2016 Assessment of the Civilian Acquisition Workforce Personnel Demonstration Project

"In August 2015, René Thomas-Rizzo, director, Human Capital Initiatives, Office of the Under Secretary of Defense for Acquisition, Technology, and Logistics, asked the RAND Corporation to undertake a study to accomplish the fiscal year (FY) 2016 assessment of the Civilian Acquisition Workforce Personnel Demonstration Project (AcqDemo) mandated in the National Defense Authorization Act (NDAA) of FY 2011. AcqDemo aims to provide a system that retains, recognizes, and rewards employees for their contributions and supports their personal and professional development. The assessment used multiple data sources to evaluate how well AcqDemo has performed with respect to these goals. The assessment directly addresses the original 12 criteria enumerated in the NDAA, as well as five

new criteria specified by the AcqDemo Program Office. These criteria call for a look at the following: AcqDemo's key features pertaining to hiring, appointments, and performance appraisal; the adequacy of its guidance, protections for diversity, efforts to ensure fairness and transparency, and means used to involve employees in improving AcqDemo; AcqDemo's impact on career outcomes, such as compensation, promotion, and retention, particularly with respect to similar outcomes for the General Schedule workforce; AcqDemo's ability to support the acquisition mission. The RAND team found that some aspects of AcqDemo are performing well, while others leave room for improvement"--Publisher's web site.

An Assessment of the Civilian Acquisition Workforce Personnel Demonstration Project

The vast majority of U.S. Department of Defense (DoD) and federal civilian employees work on the General Schedule (GS) personnel system. However, some concerns have been raised about the GS system, including perceptions that poorly performing employees are tolerated for extended periods of time and that monetary rewards are not directly linked to performance. In response to concerns of this nature, Congress has authorized some demonstration projects, in which additional flexibilities are provided, intending to produce better outcomes than if the employees were in the GS system. One such demonstration project, the DoD Civilian Acquisition Workforce Personnel Demonstration Project (AcqDemo), is the subject of this report. Implemented on February 7, 1999, AcqDemo is an effort to reengineer the civilian personnel system to meet the needs of the acquisition workforce and to facilitate the fulfillment of the DoD acquisition mission. Congress required an independent assessment of the program against 12 criteria by September 30, 2012. This report is that legislatively mandated assessment.

2016 Assessment of the Civilian Acquisition Workforce Personnel Demonstration Project

"In August 2015, René Thomas-Rizzo, director, Human Capital Initiatives, Office of the Under Secretary of Defense for Acquisition, Technology, and Logistics, asked the RAND Corporation to undertake a study to accomplish the fiscal year (FY) 2016 assessment of the Civilian Acquisition Workforce Personnel Demonstration Project (AcqDemo) mandated in the National Defense Authorization Act (NDAA) of FY 2011. AcqDemo aims to provide a system that retains, recognizes, and rewards employees for their contributions and supports their personal and professional development. The assessment used multiple data sources to evaluate how well AcqDemo has performed with respect to these goals. The assessment directly addresses the original 12 criteria enumerated in the NDAA, as well as five new criteria specified by the AcqDemo Program Office. These criteria call for a look at the following: AcqDemo's key features pertaining to hiring, appointments, and performance appraisal; the adequacy of its guidance, protections for diversity, efforts to ensure fairness and transparency, and means used to involve employees in improving AcqDemo; AcqDemo's impact on career outcomes, such as compensation, promotion, and retention, particularly with respect to similar outcomes for the General Schedule workforce; and AcqDemo's ability to support the acquisition mission. This executive summary presents the key findings of this research. A more detailed account of the research methods and findings can be found in 2016 Assessment of the Civilian Acquisition Workforce Personnel Demonstration Project, by Jennifer Lamping Lewis, Laura Werber, Cameron Wright, Irina Danescu, Jessica Hwang, and Lindsay Daugherty, RR-1783-OSD, 2017."--Publisher's description.

Acquisition Workforce

International Academic Conferences in Prague, August 10 - 13, 2018

Mom, apple pie, and working for America : accountability and rewards for the federal workforce

Rapid developments are taking place within society and organizations. They demand a flexible, responsive, and competent workforce. Demographic shifts and the increasing shortfall of young workers have resulted in increasing demand for the intergenerational workplace. Retaining multicultural workers is practiced in some countries to make use of their rich expertise. Experienced older workers are no longer seen as a burden to the economy. On the contrary, practices such as senior entrepreneurship are also popular. Similarly, while technological development and differences among employees are discussed in leadership issues, diversity is also included. Leadership Perspectives on Effective Intergenerational Communication and Management examines the differences between monocultural workers and intergenerational workers in Western and Eastern companies. It investigates the technological developments such as Industry 4.0 at the societal or industry levels. Covering topics such as intergenerational

diversity, organizational interactions, and employee satisfaction, this premier reference source is an excellent resource for business leaders and executives, human resource managers, sociologists, students and educators of higher education, librarians, researchers, and academicians.

Mom, apple pie, and working for America

Human resource management is experiencing profound change, new challenges, exciting accomplishments, and much uncertainty. The public service has moved away from the old days of "personnel management" concerned mostly with processing "personal action" paperwork, to a system where public employees are managed as human capital to get the work of the government done more effectively and efficiently. This volume brings together the latest thinking on human resource management in the public service, presented by distinguished thought leaders in the field. While it focuses primarily on federal government policies and practices, the principles, conclusions, and recommendations translate readily to state and local government, and to the private sector as well.

Proceedings of AC 2018 in Prague

Some vols. include supplemental journals of "such proceedings of the sessions, as, during the time they were depending, were ordered to be kept secret, and respecting which the injunction of secrecy was afterwards taken off by the order of the House".

Leadership Perspectives on Effective Intergenerational Communication and Management

Professional publication of the RD & A community.

Innovations in Human Resource Management

While workforce issues in general - human capital strategic planning efforts in particular-are important throughout the DoD, the AT & L workforce has received special attention. The strategic human capital plan for the AW, which is currently in its third revision (see DoD, Acquisition, Technology, and Logistics, 2007), emphasizes several critical workforce issues: the eventual loss of retirement-eligible personnel and their knowledge, understanding the differences in the workforce generations (aging baby-boomers compared with Generations X and Y, for example), and coping with the increasing demand for workers educated in science and engineering. In 2006, the Office of the Under Secretary of Defense for Acquisition, Technology and Logistics, Director of Human Capital Initiatives (OUSD(AT & L)/HCI)), asked RAND to analyze DoD AW data. RAND's findings for OUSD(AT & L/HCI) are presented in Gates et al. (2008). While that inquiry was under way, the United States Navy asked RAND to undertake a complementary analysis focusing on the DoN's civilian AW. The DoN asked RAND to provide a descriptive overview of the DoN civilian AW and conduct preliminary analyses of data related to specific workforce management issues of retention, professional development, and leadership. This report summarizes what we learned about DoN's civilian AW and these workforce management issues.

Critical Mission

This thesis looks at the recruitment and retention challenge facing the DoD's civilian acquisition workforce in light of the demographic gap caused by years of downsizing. It provides a qualitative assessment of the adequacy of existing recruitment and retention tools in light of the generational differences between current policy makers (Baby Boomers) and needed younger employees (Generation-X). Key generational characteristics are compared and assessed in relation to workforce recruitment and retention tools. The research indicates that although a generation gap exists it is not so large that bridges cannot be built. Personnel tools can be modified or created to enable culture change so that Generation-X values are embraced in the workplace. Of the existing tools, flextime; lateral movement and education opportunities; and the demo project appear most promising since they offer individual flexibility and empowerment. Among other things, this thesis recommends to increase internships; advertise career broadening and lateral movement opportunities; and centralize all job opportunities to a single site open to all interested applicants. These adjustments will help the DoD address its recruitment and retention goals.

Congressional Record

Provides a descriptive overview of the Department of the Navy's civilian acquisition workforce over the past decade and presents the results of preliminary analyses of data related to specific workforce management issues: retention, professional development, and leadership.

Journal of the House of Representatives of the United States

The defense acquisition workforce includes more than 126,000 military and civilian personnel responsible for providing a wide range of acquisition, technology, and logistics support to the nation's warfighters. This report summarizes workforce analyses that RAND has undertaken in support of the Defense Acquisition University, which is responsible for strategic human capital management of that workforce. It covers the civilian acquisition workforce, the careers of acquisition workforce senior executive service members, and the relationship between the military and civilian acquisition workforce. It also describes a workforce inventory projection model that uses data on the civilian acquisition workforce as a key input. The authors conclude that better definition and tracking of the acquisition workforce would improve workforce planning and that workforce analysis is only one step in an overall strategic human capital planning effort.

Implementing Management for Performance and Related Reforms to Obtain Value in Every Acquisition Act of 2010, April 23, 2010, 111-2 House Report 111-465, Part 1

"When this Administration took office, the President charged us with a mission - to challenge the status quo, and prepare the Department of Defense to meet the new threats our nation will face as the 21st century unfolds." - U.S. Secretary of Defense, Donald H. Rumsfeld The Department of Defense's transformative mission is planned against the backdrop of a global war on terrorism. As a result, THE ANNUAL DEFENSE REPORT represents the latest defense strategy with an innovative approach to balancing risks and rewards of a retooled national security policy. This report encompasses information on Operational, Institutional and Force Management Risk and its Future Challenges. Also incorporated are reports from the Secretaries of the Army, Navy & Air Force. Appendices include detailed budget tables, resources allocated to mission and support activities, and a summary of the Goldwater-Nichols Act Implementation Report.

Site Dance

In recent years, site-specific dance has grown in popularity. In the wake of groundbreaking work by choreographers who left traditional performance spaces for other venues, more and more performances are cropping up on skyscrapers, in alleyways, on trains, on the decks of aircraft carriers, and in a myriad of other unexpected locations worldwide. In *Site Dance*, the first anthology to examine site-specific dance, editors Melanie Kloetzel and Carolyn Pavlik explore the work that choreographers create for nontraditional performance spaces and the thinking behind their creative choices. Combining interviews with and essays by some of the most prominent and influential practitioners of site dance, they look at the challenges and rewards of embracing alternative spaces. The close examinations of the work of artists like Meredith Monk, Joanna Haigood, Stephan Koplowitz, Heidi Duckler, Ann Carlson, and Eiko Otake provide important insights into why choreographers leave the theatre to embrace the challenges of unconventional venues. *Site Dance* also includes more than 80 photographs of site-specific performances, revealing how the arts, and movement in particular, can become part of and speak to our everyday lives. Celebrating the often unexpected beauty and juxtapositions created by site dance, the book is essential reading for anyone curious about the way that these choreographers are changing our experience of the world one step at a time.

Moving Sites

Moving Sites explores site-specific dance practice through a combination of analytical essays and practitioner accounts of their working processes. In offering this joint effort of theory and practice, it aims to provide dance academics, students and practitioners with a series of discussions that shed light both on approaches to making this type of dance practice, and evaluating and reflecting on it. The edited volume combines critical thinking from a range of perspectives including commentary and observation from the fields of dance studies, human geography and spatial theory in order to present interdisciplinary discourse and a range of critical and practice-led lenses through which this type of work can be considered and explored. In so doing, this book addresses the following questions: ·

How do choreographers make site-specific dance performance? · What occurs when a moving body engages with site, place and environment? · How might we interpret, analyse and evaluate this type of dance practice through a range of theoretical lenses? · How can this type of practice inform wider discussions of embodiment, site, space, place and environment? This innovative and exciting book seeks to move beyond description and discussion of site-specific dance as a spectacle or novelty and considers site-dance as a valid and vital form of contemporary dance practice that explores, reflects, disrupts, contests and develops understandings and practices of inhabiting and engaging with a range of sites and environments. Dr Victoria Hunter is Senior Lecturer in Dance at the University of Chichester.

Dance and Organization

Dance and Organisation is the first comprehensive work to integrate dance theory and methods into the study of management, which have developed an interest in the arts and the humanities. Dance represents dynamics and change and puts the moving body at the centre, which has been ignored and oppressed by traditional management theory. 'Being' a leader however also means to 'move' like one, and critical lessons can be learned from ballerinas and modern dancers. Leadership is a dialogue, as in the work of musicians, conductors and DJs who manage groups without words. Movement in organisational space, in a museum or a techno club can be understood as a choreography and site-specific performance. Movement also is practically used for leadership and employee development workshops and can be deployed as an organisational research method. By taking a firm interdisciplinary stance in dance studies and organisational research to explore management topics, reflecting on practitioner accounts and research projects, the book seeks to make an innovative contribution to our understanding of the moving body, generating new insights on teamwork, leadership, gender in management, organisational space, training and research methods. It comprises an important contribution to the organizational behaviour and critical management studies disciplines, and looks to push the boundaries of the academic literature.

Perspectives on American Dance

Dancing embodies cultural history and beliefs, and each dance carries with it features of the place where it originated. Influenced by different social, political, and environmental circumstances, dances change and adapt. American dance evolved in large part through combinations of multiple styles and forms that arrived with each new group of immigrants. Perspectives on American Dance is the first anthology in over twenty-five years to focus exclusively on American dance practices across a wide span of American culture. This volume and its companion show how social experience, courtship, sexualities, and other aspects of life in America are translated through dancing into spatial patterns, gestures, and partner relationships. This volume of Perspectives on American Dance features essays by a young generation of authors who write with familiarity about their own era, exploring new parameters of identity and evaluating a wide variety of movement practices being performed in spaces beyond traditional proscenium stages. Topics include "dorky dancing" on YouTube; same-sex competitors on the TV show So You Think You Can Dance; racial politics in NFL touchdown dances; the commercialization of flash mobs; the connections between striptease and corporate branding; how 9/11 affected dance; the criminalization of New York City club dancing; and the joyous ironies of hipster dance. This volume emphasizes how dancing is becoming more social and interactive as technology opens up new ways to create and distribute dance. The accessible essays use a combination of movement analysis, thematic interpretation, and historical context to convey the vitality and variety of American dance. They offer new insights on American dance practices while simultaneously illustrating how dancing functions as an essential template for American culture and identity. Summers | Latika L. Young | Tricia Henry Young

Tandem Dances

"In October 2017, four internationally influential practitioners of immersive experiences gathered at the Snug Harbor Cultural Center on Staten Island in New York for a panel discussion on the creation of immersive productions. The panel, entitled "All the World is a Stage," was part of the Future of Storytelling Festival 2017 (FoST FEST), advertised as "the world's leading immersive storytelling event." During this discussion, each of the four panelists described examples of their work. Hector Harkness, Associate Director of Punchdrunk International, explained how the company created productions that "rip up the rules for the audience" so they can "go beyond the boundaries of closed

environments." Food technologist, experience designer, and multimedia artist Emilie Baltz described inviting audiences to step up to a microphone and use their tongues, teeth, and lips to play musical popsicles in an installation called PopStars. Jon Sands, founder of Poets in Unexpected Places, revealed how his strategic placement of poets on subway cars across New York City turned commutes into impromptu poetry slams for unsuspecting riders, some of whom joined in by improvising their own poetic works. Justin "JB" Bolognino, CEO (Chief Experience Officer) of META, an experience production company, described his commissioning of Jon Morris, artistic director of the Brooklyn-based Windmill Factory, to design a music-festival queue into an experiential artwork. Entitled Right Passage, the work was a "room-scale sound and light performance installation" involving moving walls that guided festival participants efficiently into the concert venue (Windmill Factory 2017). Through their detailed descriptions of how their productions organized the bodies of performers and spectators in space and time, the panelists hinted at the presence of choreography in their productions"--

On Site

"On Site: Methods for Site-Specific Performance Creation is written for artists and students at all levels who wish to explore the artistic and production processes of making sited works. The book covers specific, practical strategies for an array of issues to consider before, during, and after embarking upon a project: site selection, procuring permits, designing the audience experience, researching and exploring a site for inspiration and content, differences in urban and natural environments, definitions of key production roles, building effective collaborations with different artists, and techniques to generate site-inspired production elements such as sound/music, costumes, lighting, and media. The book also includes helpful chapters on project budgeting, contract negotiation, fundraising, marketing, documentation, and assessment, useful to everyone involved in productions. On Site is a guide designed to make site-work practical, intentional, and attainable. Based on the author's career spanning over 30 years of site creation, the book also includes the voices of over 24 other artists, producers, and writers who share their perspectives and experience on the many topics covered. On Site is a clearly written resource that will become a well-worn reference for anyone interested in the creative process and discovering the power of site-specific works"--

Consuming Dance

Whether advertising clothes or technology, dance is staple of advertising today. 'Consuming Dance' offers a clear history and analysis of dance in advertising and demonstrates the ways in which the form articulates with, informs, and reflects U.S. culture.

Perspectives on Dance Fusion in the Caribbean and Dance Sustainability

This volume examines the theme of fusion in Caribbean dance from a wide range of perspectives, including its socio-cultural-historical formation. The contributions are drawn from a conference entitled "Caribbean Fusion Dance Works: Rituals of Modern Society", which focused primarily on the Caribbean as a unique locale. However, chapters on dance fusions in other diasporic locations and the sustainability of dance as an art form are also included here in order to offer a sense of an inevitable and, in some instances, desirable evolution due to the globalizing forces that continue to influence dance.

Dance Research Methodologies

Dance Research Methodologies: Ethics, Orientations, and Practices captures the breadth of methodological approaches to research in dance in the fine arts, the humanities, the social sciences, and the natural sciences by bringing together researchers from around the world writing about a variety of dance forms and practices. This book makes explicit the implicit skills and experiences at work in the research processes by detailing the ethics, orientations, and practices fundamental to being a researcher across the disciplines of dance. Collating together approaches from key subdisciplines, this book brings together perspectives on dance practice, dance studies, dance education, dance science, as well as dance research in cross-, multi-, and interdisciplinary fields. Practice-based chapters cover methodological approaches that provide rich examples of how research design and implementation are navigated by practicing scholars. Dance Research Methodologies also includes a practical workbook that helps readers to decide upon, refine, and enact their research, as well as develop ways in which to communicate their process and outcomes. This vital textbook is a valuable resource for research faculty interested in interdisciplinary conversation and practice, emerging scholars honing their methodological

approaches, graduate students engaged in research-based coursework and projects, and advanced undergraduates.

The Oxford Handbook of Jewishness and Dance

Responding to recent evolutions in the fields of dance and religious and secular studies, *The Oxford Handbook of Jewishness and Dance* documents and celebrates the significant impact of Jewish identity on a variety of communities and the dance world writ large. Focusing on North America, Europe, and Israel in the twentieth and twenty-first centuries, this Handbook highlights the sometimes surprising, often hidden and overlooked Jewish resonances within a range of styles from modern and postmodern dance to folk dance and flamenco. Privileging the historically marginalized voices of scholars, performers, and instructors the Handbook considers the powerful role of dance in addressing difference, such as between American and Israeli Jewish communities. In the process, contributors advocate values of social justice, like Tikkun Olam (repair of the world), debate, and humor, exploring the fascinating and potentially uncomfortable contradictions and ambiguities that characterize this robust area of research.

Off Sites

Honorable Mention, ATHE's 2018 Outstanding Book Award Contextualizing the techniques and methods of the incredibly rich and vital genre of site-specific performance, author Bertie Ferdman traces the evolution of that term. Originally used for experimental staging practices and then later also for engaged situational events, site-specific is no longer sufficient for the genre's many contemporary variations. Using the term off-site, Ferdman illustrates five distinct ways artists have challenged the disciplinary framework of site-specific theatre: blurring the traditional boundaries between the fictional and the real; changing how the audience and actor interact with each other and whether they are physically together or apart; fabricating sites from physically bound, conceptually constructed, or virtual spaces; staging live situations in real/nonreal and often mediated encounters; and challenging our preconceived notions of time and space. Tracing the genealogy of site-based work through the twentieth and twenty-first centuries, Ferdman outlines the theoretical groundwork for her study in the introduction. Individual chapters focus on distinct types of off-sites—the interdisciplinary discourse of disciplinary sites; the spaces of audience engagement with spectator sites; the dislocation of time for temporal sites; and the historiographical spaces of mapping for urban sites. Ferdman examines site-based work being done in the Americas by contemporary companies and artists experimenting with new forms and practices for site-driven theatre. Key productions discussed include *Private Moment* by David Levine, *Geyser Land* by Mary Ellen Strom and Ann Carlson, Jim Findlay's *Dream of the Red Chamber*, and Lola Arias' *Mi Vida Después*.

The Oxford Handbook of Screendance Studies

The Oxford Handbook of Screendance Studies offers a full overview of the histories, practices, and critical and theoretical foundations of the rapidly changing landscape of screendance. Drawing on their practices, technologies, theories, and philosophies, scholars from the fields of dance, performance, visual art, cinema and media arts articulate the practice of screendance as an interdisciplinary, hybrid form that has yet to be correctly sited as an academic field worthy of critical investigation. Each chapter discusses and reframes current issues, as a means of promoting and enriching dialogue within the wider community of dance and the moving image. Topics addressed embrace politics of the body; agency, race, and gender in screendance; the relationship of choreography to image; constructs of space and time; representation and effacement; production and curatorial practice; and other areas of intersecting disciplines. *The Oxford Handbook of Screendance Studies* features newly-commissioned and original scholarship that will be essential reading for all those interested in the intersection of dance and the moving image, including film and video-makers, dance artists, screendance artists, academics and writers, producers, composers, as well as the wider interested public. It will become an invaluable resource for researchers and professionals in the field.

Pragmatist Philosophy and Dance

This book investigates how Pragmatist philosophy as a philosophical method contributes to the understanding and practice of interdisciplinary dance research. It uses the author's own practice-based research project, *Later Rain*, to illustrate this. *Later Rain* is a post-dramatic dance theater work that engages primarily with issues in the philosophy of religion and socio-political philosophy. It focuses on

ecstatic states that arise in Appalachian charismatic Pentecostal church services, states characterized by dancing, paroxysms, shouting, and speaking in tongues (glossolalia). Research for this work is interdisciplinary as it draws on studio practice, ethnographic field work, cultural history, Pentecostal history and theology, folk aesthetics, anthropological understandings of ecstatic religious rituals, and dance history regarding acclaimed works that have sought to present aspects of religious ecstasy on stage; Doris Humphrey's *The Shakers* (1931), Mark Godden's *Angels in the Architecture* (2012), Martha Clarke's *Angel Reapers* (2015) and Ralph Lemon's *Geography* trilogy (2005). The project thereby demonstrates a process model of dance philosophy, showing how philosophy and dance artistry intertwine in a specific creative process.

Walking's New Movement

A book about developments in walking and walk-performance for enthusiasts, practitioners, students and academics.

Dance's Duet with the Camera

Dance's Duet with the Camera: Motion Pictures is a collection of essays written by various authors on the relationship between live dance and film. Chapters cover a range of topics that explore dance film, contemporary dance with film on stage, dance as an ideal medium to be captured by 3D images and videodance as kin to site-specific choreography. This book explores the ways in which early practitioners such as Loïe Fuller and Maya Deren began a conversation between media that has continued to evolve and yet still retains certain unanswered questions. Methodology for this conversation includes dance historical approaches as well as mechanical considerations. The camera is a partner, a disembodied portion of self that looks in order to reflect on, to mirror, or to presage movement. This conversation includes issues of sexuality, race, and mixed ability. Bodies and lenses share equal billing.

Dance, Space and Subjectivity

This book contains readings of American, British and European postmodern dances informed by feminist, postcolonialist, queer and poststructuralist theories. It explores the roles dance and space play in constructing subjectivity. By focusing on site-specific dance, the mutual construction of bodies and spaces, body-space interfaces and 'in-between spaces', the dances and dance films are read 'against the grain' to reveal their potential for troubling conventional notions of subjectivity associated with a white, Western, heterosexual able-bodied, male norm.

Dance Appreciation

"Undergrad text for general-education courses helps students fulfill fine arts credits. This text will help students form a connection to and appreciation for dance as both an art form and a lifetime physical activity, no matter their primary course of study or eventual career path"--

Contemporary Choreography

Fully revised and updated, this second edition of *Contemporary Choreography* presents a range of articles covering choreographic enquiry, investigation into the creative process, and innovative challenges to traditional understandings of dance making. Contributions from a global range of practitioners and researchers address a spectrum of concerns in the field, organized into seven broad domains: Conceptual and philosophical concerns Processes of making Dance dramaturgy: structures, relationships, contexts Choreographic environments Cultural and intercultural contexts Challenging aesthetics Choreographic relationships with technology. Including 23 new chapters and 10 updated ones, *Contemporary Choreography* captures the essence and progress of choreography in the twenty-first century, supporting and encouraging rigorous thinking and research for future generations of dance practitioners and scholars.

Making Site-Specific Theatre and Performance

This practical, accessible and far-reaching guide to making site-specific theatre and performance emphasises the diversity of approaches to the practice, and explores key principles of space and site. Phil Smith draws on a wide range of interdisciplinary and international performance examples, and

uses an innovative variety of exercises, to show students and aspiring performance-makers how to find a site and generate a performance beyond the theatre building.

The Routledge Handbook to the Culture and Media of the Americas

Exploring the culture and media of the Americas, this handbook places particular emphasis on collective and intertwined experiences and focuses on the transnational or hemispheric dimensions of cultural flows and geocultural imaginaries that shape the literature, arts, media and other cultural expressions in the Americas. The Routledge Handbook to the Culture and Media of the Americas charts the pervasive, asymmetrical flows of cultural products and capital and their importance in the development of the Americas. The volume offers a comprehensive understanding of how inter-American communication is constituted, framed and structured, and covers the artistic and political dimensions that have shaped literature, art and popular culture in the region. Forty-six chapters cover a range of inter-American key concepts and dynamics, divided into two parts: Literature and Music deals with inter-American entanglements of artistic expressions in the Western Hemisphere, including music, dance, literary genres and developments. Media and Visual Cultures explores the inter-American dimension of media production in the hemisphere, including cinema and television, photography and art, journalism, radio, digital culture and issues such as freedom of expression and intellectual property. This multidisciplinary approach will be of interest to a broad array of academic scholars and students in history, sociology, political science; and cultural, postcolonial, gender, literary, globalization and media studies.

Contemporary Publics

If the twentieth century has been dominated by discussions of the public, public life, and the public sphere, Contemporary Publics argues that, in the twenty-first century, we must complicate the singularity of that paradigm and start thinking of our world in terms of multiple, overlapping, and competing publics. In three distinct streams—art, media and technology, and the intimate life—this volume offers up the intellectual and political significance of thinking through the plurality of our publics. “Countering Neoliberal Publics: Screen and Space,” explores how different artistic practices articulate the challenges and desires of multiple publics. “Making and Shaping Publics: Discourse and Technology” showcases how media shape publics, and how new and emerging publics use these technologies to construct identities. “Commodifying Public Intimacies” examines what happens to the notion of the private when intimacies structure publics, move into public spaces, and develop value that can be exchanged and circulated.

The Metamorphosis of Cultural and Creative Organizations

Organizations in the creative and cultural sector are experiencing transformational change. This book offers a new way of exploring the transformational processes that these organizations are going through, by focusing on their organizational space. By bringing together theoretical and empirical contributions from international scholars belonging to different fields of research, such as management, entrepreneurship, sociology, philosophy and anthropology, this volume seeks to provide readers with a multifaceted, comprehensive understanding of the changes that creative and cultural organizations are facing. By exploring them from an original perspective – the spatial one – this volume provides the foundations for developing a coherent research debate on the spatial dimension of creative and cultural organizations, leading to a new research agenda. This book contributes to our understanding of the ‘space’ of the creative and cultural industries and will be a useful reading for scholars involved in arts and cultural management in particular, as well as the social and human sciences more broadly. This book will inspire and inform researchers and managers who look with curiosity at the changes taking place in the creative and cultural sectors.

Performance Studies in Canada

Since its inception as an institutionalized discipline in the United States during the 1980s, performance studies has focused on the interdisciplinary analysis of a broad spectrum of cultural behaviours including theatre, dance, folklore, popular entertainments, performance art, protests, cultural rituals, and the performance of self in everyday life. Performance Studies in Canada brings together a diverse group of scholars to explore the national emergence of performance studies as a field in Canada. To date, no systematic attempts have been made to consider how this methodology is being taught, applied, and rethought in Canadian contexts, and Canadian performance studies scholarship remains largely unacknowledged within international discussions about the discipline. This collection fills this gap by

identifying multiple origins of performance studies scholarship in the country and highlighting significant works of performance theory and history that are rooted in Canadian culture. Essays illustrate how specific institutional conditions and cultural investments – Indigenous, francophone, multicultural, and more – produce alternative articulations of “performance” and reveal national identity as a performative construct. A state-of-the-art work on the state of the field, *Performance Studies in Canada* foregrounds national and global performance knowledge to invigorate the discipline around the world.

Immersive Theatres

This comprehensive text is the first survey to explore the theory, history and practice of immersive theatre. Charting the rise of the immersive theatre phenomenon, Josephine Machon shares her wealth of expertise in the field of contemporary performance, inviting the reader to immerse themselves within this abundantly illustrated text. The first section of the book introduces concepts of immersion, situating them within a historical context and establishing a clear critical vocabulary for discussion. The second section then presents contributions from a wealth of immersive artists. Assuming no prior knowledge with its critical commentary, this is a rich resource for lecturers and students at all levels and internationally, including undergraduates and post-graduates, as well as practitioners and researchers of contemporary performance. This would also be an ideal text for general enthusiasts and readers with an interest in immersive theatre.

Flowers Cracking Concrete

Flowers Cracking Concrete is the first in-depth study of the forty-year career of Eiko & Koma—two artists from Japan who have lived and worked in New York City since the mid-1970s, establishing themselves as innovative and influential modern and postmodern dancers. They continue to choreograph, perform, and give workshops across the United States and around the world. Rosemary Candelario argues that what is remarkable about Eiko & Koma’s dances is not what they signify but rather what they do in the world. Each chapter of the book is a close reading of a specific dance that reveals a choreographic theme or concern. Drawing on interviews, live performance, videos, and reviews, Candelario demonstrates how ideas have kinesthetically and choreographically cycled through Eiko & Koma’s body of work, creating dances deeply engaged with the wider world through an active process of mourning, transforming, and connecting.

Urban Sensographies

Urban Sensographies views the human body as a highly nuanced sensor to explore how various performance-based methods can be implemented to gather usable ‘felt data’ about the environment of the city as the basis for creating embodied mappings. The contributors to this fascinating volume seek to draw conclusions about the constitution, character and morphology of urban space as public, habitable and sustainable by monitoring the reactions of the human body as a form of urban sensor. This co-authored book is centrally concerned, as a symptom of the degree to which cities are evolving in the 21st century, to examine the effects of this change on the practices and behaviours of urban dwellers. This takes into account such factors as: defensible, retail and consumer space; legacies of modernist design in the built environment; the effects of surveillance technologies, motorised traffic and smart phone use; the integration of ‘wild’ as well as ‘domesticated’ nature in urban planning and living; and the effects of urban pollution on the earth’s climate. Drawing on three years of funded practical research carried out by a multi-medial team of researchers and artists, this book analyses the presence and movement of the human body in urban space, which is essential reading for academics and practitioners in the fields of dance, film, visual art, sound technology, digital media and performance studies.

DAH Theatre

DAH Theatre: A Sourcebook is both a contemporary history of the role this performance group has played throughout the dissolution of Yugoslavia up to the present and an inside look into the nuts and bolts of Eugenio Barba’s notion of “Anthropological Theatre,” told in surprisingly practical terms. It should be of interest to a wide range of academics, from cultural anthropologists to historians who specialize in eastern Europe, as well as to teachers in the field of performance studies.

Screendance

The practice of dance and the technologies of representation has excited artists since the advent of film. This book weaves together theory from art and dance as well as appropriate historical reference material to propose a new theory of screendance, one that frames it within the discourse of post-modern art practice.

The Music of Tragedy

The Music of Tragedy offers a new approach to the study of classical Greek theater by examining the use of musical language, imagery, and performance in the late work of Euripides. Naomi Weiss demonstrates that Euripides' allusions to music-making are not just metatheatrical flourishes or gestures towards musical and religious practices external to the drama but closely interwoven with the dramatic plot. Situating Euripides' experimentation with the dramaturgical effects of mousike within a broader cultural context, she shows how much of his novelty lies in his reinvention of traditional lyric styles and motifs for the tragic stage. If we wish to understand better the trajectories of this most important ancient art form, The Music of Tragedy argues, we must pay closer attention to the role played by both music and text.

(Re)Positioning Site Dance

This co-authored book aims to articulate international approaches to making, performing and theorizing site-based dance. Intended for artists, scholars, and students, the approaches discussed are informed by interdisciplinary engagements with socio-cultural, political, economic and ecological perspectives.

Experiencing Music and Visual Cultures

Bringing the research of musicologists, art historians, and film studies scholars into dialogue, this book explores the relationships between visual art forms and music. The chapters are organized around three core concepts – threshold, intermediality, and synchresis – which offer ways of understanding and discussing the interplay between the arts of sounds and images. Refuting the idea that music and visual art forms only operate in parallel, the contributors instead consider how the arts of sound and vision are entwined across a wide array of materials, genres and time periods. Contributors delve into a rich variety of topics, ranging from the art of Renaissance Italy to the politics of opera in contemporary Los Angeles to the popular television series Breaking Bad. Placing these chapters in conversation, this volume develops a shared language for cross-disciplinary inquiry into arts that blend music and visual components, integrates insights from film studies with the conversation between musicology and art history, and moves the study of music and visual culture forward.

Perpetual Motion

A new exploration of how digital media assert the relevance of dance in a wired world How has the Internet changed dance? Dance performances can now be seen anywhere, can be looped endlessly at user whim, and can integrate crowds in unprecedented ways. Dance practices are evolving to explore these new possibilities. In Perpetual Motion, Harmony Bench argues that dance is a vital part of civil society and a means for building participation and community. She looks at how, after 9/11, it became a crucial way of recuperating the common character of public spaces. She explores how crowdsourcing dance contributes to the project of performing a common world, as well as the social relationships forged when we look at dance as a gift in the era of globalization. Throughout, she asks how dance brings people together in digital spaces and what dance's digital travels might mean for how we experience and express community. From original research on dance today to political economies of digital media to the philosophy of dance, Perpetual Motion provides an ambitious, invigorating look at a commonly shared practice.

The Punchdrunk Encyclopaedia

The Punchdrunk Encyclopaedia is the definitive book on the company's work to date, marking eighteen years of Punchdrunk's existence. It provides the first full-scale, historical account of one of the world's foremost immersive theatre companies, drawn from unrivalled access to the collective memory and archives of their core creative team. The playful encyclopaedic format, much like a Punchdrunk masked show, invites readers to create their own journey through the ideas, aesthetics, contexts, and practices that underpin Punchdrunk's work. Interjections from Felix Barrett, Stephen Dobbie, Maxine Doyle, Peter Higgin, Beatrice Minns, Colin Nightingale and Livi Vaughan, among others, fill out the picture with

in-depth reflections. Charting Punchdrunk's rise from the fringe to the mainstream, this encyclopaedia records the founding principles and mission of the company, documenting its evolving creative process and operational structures. It has been compiled to be useful to scholars and students from a variety of backgrounds and disciplines, from secondary level through to doctoral research, and is intended for those with a fascination for theatre in general and immersive work in particular. Ultimately it is written for those who have dared to come play with Punchdrunk across the years. It is also offered to the curious; those adventurers ready and waiting to be immersed in Punchdrunk worlds.

Choreography Invisible

Dance is often considered an ephemeral art, one that disappears nearly as soon as it materializes, leaving no physical object behind. While most cultural works are tangible, like books in print and framed artworks on display, the practice of dance remains more elusive. Dance involves people trying to embody some abstract, unwritten thing that exists before - and survives beyond - their particular acts of dancing. But what exactly is that thing? For that matter, what is a dance? And do dances continue to exist when not performed? Anna Pakes seeks to answer these questions and more in this exciting new volume, which investigates what sort of thing dance really is. Focusing on Western theater dance, *Choreography Invisible: The Disappearing Work of Dance* explores the metaphysics of dance and choreographic works. The volume traces the different ways dances have been conceptualized across time, through such lenses as the cultural theory of Derrida, the philosophy of Ranciere and Baidou, and contemporary dance theory. It examines how dances have survived through time, and what it means for a dance work to be forgotten and lost. In her exploration of the amorphous and fleeting nature of dance as a cultural object, Pakes ultimately transforms the way we understand the very nature of art.

Exhausting Dance

The only scholarly book in English dedicated to recent European contemporary dance, *Exhausting Dance: Performance and the Politics of Movement* examines the work of key contemporary choreographers who have transformed the dance scene since the early 1990s in Europe and the US. Through their vivid and explicit dialogue with performance art, visual arts and critical theory from the past thirty years, this new generation of choreographers challenge our understanding of dance by exhausting the concept of movement. Their work demands to be read as performed extensions of the radical politics implied in performance art, in post-structuralist and critical theory, in post-colonial theory, and in critical race studies. In this far-ranging and exceptional study, Andre Lepecki brilliantly analyzes the work of the choreographers: * Jerome Bel (France) * Juan Dominguez (Spain) * Trisha Brown (US) * La Ribot (Spain) * Xavier Le Roy (France-Germany) * Vera Mantero (Portugal) and visual and performance artists: * Bruce Nauman (US) * William Pope.L (US). This book offers a significant and radical revision of the way we think about dance, arguing for the necessity of a renewed engagement between dance studies and experimental artistic and philosophical practices.

Beyond Scenography

Focused on the contemporary Anglophone adoption from the 1960s onwards, *Beyond Scenography* explores the porous state of contemporary theatre-making to argue a critical distinction between scenography (as a crafting of place orientation) and scenographics (that which orientate acts of worlding, of staging). With sections on installation art and gardening as well as marketing and placemaking, this book is an argument for what scenography does: how assemblages of scenographic traits orientate, situate, and shape staged events. Established stage orthodoxies are revisited - including the symbiosis of stage and scene and the aesthetic ideology of 'the scenic' - to propose how scenographics are formative to all staged events. Consequently, one of the conclusions of this book is that there is no theatre practice without scenography, no stages without scenographics. *Beyond Scenography* offers a manifesto for a renewed theory of scenographic practice.

Artificial Hells

Since the 1990s, critics and curators have broadly accepted the notion that participatory art is the ultimate political art: that by encouraging an audience to take part an artist can promote new emancipatory social relations. Around the world, the champions of this form of expression are numerous, ranging from art historians such as Grant Kester, curators such as Nicolas Bourriaud and Nato Thompson, to performance theorists such as Shannon Jackson. *Artificial Hells* is the first historical and theoretical overview of socially engaged participatory art, known in the US as "social practice." Claire

Bishop follows the trajectory of twentieth-century art and examines key moments in the development of a participatory aesthetic. This itinerary takes in Futurism and Dada; the Situationist International; Happenings in Eastern Europe, Argentina and Paris; the 1970s Community Arts Movement; and the Artists Placement Group. It concludes with a discussion of long-term educational projects by contemporary artists such as Thomas Hirschhorn, Tania Bruguera, Paweł Althamer and Paul Chan. Since her controversial essay in *Artforum* in 2006, Claire Bishop has been one of the few to challenge the political and aesthetic ambitions of participatory art. In *Artificial Hells*, she not only scrutinizes the emancipatory claims made for these projects, but also provides an alternative to the ethical (rather than artistic) criteria invited by such artworks. *Artificial Hells* calls for a less prescriptive approach to art and politics, and for more compelling, troubling and bolder forms of participatory art and criticism.

Site-Specific Art

Site-Specific Art charts the development of an experimental art form in an experimental way. Nick Kaye traces the fascinating historical antecedents of today's installation and performance art, while also assembling a unique documentation of contemporary practice around the world. The book is divided into individual analyses of the themes of space, materials, site, and frames. These are interspersed by specially commissioned documentary artwork from some of the world's foremost practitioners and artists working today. This interweaving of critique and creativity has never been achieved on this scale before. *Site-Specific Art* investigates the relationship of architectural theory to an understanding of contemporary site related art and performance, and rigorously questions how such works can be documented. The artistic processes involved are demonstrated through entirely new primary articles from: * Meredith Monk * Station House Opera * Brith Gof * Forced Entertainment. This volume is an astonishing contribution to debates around experimental cross-arts practice.

Funding Bodies

"A cultural and structural analysis of the NEA's dance funding from its inception through the early 2000s. Wilbur studies how people in power engineer and translate institutional norms of arts recognition within dance, performance, and arts policy disclosure"--

Gun Digest Book of Automatic Pistols Assembly/Disassembly, 7th Edition

Nearly 1,000 pages of detailed instructions to help you maintain and repair your handguns! Shooters, gunsmiths and collectors alike will find the 7th edition of this handy book invaluable when it comes to fixing and cleaning a huge variety of semi-automatic pistols. Gunsmith Kevin Muramatsu has added 20 recently introduced models to this must-have reference guide, which now covers more than 100 models and nearly 300 variants of the most popular handguns on the market. Step-by-step photographs and clear, simple text make it easy to disassemble and reassemble a wide range of modern and vintage models. No matter what the size of your firearms collection, all of the books in Gun Digest's

Assembly/Disassembly are guaranteed to save you time and money by helping you handle gunsmithing chores right at your own workbench!

Innovations in Chemical Biology

This book includes 49 chapters presented as plenary, invited lectures and posters at the conference. Six plenary lectures have published in an issue of Pure and Applied Chemistry, Vol. 79, No. 12, 2007; the titles of these presentations are given as an Annex at the end of the book. I thank all contributors for the preparation of their presentations. It is sad to report that Professor Hitoshi Ohtaki, one of the founders of the Eurasia conferences and contributors passed away on November 5, 2006. Professor Ohtaki enthusiastically promoted international cooperation and took it upon himself to publicize Japanese science to the wider world. His contribution in this book will serve as a memorable contribution to that goal. He will be missed by all of us. This book is dedicated to his memory. Professor Dr. Bilge Sener Editor Memorial Tribute to Professor Dr. Hitoshi Ohtaki Curriculum Vitae of Hitoshi Ohtaki Date of Birth September 16, 1932 Place of Birth Tokyo, Japan Date of Decease November 5, 2006 (at the age of 74) Address 3-9-406 Namiki-2-chome, Kanazawa-ku, Yokohama, Japan Institution Chair Professor of The Research Organization of Science and Engineering, Ritsumeikan University Guest Professor of Yokohama City University Education Bachelor of Science, Nagoya University, 1955 Master of Science, Nagoya University, 1957 Doctor of Science, Nagoya University, 1961 ix x Memorial Tribute to Professor Dr.

Agriculture in Urban Planning

This volume, by graduate researchers working in urban agriculture, examines concrete strategies to integrate city farming into the urban landscape. Drawing on original field work in cities across the rapidly urbanizing global south, the book examines the contribution of urban agriculture and city farming to livelihoods and food security. Case studies cover food production diversification for robust and secure food provision; the socio-economic and agronomic aspects of urban composting; urban agriculture as a viable livelihood strategy; strategies for integrating city farming into urban landscapes; and the complex social-ecological networks of urban agriculture. Other case studies look at public health aspects including the impact of pesticides, micro-biological risks, pollution and water contamination on food production and people. Ultimately the book calls on city farmers, politicians, environmentalists and regulatory bodies to work together to improve the long term sustainability of urban farming as a major, secure source of food and employment for urban populations. Published with IDRC

Surface Chemistry of Froth Flotation

The process of froth flotation is an outstanding example of applied surface chemistry. It is extensively used in the mining, mineral, metallurgical, and chemical industries for separation and selective concentration of individual minerals and other solids. Substances so concentrated serve as raw materials for producing appropriate metals and chemicals. The importance of flotation in technology is chiefly due to the ease with which it can be made selective and versatile and to the economy of the process. The objective of this book is to review the fundamentals of surface chemistry together with the relevant aspects of organic and inorganic chemistry that in the opinion of the author are important to control of the froth flotation process. The review updates the information that had been available in books by Sutherland and Wark (1955), Gaudin (1957), Klassen and Mokrousov (1963), and Glembotsky et al. (1963). It emphasizes mainly the surface chemical aspects of the process, leaving other relevant topics such as hydrodynamics, mechanical and electrical technology, circuit design and engineering, operations research, instrumentation technology, modeling, etc., to appropriate specialized treatments.

Genetic Enhancement of Crops for Tolerance to Abiotic Stress: Mechanisms and Approaches, Vol. I

Abiotic stresses such as drought (water deficit), extreme temperatures (cold, frost and heat), salinity (sodicity) and mineral (metal and metalloid) toxicity limit productivity of crop plants worldwide and are big threats to global food security. With worsening climate change scenarios, these stresses will further increase in intensity and frequency. Improving tolerance to abiotic stresses, therefore, has become a major objective in crop breeding programs. A lot of research has been conducted on the regulatory mechanisms, signaling pathways governing these abiotic stresses, and cross talk among them in various model and non-model species. Also, various 'omics' platforms have been utilized to unravel the candidate genes underpinning various abiotic stresses, which have increased our understanding of the tolerance mechanisms at structural, physiological, transcriptional and molecular level. Further, a

wealth of information has been generated on the role of chromatin assembly and its remodeling under stress and on the epigenetic dynamics via histones modifications. The book consolidates outlooks, perspectives and updates on the research conducted by scientists in the abovementioned areas. The information covered in this book will therefore interest workers in all areas of plant sciences. The results presented on multiple crops will be useful to scientists in building strategies to counter these stresses in plants. In addition, students who are beginners in the areas of abiotic stress tolerance will find this book handy to clear their concepts and to get an update on the research conducted in various crops at one place

Agropolis

Urban agriculture is an increasingly popular practice in cities worldwide, and a sustainable future for it is critical, especially for the urban poor of the developing world.

The New York Clipper (December 1919)

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Edible Medicinal and Non-Medicinal Plants

Volume 10 is part of a multi compendium Edible Medicinal and Non-Medicinal Plants. This work is of significant interest to medical practitioners, pharmacologists, ethnobotanists, horticulturists, food nutritionists, botanists, agriculturists, conservationists and general public. 59 plant species with edible modified stems, roots and bulbs in the families Amaranthaceae, Cannaceae, Cistaceae, Convolvulaceae, Cyperaceae, Dioscoreaceae, Euphorbiaceae, Fabaceae, Iridaceae, Lamiaceae, Marantaceae, Nelumbonaceae, Nyctaginaceae, Nymphaeaceae, Orchidaceae, Oxalidaceae, Piperaceae, Poaceae, Rubiaceae, Simaroubaceae, Solanaceae, Tropaeolaceae, Typhaceae and Zingiberaceae. Topics covered include: taxonomy; common/ vernacular names; origin/ distribution; agroecology; edible plant parts/uses; botany; nutritive/medicinal properties, nonedible uses and selected references.

Introduction to Physical Science

This classic book outlines the anatomy and physiology of the circulation and explains the mechanical principles that govern it.

The Mechanics of the Circulation

Since the third edition of this reference was completed, there have been major changes in the global chemical industry. With less emphasis on new processes for making basic chemicals and more emphasis on pollution prevention and waste disposal, petrochemical processes are giving way to biochemical processes. These changes are reflected in the new processes being developed, many of which have their own names. In addition, niche improvements are still being made in petrochemistry, and some of these processes have new names as well. Gathering and defining a large portion of special named processes that may fall outside standard chemical texts or be scattered among industry manuals, Encyclopedic Dictionary of Named Processes in Chemical Technology, Fourth Edition provides a single-source reference on an extensive array of named processes. It provides concise descriptions of those processes in chemical technology that are known by special names that are not self-explanatory. While overviews of the chemical technology industry are present in other books, most of the names defined within this volume are unique to this compilation. This reference includes named processes in current commercial use around the world, processes that have been or are being piloted on a substantial scale, and even obsolete processes that have been important in the past. The length of the dictionary entries reflects their importance and topicality. The text includes references that document the origins of the processes and review the latest developments. Written by a highly experienced and

respected author, this user-friendly text is presented in a practical dictionary format that is useful for a broad audience including industrial chemists and engineers.

Encyclopedic Dictionary of Named Processes in Chemical Technology, Fourth Edition

This book guides the reader through the thought process of deciding what type of firearm to buy based on how they plan to use the firearm. Topics include: Personal Protection / Self Defense, Hunting, Competition, and Self Gratification / Personal Achievement

Guns 101

Linda Mellor explores the genuine love and affection men and women have for the outdoors and country sports. She invites 40 country sports enthusiasts to share why they have a passion for outdoor pursuits. The results are heartwarming, individual, passionate and wrapped up in a deep respect for the outdoors and wildlife.

For the Love of Country Sports

Shooting to Live describes methods developed and practiced during an eventful quarter of a century and adopted by numerous police organization in the Far East and elsewhere. It covers everything from the purpose of the pistol, to selection, training, advance methods and more! This book was the first time that fighting with firearms was clearly and explicitly disassociated from classical target/range shooting. The proven techniques displayed have spawned most modern pistol techniques because of their simplicity and effectiveness. It is written as instruction to police forces in the methods of shooting (reflexive/instinctive) and training (realistic/challenging) that the author developed over two decades active service in Shanghai.

Shooting to Live with the One-Hand Gun

2nd Edition of Vickers Guide: AR-15 (Volume 1)

Plutonium

Corrosion, Volume 2: Corrosion Control deals with corrosion and corrosion control. Topics covered range from the design and economic aspects of corrosion to cathodic and anodic protection; pretreatment and design for metal finishing; protective action of metallic coatings; and methods of applying metallic coatings. Corrosion testing, monitoring, and inspection are also considered. This volume is comprised of 13 chapters; the first of which provides an overview of corrosion control, with emphasis on the classification of practical methods of corrosion control. Attention then turns to the economic aspects of corrosion; how corrosion control is implemented in chemical and petrochemical plants; and design considerations to prevent corrosion in buildings and structures. Design in marine engineering and in relation to welding and joining is also discussed. The chapters that follow focus on the principles and practical applications of cathodic and anodic protection; chemical and mechanical pretreatments for metal finishing; and design for corrosion protection by electroplated and paint coatings. Chemical conversion coatings and miscellaneous coatings such as vitreous enamel coatings are also considered. Finally, this book describes the conditioning of the atmosphere to reduce corrosion. Tables and specifications as well as terms and abbreviations are included. This book will be of value to students as well as workers and engineers involved in corrosion and corrosion control.

The Australian Official Journal of Trademarks

"Over half a century has passed since I cut my teeth on an old .36 Navy Colt. For 40 years I have almost never been out of easy reach of a good sixgun. Thirty years I spent in the saddle, packing, punching cows and breaking saddle brones. The sixgun was worn just as regularly as my pants and many times was much more important to my existence. It pulled me out of several tight scrapes with wild horses, wilder cattle and some big game. Though I have witnessed several gun fights, have had guns pulled on me and have been shot at several times, I have never had to use my gun on a man. Several times it was touch-and-go and perhaps only the current knowledge that I was both fast and accurate with a sixgun saved me from being embroiled. Though I do not recommend a sixgun for big game, thirty head of big game have fallen to mine, including elk, bear, deer, cougar, mountain goat and javelina. I have also trailed up a great many big game animals of various species that were wounded by sportsmen and then I finished them off. No record was kept of these or the many coyotes, bobcats and lesser

game, or the livestock I have had to kill.” This classic includes the following chapters: Introduction I. History of the Sixgun II. Selecting the Handgun III. Learning To Shoot IV. Sixgun Sights V. Long Range Shooting VI. Game Shooting VII. Double Action Shooting VIII. Gun Rigs and Holsters IX. Quick Draw and Hip Shooting X. Gun Fighting XI. Revolver Versus Auto Pistol XII. Aerial and Trick Shooting XIII. Slip Shooting, Fanning, Cavalry Guns XIV. Loading and Management of Cap and Ball Sixguns XV. Repairs, Remodeling, Resighting XVI. A Bullet Chapter XVII. Cartridge Reloading XVIII. Selection of Cartridges XIX. Ornamentation, Barrel Lengths, Balance, Velocities XX. Care and Cleaning Supplement

Vickers Guide

The analysis of the circulation of the blood is one of the most important areas of fluid mechanics research, with far-reaching medical and physiological implications.

Corrosion

Illustrated with hundreds of Edison's drawings, these documents are further illuminated by meticulous research on a wide range of sources, including the most recently digitized newspapers and journals of the day.

Sixguns

Resource added for the Business Management program 101023.

Angel of Accidence

A guidebook designed specifically to teach gun users everything they need to know to select the right cartridge for their shooting needs. This title is written in an accessible and engaging style that makes research fun. The Shooter's Bible Guide to Cartridges is packed with full-color photographs, clear and detailed diagrams, and easy-to-read charts with cartridge data. The Shooter's Bible name has been known and trusted as an authority on guns and ammunition for nearly a century and has sold over seven million copies since its start. Now the Shooter's Bible offers readers this comprehensive and fascinating guide to cartridges. Complete with color and black and white photographs showcasing various makes and models of firearms and equipment, this guide to cartridges is the perfect addition to the bookshelf of any beginner or experienced hunter, firearm collector, or gun enthusiast. No matter what your shooting background is, you'll learn something new. This guide is a great introduction that will make readers want to seek out and get to know all the titles in the informative Shooter's Bible series.

The Fluid Mechanics of Large Blood Vessels

2022 Reprint of the 1962 Edition. Exact facsimile of the original edition and not reproduced with Optical Recognition Software. Profusely illustrated with photos of actual cartridges and dimensions. Illustrated Edition of 1959 in Facsimile. This is one of the classic descriptions of wildcat cartridges, first published in 1949 and revised and expanded in this 1962 edition. This is Ackley's major effort at tackling the loading data, theory, and practice of wildcat cartridges. A wildcat cartridge, often shortened to wildcat, is a custom cartridge for which ammunition and/or firearms are not mass-produced. These cartridges are often created in order to optimize a certain performance characteristic (such as the power, size, or efficiency) of an existing commercial cartridge. Developing and using wildcat cartridges does not generally serve a purpose in military or law enforcement; it is more a hobby for serious shooting, hunting, gunsmithing and handloading enthusiasts, particularly in the United States.

Manual of the Automatic Rifle (Chauchat)

Food, water, and shelter are very important to survival. But you must also be ready to protect what is yours, because if somebody stronger, better prepared, and better equipped takes it all away, you will die. Your family will die. The only way to protect them is with firearms. Written with the law-abiding civilian in mind, Prepper Guns covers the firearms and tools needed to survive, not only for defense, but also for foraging. It is a comprehensive look at the realities of the firearms a prepper should have. Written by Bryce M. Towsley, a firearms expert and a full-time gun writer with thirty years of experience, it steps away from the “conventional wisdom” that is often spouted by prepper publishing and takes a hard, honest, look at the reality of the firearms, ammo, tools and training needed to survive at home and on the road. Prepper Guns takes a careful look at each category of firearms, ammo, sights, and accessories. Other topics include gun care and maintenance, as well as some simple gunsmithing and

reloading to keep firearms repaired and ammo on hand. Finally, Prepper Guns has training suggestions and drills, plus a look at the psychology of survival, using the expertise of some of the top people in the world in these fields. If you are worried that bad things are coming and are trying to prepare, this book is the most important piece of gear you can buy. Because if you can't protect your family, your food and your home, nothing else really matters.

The Papers of Thomas A. Edison

One of the most influential combat shooting books ever published, *Shooting to Live* is the product of Capt. W.E. Fairbairn's and Capt. E.A. Sykes' practical experience with the handgun from their many close-quarters gunfights while working for the Shanghai Municipal Police in the 1930s. This expanded edition contains a new foreword by British World War II combatives expert Phil Mathews, which sheds new light on the career of E.A. Sykes - the "forgotten hero" of the Fairbairn-Sykes duo - as well as previously unpublished photos. Hundreds of actual incidents provided the basis for this first true instruction manual on life-or-death shootouts with the pistol. In clear, concise terms, the book teaches the concepts, considerations and applications of combat pistolcraft. A foreword by Col. Rex Applegate explains how Fairbairn and Sykes introduced their groundbreaking methods into American military training circles at the height of World War II.

Vickers Guide

"As the protagonist figures out how to survive the hordes bent on destruction, the lessons he learns serve as illustrations for those who worry that we may be headed for a real collapse. The 14th reinstated then morphs into an epic adventure as the small group struggles against all odds to save the world from a terrible bleak and dark future"--Page [4] of cover.

170 Years of the Guns that Tamed the West and Made All Men Equal! & break;& break;The Peacemaker. The Ol' Thumb-Buster. The Hawg Laig. & break;& break;No firearm in the world is more immediately recognizable than the 1873 Colt Single Action Army Revolver. Yet Colt's famed six-shooter was only one of hundreds of models of single action revolvers that fought wars, tamed a wild continent and bought the long arm of the law to a new world. Single Action Six Guns is packed with fascinating facts about all makes and models: Colt, Smith & Wesson, Remington, Ruger, Freedom Arms, John Linebaugh, United States Fire Arms, and many more... & break;& break;Hundreds of full-color photos & break;Up-to-the-minute reloading data for today's hottest cowboy action guns

3-inch Gun Motor Carriage, M10

With the guidance of top gunsmith Patrick Sweeney, beginners, as well as serious enthusiasts, are able to diagnose handgun problems--for once they're the experts, deciding whether to do their own work or leave it up to the professionals. Profusely illustrated step-by-step instructions are presented for do-it-yourself minor repairs and major upgrades, from the how-tos of diagnosing malfunctions in both revolver and semi-automatic pistols to what corrective steps can be taken to solve them. Sweeney provides a complete look at repairs and upgrades: setting up an efficient and organized workplace, what gunsmithing tools are needed to complete projects, and a thorough series of mini-projects--teaching professional tool-use techniques. Plus, there are chapters on cleaning, polishing and minor repairs, welding and metal joining, recoil reduction, and refinishing. And new to this edition, gunsmithing tips are included for polymer-framed pistols.

Shooter's Bible Guide to Cartridges

This richly illustrated volume explores Edison's inventive and personal pursuits from 1888 to 1889, documenting his responses to technological, organizational, and economic challenges. Thomas A. Edison was received at the 1889 Paris Exposition Universelle--the World's Fair--as a conquering hero. Extravagantly fêted and besieged by well-wishers, he was seen, like Gustave Eiffel's iron tower, as a triumphal symbol of republicanism and material progress. The visit was a high-water mark of his international fame. Out of the limelight, Edison worked as hard as ever. On top of his work as an inventor, entrepreneur, and manufacturer, he created a new role as a director of research. At his peerless laboratory in Orange, New Jersey, he directed assistants working in parallel on multiple projects. These included the "perfected" phonograph; a major but little-recognized effort to make musical recordings

for sale; the start of work on motion pictures; and improvements in the recovery of low-grade iron ore. He also pursued a public "War of the Currents" against electrical rival George Westinghouse. Keenly attuned to manufacturing as a way to support the laboratory financially and control his most iconic products, Edison created a new cluster of factories. He kept his manufacturing rights to the phonograph while selling the underlying patents to an outside investor in a deal he would regret. When market pressures led to the consolidation of Edison lighting interests, he sold his factories to the new Edison General Electric Company. These changes disrupted his longtime personal and professional relations even as he planned an iron-mining project that would take him to the New Jersey wilderness for long periods. The ninth volume of the series, *Competing Interests* explores Edison's inventive and personal pursuits from 1888 to 1889, documenting his responses to technological, organizational, and economic challenges. The book includes 331 documents and hundreds of Edison's drawings, which are all revealing and representative of his life and work in these years. Essays and notes based on meticulous research in a wide range of sources, many only recently available, provide a rich context for the documents.

Handbook for Shooters and Reloaders (Volume 1)

One of America's foremost experts on gunsmithing, Bryce Towsley is back again to provide even more projects for anyone interested in building, customizing, fixing, or maintaining firearms. Gunsmith Towsley offers detailed explanations and includes color illustrations for just about every aspect of gun modification, builds, and repair. Featured tutorials include: how to customize a GLOCK handgun build a 1911 handgun or an AR-15 rifle from parts how to do spray on gun coatings turning a Mosin-Nagant into a tactical rifle building a precision or hunting rifle from scratch and much more This extensive information is important to anybody interested in firearms care, modification, repair, or improvement. It takes the reader from easy-to-do, "kitchen table" projects through advanced techniques. There is something in these pages for anybody interested in working on firearms, and Towsley's writing style is easy to read and understand and the humor will make you laugh while you learn. "Gunsmithing is a great hobby. It brings satisfaction that few others can achieve. There is the pride in fixing something that is broken and in feeling the artistic achievement when you modify a firearm to make it better."—Bryce M. Towsley

Improvements in Water Reactor Fuel Technology and Utilization

THE ESSENTIAL, COMPREHENSIVE GUIDE TO CARTRIDGES--PAST AND PRESENT! Serious shooters and reloaders will find the cartridges they love--and many they never dreamed of--in this newest edition of the most widely read cartridge reference book ever published. From the latest introductions in standard American sporting cartridges, to the hottest proprietary rounds, and new authoritative feature articles by the gun industry's heavy hitters on cartridge design, application, selection, tips and idiosyncrasies, this book is packed with everything shooters, handloaders and cartridge collectors need to know. *Cartridges of the World*, 16th Edition is packed with over 688 pages of concise information and data on old, new and currently manufactured ammo. Heavily illustrated with more than 1,500 photos, this book is the ultimate guide for gun owners interested in current and historical ammunition for handguns, rifles and shotguns. With 50 new cartridges, from the latest cutting-edge factory loads to wildcats that will set ballistic trends for years to come, plus updated cartridge descriptions and the newly expanded full-color feature article section, *Cartridges of the World*, 16th Edition is the most comprehensive reference of its kind, and a must-have for every firearms owner--from beginner to advanced. IT'S ALL HERE! 50 new cartridges Full-color feature story section Trendsetting wildcats Updated spec and reference charts Expert advice on handloads and cartridge selection

Prepper Guns

Couples today want it all: cars, kids, houses, vacations, early retirement, successful career, and happiness. The question is, what does it take to make all that happen? As more and more marriages are made up of two working professionals, our definition of a traditional marriage is put to the test. In *Alpha Couples*, the Solanos take us on a journey through an ambitious professional couple's trials, tribulations, and lessons learned. They show us the challenges of balancing a corporate job with an entrepreneurial career, and they teach us how to be successful in finances, time management, and with each other. They also offer great insight from other successful couples like Will and Jada Pinkett Smith, Sara Blakely and Jesse Itzler, and Barack and Michelle Obama. Alpha males are a thing of the

past. Or, as the Solanos explain, maybe alpha males were never a thing to begin with. In nature, Alpha Couples work together to lead their packs as powerful pairs. Within the pages of this book, you'll learn all the tips and tricks you need to establish a strong, loving, and exciting, mutually beneficial, and all around badass relationship with you and your partner. Robert Solano is a dreamer, hustler, and tech geek. He is a former pilot, aerospace engineer, and senior manager in the aviation industry, with 20 years of experience leading world-class teams. Zaira Solano is a badass entrepreneur and attorney. She is the founder and CEO of Solano Law Firm where her company helps immigrants build a better future in the United States. In 2013, Robert and Zaira met on Match.com and fell in love. As an Alpha Couple, Robert and Zaira support each other as they chase their dreams, challenge the status quo, and strive to change the world.

Shooting To Live

Introduction to Peace and Conflict Studies in West Africa
