[#social class](#) [#mental health](#) [#children and adolescents](#) [#psychiatric disorders](#) [#socioeconomic status](#)

This study explores the relationship between social class and mental health disorders in children and adolescents. It investigates the prevalence of psychiatric conditions within different socioeconomic strata and aims to identify potential contributing factors. The research is focused on utilizing child and adolescent psychiatric clinics for an empirical investigation to understand the impact of social stratification on mental wellbeing and the challenges faced by youth from varying backgrounds.
