A social construction is something brought into existence by groups of people and is accepted as true by that group.

A type of economy in which industries and trades are controlled by private owners who produce goods and services for profits.

Social constructions are produced and maintained socially.

Social constructions are based on and maintained through trust.

The meaning and form of social constructions can transform throughout time based on negotiation and conflict.

Social constructions become visible when actively contested or questioned.

While social constructions and the meanings attached to it are created and maintained by humans, they help determine how people act.

Meanings, ideas, beliefs, or values that transcend the individual and exercise social control over that individual.

Argument Against Objective Reality
