Chinese Acupuncture and Moxibustion

Based on Essentials of Chinese acupuncture.

Chinese Acupuncture and Moxibustion

This scholarly and comprehensive textbook comprises three parts: Channels and Points; Acupuncture and Moxibustion Techniques; Treatment of Diseases. Based on the ancient classics of traditional Chinese medicine, modern clinical practice, and recent research, Acupuncture and Moxibustion is a wonderful textbook both for international students and an essential reference for practitioners. Its editorial board, composed of well-known Chinese and Western acupuncture practitioners, has ensured that the English edition conforms to high academic standards.

Chinese Acupuncture and Moxibustion

Cheng DAN-an was the single most important Chinese acupuncturist of the mid-20th century. He created the modern acupuncture college curriculum in China and rescued acupuncture and moxibustion from oblivion in its native land. As a teacher of many other famous teachers of acupuncture, such as the late Dr. James Tin Yau So, Cheng Dan-an is the father of modern Chinese acupuncture. This book is a collection of his formulas and treatments for a wide range of traditional Chinese diseases, such as cold damage, warm heat diseases, wind stroke, mania, diarrhea and dysentery, cough, phlegm rheum, panting & wheezing, the five accumulations, and more. This is a seminal book in the development of modern acupuncture which should not be overlooked by any Western practitioner.

Acupuncture and Moxibustion

A textbook of acupuncture and moxibustion from a highly respected Chinese specialist of Traditional Chinese Medicine (TCM). Qiu is also well known in Europe following lecture tours on these therapies. The text discusses acupuncture and moxibustion from a dialectic materialist perspective, in keeping with importance the contemporary Communist state places on TCM for all the people. The text has been expertly translated from the Chinese by Richard Bertshinger (author of the 'Golden Needle'). The original Chinese version of Chinese Acupuncture and Moxibustion was recently accepted by the All China Medical Board as the official teaching manual for students in China. Its scope and authenticity are unique among presently available Western textbooks. Comprehensive coverage includes: the more usual philosophy and history of Chinese traditional medicine; regular descriptions of the meridians and points; extra meridians and extra points; detailed sections on less well known therapies - scalp and ear needling, electro-acupuncture; abstracts from ancient texts, including the Odes; methods and styles of needling; discussion of the character patterns of disease.

Acupuncture and Moxibustion Formulas & Treatments

A selection of examination questions for the education and examination program sponsored by the China Academy of Traditional Chinese Medicine for foreign doctors.

Chinese Acupuncture and Moxibustion

Single Point Acupuncture and Moxibustion for 100 Diseases is a comprehensive yet easy-to-follow guide to the clinical application of single point acupuncture and moxibustion therapy, with a special emphasis on methods and needle techniques. Single point acupuncture and moxibustion therapy differs from other forms of acupuncture in that only one point is selected during each session. The single point technique is noted for its quick therapeutic response and exceptional results, despite using far fewer points than traditional acupuncture therapy. It is a simple technique for practitioners to master, and patients are quick to extol the virtues of the single-point approach. Author Dr. Decheng Chen describes in detail how to treat one hundred of the most common clinical ailments, including headaches, neck pain, hypertension, and even the common cold. Dr. Chen uses both Western and traditional Chinese medical theory to describe his treatment methods. Each section consists of an introduction to the disease, a detailed explanation of the needle technique used, a case study of the treatment, and a discussion. With its easy-to-use format and step-by-step instructions, Single Point Acupuncture and Moxibustion for 100 Diseases is the definitive single point acupuncture guide for teachers, students, and acupuncture practitioners alike.

Chinese Acupuncture and Moxibustion

The first clinical textbook of acumoxa therapy dating from the third century - and one of the four great Chinese acupuncture classics - this book is so authoritative that it has provided the framework and standard for all subsequent acupuncture textbooks in China. It contains all the most important passages of the Su Wen and Ling Shu, collated, edited, and arranged according to topic.

Tests

A well-known acupuncturist specializing in external diseases from Tangshan, Hebei, wrote this clinical manual with Western practitioners in mind. It covers the treatment of traumatic injuries, muscle/joint problems, dermatological conditions, and postoperative complaints. Practitioners will find this book a useful addition to their library, allowing them to treat an even wider variety of diseases.

Single Point Acupuncture and Moxibustion for 100 Diseases

This authoritative text provides a complete overview of Chinese moxibustion techniques and methods, including detailed treatments and contraindications for a wide range of conditions. The authors cover the fundamentals of theory as well as the skills and techniques practitioners will need, and provide a detailed summary of all of the acupoints commonly used in moxotherapy. The book also covers the ways in which moxotherapy can be used to cultivate general health and wellbeing in patients, and explains in detail how to treat a wide range of complaints; for each complaint, descriptions of typical cases and the acupoints and procedures needed for treatment are provided. Extensively illustrated with photographs which clearly demonstrate clinical procedures, this is an essential reference for practitioners and students of acupuncture.

The Story of Chinese Acupuncture and Moxibustion

Based on China's national textbook for acupuncture and moxibustion, this book covers acupuncture's fundamental concepts and more advanced theory. It is designed in a chart and diagram format so as to help the reader and compare information presented.

The Systematic Classic of Acupuncture & Moxibustion

The ability to apply complex theory to practice is a vital skill for acupuncturists. Case studies and medical records are an extremely useful resource for understanding how to differentiate between different syndromes, and provide invaluable precedents for deciding upon appropriate methods of diagnosis and treatment. This book presents a collection of real case studies of patients who have been treated by prominent acupuncture practitioners in China. The case studies are divided into five sub-categories of disease, and include information on the patient's medical history, presenting complaint, symptoms, tongue and pulse examination, diagnosis, treatment, and prescription as well as the Western diagnosis. More than 170 different case studies are included in the book, covering 73 different types of syndromes and disease. A useful appendix with the Chinese and English names for these syndromes is also included. Compiled by leading experts at the China Beijing International Acupuncture Training Center (CBIATC), under the editorial direction of leading Chinese clinicians Zhu Bing and Wang Hongcai, this book is a useful reference for acupuncture practitioners and students at all levels.

His medical writings include Head Acupuncture, Jiao Shun Fa Head Acupuncture, Carotid Drip Liquid in the Treatment of Cerebrovascular Disease, Seeking the Truth of Chinese Acupuncture and Moxibustion, Soul of Chinese Acupuncture and Moxibustion, Acupuncture and Moxibustion Theory and Clinical Practice, Treating Diseases with Acupuncture and more than ten other texts published in China and abroad. This new version of the classic Chinese medical text, the Ling Shu - Nine Needles and Twelve Yuan-Source Points, is his latest work and in many ways his most important contribution to the literature of contemporary Chinese medicine.

Acupuncture & Moxibustion - A Clinical Desk Reference

Using modern knowledge to shed light on ancient techniques, this text examines two of the earliest therapeutic techniques of Chinese medicine: acupuncture and moxibustion. Acupuncture is the im-

plantation of very thin needles into subcutaneous connective tissue and muscle at a great number of different points on the body's surface; moxibustion is the burning of Artemisia tinder (moxa) either directly on the skin or just above it. For 2500 years the Chinese have used both techniques to relieve pain and to heal a wide variety of illnesses and malfunctions. Providing a full historical account of acupuncture and moxibustion in the theoretical structure of Chinese medicine, Doctors Lu and Needham combine it with a rationale of the two techniques in the light of modern scientific knowledge.

The Great Compendium of Acupuncture and Moxibustion Volume IX

The Zh n J u Z Sh ng J ng (The Classic of Supporting Life with Acupuncture and Moxibustion) by Wang Zhizhong as translated by Yue Lu (with editing by Lorraine Wilcox) is an absolutely phenomenal resource for the clinical use of acupuncture and moxibustion. This text stands out amongst many of the Classics for several reasons: the first of which is that Wang Zhizhong was a keen researcher, who would not only compare source materials against each other, but also cite which source materials he compared, and how they were the same or different. Secondly, while Wang was a gatherer of information, he was also practical, and this book is filled with his many many pearls of how he used a point prescription, why and what the results were of his own tests of the material. Thirdly, to date there

is no other classical material which is as complete in subject matter as the *Zh n J u Z Sh ng J ng*. Wang categorized not only the point locations, and how to use the points with what method, but systematically collated 196 disease patterns from the most exterior down to the deepest levels, documenting multiple presentations and treatments for each pattern. Lastly, Wang's primary focus was on supporting or nourishing life through the use of these techniques, and therefore there are a significant number of these treatments that either use moxibustion as the primary treatment method, or use moxibustion after the primary treatment method. In the modern age, we are extremely lucky to have access to the classical sources for East Asian Medicine, and this is partly because of the hard work of translators like Yue Lu and Lorraine Wilcox.
