Medical Surgical Nursing Exam 2 (62) - Medical Surgical Nursing Exam 2 (62) by Nursing Practice Exam 7,687 views 2 years ago 37 minutes - Take this free **Medical Surgical Nursing**, Exam to see what types of questions are on the **Medical Surgical Nursing**, Exam.

Medical-Surgical Nursing Exam 2.

Marco who was diagnosed with brain tumor was scheduled for craniotomy. In preventing the development of cerebral edema after surgery, the nurse should expect the use of

Halfway through the administration of blood, the female client complains of lumbar pain. After stopping the infusion Nurse Hazel should

Nurse Maureen knows that the positive diagnosis for HIV infection is made based on which of the following

Answer: B. These tests confirm the presence of HIV antibodies that occur in response to the presence of the human immunodeficiency virus (HIV)

Nurse Maureen is aware that a client who has been diagnosed with chronic renal failure recognizes an adequate amount of high-biologic-value protein when the food the client selected from the menu was

Kenneth who has diagnosed with uremic syndrome has the potential to develop complications. Which among the following complications should the nurse anticipates

A client is admitted to the hospital with benign prostatic hyperplasia, the nurse most relevant assessment would be

A client has undergone with penile implant. After 24 hrs of surgery, the client's scrotum was edematous and painful. The nurse should

Nurse hazel receives emergency laboratory results for a client with chest pain and immediately informs the physician. An increased myoglobin level suggests which of the following?

Nurse Maureen would expect the a client with mitral stenosis would demonstrate symptoms associated with congestion in the

A client has been diagnosed with hypertension. The nurse priority nursing diagnosis would be

Answer: A. Managing hypertension is the priority for the client with hypertension. Clients with hypertension frequently do not experience pain, deficient volume, or impaired skin integrity. It is the asymptomatic nature of hypertension that makes it so difficult to treat.

Nurse Hazel teaches the client with angina about common expected side effects of nitroglycerin including

The following are lipid abnormalities. Which of the following is a risk factor for the development of atherosclerosis and PVD?

Which of the following represents a significant risk immediately after surgery for repair of aortic aneurysm?

Nurse Josie should instruct the client to eat which of the following foods to obtain the best supply of Vitamin B12?

Karen has been diagnosed with aplastic anemia. The nurse monitors for changes in which of the following physiologic functions?

Lydia is scheduled for elective splenectomy. Before the clients goes to surgery, the nurse in charge final assessment would be

Answer: B. An elective procedure is scheduled in advance so that all preparations can be completed ahead of time. The vital signs are the final check that must be completed before the client leaves the room so that continuity of care and assessment is provided for

What is the peak age range in acquiring acute lymphocytic leukemia (ALL)?

Answer: A. The peak incidence of Acute Lymphocytic Leukemia (ALL) is 4 years of age. It is uncommon after 15 years of age.

Marie with acute lymphocytic leukemia suffers from nausea and headache. These clinical manifestations may indicate all of the following except

A client has been diagnosed with Disseminated Intravascular Coagulation (DIC). Which of the following is

Which of the following findings is the best indication that fluid replacement for the client with hypovolemic shock is adequate?

Which of the following signs and symptoms would Nurse Maureen include in teaching plan as an early manifestation of laryngeal cancer?

Karina a client with myasthenia gravis is to receive immunosuppressive therapy. The nurse understands that this therapy is effective because it

A female client is receiving IV Mannitol. An assessment specific to safe administration of the said drug is

Answer: C. The osmotic diuretic mannitol is contraindicated in the presence of inadequate renal function or heart failure because it increases the intravascular volume that must be filtered and excreted by the kidney

Patricia a 20 year old college student with diabetes mellitus requests additional information about the advantages of using a pen like insulin delivery devices. The nurse explains that the advantages of these devices over syringes includes

Answer: A. These devices are more accurate because they are easily to used and have improved adherence in insulin regimens by young people because the medication can be administered discreetly

A male client's left tibia was fractured in an automobile accident, and a cast is applied. To assess for damage to major blood vessels from the fracture tibia, the nurse in charge should monitor the client for

Answer: C. Damage to blood vessels may decrease the circulatory perfusion of the toes, this would indicate the lack of blood supply to the extremity

While performing a physical assessment of a male client with gout of the great toe, Nurse Vivian should assess for additional tophi (urate deposits) on the

Nurse Katrina would recognize that the demonstration of crutch walking with tripod gait was understood when the client places weight on the

Mang Jose with rheumatoid arthritis states, the only time I am without pain is when I lie in bed perfectly still. During the convalescent stage, the nurse in charge with Mang Jose should encourage

A male client has undergone spinal surgery, the nurse should

Marina with acute renal failure moves into the diuretic phase after one week of therapy. During this phase the client must be assessed for signs of developing

Nurse Judith obtains a specimen of clear nasal drainage from a client with a head injury. Which of the following tests differentiates mucus from cerebrospinal fluid (CSF)?

Answer: C. The constituents of CSF are similar to those of blood plasma. An examination for glucose content is done to determine whether a body fluid is a mucus or a CSF A CSF normally contains glucose.

A 22 year old client suffered from his first tonic-clonic seizure. Upon awakening the client asks the nurse, What caused me to have a seizure? Which of the following would the nurse include in the primary cause of tonic clonic seizures in adults more the 20 years?

Answer: B. Trauma is one of the primary cause of brain damage and seizure activity in adults. Other common causes of seizure activity in adults include neoplasms, withdrawal from drugs and alcohol, and vascular disease.

What is the priority nursing assessment in the first 24 hours after admission of the client with thrombotic CVA?

Nurse Linda is preparing a client with multiple sclerosis for discharge from the hospital to home. Which of the following instruction is most appropriate?

Answer: C. The nurse most positive approach is to encourage the client with multiple sclerosis to stay active, use stress reduction techniques and avoid fatigue because it is important to support the immune system while remaining active.

The nurse is aware the early indicator of hypoxia in the unconscious client is

Answer: D. Restlessness is an early indicator of hypoxia. The nurse should suspect hypoxia in unconscious client who suddenly becomes restless.

A client is experiencing spinal shock. Nurse Myrna should expect the function of the bladder to be which of the following?

Which of the following stage the carcinogen is irreversible?

Among the following components thorough pain assessment, which is the most significant?

Answer: D. Intensity is the major indicative of severity of pain and it is important for the evaluation of the treatment.

A 65 year old female is experiencing flare up of pruritus. Which of the client's action could aggravate the cause of flare ups?

Atropine sulfate (Atropine) is contraindicated in all but one of the following client?

Among the following clients, which among them is high risk for potential hazards from the surgical experience?

Nurse Jon assesses vital signs on a client undergone epidural anesthesia. Which of the following would the nurse assess next?

Nurse Katrina should anticipate that all of the following drugs may be used in the attempt to control the symptoms of Meniere's disease except

Which of the following complications associated with tracheostomy tube?

Nurse Faith should recognize that fluid shift in an client with burn injury results from increase in the Answer: C. In burn, the capillaries and small vessels dilate, and cell damage cause the release of a histamine-like substance. The substance causes the capillary walls to become more permeable and significant quantities of fluid are lost.

An 83-year-old woman has several ecchymotic areas on her right arm. The bruises are probably caused by

Nurse Anna is aware that early adaptation of client with renal carcinoma is

A male client with tuberculosis asks Nurse Brian how long the chemotherapy must be continued.

Nurse Brian's accurate reply would be

Answer: B. Tubercle bacillus is a drug resistant organism and takes a long time to be eradicated.

Usually a combination of three drugs is used for minimum of 6 months and at least six months beyond culture conversion

A client has undergone laryngectomy. The immediate nursing priority would be

Answer: A. Patent airway is the most priority; therefore removal of secretions is necessary

Question Bank in Mechanical Engineering

This book presents text on various topics of Mechanical Engineering in most concise and precise manner and is good for those preparing for competitive examinations and Interviews. All the relevant topics of Mechanical Engineering that are commonly Included in the syllabii of UPSC, State PSC, PSU, GATE and university curricula have been covered. The solved examples and objective type questions have been so chosen that they illustrate the subject matter and help understand the finer aspects of the subject. Attempt has been made to introduce learning through questions.

General Questions of Machine Design

Machine design is the single most important activity in the mechanical industries. Success or failure of a company has its roots in product design, whether it is done in-house or contracted out. It is here that manufacturing costs and profits are determined.

Engineering Mechanics

Engineering Mechanics has been designed as per updated and new syllabus of various technical universities and engineering colleges. The book systematically develops the concepts and principles essential for understanding the subject. The difficulties usually faced by new engineering students have been taken care of while preparing the book. A large number of numerical problems have been selected from university and competitive examination papers and question banks, properly graded, solved and arranged in various chapters. The present book has been divided in five parts: Two-Dimensional Force System Beams and Trusses Moment of Inertia Dynamics of Rigid Body Stress and Strain Analysis The highlights of the book are: Comparison tables and illustrative drawings Exhaustive question bank on theory problems at the end of every chapter A large number of solved numerical examples SI units used throughout

Basics of Mechanical Engineering

Basics of Mechanical Engineering systematically develops the concepts and principles essential for understanding engineering thermodynamics, mechanics and strength of materials. This book is meant for first year B.Tech students of various technical universities. It will also be helpful for candidates preparing for various competitive examinations. In Basics of Mechanical Engineering Each chapter includes problems selected from university examination papers and question banks. Exhaustive question bank on theory problems at the end of each chapter. Includes all supplementary material required by the students like steam tables, section modulus. A large number of illustrative diagrams support the text, wherever required. S.I. units used throughout. Each chapter has been summed up in easy to recall points.

English Mechanic and Mirror of Science

EBONY is the flagship magazine of Johnson Publishing. Founded in 1945 by John H. Johnson, it still maintains the highest global circulation of any African American-focused magazine.

Domestic Engineering and the Journal of Mechanical Contracting

Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle.

Engineering and Mining Journal

Effective from 2008-09 session, U.P.T.U. has introduced the subject of manufacturing processes for first year engineering students of all streams. This textbook covers the entire course material in a distilled form.

Mechanical World and Engineering Record

This report reviews engineering's importance to human, economic, social and cultural development and in addressing the UN Millennium Development Goals. Engineering tends to be viewed as a national issue, but engineering knowledge, companies, conferences and journals, all demonstrate that it is as international as science. The report reviews the role of engineering in development, and covers issues including poverty reduction, sustainable development, climate change mitigation and adaptation. It presents the various fields of engineering around the world and is intended to identify issues and challenges facing engineering, promote better understanding of engineering and its role, and highlight ways of making engineering more attractive to young people, especially women.--Publisher's description.

Engineering and Mining Journal

Monthly magazine devoted to topics of general scientific interest.

Ebony

Statistics and Probability for Engineering Applications provides a complete discussion of all the major topics typically covered in a college engineering statistics course. This textbook minimizes the derivations and mathematical theory, focusing instead on the information and techniques most needed and used in engineering applications. It is filled with practical techniques directly applicable on the job. Written by an experienced industry engineer and statistics professor, this book makes learning statistical methods easier for today's student. This book can be read sequentially like a normal textbook, but it is designed to be used as a handbook, pointing the reader to the topics and sections pertinent to a particular type of statistical problem. Each new concept is clearly and briefly described, whenever possible by relating it to previous topics. Then the student is given carefully chosen examples to deepen understanding of the basic ideas and how they are applied in engineering. The examples and case studies are taken from real-world engineering problems and use real data. A number of practice problems are provided for each section, with answers in the back for selected problems. This book will appeal to engineers in the entire engineering spectrum (electronics/electrical, mechanical, chemical, and civil engineering); engineering students and students taking computer science/computer engineering graduate courses; scientists needing to use applied statistical methods; and engineering technicians and technologists. * Filled with practical techniques directly applicable on the job * Contains hundreds of solved problems and case studies, using real data sets * Avoids unnecessary theory

Popular Mechanics

Provides a thorough explanation of the basic properties of materials; of how these can be controlled by processing; of how materials are formed, joined and finished; and of the chain of reasoning that leads to a successful choice of material for a particular application. The materials covered are grouped into four classes: metals, ceramics, polymers and composites. Each class is studied in turn, identifying the families of materials in the class, the microstructural features, the processes or treatments used to obtain a particular structure and their design applications. The text is supplemented by practical case studies and example problems with answers, and a valuable programmed learning course on phase diagrams.

The Engineer

The Journal of Refrigeration

Test Bank for Psychology

Psychology, Third Edition, builds upon the experience and reputations of Phil Zimbardo and Ann Weber with the addition of a new co-author, Bob Johnson, who has a wealth of teaching experience at the community college level. This briefer, less expensive book presents psychology in a meaningful, manageable format that focuses on the key questions and core concepts of psychology. Introductory psychology covers such a wide range of topics and issues that it becomes difficult for readers to see the forest for the trees. To make key psychological concepts more meaningful, the authors found inspiration in a classic chess study. This study showed that experts did no better than novices at remembering the location of pieces on a chess board when they were placed randomly. Only when the patterns represented actual game situations did they make sense and therefore become more easily memorable for the experts. Clearly, meaningful patterns are easier to remember and understand than random arrangements, and Psychology applies this by presenting the field of psychology in meaningful patterns to enhance comprehension. These concepts are then applied to readers' own lives, study skills, and the world around them. Finally, Psychology integrates a cross-cultural and multicultural perspective to make psychology meaningful for everyone. For anyone interested in Introductory Psychology.

Psychology

This test bank is designed to accompany the text.

Printed Test Bank Volumes 1 - 2 for Exploring Psychology 5e

This is a great psychometric collection and contains numerous tests and questionnaires. This volume provides psychology tests and questionnaires in below Category: Education.

Intro

A client was involved in a motor vehicular accident in which the seat belt was not worn. The client is exhibiting crepitus, decreased breath sounds on the left, complains of shortness of breath, and has a respiratory rate of 34 breaths per minute. Which of the following assessment findings would concern the nurse most? A. Temperature of 102 degrees F and productive cough B. ABG with PaO₂ of 92 and PaCO₂ of 40 mmHg C. Trachea deviating to the right D. Barrel-chested appearance

Thomas Elison is a 79 year old man who is admitted with a diagnosis of dementia. The doctor orders a series of laboratory tests to determine whether Mr. Elison's dementia is treatable. The nurse understands that the most common cause of dementia in this population is: A. AIDS B. Alzheimer's disease C. Brain tumors D. Vascular disease

A client with congestive heart failure has digoxin (Lanoxin) ordered everyday. Prior to giving the medication, the nurse checks the digoxin level which is therapeutic and auscultates an apical pulse. The apical pulse is 63 bpm for 1 full minute. The nurse should

Nurse Marian is caring for a client with a hiatal hernia, which the following should be included in her teaching plan regarding causes

Joseph has been diagnosed with hepatic encephalopathy. The nurse observes flapping tremors. The nurse understands that flapping tremors associated with hepatic encephalopathy are also known as Which of the following findings would strongly indicate the possibility of cirrhosis? A. dry skin B. hepatomegaly C. peripheral edema D. pruritus

Aling Puring has just been diagnosed with close-angle (narrow-angle) glaucoma. The nurse assesses the client for which of the following common presenting symptoms of the disorder? A.halo vision B.dull eye pain C.severe eye and face pain impaired night vision

What laboratory test is a common measure the renal function?

A nurse is caring for a patient with COPD. Which of the following interventions should be avoided to prevent exacerbation?

Which of the following is not a common symptom of meningitis?

Patients who undergo total hip replacement surgery need to follow specific precautions to ensure proper healing and to prevent dislocation of the new joint.

A patient with a history of hypertension is prescribed lisinopril. Which of the following statements is true about lisinopril?

Which of the following is not a typical side effect of chemotherapy?

A patient with a history of heart failure is prescribed digoxin. Which of the following is a sign of digoxin toxicity?

A patient with chronic obstructive pulmonary disease (COPD) is prescribed ipratropium bromide.

Which of the following is the correct administration technique for ipratropium bromide?

A patient with diabetes is prescribed metformin. Which of the following is a potential side effect of metformin?

Medical Surgical Nursing Exam 1 (61) - Medical Surgical Nursing Exam 1 (61) by Nursing Practice Exam 26,728 views 2 years ago 39 minutes - Take this free **Medical Surgical Nursing**, Exam to see what types of questions are on the **Medical Surgical Nursing**, Exam.

Mrs. Chua a 78 year old client is admitted with the diagnosis of mild chronic heart failure. The nurse expects to hear when listening to client's lungs indicative of chronic heart failure would be

Patrick who is hospitalized following a myocardial infarction asks the nurse why he is taking morphine. The nurse explains that morphine

Which of the following should the nurse teach the client about the signs of digitalis toxicity?

Nurse Trisha teaches a client with heart failure to take oral Furosemide in the morning. The reason for this is to help...

What would be the primary goal of therapy for a client with pulmonary edema and heart failure?

Answer: B. The primary goal of therapy for the client with pulmonary edema or heart failure is increasing cardiac output. Pulmonary edema is an acute medical emergency requiring immediate intervention

Nurse Linda is caring for a client with head injury and monitoring the client with decerebrate posturing. Which of the following is a characteristic of this type of posturing?

A female client is taking Cascara Sagrada. Nurse Betty informs the client that the following maybe experienced as side effects of this medication

Dr. Marquez orders a continuous intravenous nitroglycerin infusion for the client suffering from myocardial infarction. Which of the following is the most essential nursing action?

Answer: D. Administration of Intravenous Nitroglycerin infusion requires pump for accurate control of medication

During the second day of hospitalization of the client after a Myocardial Infarction. Which of the following is an expected outcome?

A 68 year old client is diagnosed with a right-sided brain attack and is admitted to the hospital. In caring for this client, the nurse should plan to

Nurse Liza is assigned to care for a client who has returned to the nursing unit after left nephrectomy. Nurse Liza's highest priority would be...

Answer: A. After nephrectomy, it is necessary to measure urine output hourly. This is done to assess the effectiveness of the remaining kidney also to detect renal failure early

A 64 year old male client with a long history of cardiovascular problem including hypertension and angina is to be scheduled for cardiac catheterization. During pre cardiac catheterization teaching, Nurse Cherry should inform the client that the primary purpose of the procedure is.....

During the first several hours after a cardiac catheterization, it would be most essential for nurse Cherry to...

Kate who has undergone mitral valve replacement suddenly experiences continuous bleeding from the surgical incision during postoperative period. Which of the following pharmaceutical agents should Nurse Aiza prepare to administer to Kate?

Answer: A. Protamine Sulfate is used to prevent continuous bleeding in client who has undergone open heart surgery.

In reducing the risk of endocarditis, good dental care is an important measure. To promote good dental care in client with mitral stenosis in teaching plan should include proper use of...

Answer: C. The use of electronic toothbrush, irrigation device or dental floss may cause bleeding of gums, allowing bacteria to enter and increasing the risk of endocarditis.

Among the following signs and symptoms, which would most likely be present in a client with mitral

gurgitation?

Kris with a history of chronic infection of the urinary system complains of urinary frequency and burning sensation. To figure out whether the current problem is in renal origin, the nurse should assess whether the client has discomfort or pain in the...
