, vignettes and activities that engage the reader from the beginning. This is an excellent resource for students, practitioners and educators." Nicky Clark, Lead Midwife for Education, University of Hull, UK "This book covers many poignant examples of difficult and challenging communication that midwives face in everyday practice ... It covers both every day aspects of care such as facilitating choice and less common experiences like responding to domestic violence ... This book is unique and would be good bedtime reading for any midwife!" Tandy Deane-Grey, Senior Midwifery Lecturer, University of Hertfordshire, UK "This comprehensive and reader friendly text ... utilises a variety of strategies to aid understanding and application to practice. Each chapter has clear aims to address a challenging situation that readers will readily identify with and provides an excellent mix of vignettes, reflective activities, text and diagrams to support the development of knowledge and skills..." Heather Passmore, Senior Lecturer, UCS, UK This

is the first book on communication skills to explore the more challenging contexts and circumstances that midwives encounter in practice. As these occur infrequently and often unexpectedly in the daily practice of many midwives, they may find it difficult to communicate effectively to alleviate the situation. Knowing what to say and how to say it is part of this dilemma. The book uses case vignettes, reflective questions, illustrations, tools and techniques to provide the evidence base needed to cope effectively in a range of situations by offering support to enhance your communication skills. Communication Skills for Midwives explores challenges relating to: Negotiating with others within inter-professional and inter-agency teams Working with minority groups Breaking significant news when labour threatens the life of a baby Telling parents that their baby has an abnormality Coping with loss and bereavement Addressing issues of domestic abuse Importantly the book provides information on how thoughts and feelings may be expressed both through body language and in words. Taking a practical and problem solving approach, the book will help you to enhance your learning and improve interaction with your colleagues, the women you care for and their families.
