Organize a customized eating plan that includes family favorites. Teach children to eat healthy foods without fights, and learn how and when to compromise over junk food. Includes 50 easy recipes and 80 kid-friendly menus.

True Green Kids

This informative book is crammed full of fun, easy, and practical projects you can do to "green up" your home, school, community, and environment!

Environmental Science in the Primary Curriculum

The importance of helping children to understand the environment is now widely recognized and is well represented in The National Curriculum for Science. But what kind of 'environmental education' is appropriate at the primary level? The authors address this central question throughout this book. Science activities relating to the children's school environment are described and explained. The interaction or 'encounter' of children with the environment is the pervading theme. In these 'encounters' children are encouraged to find answers to their questions through scientific investigation of the objects, events or particular part of the environment being studied, either in the field or in the classroom.

Projects for a Healthy Planet

Simple and fun activities that inspire understanding and respect for the environment. Discover what pollution is and what it does. Learn how you can limit pollution through conservation and recycling. Make your own environmentally friendly products. The activities in this book will show you things like how to make scratch-and-sniff paper, how to build your own greenhouse, and how to sprout seeds in old tea bags. Each activity is fun to read and is explained in step-by-step drawings that are easy to follow, and all materials are readily available household items.

Take Action: An Environmental Book for Kids

Filled with ideas for arts and crafts projects, experiments, and experiences that encourage children to enjoy and heal the environment, this book covers acid rain, endangered wildlife, pesticides, energy, recycling, pollution, landfills, rain forests, water conservation, and related topics.

Minnesota Environment

A fantastic new series introducing children to environmental issues facing the world today. Informative and visually exciting, these titles encourage a positive approach to becoming more 'green'. Activities to encourage children to reuse, reduce and recycle. Packed with photographs. Fascinating facts, written and checked by experts. Contents, glossary and index.

Earth Book for Kids

Called "the perfect children's introduction to environmental issues" by Fred Krupp, president of the Environmental Defense Fund, *Our House Is Round* gently guides young readers through a smartly narrated conversation illuminating the concept of global connection and environmental cause and effect. This book teaches the "whys" behind earth conservation in a colorful, positive way that encourages maturity, responsibility, and problem-solving discussion. Author Yolanda Kondonassis encourages children to answer questions about their planet and discusses the issues of global warming, recycling, energy conservation, planting trees, and more. This book is a must for every school and family library. Sky Pony Press, with our Good Books, Racehorse and Arcade imprints, is proud to publish a broad range of books for young readers—picture books for small children, chapter books, books for middle grade readers, and novels for young adults. Our list includes bestsellers for children who love to play Minecraft; stories told with LEGO bricks; books that teach lessons about tolerance, patience, and the environment, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.

First published in Canada in 1989, the book lists contact details for environmental agencies and relevant government departments in Australia.

Groovy Green Ideas

"...the 'proof' of man's destruction of the environment isconsistently flawed.... the scientific method is being abused andignored. The errors are not random, however, but are systematicallybiased toward attempting to prove the guilt of man in the allegeddestruction of the planet. Objective science is disappearing and isbeing replaced by the pursuit of a philosophical agenda." --Richard F. Sanford in Environmentalism and theAssault on Reason Chapter 1 "The public has numerous misconceptions about the relationshipbetween environmental pollution and human cancer. Underlying thesemisconceptions is an erroneous belief that nature is benign." --Bruce N. Ames, Ph.D. and Lois Swirsky Gold, Ph.D inEnvironmental Pollution and Cancer: Some Misconceptions Chapter7 "Greenhouse gases have been increasing in the atmosphere,largely as a result of human activities. However, the climaterecord does not show the temperature increase and other telltalesigns of the expected greenhouse effect. The mathematical modelsused for predicting such effects are evidently not complete enough to encompass all of the relevant physical processes in theatmosphere, thus throwing grave doubt on the drastic warminghypothesized for the next century." --S. Fred Singer in Global Climate Change: Facts andFiction Chapter 13 "...There is now no prima-facie case for any expensive policy ofsafeguarding species without more extensive analysis than has sofar been done." --Julian L. Simon in Disappearing Species,Deforestation and Data Chapter 26

Written for children, this book explains the environmental problems the world is currently facing and suggests ways in which the child can take positive action to help. The Earthworks Group has also written 50 Simple Things You Can Do To Save The Earth.

Green Ecology Environment for Kids

Why is there so much plastic in the world? How does it help us? What's the problem and how can we solve it? These are just some of the 60+ questions answered in this timely and topical book. The facts are presented in a friendly and quirky way, helping kids to understand this global predicament and inspiring them to be part of the solution. Illustrations: Full colour throughout

Good Planets Are Hard to Find!

The objective of 225 Math Quizzes That Will Make You an Environmental Expert is to increase children's knowledge on environmental issues while improving their math skills and critical thinking skills. In an era when redesigning each community in which all needs are met in sustainable ways is a key to the success of the community, building knowledge and skills to address complex environmental challenges has become more critical than ever. The importance of environmental education for children was highlighted when environmental education was included in the Every Student Succeeds Act (ESSA) that replaced the No Child Left Behind Act on December 10, 2015. ESSA emphasizes that both strengthening academic skills and developing a deeper understanding of environmental issues is essential to enhance students' learning and academic success. 225 Math Quizzes That Will Make You an Environmental Expert was designed to enhance both academic achievement and environmental knowledge of children. While traditional educational materials provide information on their subject matters only, this material integrated environmental subjects into one of the most important core academic subjects - mathematics. 225 Math Quizzes That Will Make You an Environmental Expert covers the national math standards for fifth grade. It also encourages children to challenge themselves beyond the material they have already mastered by connecting their learning with environmental situations in real world. Each quiz shows ongoing environmental issues in the United States and around the world, using the latest data from organizations such as the U.S. Environmental Protection Agency (EPA) and the World Wide Fund for Nature (WWF). Using actual data and real-life examples, the quizzes provide children opportunities to stimulate independent thinking, promote their academic success, and gain confidence in their abilities to learn. I strongly believe that 225 Math Quizzes That Will Make You an Environmental Expert will help foster the new generation of leaders and good environmental citizens. Hideka Yamaguchi, Ph.D. Founder of Blueggs Environmental Education, Ltd. January 2017
