Jim Fisk the Career of an Improbable Rascal - Scholar's Choice Edition

An “ambitious, thorough, supremely researched” (The Washington Post) biography of the extraordinary, tragic life of America’s twentieth president—James Garfield. In “the most comprehensive Garfield biography in almost fifty years” (The Wall Street Journal), C.W. Goodyear charts the life and times of one of the most remarkable Americans ever to win the Presidency. Progressive firebrand and conservative compromiser; Union war hero and founder of the first Department of Education; Supreme Court attorney and abolitionist preacher; mathematician and canalman; crooked election-fixed and clean-government champion; Congressional chieftain and gentleman-farmer; the last president to be born in a log cabin; the second to be assassinated. James Abram Garfield was all these things and more. Over nearly two decades in Congress during a polarized era—Reconstruction and the Gilded Age—Garfield served as a peacemaker in a Republican Party and America defined by divisions. He was elected to overcome them. He was killed while trying to do so. President Garfield is American history at its finest. It is about an impoverished boy working his way from the frontier to the Presidency; a progressive statesman, trying to raise a more righteous, peaceful Republic out of the ashes of civil war; the tragically imperfect course of that reformation, and the man himself; a martyr-President, whose death succeeded in nudging the country back to cleaner, calmer politics.

President Garfield

The remarkable career of one of America's greatest detectives—a story of murder, mayhem, and intrigue Philip Marlowe, Dirty Harry, and even Law & Order—none of these would exist as they do today were it not for the legendary career of nineteenth-century New York City cop Thomas Byrnes. From 1854 to 1895, Byrnes rose through the ranks of the city’s police department to become one of the most celebrated detectives in American history, a larger-than-life figure who paved the way for modern-day police methods, both good and bad. During the age of Gangs of New York, Byrnes solved many of the most sensational and high-profile cases in the city and the country. He captured Manhattan’s Jack the Ripper copy-cat killer; solved the murder of prostitute Maude Merrill, who was killed by her jealous lover—her own uncle; solved the largest bank heist in American history; arrested anarchist Emma Goldman for inciting a riot in Union Square; and accomplished much more. For both good and ill, according to the New York Times, Byrnes “shaped not just the New York City Detective Bureau but the template for detective work . . . in every modern American metropolis.” He not only pioneered crime scene investigation, but also perfected the brutal interrogation process called “the third degree.” He revolutionized the gathering of evidence and was the first to use mug shots and keep criminal records. But when Police Commissioner Theodore Roosevelt investigated the corruption that had plagued the department for decades, the man one prominent journalist had dubbed the “big policeman” was forced to resign. Bringing the Gilded Age to life as he did in his acclaimed King of Heists: The Sensational Bank Robbery of 1878 That Shocked America, J. North Conway narrates in thrilling, vivid detail the crimes, murders, corruption, and gritty police work associated with the father of the American detective.

Big Policeman

"I got to be a millionaire afore I know'd it hardly," remarked the Wall Street financier Daniel Drew (1797-1879). An uneducated farm boy from Putnam County, New York, he became in turn a successful cattle drover, a circus clown, tavern keeper, a shrewd Hudson River steamboat operator, and an unscrupulous speculator. As the colorful "Uncle Daniel" of Wall Street-his whiskered face seamed with wrinkles and twinkling with steel-gray eyes—time and again he disrupted the financial markets with manipulations whereby he either won or lost millions of dollars. Having "got religion" upon hearing a scary hell-fire sermon at the age of fourteen, Drew was also a fervent Methodist. Rumors of his financial operations—epic struggles that pitted him against Cornelius Vanderbilt, Jay Gould, and Jim Fisk, and that subjected him to threats of arrest and even kidnapping, and on one occasion to a most undignified flight from the state-baffled and disturbed the Methodists, who admittedly had little grasp of Wall Street but knew firsthand Brother Drew's tearful repentance at prayer meetings and his generosity in founding churches and seminaries. With its dual commitment to religion and rascality, Drew's career is a rich study in contradictions, an exciting chronicle of high drama and low comedy capped by bankruptcy. To understand Drew in his complexity, the author argues, is to get a grip on the heady and exploitative age that produced him—the yesterday of "smartness" and "go ahead" that helped engender the America

of today. Based on primary sources, this is the first full-fledged biography of Drew, who hitherto has been known chiefly through a fictionalized and fraudulent account of 1910.

The United States Independent Treasury System

Covering an exhaustive range of information about the five boroughs, the first edition of *The Encyclopedia of New York City* was a success by every measure, earning worldwide acclaim and several awards for reference excellence, and selling out its first printing before it was officially published. But much has changed since the volume first appeared in 1995: the World Trade Center no longer dominates the skyline, a billionaire businessman has become an unlikely three-term mayor, and urban regeneration—Chelsea Piers, the High Line, DUMBO, Williamsburg, the South Bronx, the Lower East Side—has become commonplace. To reflect such innovation and change, this definitive, one-volume resource on the city has been completely revised and expanded. The revised edition includes 800 new entries that help complete the story of New York: from Air Train to E-ZPass, from September 11 to public order. The new material includes broader coverage of subject areas previously underserved as well as new maps and illustrations. Virtually all existing entries—spanning architecture, politics, business, sports, the arts, and more—have been updated to reflect the impact of the past two decades. The more than 5,000 alphabetical entries and 700 illustrations of the second edition of *The Encyclopedia of New York City* convey the richness and diversity of its subject in great breadth and detail, and will continue to serve as an indispensable tool for everyone who has even a passing interest in the American metropolis.

The Money Game in Old New York

Presents an alphabetically-arranged reference to the history of business and industry in the United States. Includes selected primary source documents.

The Encyclopedia of New York City

Few scenes capture the American experience so eloquently as that of a lonely train chugging across the vastness of the Great Plains, or snaking through tortuous high mountain passes. Although this vision was eclipsed for a time by the rise of air travel and trucking, railroads have enjoyed a rebirth in recent years as profitable freight carriers. A fascinating account of the rise, decline, and rebirth of railroads in the United States, John F. Stover's *American Railroads* traces their history from the first lines that helped eastern seaports capture western markets to today's newly revitalized industry. Stover describes the growth of the railroads' monopoly, with the consequent need for state and federal regulations; relates the vital part played by the railroads during the Civil War and the two World Wars; and charts the railroads' decline due to the advent of air travel and trucking during the 1950s. In two new chapters, Stover recounts the remarkable recovery of the railroads, along with other pivotal events of the industry's recent history. During the 1960s declining passenger traffic and excessive federal regulation led to the federally-financed creation of Amtrak to revive passenger service and Conrail to provide freight service on bankrupt northeastern railroads. The real savior for the railroads, though, proved to be the Staggers Rail Act of 1980, which brought prosperity to rail freight carriers by substantially deregulating the industry. By 1995, renewed railroad freight traffic had reached nearly twice its former peak in 1944. Bringing both a seasoned eye and new insights to bear on one of the most American of industries, Stover has produced the definitive history of railroads in the United States.

Encyclopedia of American Business History

Essays in Biography is a play on words conveying Carl Rollyson's attempt to explore the nature of biography in pieces about the history of the genre and in portrayals of biographers (Plutarch, Leon Edel, and W. A. Swanberg), literary figures (Lillian Hellman, Jack London), philosophers and critics (Leo Strauss and Hippolyte Taine), political figures (Winston Churchill and Napoleon), and artists (Rembrandt and Rubens). An essay in biography, Rollyson argues, is an effort to comprehend a life that is inherently incomplete and subject to revision. Many of the facts about a biographical subject's life that are blandly presented in reference books have been discovered by biographers at great cost to their reputations. With the history of biography as a censored genre in mind, he encourages readers of biography to look critically at the biographies they read—no matter whether those biographies are book-length narratives or short encyclopedia entries. Many of the pairings in *Essays in Biography* are meant to evoke Plutarch's presentation of "parallel lives." The biographical essay, Rollyson concludes,

is a unique form of knowledge, one that modern critics have devalued by trying to separate the creator from his creation.

American Railroads

A lively survey of the railroad industry by the field's leading historian.

Essays in Biography

At the beginning of the nineteenth century, New York City was an undistinguished town, competing with Philadelphia and Boston to be America's dominant port city. Just two generations later, it had built itself into the country's powerhouse center of trade and finance, rivaled only by London as financial capital of the world. In *Capital City*, Thomas Kessner tells the story of this remarkable transformation. With the advantages of its famous harbor and the opening of the Erie Canal in 1825, New York became the chief commercial center for the growing nation. As the shipping industry prospered, capital accumulated, and a growing banking center emerged, New York went on to finance the Union cause during the Civil War, open the West to development, and consolidate the national railroad system. The city's energy and opportunity attracted ambitious men from all over the country whose names became synonymous with big business: Vanderbilt, Carnegie, Rockefeller, and Morgan. New York's banks set the interest rates for the nation, its stock exchange fixed the price of securities, its investors transformed American business from family-owned enterprises into modern corporations, and its growing political clout catapulted public figures, such as Samuel Tilden and Teddy Roosevelt, onto the national stage. Combining political and urban history with a colorful cast of characters, *Capital City* chronicles how Gotham's Gilded Age reshaped the metropolis and the nation as it molded our present-day economy.

Unfinished Business

No detailed description available for "Complete Biographical Encyclopedia of Pulitzer Prize Winners 1917 - 2000".

Capital City

The School of Journalism at Columbia University has awarded the Pulitzer Prize since 1917. Nowadays there are prizes in 21 categories from the fields of journalism, literature and music. The Pulitzer Prize Archive presents the history of this award from its beginnings to the present: In parts A to E the awarding of the prize in each category is documented, commented and arranged chronologically. Part F covers the history of the prize biographically and bibliographically. Part G provides the background to the decisions.

Panic on Wall Street

An entertaining, deeply informative explanation of how high-level financial crimes work, written by an industry insider who's an expert in the field. The way most white-collar crime works is by manipulating institutional psychology. That means creating something that looks as much as possible like a normal set of transactions. The drama comes later, when it all unwinds. Financial crime seems horribly complicated, but there are only so many ways you can con someone out of what's theirs. In *Lying for Money*, veteran regulatory economist and market analyst Dan Davies tells the story of fraud through a genealogy of financial malfeasance, including: the Great Salad Oil swindle, the Pigeon King International fraud, the fictional British colony of Poyais in South America, the Boston Ladies' Deposit Company, the Portuguese Banknote Affair, Theranos, and the Bre-X scam. Davies brings new insights into these schemes and shows how all frauds, current and historical, belong to one of four categories ("long firm," counterfeiting, control fraud, and market crimes) and operate on the same basic principles. The only elements that change are the victims, the scammers, and the terminology. Davies has years of experience picking the bones out of some of the most famous frauds of the modern age. Now he reveals the big picture that emerges from their labyrinths of deceit and explains how fraud has shaped the entire development of the modern world economy.

Complete Biographical Encyclopedia of Pulitzer Prize Winners, 1917-2000

Volume III of Mark Twain's notebooks spans the years 1883 to 1891, a period during which Mark Twain's personal fortunes reached their zenith, as he emerged as one of the most successful authors and publishers in American literary history. During these years *Life on the Mississippi*, *Adventures of*

Huckleberry Finn, and a Connecticut Yankee in King Arthur's Court appeared, revealing the diversity, depth, and vitality of Mark Twain's literary talents. With his speeches, his public performances, and his lecture tour of 1884/1885, he became the most recognizable of national figures. At the same time, Mark Twain's growing fame and prosperity allowed him to plunge deeply into the business world, a sphere not suited to his erratic energies. He created the subscription publish firm of Charles L. Webster & Company, Which published the most profitable book of its time, the Personal Memoirs of U.S. Grant. And he became the primary financial support for the ingenious but imperfectible Paige typesetter. Within a few years both the publishing company and the typesetter had taxed Mark Twain's patience, and pocket, beyond endurance. The near bankruptcy of the publishing firm and the debacle of the typesetter scheme finally resulted in 1891 in a drastic decision--to leave the house in Hartford, Connecticut, which had long been the symbol of Mark Twain's rising fortunes and idyllic family life, and move to Europe for an indefinite period in the hope of reducing the family's living expenses. The Clemens family would never return to the Hartford house, and the European stay would lengthen into an almost unbroken nine years of exile. Mark Twain's notebooks permit an intimate view of this turbulent period, whose triumphs were tempered by intimations of financial disaster and personal bitterness.

Biography / Autobiography Awards 1917-1992

While president of Aetna Life from 1879 to 1922, Morgan Bulkeley served four terms as mayor of Hartford, two terms as Connecticut's governor, and one term as a United States senator. His friends and business and political acquaintances were a who's who of the Gilded Age: Samuel Clemens, J. P. Morgan, Samuel and Elizabeth Colt, Harriet Beecher Stowe, Leland Stanford, Charles Crocker, Albert Spalding, General Sherman, Oliver Wendell Holmes, Katherine Hepburn, as well as every president from Ulysses Grant to Warren Harding. In 1874 Bulkeley formed the Hartford Dark Blues who soon joined the unruly National Association, antecedent of the National League. He served as the league's first president for a year, and was later elected to the Baseball Hall of Fame in Cooperstown. It was during Bulkeley's controversial "holdover" term as governor that he earned the nickname "Crowbar Governor." He used a crowbar to remove a lock that had been placed on his office door after refusing to vacate the governor's chambers on a technicality. Written in classic storyteller fashion, and augmented by copious research, Crowbar Governor offers readers a privileged glimpse into life and politics in Connecticut during the Gilded Age. Ebook Edition Note: Eight images from the Connecticut Historical Society have been redacted.

Lying for Money

Americans as a whole view themselves as reasonably prudent and sober people when it comes to matters of money, reflecting the puritan roots of the earliest European settlers. Yet as a community, we also seem to believe that we are entitled to a lifestyle that is well-beyond our current income, a tendency that goes back to the earliest days of the United States and particularly to get rich quick experiences ranging from the Gold Rush of the 1840s to the real estate bubble of the early 21st Century. Inflated examines this apparent conflict and makes the argument that such a world view is so ingrained in us that to expect the United States to live in a "deflated" world is simply unrealistic. It skillfully seeks to tell the story of, money inflation and public debt as enduring (and perhaps endearing) features of American life, rather than something we can one day overcome as our policy makers constantly promise. Features interviews with today's top financial industry leaders and insiders. Offer a glimpse into the future of the Federal Reserve and the role it will play in the coming years Examines what the future may hold for the value of the U.S. dollar and the real incomes of future generations of Americans The gradual result of the situation we find ourselves in will inevitably lead to inflation, loss of economic opportunity, and a decline in the value of the dollar. This book will show you why, and reveal how we might be able to deal with it.

Mark Twain's Notebooks & Journals, Volume III

First published in 1972, The Great Bridge is the classic account of one of the greatest engineering feats of all time. Winning acclaim for its comprehensive look at the building of the Brooklyn Bridge, this book helped cement David McCullough's reputation as America's preeminent social historian. Now, The Great Bridge is reissued as a Simon & Schuster Classic Edition with a new introduction by the author. This monumental book brings back for American readers the heroic vision of the America we once had. It is the enthralling story of one of the greatest events in our nation's history during the Age of Optimism -- a period when Americans were convinced in their hearts that all great things were

possible. In the years around 1870, when the project was first undertaken, the concept of building a great bridge to span the East River between the great cities of Manhattan and Brooklyn required a vision and determination comparable to that which went into the building of the pyramids. Throughout the fourteen years of its construction, the odds against the successful completion of the bridge seemed staggering. Bodies were crushed and broken, lives lost, political empires fell, and surges of public emotion constantly threatened the project. But this is not merely the saga of an engineering miracle: it is a sweeping narrative of the social climate of the time and of the heroes and rascals who had a hand in either constructing or obstructing the great enterprise. Amid the flood of praise for the book when it was originally published, *Newsday* said succinctly "This is the definitive book on the event. Do not wait for a better try: there won't be any."

Crowbar Governor

Perfect for David McCullough fans and history lovers alike, this eBook boxed set features all of his bestselling titles, from 1776 to Mornings on Horseback. This e-book box set includes all of David McCullough's bestselling backlist titles: · 1776: The riveting story of George Washington, the men who marched with him, and their British foes in the momentous year of American independence. · Brave Companions: Profiles of exceptional men and women who shaped history, among them Alexander von Humboldt, Harriet Beecher Stowe, and Charles and Anne Lindbergh. · The Great Bridge: The remarkable, enthralling story of the planning and construction of the Brooklyn Bridge, which linked two great cities and epitomized American optimism, skill, and determination. · John Adams: The magisterial, Pulitzer Prize-winning biography of the independent, irascible Yankee patriot, one of our nation's founders and most important figures, who became our second president. · The Johnstown Flood: The classic history of an American tragedy that became a scandal in the age of the Robber Barons, the preventable flood that destroyed a town and killed 2,000 people. · Mornings on Horseback: The brilliant National Book Award-winning biography of young Theodore Roosevelt's metamorphosis from sickly child to a vigorous, intense man poised to become a national hero and then president. · Path Between the Seas: The epic National Book Award-winning history of the heroic successes, tragic failures, and astonishing engineering and medical feats that made the Panama Canal possible. · Truman: The Pulitzer Prize-winning biography of Harry Truman, the complex and courageous man who rose from modest origins to make momentous decisions as president, from dropping the atomic bomb to going to war in Korea. · Special Bonus: The Course of Human Events: In this Jefferson Lecture in the Humanities, David McCullough draws on his personal experience as a historian to acknowledge the crucial importance of writing in history's enduring impact and influence, and he affirms the significance of history in teaching us about human nature through the ages.

Inflated

From New York Times bestselling author David McCullough, a special eBook boxed set features books that study key points of American history. The David McCullough Great Moments in History e-book box set includes the following McCullough classics: · 1776: The riveting story of George Washington, the men who marched with him, and their British foes in the momentous year of American independence. · The Johnstown Flood: The classic history of an American tragedy that became a scandal in the age of the Robber Barons, the preventable flood that destroyed a town and killed 2,000 people. · Path Between the Seas: The epic National Book Award-winning history of the heroic successes, tragic failures, and astonishing engineering and medical feats that made the Panama Canal possible. · The Great Bridge: The remarkable, enthralling story of the planning and construction of the Brooklyn Bridge, which linked two great cities and epitomized American optimism, skill, and determination. · Special Bonus: The Course of Human Events: In this Jefferson Lecture in the Humanities, David McCullough draws on his personal experience as a historian to acknowledge the crucial importance of writing in history's enduring impact and influence, and he affirms the significance of history in teaching us about human nature through the ages.

The Great Bridge

More than a century ago over 200 leading lawyers met in a schoolroom on Fifth Avenue and Twenty-Sixth Street to organize the Association of the Bar of the City of New York. They were hot with reform and with the sting of professional shame. Boss Tweed and his cronies were not only robbing the city's treasury, but, worse, were also corrupting the courts and judges. Boss Tweed and his gang were routed but not without a long struggle and the help of many others in the city. Since that historical victory,

the Association has taken up other "causes and conflicts," sometimes with wide success, sometimes failing, but continuing a wide variety of activities with unabated zeal. George Martin tells of these struggles in this volume. It is the story of the Association through times of turbulence and times of trouble, including the famous March on Washington, the toppling of Mayor Jimmie Walker under the Judge Seabury investigation, and the Joseph McCarthy Era. George Martin has brought these great events and a number of no less interesting footnotes to history alive in *Causes and Conflicts* through these many vignettes about the Associations' leaders.

David McCullough Library E-book Box Set

From Pulitzer Prize-winner Michael Hiltzik, the epic tale of the clash for supremacy between America's railroad titans.

David McCullough Great Moments in History E-book Box Set

First published in 1992, *The New York Stock Exchange* is an informative library resource. The book begins with a history of the stock exchange, and offers a series of annotated bibliographies devoted to dictionaries and general guides, directories, bibliographies, general histories, and statistical sources. The book provides important coverage of the stock market crashes of 1929 and 1987 and the appendices offer a useful collection of data, including a directory of serial publications, listings of abstracts and indexes, online databases, and CD-ROM products. This book will be of interest to libraries and to researchers working in the field of economics and business.

A Lost Heroine of the Confederacy

Calixa Lavallée, the composer of "O Canada," was the first Canadian-born musician to achieve an international reputation. While primarily remembered for the national anthem, Lavallée and his work extended well beyond Canada, and he played a multitude of roles in North American music as a composer, conductor, administrator, instrumentalist, educator, and critic. In *Anthems and Minstrel Shows*, Brian Thompson analyzes Lavallée's music, letters, and published writings, as well as newspapers and music magazines of the time, to provide a detailed account of musical life in nineteenth-century North America and the relationship between music and nation. Leaving Quebec at age sixteen, Lavallée travelled widely for a decade as musical director of a minstrel troupe, and spent a year as a bandsman in the Union Army. Later, as a performer and conductor, he built a repertoire that prepared audiences for the intellectually challenging music of European composers and new music by his US contemporaries. His own music extended from national songs to comic operas, and instrumental music, as he shifted between the worlds of classical and popular music. Previously portrayed as a humble French Canadian forced into exile by ignorance and injustice, Lavallée emerges here as ambitious, radical, bohemian, and fully engaged with the musical, social, and political currents of his time. While nationalism and nation-building are central to this story, *Anthems and Minstrel Shows* asks to which nation – or nations – Lavallée and "O Canada" really belong.

Causes and Conflicts

Though reviled for more than a century as Wall Street's greatest villain, Jay Gould was in fact its most original creative genius. Gould was the robber baron's robber baron, the most astute financial and business strategist of his time and also the most widely hated. In *Dark Genius of Wall Street*, acclaimed biographer Edward J. Renehan, Jr., combines lively anecdotes with the rich social tapestry of the Gilded Age to paint the portrait of the most talented financial buccaneer of his generation -- and one of the inventors of modern business.

The Big Board

The volumes in this set, originally published between 1970 and 1996, draw together research by leading academics in the area of economic and financial markets, and provide a rigorous examination of related key issues. The volumes examine the stock exchange, capital cities as financial centres, international capital, the financial system, bond duration, security market indices and artificial intelligence applications on Wall Street, whilst also exploring the general principles and practices of financial markets in various countries. This set will be of particular interest to students of economics and finance respectively.

Stories of two men named Henry who loved Florida and built railroads which brought growth and development to Florida.

The Two Henrys

Stories of two men named Henry who loved Florida and built railroads which brought growth and development to Florida.

Henry Flagler, Builder of Florida

An exciting biography about the man who changed Florida's east coast with his hotels and his Florida East Coast Railway. Henry Morrison Flagler was already a millionaire when he first visited Florida in 1878. He liked what he saw. He came back and built railroads along the east coast so that others could more easily come. And he built grand hotels so that those who came had a beautiful place to stay. By the end of his long and productive life, he had built a railroad all the way to the very end of the Keys. It arrived in Key West in 1912. Henry Flagler was very determined and practical. He met all the great challenges he set for himself. Ages 9-12 Next in series > > See all of the books in this series

Marjory Stoneman Douglas and the Florida Everglades

Young adult biography of the Florida author and naturalist who wrote *Everglades: River of Grass*

Marjorie Kinnan Rawlings and the Florida Crackers

Marjorie Kinnan Rawlings grew up loving to write and hoping to become an author. Later she moved to Florida, where she lived out in the country at Cross Creek in an area called the Big Scrub. She met the people who lived there, the so-called Crackers. Their simple way of life fascinated her, so she wrote stories about them. One of her books, called *The Yearling*, was about a boy and a pet deer. This book won the Pulitzer Prize for fiction. Her dream of becoming a famous writer had come true. Ages 9-12 Next in series > > See all of the books in this series

Climate Change and Sea Level Rise in South Florida

South Florida is frequently cited as the part of the United State of America as most susceptible to the devastation accompanying sea level rise. Several scholarly studies have shown the negative impact of coastal location in Florida on housing values. Are the residents of South Florida concerned? Is susceptibility to sea level rise actually affecting the housing market in terms of demand, the availability of home mortgages, or house prices? Are people living at particular risk from sea level rise aware of this risk and more open to new information about climate change? Do they support policies and laws to mitigate the pace and extent of climate change? Answers to these questions are not only of general interest, but they are also key to our understanding of the human dimensions of this problem. This book describes the results of a detailed survey in which respondents viewed a local map displaying flooding to their own community that would result from a Category 3 hurricane in 2033. It discusses political party identification and ideology that has an overwhelming impact in shaping views about sea level rise and climate change. This book has enormous implications for the effectiveness of communicating risk information. The text is important if we, as a nation, are to design communication strategies that will lead to broader policy to combat or mitigate this risk.

Ponce de Leon and the Discovery of Florida

Juan Ponce de Leon was a young soldier in Spain when Christopher Columbus made his first voyage to the New World. De Leon accompanied him on his second voyage, and later became Governor of Puerto Rico. On voyages of his own, he explored other islands and discovered an even larger land—Florida. This biography captures the excitement of finding a "new world."

John and William Bartram

A juvenile biography of father and son, John and William Bartram, naturalists who lived in the late 18th and early 19th centuries in America. The Bartrams were America's first native botanists, father and son travelers, plant hunters, and master gardeners. They traveled the east coast and observed and wrote about the nature they found. Their story is full of adventure and curiosity. Their interests took them on wide travels, including through Florida in 1774. William Bartram's most famous book is *Travels*, which

is of particular interest for its early description and drawings of Florida. His book is an important part of Florida's early records. This is seventh book in Pineapple Press's Young Readers series of biographies of famous people who influenced Florida. Next in series > > See all of the books in this series

Marjorie Kinnan Rawlings and the Florida Crackers

Marjorie Kinnan Rawlings worked hard to become a published author, and her efforts finally paid off when she moved to Cross Creek and met the Florida Crackers.

The Railroad Grows Into an Industry (1840-1850)

Prior to the 1820s, the main form of commercial transportation in America was steamboats, which were able to move large quantities of freight and passengers. When the first railroads were built, they were initially seen as a novelty. But a handful of visionaries believed that railroads could transform the way business was conducted and create new opportunities for both established companies and independent entrepreneurs. In the 1840s and the 1850s, the railroad industry would experience tremendous growth and become the primary means of moving goods throughout the United States. Expansion of the rail system stimulated the economy, promoted manufacturing, and turned railroads into one of the most valuable industries in the world, making their owners millionaires and industrial-age power brokers in the process. Railroads also helped make America one of the most dominant economic powers in the world.

The Three Marjories

Thirteen-year-old Bella wants to be a lector just like her grandfather, who sits on a special platform in the cigar factory, reading great novels, the newspaper, and union news to workers as they roll the cigars. Being a lector is an important role in their immigrant community. But the hard times of the Depression mean that Bella must go to work in the factory; her hope of getting the education a lector needs seems impossible. Meanwhile, the factory workers and owners clash. People lose jobs, innocent workers are arrested, and the Ku Klux Klan prowls the area. And then there are those amazing new radios showing up all over town. Could the radio take the place of the lector? Bella must decide her own future and help her people preserve their history. Bella's lively, warmhearted story captures the color and flavor of Ybor City as it explores an intriguing part of our American history.

El Lector

Kelly Reynolds follows Henry Plant through some of the most exciting days in America's history, when the communication revolution truly began, and when hard-won advances in transportation helped heal a nation torn by bitter division and strife. *Henry Plant: Pioneer Empire Builder* tells the story of a man who made doing business a daily adventure, and who made his own and everybody's dreams come true. This book, the first modern biography of the founder, provides the inside story on the often risky building and consolidation of the ultimately triumphant Plant System.

Henry Plant

A landmark work on one of the most important but least-written-about Indian wars, *Hunted Like a Wolf* chronicles the Second Seminole War. From 1835 to 1842, Washington, D.C. waged a violent war upon the Seminoles and their allies in Florida, using any measure, including treachery and fraud, to drive them from their lands. Respected historian Milton Meltzer explores the choices facing the Seminoles as whites gradually encroached on their land, as well as the sacrifices they made in order to resist. The Second Seminole War was a war over slavery as well as territory, for living among the Seminoles were black men and women—some runaway slaves, some free people—willing to fight alongside their Indian brothers for the territory they considered their own. A ragged, starving handful of guerrillas, the Seminoles and blacks managed to resist an invading American army ten times their number, defying the skill of six eminent generals. The war was not only the longest of the Indians wars but also the costliest in resources and human life. In the story of the Seminole War, we can see at work all the forces of America's terrible racist history, the consequences of which we are only beginning to understand.

Hunted Like a Wolf

All Cubans agree on one thing: José Martí is the "Father of Cuba." He was and remains Cubas national hero. Cubans from all walks life simply call him "The Apostle." Poet, political philosopher, statesman,

novelist, journalist, translator, and firebrand revolutionary, Martí was the driving force behind the final Cuban insurrection against Spanish rule in the late nineteenth century. This young adult biography begins with Martí's origins in the mid-nineteenth century Cuba, which was then among the last of Spain's New World possessions. Next, the narrative traces his one-track mission into adulthood as a firebrand, intellectual radical who dies a martyr's death while fighting in Cuba. Martí's remarkable talents emerged in his boyhood. A revulsion against slavery in Cuba and Spain's oppressive rule evoked powerful moral response in him. Havana's revolutionary circles drew him in and turned him into a radical in his early teens. Unjustly convicted, imprisoned, and exiled for treason against Spain at 17, he dedicated his life to the ousting Spanish from Cuba. As an adult, he lived as an expatriate in four nations, honing his skills as journalist, poet, political thinker, and organizer of revolution. More than any other Cuban he motivated the Cuban émigré population, especially in Florida, to take up arms against Spain. He conducted much of the war planning, fund raising, and troop-recruiting in Florida, including cities such as Key West, Tampa, Jacksonville, and Ocala. The book relates Martí's personal story—both his strengths and weaknesses—culminating in a depiction of how at 42 he was killed in action and became a martyr. His legacy remains powerful. Today, both Castro's regime and his opponents in exile claim Martí as their own. For the past 120 years, his standard for leadership has endured. No other Cuban reaches his stature. No one probably ever will.

Jose Marti

In *Old Neb and The Lighthouse Treasure*, it is the 1930s and we meet Neb, a horse who belongs to himself, and two families living on a white-beached island jewel set in the blue water of the Gulf of Mexico. Papa, the lighthouse keeper on St. George Island, does his best to help Elizabeth Ann and her friends come of age. He balances keeping them safe with allowing them to learn about life in a world filled with beauty and, sometimes, a little too much adventure. In this first *Old Neb* story, the three children spend a summer searching for pirate treasure. This is a charming adventure story for middle grade readers set at an appealing time and place. Next in series > > See all of the books in this series

Old Neb and The Lighthouse Treasure

Florida is lucky to have had three women — three Marjories — speaking out about saving Florida's natural environment. Marjory Stoneman Douglas is known as the “Mother of the Everglades.” She wrote *The Everglades: River of Grass*, the seminal and now classic book on this unique region of south Florida. She was a tireless campaigner for the environment and helped make the Everglades a national park. Marjorie Kinnan Rawlings is best known for her books set in Florida: *The Yearling*, *Cross Creek*, and *South Moon Under*, all set in the then-remote wilderness of central Florida. Her very popular books brought the world's attention to the importance of the culture and natural environment of this region. Marjorie Harris Carr fought to save the Oklawaha River by challenging the building of the Cross Florida Barge Canal. She argued that this would cut the ecology of the state in two, particularly ruinous for the wildlife. Now there is the Marjorie Harris Carr Cross Florida Greenway, which serves as a bridge for wildlife through developed areas and over I-75.

The Three Marjories

From reviews of the first edition: "A succinct and informed account of [Flagler's] leadership in transforming Florida's economy."--*American Historical Review* "An important contribution to the understanding of Standard Oil's extended partnership and how the personal desire of Flagler led to the early development of Florida's Atlantic Coast."--*The Historian* Henry M. Flagler (1830-1913), the ambitious Gilded Age tycoon who designed and built much of Florida's fashionable east coast, rode to success on the rails. As John D. Rockefeller's closest adviser in the 1870s, Flagler helped assemble the Standard Oil empire. In this thoroughly researched biography, Akin shows that Flagler understood early in his career that cheap freight rates determined industrial profits. Portraying Flagler as an aggressive entrepreneur, Akin documents his shrewd negotiations to obtain reduced rates, rebates, and drawbacks from the railroads, thus assuring Standard Oil's national domination over oil transportation costs. Flagler drove himself as hard as he drove a bargain, obsessed with the desire to create a monument to himself that he called "my domain." His legacy was no less than modern Florida. In 1885, at the age of fifty-five, he turned his attention away from Standard Oil and began construction of the Ponce de León luxury hotel in St. Augustine, the city where he had honeymooned with his second wife. Realizing he could never fill its rooms unless better transportation with the North was available, he embarked on the second railroad venture of his lifetime, creation of the Florida East Coast Railway. Flagler's resort empire

eventually included The Breakers in Palm Beach and the Royal Palm in Miami; his Atlantic coast railroad extended all the way to Key West, an engineering achievement that was called the "eighth wonder of the world." By the beginning of the twentieth century, Flagler dominated not just the resort and railroad industries in Florida but steamship and agricultural operations, too. Florida politicians gave his projects preferential treatment, even changing the state's divorce law so he could marry for a third time. Woven into this biography are details about Flagler's family, personality, three marriages, alienation from his only son, and devotion to the Presbyterian church--copy that fueled society gossip columns from New York to Palm Beach for decades. Edward N. Akin, author of *Mississippi: An Illustrated History* and other works on southern history, taught at Mississippi College in Clinton. His biography of Henry Flagler won the 1985 Phi Alpha Theta manuscript prize.

Aviation in the U.S. Army, 1919-1939

Florida's railroad heritage began in the 1830s amidst Native American upheaval and territorial colonization. Surpassing waterways as the primary mode of transport, the "Iron Horse" linked practically every town and city, carried tourists and locals, and ably conveyed the wealth of Florida's mines, factories, forests, groves, and farms. Nearly 175 years later, railroads still remain a dependable source of transport within the Sunshine State.

Flagler

Tells the story of the Connecticut Yankee who built an empire of railroads, steamships, communication centers, and luxury hotels from Charleston to Tampa Bay, to Mobile, to Key West, to Cuba.

A Short History of Florida Railroads

All aboard for the history of one of the most audacious and innovative railroad engineering feats in history from the celebrated Floridian author. Although several people had considered constructing a railroad to Key West beginning in the early 1800s, it took a bold industrialist with unparalleled vision to make it happen. In 1902, Henry Flagler made the decision to extend the Florida East Coast Railway to "the nearest deepwater American port." In this book, renowned Florida historian Seth H. Bramson reveals how the Key West Extension of the Flagler-owned FEC became the greatest railroad engineering and construction feat in United States, and possibly world, history, an accomplishment that would cement Flagler's fame and legend for all time. Join Bramson as he recounts the years of operation of this great railroad, what it did for the Florida Keys and what it meant to the resident conchs. Includes photos

Henry Plant

Chronicles the rise and fall of the Key West Railroad--which reached from the shores of mainland Florida to the island of Key West--describing its seven-year construction under the watch of entrepreneur Henry Flagler and its destruction by a hurricane in 1935.

The Greatest Railroad Story Ever Told

An engaging and delightfully illustrated account of the impact of railroads on the American built environment and on American culture from the last decades of the nineteenth century to the 1930's.

Last Train to Paradise

"Paul Ortiz's lyrical and closely argued study introduces us to unknown generations of freedom fighters for whom organizing democratically became in every sense a way of life. Ortiz changes the very ways we think of Southern history as he shows in marvelous detail how Black Floridians came together to defend themselves in the face of terror, to bury their dead, to challenge Jim Crow, to vote, and to dream."—David R. Roediger, author of *Colored White: Transcending the Racial Past* "Emancipation Betrayed is a remarkable piece of work, a tightly argued, meticulously researched examination of the first statewide movement by African Americans for civil rights, a movement which since has been effectively erased from our collective memory. The book poses a profound challenge to our understanding of the limits and possibilities of African American resistance in the early twentieth century. This analysis of how a politically and economically marginalized community nurtures the capacity for struggle speaks as much to our time as to 1919."—Charles Payne, author of *I've Got the Light of Freedom*

Metropolitan Corridor

What was it like to live and work at a lighthouse during the heyday of shipping and fishing? How did lighthouse keepers and their families stationed on remote islands while away the long, cold, lonely hours between trips to the mainland for food and supplies? Here you'll find a record of the charming memories and stories of America's lighthouse keepers, including descriptions of daily life at a lighthouse.

American Railway Management

Winner, 2012 Sally Hacker Prize, *Society for the History of Technology* *Hotel Dreams* is a deeply researched and entertaining account of how the hotel's material world of machines and marble integrated into and shaped the society it served. Molly W. Berger offers a compelling history of the American hotel and how it captured the public's imagination as it came to represent the complex—and often contentious—relationship among luxury, economic development, and the ideals of a democratic society. Berger profiles the country's most prestigious hotels, including Boston's 1829 Tremont, San Francisco's world-famous Palace, and Chicago's enormous Stevens. The fascinating stories behind their design, construction, and marketing reveal in rich detail how these buildings became cultural symbols that shaped the urban landscape.

Wilson's Business Directory of New-York City

Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

The Florida Agriculturist

Thomas Vail (fl. 1640-1687) immigrated from England to Salem, Massachusetts in 1640, later moving to Southampton, Long Island, New York. Descendants lived in New England, New York, New Jersey and elsewhere.

Emancipation Betrayed

Without deifying its subject, this biography looks at the life of Nelson Mandela, placing his awe-inspiring political accomplishments into historical context for young readers.

Lighthouse Families

How tourism shaped the Sunshine State "An enlightening journey through Florida's diverse and evolving tourism history, illustrating the changing face of tourism over the years, and how Floridians have coped with these changes. An informative look at Florida's past efforts to woo tourists, and the mixed blessings that tourism has brought to the Sunshine State."--Brian Rucker, author of *Image and Reality* "At last--a readable, concise history of Florida tourism from the earliest European discovery to the present. Revels's prose sizzles. Her ability to summarize and analyze more than 300 years of Florida tourism in just over 200 pages is truly stunning. It is a remarkable achievement. *Sunshine Paradise* both entertains and informs on every page, and it should be required reading for policy makers and everyone else who needs to know how current Florida came to be."--James M. Denham, professor of history and director, Lawton M. Chiles Jr., Center for Florida History, Florida Southern College For nearly two hundred years, Floridians have eagerly exploited tourism as the key to economic prosperity. As a result, the state has constantly reshaped and remodeled itself as different types of tourist heavens, and many aspects of its history have become inseparable from the fantastic images created by the tourism industry. From spa retreats to nature preserves, from riverboat rides to roller coasters, and from railroads to theme parks, the state's dependence on tourism has greatly shaped its identity. *Sunshine Paradise* is the first book to focus exclusively on how--and why--tourism came to define Florida. Offering a concise look at the subject from the 1820s to the present, Tracy Revels demonstrates tourism's relevance to all other major aspects of Florida history, including the Civil War, the land boom, and civil rights. In this enjoyable and well-written history, Revels shows how Florida's tourism industry has remained adaptive and expansive, ready to sell the next version of paradise to northerners hungry for sunshine. She also explains why the state's business and political leaders must consider the history of tourism development as they plan for the state's future. Tracy J. Revels, professor and chair of history at Wofford College, is the author of *Grander in Her Daughters: Florida's Women during the Civil War*. A volume in the Florida History and Culture Series, edited by Raymond Arsenault and Gary R. Mormino

The Cornell Alumni News

This is Volume Two of The WAR ON FEAR Series. In this book, you will find out what the Bible says about how FEAR originated with mankind. And, you will also see God's foundational solution to FEAR found in the Scriptures. This book was written because we want you learn how to become free from the operation of fear in your life. God Bless you!

Hot High-nitrogen Gas in a Metal Mine

This Florida alphabet book is packed with almost 200 facts about Florida personalities, history, geography, nature, and culture. Hundreds of photos and drawings illustrate the text written at grade levels 4 through 6. In H, you will learn about the Horse Conch, a marine mollusk whose pink and orange shell was named the state seashell in 1969. In L, read about Love Bugs that appear in Florida spring and fall and bump into cars, leaving a sticky mess. In V, learn about Vizcaya a villa built in 1916 in Miami and Valencia Oranges, which make up about half the Florida orange crop.

Hotel Dreams

Affective Health and Masculinities in South Africa
