ASI adalah susu yang diproduksi manusia untuk konsumsi bayi dan merupakan sumber gizi utama bayi yang belum dapat mencerna makanan padat (Ambarwati, 2008). Menurut Walyani, E. S., & Purwoastuti, (2015) ASI stadium I dari hari pertama sampai hari keempat adalah kolostrum. Kolostrum membantu mengeluarkan mekonium dari usus bayi sehingga mukosa usus bayi baru lahir segera bersih dan siap menerima ASI.

This volume argues the case that public health communication has affected health behavior. It brings together 16 studies of large-scale communication in a variety of substantive health areas--tobacco, drugs, AIDS, family planning, heart disease, childhood disease, highway safety--prepared by the authors who did the original research. These studies show important effects and illustrate the central conditions for success. The book also includes complementary analytic chapters which provide a meta-analysis of published results, some approaches to developing communication interventions, and alternative methods for evaluation of public health communication projects. Including studies based on communication programs in the United States, as well as projects done elsewhere in the world, including Europe, Africa, Asia and Latin America, this book: *offers a broad presentation of the alternative research designs that have been used to evaluate public health communication programs; *includes a great range of approaches from field experiments and natural experiments to simple before-after and complex time series designs, using data gathered from individuals and from archives; and *utilizes an innovative perspective on how to exercise public health communication from a leading and thoughtful practitioner. As such, it is required reading for scholars, students, practitioners, and policymakers in public health, health communication, health psychology, and related areas.

English-Only Europe? explores the role of languages in the process of European integration. Languages are central to the development of an integrated Europe. The way in which the European Union deals with multilingualism has serious implications for both individual member countries and international relations. In this book, Robert Phillipson considers whether the contemporary expansion of English represents a serious threat to other European languages. After exploring the implications of current policies, Phillipson argues the case for more active language policies to safeguard a multilingual Europe. Drawing on examples of countries with explicit language policies such as Canada and South Africa, the book sets out Phillipson's vision of an inclusive language policy for Europe, and describes how it can be attained.

The Thursday Murder Club

Didactically, a textbook of criminology should start at the beginning. The learning process, also an emotional process, begins in criminology with the concepts, views, emotions, attitudes and ideas we have regarding crime and criminals. Exploration of these underlying factors is one of the aims of the present book. We can free our thinking only by being aware of the significance of our own feelings and thoughts about a phenomenon like crime. 'That is the basic problem confronting us. In scientific thinking implicit postulates as to the *sensus communis*, unless recognized and 1 neutralized, grow into idols.' The fight against crime is one example of such an idol. Crimes and criminals exist only by virtue of reactions to certain forms of behavior. For this reason this book will begin by examining the reactions of society to crime. Criminology is primarily a science of others than offenders. In this sense I invert criminology. The history of criminology is not so much a history of offenders, 2 as a history of the reactions of those in power.

The Other Side of Criminology

Harvard University Professor David C. McClelland is chiefly known for his work on achievement motivation, but his research interests extended to personality and consciousness. He pioneered workplace motivational thinking, developing achievement-based motivational theory and models, and promoted improvements in employee assessment methods, advocating competency-based assessments and tests, arguing them to be better than traditional IQ and personality-based tests. His ideas have since been widely adopted in many organisations, and relate closely to the theory of Frederick Herzberg. He is most noted for describing three types of motivational need, which he identified in this book, *The Achieving Society*: 1. achievement motivation (n-ach), 2. authority/power motivation (n-pow), 3. affiliation motivation (n-affil). First published in 1961, his classic book provides a factual basis for evaluating economic, historical, and sociological theories that explain the rise and fall of civilizations.

The Achieving Society

The popular 1998 reformasi movement that brought down President Suharto's regime demanded an end to illegal practices by state officials, from human rights abuse to nepotistic investments. Yet today, such practices have proven more resistant to reform than people had hoped. Many have said corruption in Indonesia is "entrenched". We argue it is precisely this entrenched character that requires attention. What is state illegality entrenched in and how does it become entrenched? This involves studying actual cases. Our observations led us to rethink fundamental ideas about the nature of the state in Indonesia, especially regarding its socially embedded character. We conclude that illegal practices by state officials are not just aberrations to the state, they are the state. Almost invariably, illegality occurs as part of collective, patterned, organized and collaborative acts, linked to the competition for political power and access to state resources. While obviously excluding many without connections, corrupt behaviour also plays integrative and stabilizing functions. Especially at the lower end of the social ladder, it gets a lot of things done and is often considered legitimate. This book may be read as a defence of area studies approaches. Without the insights that grew from applying our area studies skills, we would still be constrained by highly stylised notions of the state, which bear little resemblance to the state's actual workings. The struggle against corruption is a long-term political process. Instead of trying to depoliticize it, we believe the key to progress is greater popular participation. With contributions from Simon Butt, Robert Cribb, Howard Dick, Michele Ford, Jun Honna, Tim Lindsey, Lenore Lyons, John McCarthy, Ross McLeod, Marcus Mietzner, Jeremy Mulholland, Gerben Nooteboom, J Danang Widoyoko and Ian Wilson. This book is the result of a series of workshops supported, among others, by the Australian-Netherlands Research Collaboration (ANRC).

The State and Illegality in Indonesia

World-renowned restorative yoga teacher Jillian Pransky came to the practice of yoga to heal herself. For much of her life, she subscribed to a relentless work hard/play hard mentality, burying parts of herself beneath the pursuit of busy-ness and accomplishment. It wasn't until a devastating personal loss and health crisis thrust her into suffocating anxiety that she stopped racing around. As she began to pause and examine her actions and emotions, she found herself able to unlock deeply seated tension in her mind and body. Since then, Pransky has been devoted to studying and teaching mindfulness practices, deep relaxation, and compassionate listening. In *Deep Listening*, Pransky presents her signature Calm Body, Clear Mind, Open Heart program a 10-step journey of self-exploration that she's taught around the world. Derived from the techniques that healed her, the practice of Deep Listening invites you to pay close attention to your body, mind, and heart. You're taught how to tune inward and relax into a state of openness, ease, and clarity. This is the new frontier in integrative wellness—mindfulness designed for healing. Pransky doesn't ask you to "be your best self," or "do more!" She asks you to "be here" and "do less." She guides you gently through the stages of Deep Listening, from being present and noticing your tension to welcoming what you discover with softness and compassion. She integrates tools like guided meditations, journaling prompts, and restorative yoga poses to help you regard yourself with kindness and curiosity. Immersing yourself in the practice of Deep Listening will allow you to nurture your own well-being.

The United States today suffers from too much criminal law and too much punishment. Husak describes the phenomena in some detail and explores their relation, and why these trends produce massive injustice. His primary goal is to defend a set of constraints that limit the authority of states to enact and enforce penal offenses. The book urges the weight and relevance of this topic in the real world,

and notes that most Anglo-American legal philosophers have neglected it. Husak's secondary goal is to situate this endeavor in criminal theory as traditionally construed. He argues that many of the resources to reduce the size and scope of the criminal law can be derived from within the criminal law itself—even though these resources have not been used explicitly for this purpose. Additional constraints emerge from a political view about the conditions under which important rights such as the right implicated by punishment may be infringed. When conjoined, these constraints produce what Husak calls a minimalist theory of criminal liability. Husak applies these constraints to a handful of examples—most notably, to the justifiability of drug proscriptions.

We are entering a Space Age, but not the kind President Kennedy originally envisioned. This Space Age is replacing resource wars and redefines planet earth as a "battlespace" in accordance with the military doctrine of "Full-Spectrum Dominance." This book examines how chemtrails and ionospheric heaters like the High-frequency Active Auroral Research Project (HAARP) in Alaska services a full-spectrum dominance. This "Revolution in Military Affairs" needs an atmospheric medium to assure wireless access to the bodies and brains of anyone on Earth—from heat-seeking missiles to a form of mind control. How sinister are these technologies? Are we being prepared for a "global village" lockdown? The recent release of NSA records have reminded Americans that "eyes in the sky" are tracking us as supercomputers record the phone calls, e-mails, internet posts, and even the brain

frequencies of millions. Elana M. Freeland's startling book sifts through the confusion surrounding chemtrails-versus-contrails and how extreme weather is being "geo-engineered" to enrich disaster capitalists and intimidate nations. A deconstruction of Bernard J. Eastlund's HAARP patent points to other covert agendas, such as a global Smart Grid infrastructure that enables access to every body and brain on Earth, a "Transhumanist" future that erases lines between human and machine, and Nanobiological hybrids armed with microprocessors that infest and harm human bodies.

Some revision of public schooling history is necessary to challenge the dominant mythology that public schools were established on the grounds of values-neutrality. In fact, those responsible for the foundations of public education in Australia were sufficiently pragmatic to know that its success relied on its charter being in accord with public sentiment. Part of the pragmatism was in convincing those whose main experience of education had been through some form of church-based education that state-based education was capable of meeting the same ends. Hence, the documents of the 1870s and 1880s that contained the charters of the various state and territory systems witness to a breadth of vision about the scope of education. Beyond the standard goals of literacy and numeracy, education was said to be capable of assuring personal morality for each individual and a suitable citizenry for the soon-to-be new nation. As an instance, the NSW Public Instruction Act of 1880 (cf. NSW, 1912), under the rubric of "religious teaching", stressed the need for students to be inculcated into the values of their society, including understanding the role that religious values had played in forming that society's legal codes and social ethics. The notion, therefore, that public education is part of a deep and ancient heritage around values neutrality is mistaken and in need of serious revision. The evidence suggests that public education's initial conception was of being the complete educator, not only of young people's minds but of their inner character as well.

As constitutional scholar John Nowak noted when the book was first released, "Professor Choper's Judicial Review and the National Political Process is mandatory reading for anyone seriously attempting to study our constitutional system of government. It is an important assessment of the democratic process and the theoretical and practical role of the Supreme Court." That view is no less true today, as borne out by the countless citations to this landmark work over the decades, including scores in the last few years alone. It is simply part of the foundational canon of constitutional law and political theory, an essential part of the library of scholars, students, and educated readers interested in considering the hard choices inherent in what the courts should decide and how they should decide them.

Corporate governance principles provide guidance on how corporations should operate. Adoption of international corporate governance best practices leads to long-term sustainability and resilience, and can be a competitive tool to attract foreign investments. The Asian Development Bank, in partnership with the ASEAN Capital Markets Forum, have jointly developed the ASEAN Corporate Governance Scorecard, an assessment based on publicly available information and benchmarked against international best practices that encourage publicly listed companies to go beyond national legislative requirements. This report can be used by capital market regulators and other stakeholders as a reference to understand the current corporate governance standards across the region. It is also a useful diagnostic tool to guide improvement of corporate governance standards.

Values Education and Quality Teaching

Often times the Bible is associated with rural pastoral settings. The Israelites wandering in the desert wilderness living in tents, David playing his harp for sheep out in the pasture, and Jesus strolling along dusty roads between remote villages. But what if I told you that the Bible is an urban book and that the center stage for where the drama of biblical events played out was truly the city? Starting in Genesis, all of the way to the end of the Bible in Revelation, the whole trajectory of humanity and the focal point for the Missio Dei was and is urban and not rural. When Jesus erupted into history through the womb of a teenager he lived in the most urban region in the world. The early church was birthed in the city and spread to the largest most influential cosmopolitan urban centers of the day. For the first-century Christian, to be a follower of Jesus was synonymous with being an urbanite. The Urbanity of the Bible explores the urban nature of the Bible and displays the urban trajectory of the Missio Dei. The city was and is a dominant theme of the setting, backdrop, and purposes of God throughout history. As the world today has flooded to the cities this book is good news. We were meant to live in the city.

For years, China has served as the "factory floor" for global production, driving down prices for consumers worldwide. But, unfortunately, China's rapid and chaotic industrialization has put it on a collision course with the rest of the world. The Coming China Wars was the first book to systematically cover all those conflicts: political, economic, and environmental. Now, in this new edition, Dr. Peter Navarro has thoroughly updated the entire book. You'll find new chapters on the danger posed by China's flood of defective products and contaminated food; China's dramatic military expansion and the rising threat of a "hot war"; China's space program and its profound strategic implications; China's growing suppression of human rights and free speech; and much more. The coming China Wars will be fought over everything from decent jobs, livable wages, and advanced technologies to strategic resources...and eventually to our most basic of all needs: bread, water, and air. Unless all nations immediately address these impending conflicts, the results may be catastrophic. Like the First Edition, this book demands that we think much more deeply about how to stop the coming China Wars, laying out hard choices that must be made sooner rather than later. This new edition offers even more policy recommendations, including original contributions from several of the world's most important China experts.

The Urbanity of the Bible

This book addresses the broader questions of how both the content and the context of public policy affect its implementation. Through a series of case studies from Mexico, Peru, Brazil, Colombia, Zambia, Kenya, and India, ten scholars here demonstrate that numerous factors intervene between the statement of policy goals and their actual achievement in society. Originally published in 1980. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Michael Billig presents a major challenge to orthodox conceptions of nationalism in this elegantly written book. While traditional theorizing has tended to the focus on extreme expressions of nationalism, the author turns his attention to the everyday, less visible forms which are neither exotic or remote, he describes as 'banal nationalism'. The author asks why people do not forget their national identity. He suggests that in daily life nationalism is constantly flagged in the media through routine symbols and habits of language. Banal Nationalism is critical of orthodox theories in sociology, politics and social psychology for ignoring this core feature of national identity. Michael Billig argues forcefully that wi
