Popular Photography

For centuries autonomy has been a public policy tool used to provide stability and cohesion to multicultural societies. Examining case studies on non-territorial autonomy arrangements in comparison with territorial autonomy examples, this book informs both design and decision making on managing diversity.

The Software Catalog

"...profoundly moving..." -Publishers Weekly Nelson Mandela's two great-grandchildren ask their grandmother, Mandela's youngest daughter, 15 questions about their grandad – the global icon of peace and forgiveness who spent 27 years in prison. They learn that he was a freedom fighter who put down his weapons for the sake of peace, and who then became the President of South Africa and a Nobel Peace Prize-winner, and realise that they can continue his legacy in the world today. Seen through a child's perspective, and authored jointly by Nelson Mandela's great-grandchildren and daughter, this amazing story is told as never before to celebrate what would have been Nelson's Mandela 100th birthday.

Minority Accommodation Through Territorial and Non-territorial Autonomy

Since the publication of the first volume of "In Search of the Lost\

Grandad Mandela

Known for its unique "Special Topic" chapters and emphasis on everyday health concerns, the Fifth Edition of Biology of Humans: Concepts, Applications, and Issues continues to personalize the study of human biology with a conversational writing style, stunning art, abundant applications, and tools to help you develop critical-thinking skills. The authors give you a practical and friendly introduction

for understanding how their bodies work and for preparing them to navigate today's world of rapidly expanding—and shifting—health information. Each chapter now opens with new “Did You Know?” questions that pique your interest with intriguing and little-known facts about the topic that follows. The Fifth Edition also features a new “Special Topic” chapter (1a) titled “Becoming a Patient: A Major Decision,” which discusses how to select a doctor and/or a hospital, how to research health conditions, and more.

Me

This last book in the six-volume series from NEXTmanga combines cutting-edge illustration with fast-paced storytelling to deliver biblical truth to an ever-changing, postmodern culture. More than 10 million books in over 40 different languages have been distributed worldwide in the series.

Looking Under the Carpet

These comfort-food favorites are filled with creamy, cheesy goodness. Perfect for weeknight dinners and entertaining a crowd, our best-ever collection of recipes features everything from chicken pot pie to mac-n-cheese.

In Search of the Lost

Korean: A Comprehensive Grammar is a reference to Korean grammar, and presents a thorough overview of the language, concentrating on the real patterns of use in modern Korean. The book moves from the alphabet and pronunciation through morphology and word classes to a detailed analysis of sentence structures and semantic features such as aspect, tense, speech styles and negation. Updated and revised, this new edition includes lively descriptions of Korean grammar, taking into account the latest research in Korean linguistics. More lower-frequency grammar patterns have been added, and extra examples have been included throughout the text. The unrivalled depth and range of this updated edition of Korean: A Comprehensive Grammar makes it an essential reference source on the Korean language.

Biology of Humans

Join the journey with Luke with fifty days of scripture readings, meditations, and prayers written by dynamic spiritual leaders from around the world.

Manga Majesty

This book constitutes the proceedings of the 19th China National Conference on Computational Linguistics, CCL 2020, held in Hainan, China, in October/November 2020. The 32 full and 2 short papers presented in this volume were carefully reviewed and selected from 99 submissions. They were organized in topical sections named: fundamental theory and methods of computational linguistics; information retrieval, dialogue and question answering; text generation and summarization; knowledge graph and information extraction; machine translation and multilingual information processing; minority language information processing; language resource and evaluation; social computing and sentiment analysis; and NLP applications.

Southern Living Casseroles & Pot Pies

The latest edition of this bestselling game development reference offers proven tips and techniques for the real-time rendering of special effects and visualization data that are useful for beginners and seasoned game and graphics programmers alike. Exploring recent developments in the rapidly evolving field of real-time rendering, GPU Pro 7: Advanc

Korean

The only authorized full-color book commemorating Derek Jeter's iconic baseball career with the New York Yankees, featuring archival images and original photos of his final 2014 season from renowned photographer Christopher Anderson. Derek Jeter's twentieth and final season in Major League Baseball truly marks the end of a sports era. The New York Yankees' shortstop—a five-time World Series victor, team captain since 2003, and one of the greatest ballplayers of all time—is a beloved and inspiring role model who displays the indefinable qualities of a champion, on and off the field. Jeter Unfiltered is

a powerful collection of never-before-published images taken over the course of Derek's final season. Fans will have unprecedented access to "The Captain," as the famously private baseball legend takes us behind the scenes—inside his home, the stadium, the gym, at his Turn 2 Foundation events, fortieth birthday party, and more—as he looks back with candor and gratitude on his baseball career. The result is an intimate portrait bursting with personality, professionalism, and pride. Jeter Unfiltered is Jeter as you have never seen him before: unguarded, unapologetic...unfiltered.

A Journey with Luke

Male escort Nolan is at the top of his game-- and then he falls in love. The problem is, Juanesia is a successful escort herself, and she doesn't want to leave the game.

Chinese Computational Linguistics

From the first encounters between the Portuguese and indigenous peoples in 1500 to the current political turmoil, the history of Brazil is much more complex and dynamic than the usual representations of it as the home of Carnival, soccer, the Amazon, and samba would suggest. This extensively revised and expanded second edition of the best-selling Brazil Reader dives deep into the past and present of a country marked by its geographical vastness and cultural, ethnic, and environmental diversity. Containing over one hundred selections—many of which appear in English for the first time and which range from sermons by Jesuit missionaries and poetry to political speeches and biographical portraits of famous public figures, intellectuals, and artists—this collection presents the lived experience of Brazilians from all social and economic classes, racial backgrounds, genders, and political perspectives over the past half millennium. Whether outlining the legacy of slavery, the roles of women in Brazilian public life, or the importance of political and social movements, The Brazil Reader provides an unparalleled look at Brazil's history, culture, and politics.

GPU Pro 7

Financial planner and broker Julie Stav has been helping women get rich for years. Now she offers her hands-on techniques and inspiring advice in a book that simplifies the stock market and puts a new world of wealth within reach. And with updated information—including current examples, the hottest new websites, and more—this smart, sensible, and down-to-earth book is the ideal guide for women who want to invest in their dreams.

Jeter Unfiltered

This collection, which won the 2015 Costa Poetry Award, is an exhibition of the Dundee-born poet's stunningly accomplished adoption of the sonnet's ancient structure. This collection from Don Paterson, his first since the Forward Prize-winning *Rain* in 2009, is a series of forty luminous sonnets. Some take a traditional form, while others experiment with the reader's conception of the sonnet, but they all share the lyrical intelligence and musical gift that has made Paterson one of our most celebrated poets. Addressed to friends and enemies, the living and the dead, children, musicians, poets, and dogs, these poems are as ambitious in their scope and tonal range as in the breadth of their concerns. Here, voices call home from the blackout and the airlock, the storm cave and the séance, the coal shed, the war, the highway, the forest, and the sea. These are voices frustrated by distance and darkness, which ring with the "sound that fades up from the hiss, / like a glass some random downdraught had set ringing, / now full of its only note, its lonely call." In 40 Sonnets, Paterson returns to some of his central themes—contradiction and strangeness, tension and transformation, the dream world, and the divided self—in some of the most powerful and formally assured poems of his career.

Can I Taste It?

A fierce war rages for your soul. Are you ready for battle? Like it or not, you are at war. You face a powerful enemy out to destroy you. You live on the battlefield, so you can't escape the conflict. It's a spiritual war with crucial consequences in your everyday life and its outcome will determine your eternal destiny. You must engage the Enemy. And as you fight, you need a Manual for Spiritual Warfare. This guide for spiritual warriors will help you recognize, resist, and overcome the Devil's attacks. Part One, "Preparing for Battle," answers these critical questions: • Who is Satan, and what powers does he have? • What are his typical strategies? • Who fights him alongside us in battle? • What spiritual weapons and armor do we possess? • How do we keep the Enemy out of our camp? Part Two, "Aids in

Battle,” provides you these essential resources: • Teaching about spiritual warfare from Scripture and Church documents • Scripture verses for battle • Wisdom and inspiration from saints who fought Satan • Prayers for protection, deliverance, and victory • Rosary meditations, hymns, and other devotions for spiritual combat St. Paul urges us to “fight the good fight of the faith” (1 Tim 6:12). Take this Manual for Spiritual Warfare with you into battle. The beautiful Premium UltraSoft gift edition features sewn binding, ribbon marker and silver edges.

The Brazil Reader

The Flash Points sourcebook provides descriptions of exotic global hot spots of warfare and intrigue that enable Shadowrun gamemasters to take their campaigns beyond the usual metroplex streets. Each locale description contains extensive background, profiles of important characters, and suggested player missions far beyond the usual Shadowruns -- which provide gamemasters and players with unprecedented control over the events of their Shadowrun universe and the destinies of their characters.

Get Your Share

The most reader friendly text in its field, the tenth edition presents a comprehensive overview of education in America. It provides in-depth commentary on educational history, philosophy, and governance, while giving special attention to current critical topics such as the changing federal role in educational finance. Newly revised for this edition, Chapter 4 (Life in School and at Home) now includes obesity, eating disorders, and a revised section on poverty. A major revision of Chapter 5, now titled Reforming America's Schools, includes updates from the stimulus plan based on new reports on federal programs and new funding formulas. Chapter 6 on Curriculum, Standards and Testing has a new section on emerging trends in the curriculum.

Philosophy

This volume describes and analyzes alternative and emerging models of non-territorial autonomy (NTA), particularly in relation to decentralization. The authors push the NTA debate in new directions by offering a re-conceptualization based on ethno-cultural bottom-up decentralized action that redefines autonomy into its true sense of autonomous action. Through description, critical analysis, and evaluation of several case studies, this book assesses the potential for new paradigms within decentralized systems. The authors explore two approaches to political decentralization which add to the theoretical debate on NTA – network governance, which focuses on new dynamics in policy processes, and normative pluralism, which focuses on accommodating the distinctness of the groups through the subsidiarity principle with regard to their own affairs. The book explores the potential ramifications of ethno-cultural NTA institutions acting within the wider framework of state institutions and assesses the functions of these institutions as another dimension of decentralization and thus another ‘layer’ of democracy. With contemporary examples from Europe, the Middle East, Asia and South Africa, as well as theoretical aspects of the conceptualization of autonomy, this book offers a truly global perspective. It will be of great interest to policy-makers in countries experiencing adverse developments due to the pressure on public management, as well as advanced students and scholars questioning the ability of the Westphalian system to address cultural diversity.

40 Sonnets

Traveling around the world is one of the most fun and memorable things to do. And one of the best places to include in one's bucket list is Brazil. But here's the thing: Brazil isn't an English-speaking country and if you'd like to be able to really enjoy your trip there, it's crucial that you know important basic phrases so you can get and convey information that will enable you to get to where you want to go and do what you want to do there. Grab your copy of Brazilian Portuguese Phrase Book and learn the basic phrases you'll need to enjoy your trip to Brazil. And more than just the phrases themselves, you will also get to learn basic principles underlying the Brazilian Portuguese language that will help you learn even more words and phrases later on. The Brazilian Portuguese Phrase Book, you can easily learn to speak basic phrases for tourists so you can make sure that your trip to Brazil will be a most unforgettable one!

Manual for Spiritual Warfare

It was 1953, and nothing could shake William Denning's resolve to leave the army and return to the States. Nothing, except one of the largest diamond hauls ever - which, in the wrong hands, on the wrong side of the Iron Curtain, was a potentially lethal force. In a small village in the Swiss mountains, Denning discovered that there was not only a jewellery robbery at stake. In the ruthless world of espionage and international conspiracy his adversaries were the most unlikely people - and the most dangerous.

Target

A fun and exciting touch-and-feel book featuring one of the best-selling children's book characters of all time - Pat the Bunny! Pat the Bunny has been creating special first-time moments between parents and their children for over 75 years. This engaging touch-and-feel book takes babies on a playful trip to the zoo where they can pet animals like lions, pandas, turtles, and more, all the while making cherished memories that will last a lifetime.

Loose Leaf Teachers Schools and Society

The "Cuaderno de correspondencia y documentos comerciales" includes the most important and most frequently used letters and documents for communication in the international business world. Through the authentic selections and thought-provoking activities, students are exposed to various business transactions as well as the problems that may complicate them. The "Cuaderno" helps learners master not only the subject matter, but also the intricacies and nuances of communicating effectively in Spanish.

NRP WALL CHART.

"An enraged elephant flips a car onto its roof. A lioness prises open the door of a terrified couple. A leopard helps itself to a family's picnic breakfast. A fleeing impala leaps through an open car window. A lion charges around inside a busy rest camp. A hyaena snatches a baby from a tent. A tourist takes a bath in a croc-infested dam ... These are just a few of the 101 jaw-dropping sightings, scrapes and encounters in this collection of extraordinary true stories from the roads, camps, picnic sites and walking trails of South Africa's Kruger National Park, as told by the very people who experienced them. There are no game ranger tales here - each and every story happened to an ordinary Kruger visitor doing what over a million tourists do in this spectacular reserve each year."--Back cover.

Non-Territorial Autonomy and Decentralization

ACDC Principles and Applications teaches learners how to apply basic laws and analysis techniques to traditional introductory circuits, as well as popular, real-world AC and DC circuits. AC/DC Principles combines standard theory of electricity with fundamentals of electronics and demonstrates electronic theory as applied to actual applications. Throughout the book, only those circuit theorems and analysis techniques that are practical and typically used in real-world circuit analysis are addressed. In addition, Kirchhoff's current law, Kirchhoff's voltage law, Thevenin's Theorem and Ohm's law are introduced to ensure that the learner has a complete understanding of each law before attempting to apply all or part to traditional series and parallel circuits.

Doubleday, Page & Co.'s Geographical Manual and New Atlas

This volume in the Handbook of Sports Medicine and Science series delivers up-to-date scientific knowledge alongside practical applications in rowing, making it an invaluable resource for researchers, coaches and rowers of all abilities. Published under the auspices of the International Olympic Committee, in collaboration with the International Rowing Federation (FISA), Rowing: Provides key knowledge of the historical, nutritional and psychological aspects of rowing Offers ground-breaking physiological insights which can help shape future training methodologies Features a rowing periodization plan to help trainers and athletes create comprehensive and effective training programs, racing plans and tactics. Rowing brings together internationally renowned experts with experience in competitive rowing and sports medicine, making this the complete handbook of medicine, science and practice in rowing.

Instructors Resource Manual

No, you cannot live on kisses, Though the honeymoon is sweet, Harken, brides, a true word this is — Even lovers have to eat. This charming vintage cookbook, with its innocently suggestive title,

reads like a novel as it follows the fictional lives of a pair of newlyweds. Join Bettina and Bob as they eat their way through their first year of marriage, from the bride's first real dinner and a Sunday evening tea to baking day, a rainy night meal, and Thanksgiving festivities. Menus for all occasions are seasoned with anecdotes about family life, friendships, household hints, and budgetary concerns. Originally published in 1917, this volume offers a delightful look at homemaking before the advent of sophisticated appliances and fast food as well as the modern reality of women's work outside the home. Unintentionally funny and historically revealing, the whimsically illustrated narrative abounds in simple and surprisingly relevant recipes.

General Catalogue of the Books

This updated version of the bestselling "D&D Psionics Handbook" is now larger and with a new cover.

General Catalogue of the Public Library of Detroit, Mich

Suitable for college and high school students and those learning on their own, this fully illustrated coursebook provides comprehensive instruction in the history and practical techniques of Chinese calligraphy. No previous knowledge of the language is required to follow the text or complete the lessons. The work covers three major areas: 1) descriptions of Chinese characters and their components, including stroke types, layout patterns, and indications of sound and meaning; 2) basic brush techniques; and 3) the social, cultural, historical, and philosophical underpinnings of Chinese calligraphy—all of which are crucial to understanding and appreciating this art form. Students practice brush writing as they progress from tracing to copying to free-hand writing. Model characters are marked to indicate meaning and stroke order, and well-known model phrases are shown in various script types, allowing students to practice different calligraphic styles. Beginners will find the author's advice on how to avoid common pitfalls in writing brush strokes invaluable. Chinese Writing and Calligraphy will be welcomed by both students and instructors in need of an accessible text on learning the fundamentals of the art of writing Chinese characters.

Self Instructional Manual for Cancer Registrars

Analytical chemists must use a range of statistical tools in their treatment of experimental data to obtain reliable results. Practical Statistics for the Analytical Scientist is a manual designed to help them negotiate the daunting specialist terminology and symbols. Prepared in conjunction with the Department of Trade and Industry's Valid Analytical Measurement (VAM) programme, this volume covers the basic statistics needed in the laboratory. It describes the statistical procedures that are most likely to be required including summary and descriptive statistics, calibration, outlier testing, analysis of variance and basic quality control procedures. To improve understanding, many examples provide the user with material for consolidation and practice. The fully worked answers are given both to check the correct application of the procedures and to provide a template for future problems. Practical Statistics for the Analytical Scientist will be welcomed by practising analytical chemists as an important reference for day to day statistics in analytical chemistry.

The Handbook of Sports Medicine and Science

Introduction to Mineralogy and Petrology, second edition, presents the essentials of both disciplines through an approach accessible to industry professionals, academic researchers, and students alike. This new edition emphasizes the relationship between rocks and minerals, right from the structures created during rock formation through the economics of mineral deposits. While petrology is classified on the lines of geological evolution and rock formation, mineralogy speaks to the physical and chemical properties, uses, and global occurrences for each mineral, emphasizing the need for the growth of human development. The primary goal is for the reader to identify minerals in all respects, including host-rocks, and mineral deposits, with additional knowledge of mineral-exploration, resource, extraction, process, and ultimate use. To help provide a comprehensive analysis across ethical and socio-economic dimensions, a separate chapter describes the hazards associated with minerals, rocks, and mineral industries, and the consequences to humanity along with remedies and case studies. New to the second edition: includes coverage of minerals and petrology in extra-terrestrial environments as well as case studies on the hazards of the mining industry. Addresses the full scope of core concepts of mineralogy and petrology, including crystal structure, formation and grouping of minerals and soils, definition, origin, structure and classification of igneous, sedimentary and metamorphic rocks. Features more than 250 figures, illustrations and color photographs to vividly explore the fundamental principles

of mineralogy and petrology Offers a holistic approach to both subjects, beginning with the formation of geologic structures that is followed by the hosting of mineral deposits and the exploration and extraction of lucrative, usable products that improve the health of global economies Includes new content on minerals and petrology in extraterrestrial environments and case studies on hazards in the mining industry

The County Families of the United Kingdom Or Royal Manual of the Titled and Untitled Aristocracy of Great Britain and Ireland

A balanced mechanics-materials approach and coverage of the latest developments in biomaterials and electronic materials, the new edition of this popular text is the most thorough and modern book available for upper-level undergraduate courses on the mechanical behavior of materials. To ensure that the student gains a thorough understanding the authors present the fundamental mechanisms that operate at micro- and nano-meter level across a wide-range of materials, in a way that is mathematically simple and requires no extensive knowledge of materials. This integrated approach provides a conceptual presentation that shows how the microstructure of a material controls its mechanical behavior, and this is reinforced through extensive use of micrographs and illustrations. New worked examples and exercises help the student test their understanding. Further resources for this title, including lecture slides of select illustrations and solutions for exercises, are available online at www.cambridge.org/97800521866758.

Ammunition and Explosives Safety Standards

There is a growing need for appropriate management of aquatic plants in rivers and canals, lakes and reservoirs, and drainage channels and urban waterways. This management must be based on a sound knowledge of the ecology of freshwater plants, their distribution and the different forms of control available including chemical and physical, and biological and biomanipulation. This series of papers from over 20 different countries was generated from the tenth in the highly successful series of European Weed Research Society symposia on aquatic plant management, this being the tenth. It provides a valuable insight into the complexities involved in managing aquatic systems, discusses state-of-the-art control techniques and deals with patterns of regrowth and recovery post-management. Careful consideration is given to the use of chemicals, a practice which has come under scrutiny in recent years. Underpinning the development of such control techniques is a growing body of knowledge relating to the biology and ecology of water plants. The authorship of the papers represents the collective wisdom of leading scientists and experts from fisheries agencies, river authorities, nature conservation agencies, the agrochemical industry and both governmental and non-governmental organisations.

A Thousand Ways to Please a Husband

From Lisa Birnbach, the author of *The Official Preppy Handbook*, comes *True Prep*, which looks at how the old guard of natural-fiber-loving, dog-worshipping, G&T-soaked preppies adapts to the new order of the Internet, cell phones, rehab, political correctness, reality TV, and . . . polar fleece.

Expanded Psionics Handbook

Explains how to create songs to be played on guitar, including advice on such basics of songwriting as structure, rhythm, melody, and lyrics.

Chinese Writing and Calligraphy

The most comprehensive source available on medium wave, shortwave, FM broadcast, and television broadcast information, this handbook continues to be the ultimate guide for the serious radio listener.

Practical Statistics for the Analytical Scientist

Project Management in Practice, 4th Edition focuses on the technical aspects of project management that are directly related to practice.

Introduction to Mineralogy and Petrology

Projects continue to grow larger, increasingly strategic, and more complex, with greater collaboration, instant feedback, specialization, and an ever-expanding list of stakeholders. Now more than ever, effective project management is critical for the success of any deliverable, and the demand for qualified Project Managers has leapt into nearly all sectors. Project Management provides a robust grounding in essentials of the field using a managerial approach to both fundamental concepts and real-world practice. Designed for business students, this text follows the project life cycle from beginning to end to demonstrate what successful project management looks like on the ground. Expert discussion details specific techniques and applications, while guiding students through the diverse skill set required to select, initiate, execute, and evaluate today's projects. Insightful coverage of change management provides clear guidance on handling the organizational, interpersonal, economic, and technical glitches that can derail any project, while in-depth cases and real-world examples illustrate essential concepts in action.

Mechanical Behavior of Materials

Handel's English church music spans the complete period of his active career in London: his first anthem and the Utrecht Te Deum were composed soon after his arrival in London, and his last works nearly 40 years later. The repertory, which includes the Coronation Anthem Zadok the Priest, forms one of the most impressive and engaging areas of Baroque church music. Most of it was stimulated by Handel's creative contact with the English Chapel Royal, a group of professional singers in a different tradition from the opera stars with whom he worked in the theatre. This is the first full-length study of Handel's English Church music. As well as dealing with the many aspects of the compositions themselves, it traces the background to the diverse items in the repertory, which relates directly to Handel's constant but changing relationship with the Hanoverian British royal family, and was affected by political and dynastic events. It also examines the circumstances of Handel's performances, the building which (unlike his theatres) still survives in London today.

Subject Catalog

Sir Ernest George (1839-1922) was one of England's greatest architects of the late 19th and early 20th centuries. He specialised in domestic work and was responsible for beautiful and imaginative houses in both town and country, and with his three successive partners, he carried out over 200 works both in Britain and abroad. He was also a watercolourist of considerable stature whose work in the medium was acclaimed in his own time. This richly illustrated book is the first study of the man and his work and will establish him as one of the major names in his profession. His life and career is fully documented, the buildings are described and a full catalogue of works is provided. A special feature is a study of pupils and assistants who passed through George's office, including several who went on to be famous and successful - Edwin Lutyens, Guy Dawber, J. J. Joass, R. Weir Schultz - and also the first woman to become a member of the Royal Institute of British Architects, Ethel Mary Charles. Hilary Grainger is a dean at the London College of Fashion and is the recognised expert on George and his architecture. She is also a leading authority on the architecture of cremation and is the chair of the Victorian Society.

Biology, Ecology and Management of Aquatic Plants

Thomas D. Rossing String instruments are found in almost all musical cultures. Bowed string instruments form the backbone of symphony orchestras, and they are used widely as solo instruments and in chamber music as well. Guitars are used universally in pop music as well as in classical music. The piano is probably the most versatile of all musical instruments, used widely not only in ensemble with other musical instruments but also as a solo instrument and to accompany solo instruments and the human voice. In this book, various authors will discuss the science of plucked, bowed, and hammered string instruments as well as their electronic counterparts. We have tried to tell the fascinating story of scientific research with a minimum of mathematics to maximize the usefulness of the book to performers and instrument builders as well as to students and researchers in musical acoustics. Sometimes, however, it is difficult to "translate" ideas from the exact mathematical language of science into words alone, so we include some basic mathematical equations to express these ideas. It is impossible to discuss all families of string instruments. Some instruments have been researched much more than others. Hopefully, the discussions in this book will help to encourage further scientific research by both musicians and scientists alike.

1.1 A Brief History of the Science of String Instruments

Quite a number of good histories of acoustics have been written (Lindsay 1966, 1973; Hunt 1992; Beyer 1999), and these histories include musical acoustics.

Music in Medieval Britain

This book is the most up to date and thorough account of the natural history of the plants that comprise the most important food crop on Earth, the grasses and grasslands.

True Prep

Pioneering manifesto by founder of "International School." Technical and aesthetic theories, views of industry, economics, relation of form to function, "mass-production split," and much more. Profusely illustrated.

The Spectator life by states manual

Mobilizing the Past is a collection of 20 articles that explore the use and impact of mobile digital technology in archaeological field practice. The detailed case studies present in this volume range from drones in the Andes to iPads at Pompeii, digital workflows in the American Southwest, and examples of how bespoke, DIY, and commercial software provide solutions and craft novel challenges for field archaeologists. The range of projects and contexts ensures that Mobilizing the Past for a Digital Future is far more than a state-of-the-field manual or technical handbook. Instead, the contributors embrace the growing spirit of critique present in digital archaeology. This critical edge, backed by real projects, systems, and experiences, gives the book lasting value as both a glimpse into present practices as well as the anxieties and enthusiasm associated with the most recent generation of mobile digital tools. This book emerged from a workshop funded by the National Endowment for the Humanities held in 2015 at Wentworth Institute of Technology in Boston. The workshop brought together over 20 leading practitioners of digital archaeology in the U.S. for a weekend of conversation. The papers in this volume reflect the discussions at this workshop with significant additional content. Starting with an expansive introduction and concluding with a series of reflective papers, this volume illustrates how tablets, connectivity, sophisticated software, and powerful computers have transformed field practices and offer potential for a radically transformed discipline.
