Study Guide for Economics

Money. Debt. Interest rates. Bankruptcy. Billionaires. Students may understand that money makes the world go 'round, but most are a little shaky when it comes to explaining how and why. Using an A-Z format and containing over 400 entries, this reference book provides an essential foundation of business and economic knowledge for middle-school, high-school, and community college students. Short features scattered throughout the text add interest and fun, while helping students understand how economics affects their daily lives. Best, the entries are written in a style ideal for students just beginning to learn how economies work and function. Teenagers spend over \$100 billion annually in the U.S. and influence everything from clothing styles to music and movies to food and cell phones. Money for Minors will help them understand how their daily decisions have a huge impact on the economy. Special features will enable budding moguls to understand how they can become entrepreneurs and create economic value in various ways, evaluate offers from banks and credit card companies, read the business section of the newspaper, understand the importance of various government statistics, and more. And the book will not just prepare students for the higher-level economics courses they will take in high school and college—it will be a terrific guide for anyone doing research on everything from the Great Depression to credit card debt to real estate to inflation. Over 400 clearly written definitions will help students understand the essential concepts of economics and finance. In addition:

- Short sidebars scattered throughout the text help students understand how economics affects their daily lives. Topics include reading stock quotes, icon economists like Alan Greenspan, monetary trivia, cool econ and monetary Websites, and the basics of entrepreneurship.
- Six mini-lessons provide real-life applications of how the economy functions. Topics include The Federal Reserve System, Gross Domestic Product, Government Spending and Taxation, National Debt, Money, and The Business Cycle.

Used as a stand-alone reference or in conjunction with an economics textbook, the definitions in the book will help students learn the language of economics—and help them understand the ways in which individuals, businesses, and government work together to form our \$13 trillion economy.

The Study Guide by Mark Rush of the University of Florida is carefully coordinated with the text, MyEconLab, and the Test Banks. Each chapter of the Study Guide contains: Key concepts Helpful hints True/false/uncertain questions Multiple-choice questions Short-answer questions Common questions or misconceptions that the student explains as if he or she were the teacher Each part allows students to test their cumulative understanding with questions that go across chapters and work a sample midterm examination. Students can purchase the Study Guide from our online catalog or from MyPearsonStore.

Level 2 Economics AME Workbook

Student workbooks will support your teaching and help your students skills and developments. The student workbooks each cover 7-8 key topics in core subject areas of AS or A2 economics, all relevant to the main specifications. The workbooks conclude with either one or two case studies or a 'test your knowledge section', drawing on students skills and understanding of the subject area. Each topic comprises: 1-2 pages of source material(short articles, data sets, diagrams etc,) and 4-5 pages of related exercises designed to develop and test student skills, with space provided for written answers. The exercises take various forms, including exam-style questions, although the workbooks are not intended as mock exams. They are designed for systematic classroom use to support your own scheme of work or as the basis of a revision programme. Answers to the exercises are provided in an accompanying set of Teachers Notes. Where there is no objectively 'right' answer, the notes identify the key points that should appear in the answer. Student workbooks are available only in class sets of 10, priced at £35 per set. Each set of workbooks includes one FREE copy of the teachers notes.
