Why Take the Risk

God Has Not Remained Distant from the Problem of Human Suffering

... Friendship and There Comes Points I Find It **Life**, Where ...

So What We'Re Going To Do Is Just Collect a Few Questions so that I Can Estimate the Range of Questions and Then Say One or Two Things about It and Then We'Re Done All Right So Just Put Up Your Hand and Make Your Question Brief because the Time You Take for Your Question Will Be Time Taken Away from the Next Person's Question and I Collect Them There's a Hand Up There So Have You Got a Microphone To Bring to that Person Please Keep the Questions on the Topic of the Knife I'M Saying that Atheists CanNot Behave Indeed You Will Discover Even Reading the Bible That Sometimes Pagans Put to Shame People Who Claim To Know God That's because We'Ve Got this Moral Compass so that's Enormous Ly Important We'Ve Got that Moral Ability To Judge and Indeed Jesus When He Made His Appeal to the World He Asked People To Use Their Moral Judgment and What He Did Was It Good or Was It Not in Other Words His Whole Attitude to Them Presupposed that They Had Got Moral Concepts That They Could Use and I Had another Thing to that because this Is a Big Topic

And It's So Obvious Is that if You Dismiss a Transcendent God You'Ve Got To Find an Alternative Source for Morality so Where Are You Going To Find It You'Re Going To Find It Down Here in Here So To Speak so You'Re Going To either Find It and Raw Biology and Genetics or in the Social Dimension and I Might Just Make a Very Provocative Statement Right Now and Say That Has Led to Massive Moral Confusion because Depending on What Animal Species You Choose You Can Base any Morality on It You Like

What Is the Base for Your Ethical Standards Where Does Morality Come from this Is a Major Question That I Would Address of Course by Referring Back to My Christian Faith That Gives the Rational Justification It Doesn't Give the Pure Source of Morality because Morality Is Built-In to Us at that Basic Level by God Himself Know that Relates to the Previous Question That I'D Said that There's a Human Desire for Morality I Didn't Actually Talk about a Human Desire for Morality What I Use the Word Desire I Talked of a Desire for Justice

And You Helped Me Really To Refine the Point and It Is a Very Important One I Would Put It this Way It's a Little Bit More Abstract and Philosophical if in the End You Give Up Believing in Absolute Truth You Will End Up Having To Believe What Power Dictates You Might Want To Think about that and There's Massive Pressure in Society Today in the Academy As Well To Say that Naturalism Is the Default Position for all Intelligent People and the Pressure To Conform to that Is Enormous that Is an Attempt To Impose a Truth Which I Believe To Be False

And There's Massive Pressure in Society Today in the Academy As Well To Say that Naturalism Is the Default Position for all Intelligent People and the Pressure To Conform to that Is Enormous that Is an Attempt To Impose a Truth Which I Believe To Be False by Power and We Need To Be Aware of It and We Need To Celebrate the Freedoms That We Do Have So Let's Be Thankful that There Are Powers That Exist because We Need Them because I'M a Sinful Person I Need the Police As Much as You Sir No Not To Speak Is To Speak Not To Act Is To Act that Quotation

If I Do Not Speak to You and Explain What My Faith in God Means You'LI Never Understand It but if I Do Not Act Consistently with My Faith in God You'LI Not Find Me Credible and So in the End It Is Massively Important You See Ladies and Gentlemen How Shall I Put this to You God to Me Is Not a Theory as a Person My Wife Isn't a Theory She's a Person That Changes Everything because the Business about God Is Not Simply Acceptance of a Set of Abstract Propositions

So We all Have To Allow Ourselves To Be Checked for Credibility in these Things There Was a Question about Free Will the Question of a God of Love and Hell It Brings Me Back of Course to the Topic of Judgment Now Let's Try and Think about this Very Briefly There's a Lot That Could Be Said about It I Think What We Find Very Difficult once We Purged Our Minds of All these Med of Medieval Notions no One Ever Taught Us More about the Love of God than Jesus and One of the Magisterial Statements of the Love of God as this for God So Loved the World that He Gave His Only Son

But if I Say No to God What Is God To Do with Me Is He To Force Me To Believe and Insult by Humanity of Course Not that Is To Destroy Me and Reduce Me to the Level of the Amoral and When God Himself Came into the World and Showed His Care for People and His Love and Did the Supernatural Things That Cured People's Diseases Restored Them to Sanity

And that Is a Wonder of the Christian Message that God Is Prepared To Accept Me Right Now Not at the End of the Process at the Beginning Why because It's Got Nothing To Do with My Merit but What God Has Done in Christ on the Cross and Dying for Me See this Problem with Suffering Ladies and Gentlemen Has another Side the Sheer Genius of the Heart of Christianity Which Is the Cross and Resurrection of Jesus Is Not Simply It Gives Us Insight into the Problem of Suffering It Shows Us How Salvation Works and It Shows Us How We Can Be Accepted with God You See I Come Here To

Give You this Talk I'M Not Giving It to You in the Hope that God Will Think You Know Well Done the Next I'll Give You another Brownie Point for that

You See I Come Here To Give You this Talk I'M Not Giving It to You in the Hope that God Will Think You Know Well Done the Next I'll Give You another Brownie Point for that and I'M Nearer to Accepting You Ladies and Gentlemen I Come because God Accepted Me Years Ago and I Come To Express My Gratitude to Him for Accepting Me Not To Gain Acceptance that It's True with My Wife because I Accept Her Independent of Her Cooking That's What Sets Our Free To Cook I'M Glad You See the Point I Do Hope You See It When It Comes to Your Relationship with God

The Ideal Family 101

Family life is what makes a great world! What educational courses do we have on this? Do we have a family course in every grade level at school? How many papers do the young write on this topic? How important is family? The value of life itself is reflected in family life and church life and the world. So how high should our expectations of family life be? What action plans can we make and do? When we have plans, we also have a purpose. When the love of family life is at the heart and soul of every boy/man and every girl/woman, beginning at conception and continuing on through every minute of every day, violence will fade as something that is not good. It will be replaced with gratitude for our own lives and the life of every other human being! What can we do and promote to help make this happen? Do we invite grandpas and/or grandmas to our schools and churches to talk about how great it is to be grandpas and grandmas (or great-grandpas and great-grandmas)? Do we ask them to talk about what good things they did to make their family life good and/or what they could have done better and want to teach/tell the younger people? Wouldn't it be great if the love for family life was so highly valued and if peace and the unity of families would be the future for the next generations? Who is the ideal family? The ideal family reflects God's love to the world! God's love is one that sacrifices, one that has empathy for others, one that has performed miracles. It is so good to have plans in a family. An example that became humorous many years later in our family was that our fifth daughter never mowed the lawn, and we were all so busy, we didn't notice it until she was an adult! So it is good to make sure we have plans and purpose to our family life. Life is too short for us to be just floating along. This is a good memory to laugh about because we do live in a world that is not perfect. This is earth, not heaven. People and human families may have opinions, they may have perspectives, and they may be giving their all to do good for others. This is a good kind of family life!

What do we mean by 'family'?

This 4-hour free course explored the many attempts at defining 'family' and why these complex and contradictory meanings are important to us.

Why Family Therapy Doesn't Work And What We Can Do About It

Why Family Therapy Doesn't Work and What We Can Do About It is workbook – for both potential clients who struggle with interpersonal issues and for young clinicians who want to get better results from their treatment modalities. An explanation of how fears become so physically and mentally cemented is included. The roles of discouragement and unmet narcissistic needs in relationships are explained. A number of exercises, many of which can easily done at home, are included. Physical health is included. In this way, the book is a workbook like the Courage to Heal Workbook. The book has special sections on Dealing with Young Children and Dealing with Teenagers. The book looks at addiction, cutting, eating disorders, prejudice and extreme control and anger issues. Why Family Therapy Doesn't Work and What We Can Do About It has a special section on public health issues. How do we successfully “do” public health and “make” people art in their own interests?

Family Means...

Every family is different. But in the end, all families have the same core values of love, kindness and acceptance. The real question is... what does family mean to you? Small, big, colorful and fun - a family can be so many things. Every family is special, and this book celebrates all forms of living together: no one is left out. "Family Means..." is a charming and heart-warming children's picture book about family, diversity, inclusion and the joy of everyday life. The simple and easy-to-understand sentences are perfect for little readers and make this book ideal for story time or nighttime reading. The beautifully hand-drawn color illustrations depict family life and teach children that while families may look and sound different, we are all united in love. There is even a bonus activity section where you can draw your family and write your own answer to the question: What does family mean to you? So, are you ready to find out the true meaning of family? Open the book and let's get started!

A Very Modern Family

'So much more than a parenting manual - the Grants have thrown out a lifeline' THE TIMES 'The most extraordinary parenting guide of our time' DAILY MAIL A breakout book on the ever-expanding concept of family Carrie and David Grant have an extraordinary family story to tell. They have four children, one of whom is adopted, and all have come with a curveball: mental health challenges, neurodivergence, trans non-binary identities, various sexualities, and they are a mixed-race family, too. It is a reflection of the fact that society is changing faster than most of us can keep up with. The wider concepts of family and community are being deconstructed. There are those who are desperately clinging to the old and those who are desperate for the new to be accepted. How do we hold our families and communities together in unity? How do we create a society where all are included and none are oppressed? In A Very Modern Family, Carrie and David share their challenges and discoveries of growing and shapeshifting to create an incredible, diverse family and community. With their multi-intersectional family, they share their own mindset changes and insights into how to construct a new, accepting and unified space, while providing a deep dive into real life, frequently encountered situations and pertinent, applicable advice. A Very Modern Family is an important guide for our times - full of pain, change and hope.

We Are Family

Our understanding of what makes a family has undergone a revolution in the last few decades, from same-sex parenthood to surrogacy, donor conception, and IVF. But what has the impact been on children? In We Are Family, Professor Susan Golombok visits lesbian mothers, gay fathers, single parents, donor conception parents, co-parents, trans parents, surrogates, and donors, and, more importantly, their children, to find out if they are as well-adjusted, happy, and emotionally stable as children from traditional nuclear families. And she discovers that the answer is yes — and sometimes even more so. Susan's work at the Centre for Family Research at Cambridge proves that any family set-up can provide a loving, secure home for a child — although, the children from these families will often face prejudiced attitudes from others. Since the 1970s, when she was first drawn to this area of research after reading about lesbian mothers whose children were being removed from their care, Susan has worked tirelessly to challenge outdated attitudes and prevent families being split up for no good reason. This book tells the stories of those families — their struggles and their triumphs — while celebrating love and family in all its wonderful variations.

Why Do Some Families Look Different?

The Big Questions gentle book series addresses heavy topics in a kind and loving way that children can understand. Without agenda, it strives to teach our youngest generations how not everyone may think, act, or live the same, but we all deserve respect and acceptance. Why Do Some Families Look Different is the perfect book for every child! It demonstrates and talks about blended families with step/half siblings, large families, small families, mixed ethnicity families, single parent homes, same sex parent homes, families where the parents are friends and families where the parents don't get along. It is my hope that by normalizing differences, children will learn that not every family looks the same and that's actually really wonderful! Since Big Questions books aim to be communication tools for families, we thought we would start including activity sheets within the books. This is something new with this book that we haven't done before. We hope you enjoy!

Families

In 'Families' Jane Howard informally visits many dozens of families and tries to discover what makes the best ones work so well. Families are not dying, she finds, although they are evolving in various

ways. From the tightest-knit nuclear family or extended clan to the most fragile new commune, the family in one guise or another remains everybody's most basic hold on reality. We may run away from our families as many do, but no sooner do we escape than we find another one, often very much like it. Sympathetically, with immense thrust, she crosses the continent to discover families' myths, jokes, and rituals. She leafs through their scrapbooks, sits on their porches, and takes part, when she can, in their feasts and celebrations. She talks to a father of eighteen, several double first cousins, stepchildren, multiple godmothers, an honorary relative of an Indian tribe, and a nine-year-old boy who has no family but his mother. She sits with a matriarch on the front stoop of a ghetto house, goes camping with a family in Mexico, has Thanksgiving with another in Iowa, and orders pizza with a Greek clan in Massachusetts. Howard reports on visits to conventional Southern and Jewish households and to innovative ones whose members, lacking a common history, plan on building common futures as if water were after all as thick as blood. She examines the notion that "there are ways and ways of achieving kinship, of which birth and marriage are only the most obvious." Millions of clans and families all over the United States continue to celebrate, quarrel, disband, reunite, and endure. Jane Howard makes us realize how our lives are interwoven both with the families we are born into and with those we invent as we go through life. 'Families' is compassionate, provocative, and profound. The paperback edition of this important work will be essential reading for all those with an interest in the study of familial bonds, particularly sociologists, anthropologists, and psychologists.

Smile with Knowledge

Already delayed at the point of origin, having missed a connecting flight, required to spend another night in an interim hotel in a foreign country, and now this! It was as if destiny was preparing him well for this journey of unknowns that he had embarked upon...As Gyana sat in the room alone and looked at the single window with bars, it felt like being in a jail, waiting to be rescued from suspicion. Will they be able to verify his paperwork and identity? Will they do it in a timely manner to enable him to continue with his travel plans? What will happen if they are not able to verify the documents? A multitude of questions played havoc on his mind, with no answers in sight. —excerpt from *Smile with Knowledge* Describing the ground realities faced by an Indian couple when they moved from India to the United States in the early 90's in an age without internet or cell phones, this is a first hand account of the life as foreign students in the U.S., along with its myriad perks and challenges. Relating a true story of success while balancing life on a shoestring budget, this is also a tale of small hopes, small pleasures, small battles, and small victories, and yet how all these small things together formed a memorable journey that was larger than life.

The Modern Dad's Dilemma

Illustrated with the real-life stories of a diverse group of fathers--from a truck driver to an NFL player, from a stay-at-home dad to Lorne Michaels, the producer of *Saturday Night Live*--this guide helps dads sort through their own father's legacy, communicate with their kids, nurture a relationship with their children's mother, and balance work and family life. Original.

Understanding Genetics

The purpose of this manual is to provide an educational genetics resource for individuals, families, and health professionals in the New York - Mid-Atlantic region and increase awareness of specialty care in genetics. The manual begins with a basic introduction to genetics concepts, followed by a description

of the different types and applications of genetic tests. It also provides information about diagnosis of genetic disease, family history, newborn screening, and genetic counseling. Resources are included to assist in patient care, patient and professional education, and identification of specialty genetics services within the New York - Mid-Atlantic region. At the end of each section, a list of references is provided for additional information. Appendices can be copied for reference and offered to patients. These take-home resources are critical to helping both providers and patients understand some of the basic concepts and applications of genetics and genomics.

Family Upheaval

Pakistani migrant families in Denmark find themselves in a specific ethno-national, post-9/11 environment where Muslim immigrants are subjected to processes of non-recognition, exclusion and securitization. This ethnographic study explores how, why, and at what costs notions of relatedness, identity, and belonging are being renegotiated within local families and transnational kinship networks. Each entry point concerns the destructive-productive constitution of family life, where neglected responsibilities, obligations, and trust lead not only to broken relationships, but also, and inevitably, to the innovative creation of new ones. By connecting the micro-politics of the migrant family with the macro-politics of the nation state and global conjunctures in general, the book argues that securitization and suspicion-launched in the name of "integration"-escalate internal community dynamics and processes of family upheaval in unpredicted ways.

Economic Report of the President

The American family is changing. Divorce, single parents, and stepfamilies are redefining the ways we live together and raise our children. Many "experts" feel these seemingly inevitable changes should be celebrated; they claim that the "new" families, which often lack a strong father, are actually healthier than traditional two-parent families—or, at the very least, do children no harm. But as David Popenoe shows in *Families Without Fathers* this optimistic view is severely misguided. Examining evidence from social and behavioral science, history, and evolutionary biology, Popenoe shows why fathers today are deserting their families in record numbers. The disintegration of the child-centered, two parent family—especially in the inner cities, where as many as two in three children are growing up without their fathers—and the weakening commitment of fathers to their children that more and more follows divorce, are central causes of many of our worst individual and social problems. Juvenile delinquency, drug and alcohol abuse, teenage pregnancy, welfare dependency, and child poverty can be directly traced to fathers' lack of involvement in their children's lives. Our situation will only get worse, Popenoe warns, unless men are willing to renew their commitment to their marriages and to their children. Yet he is not just an alarmist. He suggests concrete policies, and new ways of thinking and acting that will help all fathers improve their marriages and family lives, and tells us what we as individuals and as a society can do to support and strengthen the most important thing a man can do.

Families without Fathers

This is a comprehensive clinical resource for addiction counselors who want to learn about the psychological components of the problem, for individual therapists—dynamic, cognitive, and behavioral—who want to understand systems approaches in order to draw on a broader repertoire of useful interventions, and for couple and family therapists who want to learn more about the intrapsychic, biological, and pharmacological aspects of addiction. Dr. Jerome D. Levin takes the reader down the parallel paths of addiction treatment and individual and family therapy until they meet on the bridge of actual clinical practice. Practitioner, professor, prolific author, and respected authority in the field, Dr. Levin uses approaches to the treatment of alcoholism as a model for illustrating how theory, research, technique, and flying by the seat of the professional pants can integrate into a therapeutic style to help substance abusers and their partners and families.

The Family Records of James and Nancy Dunham Tappan of the Fourth Generation

“This comprehensive analysis on abuse committed in the home provides insights at both the micro and macro levels... The book combines legal and social science approaches in a way that makes it essential reading for anyone studying or working on violence-related issues.” Kevät Nousiainen, University of Helsinki, Johanna Niemi-Kiesiläinen, University of Umeå and Anu Pylkkänen, University of Helsinki. “This excellent book offers a timely intervention into debates about violence. Whilst most debates still focus on the spectacular rather than mundane forms of violence, Linda McKie uses

a synthesis of legal, sociological and feminist research to show how current debates fail to deal with the violence that underpins our lives.â€ Prof Beverley Skeggs, University of London. An exciting new addition to the series, this book tackles assumptions surrounding the family as a changing institution and supposed haven from the public sphere of life. It considers families and social change in terms of concepts of power, inequality, gender, generations, sexuality and ethnicity. Some commentators suggest the family is threatened by increasing economic and social uncertainties and an enhanced focus upon the individual. This book provides a resume of these debates, as well as a critical review of the theories of family and social change: Charts social and economic changes and their impact on the family Considers the prevalence and nature of abuse within families Explores the relationship between social theory, families and changing issues in familial relationships Develops a theory of social change and families through a critical and pragmatic stance Key reading for undergraduate students of sociology reading courses such as family, gender, health, criminology and social change.

Couple and Family Therapy of Addiction

The ultimate guide for parents who dream of having a little less chaos and a lot more time for the good things in life Written by mother of five, Nicole Avery, this book shows harried parents how, with just a bit of planning, family life can become easier to manage, less stressful, and decidedly more fun. "Dream on," you say? "I might as well try to herd cats as to get my kids to follow a lot of arbitrary rules!" And Nicole would agree, which is why Planning with Kids isn't like any other parenting guide out there. It was inspired by Nicole's blog of the same name, which, over the past three years, has garnered a huge audience of likeminded parents who have achieved nothing short of miraculous results following her advice. While other prescriptive guides offer mums and dads cook-cutter solutions to the challenges of raising kids, this handbook focuses on one simple, straightforward idea: by implementing a few simple strategies for how you do things, you'll make more time for you to be you and your kids to be kids. You'll find strategies for streamlining and enhancing everything from the routines of daily life, to family relationships, to budgeting and finances, playtime and much more! Contains a full section on menus and cooking, including recipes, supported online by a planning-with-family meal planner Divided into sections so that readers can dip-in and dip-out for information as they need it as their family expands and grows up!

Families, Violence And Social Change

This edited book draws from work that focuses on the act of telling family stories, as well as their content and structure. The process of telling family stories is linked to central aspects of development, including language acquisition, affect regulation, and family interaction patterns. This book extends across traditional developmental psychology, personality theory, and family studies. Drawing broadly on the epigenetic framework for individual development articulated by Erik Erikson, as well as on conceptions of the family life cycle, the editors bring together contemporary examples of psychological research on family stories and their implications for development and change at different points in the life course. The book is divided into sections that focus on family stories at different points in the life cycle, from early childhood and the beginnings of narrative skill, through adolescence, young adulthood, midlife, and then mature adulthood and its intergenerational meaning. During each of these periods of the life cycle, research focusing on individual development within an Eriksonian framework of ego strengths and virtues is highlighted. The dynamic role of family stories is also featured here, with work exploring the links between family process, intergenerational attachment, and storytelling. Sociocultural theories that emphasize how such development is situated in the wider cultural context are also featured in several chapters. This broad lifespan developmental focus serves to integrate the exciting diversity of this work and foster further questions and research in the emerging field of family narrative. The book is intended primarily for researchers and advanced-level students in the fields of developmental and personality psychology, as well as those in family studies and in gerontology. It may also be of interest to those in the helping professions who are concerned with family therapy and family issues, and may--due to its content and illustrative material--have appeal to a wider market of the lay public. The chapters are written in a readily accessible style and the analyses are presented in a fairly non-technical way. Because family stories are charted across the lifespan, it would be a suitable companion book to a more traditional lifespan textbook in certain courses.

Planning with Kids

John Adams is best remembered as one of the four Confederate generals who lay on the porch of the Carnton House, dead, when the Battle of Franklin ended on December 1, 1864. Unfortunately he did not leave much in the way of personal papers, and this biography has been pieced together from Army records and other sources, including accounts of his contemporaries. Adams's career in the U.S. Army gives us a good look at the military, the concept of Manifest Destiny, and the relations with those conquered by the Army, the Indians. This book also considers one of the more debated topics in Civil War history: why did a man who served the United States for most of his life resign his commission and side with the Confederacy?

Family Stories and the Life Course

Published by the Boy Scouts of America for all BSA registered adult volunteers and professionals, Scouting magazine offers editorial content that is a mixture of information, instruction, and inspiration, designed to strengthen readers' abilities to better perform their leadership roles in Scouting and also to assist them as parents in strengthening families.

Brigadier General John Adams, CSA

Who Ya Bagging For? I have been told to bag for the cashier, the other bagger, or the supervisor. But very rarely have I been told to bag for the guest. This seems funny to me. Now if they wanted to tell me to take over for the other employee or the guest(s), that would make sense, but the easy, lazy way to communicate seems to be the only way they know how. You'd think someone that has the skills to do this job would at least know the difference between bagging for the cashier, etc., and the guests

Scope of Soviet Activity in the United States

Every family in the world is looking for a way to be happy, content, and valuable. In our ever-changing society the pressure is on to find any way possible to make our families "work". We all want a successful family life. We are looking for answers to all the questions of being a successful husband, wife, parent, and grandparent. We are seeking ways to have a loving, caring, committed family. We want our families to "make it." Everyone is tired of the label "dysfunctional family". People just want this thing called "family" to be functional again. So, what is the recipe for success? What can we do? How can we make the family simple and yet successful? I remember as a child that my parents wanted what was best for me in all things. When our local pediatrician told my parents that I needed to take a multi-vitamin they bought me the regular ones that tasted terrible. I would hide them or pretend to take them. (I guess that is where my own children got that idea) Then the maker of multi-vitamins began producing "fruit flavored" ones. I loved them and took them regularly. The fruit flavoring allowed me to get what I needed and to enjoy the taste. The "fruit flavored" style of leading our families has also been around for many years but is not something that people use. It is a great way to see your family "work". In a world gone wrong, we have a chance to do what is right. For the Christian believer, the Holy Spirit in you is this "fruit flavoring". Your love, joy, peace, patience, kindness, goodness, faithfulness, gentleness, and, self-control, placed in you at conversion by the Holy Spirit, is the "fruit flavoring" that allows the family to function smoothly. The overflow of God's Spirit in you "flavors" your parenting and your family with a workable recipe. This book is the result of years of seeking to be a "fruit flavored" family of faith. Cheryl and I (Garry) have had the honor of being the parents of three children and now the grandparents of four. This is quite a blessing and has allowed us to continue to experience and grow in our lives as a family. So, one can see our parenting journey is well traveled. We are definitely not perfect, but we have been there and love to share. Let me remind you that this book is not intended to be a guide or a teacher. It is a tool to allow God to speak to you directly and be your guide and teacher. The Holy Spirit is always your teacher in faith and practice. (John 16:13) The Holy Spirit will guide you to understand Truth. Although everyone who reads this book is reading the same words, the Holy Spirit will personalize each chapter to guide each individual toward the lesson he or she needs to learn and apply at this given moment in their lives. As our lives and situations in our families change from day to day, (and for us over the years) may the Holy Spirit bring back to your mind and heart what you will learn during this time you will take to read and study. (John 14:26) Finally, as we introduce this writing, never forget that Godly parenting and grandparenting is centered in prayer. It begins there and continues there throughout every task, phase, problem, pain, and victory. Prayer is communicating with God. It is talking to your God and listening to His response. God is always at Work around us and when we "pray without ceasing"

There are nine different 'times' included for each day from which participants can mix and match depending on available time and resources. Suitable for individuals, couples, families or flatmates, the book is designed to bring something fresh and new each time you use it over the years. The different 'times' include: Bible Time, Question Time, Reflection Time, Discussion Time, Activity Time, Decoration Time, Study Time, Response Time and Prayer Time. Instructions are also included to make your own set of 25 stockings. You can choose from either the 'No-Sew' or 'Simple Sew' examples. Fill your stockings with small treats and, as you share the treats each day, use the devotional resource to enhance your understanding and engagement with the Christmas season.

Retail Tales and Nonsense

Lauren Sandler is an only child with an only child of her own, who found that discussing the choice to stop at one kid was loaded with anxiety, doubt, misinformation, and judgment. After investigating what only children really are like and whether stopping at one child is an answer to reconciling motherhood and modernity, she learned a lot about herself-and a lot about our culture's assumptions. In this heartfelt work, Sandler demystifies the perceived problems of the only child and legitimizes a conversation about the larger societal costs of having more than one. We ask when people are having kids-never akid, never onechild at a time. If parents no longer felt they had to have second children to keep from royally screwing up their first, would the majority of them still do it? And, if the literature tells us-in hundreds of studies-that a child isn'tbetter off with a sibling and it's not something parents truly want for themselves, then whom is this choice serving? One and Onlyexamines these questions, exploring what the rise of the single-child family means for our economies, our environment, and our freedom. Sandler considers hundreds of studies and interviews, traveling around the world to discover that only children are just fine, their parents often happier, and our planet is better off for them. Sandler's controversial revelations will probably draw rebukes from the majority of parents who believe that having several children is the healthiest model for all members of a family. Others will claim that she's quite possibly cracked the code of happiness, demonstrating that having just one may be the way to resolve our countless issues with adulthood in our overtaxed age.

The Fruit Flavored Family

From as young as 3, children may begin to ask questions about their family structure. And while families come in many shapes and sizes with no right or wrong, children may perceive another family structure to be 'normal' and wonder why theirs is 'different'. 'Mummy, do we have a daddy' explores a number of family structures to help children to understand that all families are different and that love is what matters most.

The Effects of Budget Cuts on the Bureau of Labor Statistics and Changes in the Consumer Price Index

You're on demand 24/7, juggling children, home management, work, relationships, and never-ending to-do lists. You perform superhuman feats of multitasking to get it all done, but the harder you strive for life balance and happiness, the more tired, frustrated, and underappreciated you feel. Like many moms today, you are simply running on empty. In this guide, Kelly Pryde, Ph.D., combines real-life experiences with extensive research to help you step out of the hurried foggiess of everyday juggling into a deeper, more joyful experience of motherhood. Her seven pathways of reinvention will help you learn how to: turn around self-limiting beliefs and practices reclaim your feminine wisdom and restore your energy and mood rethink balance and priorities find joy, meaning, and peace of mind amidst the chaos slow down and reconnect with what matters most to you and your family Filled with practical advice, inspiring stories, and a wealth of resources, Reinventing Mom will support, nurture, and guide you toward becoming the Mom and woman you are meant to be.

"Deciding yes or not to motherhood can be fraught with confusion, pain, and loneliness. Many a woman is undecided about arguably the most important life-defining decision she'll make in her lifetime. With the 'Motherhood -- Is it for me?' program, the authors of this book, both dedicated and seasoned

psychotherapists, created a process that has helped countless women over the last 25 years. Finally available in print, this program is the perfect resource for closely examining ambivalence around this crucial life choice. Through precise steps, readers are guided on their own personal journeys toward deeper understanding and learn what they really want. The process even allows a woman who is experiencing extremely painful immobilization to find her way through to her true desire. The authors know from their professional experience that an analytical pros-and-cons approach often fails to successfully answer this most personal question. Interspersed throughout this book are twenty diverse stories of women who made conscious choices, half deciding yes and half deciding no. Their stories -- and sometimes advice -- create a valuable community that provides support to every reader, breaking the isolation they may feel."--Book cover.

25 Stockings to Christmas

Although the seven of us have dispersed across the country in our adult lives, we still get together occasionally for family reunions. When we do, the conversation often turns to stories beginning with, "Do you remember when...." One day we decided that some of these stories should be written down, especially since some of the most cherished stories dealt with our grandparents. We were afraid that these older stories would become lost in the mists of time, and we were aware that our more recent stories would someday be old stories to our children and grandchildren. Thus was born the idea of this book. We have all contributed remembrances to this little volume and we hope that our children will be able to know more about where their parents came from. Compiling this book has been one more enjoyable and unifying activity for a family that continues to cherish each other.

In his new guide, author C. David Crouch reveals the eighty-three principles of excellentology to help you build excellence in your life. Using "building a house" as a metaphor, he guides you in your own personal journey toward excellence. You can learn how to - lay a strong foundation by developing a mission, vision, principles, and standards; - recognize five pillars of performance that map a clear path toward excellence; - assemble a roof that allows you to measure your progress at the organizational, team, and individual levels; and - improve your ability to lead yourself and others toward excellence. By applying the model in five diverse environments-an organization, a team, a church, a family, and an individual life-Crouch demonstrates its effective use for any endeavor. He also applies his model for excellence to a sixth environment-the United States of America-revealing some interesting considerations. Build a life of joy, peace, significance, and fulfillment for yourself and those around you with The Excellent Experience.

Does the 2nd Amendment give people the right to overthrow the government with insurrections? This interpretation of the constitution is an excuse for not passing gun reform

The constitution treats insurrection as a serious and dangerous offense
Forming a militia and attacking the government is unconstitutional and qualifies as treason
The constitution doesn't even guarantee non-violent civil disobedience
Insurrectionists are not "hostages"
The 2nd Amendment is not unlimited

Q&A start

Our lone-wolf shooters are anything but a well-regulated militia

Why did conservatives change their tune in the last 15 years?

They say gun violence is due to "too many doors"

The say gun violence is due to a mental health crisis, but then do nothing about it

What is the upside to the NRA taking extreme stances against reform?
