Question 15

So because these Are Similar as We've Said the Surface Area Will Increase the Surface Area Increases by that Linear Scale Factor Squared So Now We're Talking about Surface Area Which Has a Two-Dimensional Area so We Square the Linear Scale Factor so We Can Say the Surface Area of Cone B Will Be 2 Squared Which Equals 4 So 2 B 4 Times the Surface Area of Cone a so We Can Say the Surface Area the Surface Area Can Be Is 4 Times the Surface Area of a so We Can Say that We Need 80 Times 4 Which Is Going To Be 320 Milliliters of Paint for Be

Then Part B Says the Volume of Cone a Is 170 1700 Centimeters Cubed Work Out the Volume of Cone B Now There's a Rule about the Volume of Similar Solids and It's the You Take the Linear Scale Factor and You Cube It so the Volume of Cone B Equals Two Cubed Times the Volume of Cone a Okay so We Just Need To Multiply It Well 2 Cubed Is 8 so We Need To Multiply that Number by 8 so Calculator out Plug in 171 700 I'll Try that by 8 and We Get 1 Million Three Hundred Seventy Three Thousand Six Hundred

We Could Find How To Get from B to C and Then Half that and that Will Give Us Bm and We Also Have One More Label We Can Draw in Here because We're Told Dc Is to Ab so Dc Must Be 8a so One Way To Get from B to C Is To Go Minus 4a plus 2b plus 8 a Now We'll Get Get Us To See another Way To Do It Is To Go Straight Down from B to Dc and that's the Vector to B

So One Way To Get from B to C Is To Go Minus 4a plus 2b plus 8 a Now We'll Get Get Us To See another Way To Do It Is To Go Straight Down from B to Dc and that's the Vector to B and this because I've Drawn that Line Parallel to Ad this Length in Here Must Be for a Must Be the Same as Ab and So this Is Going To Be for a in Here We Can Say that Bc Is Going To Be 2b plus 4a so You Can Do that a Couple of Ways Probably the Easiest One To See Is Just To Go from B to a to D to C so We Can Say Bc Equals 2b plus 4a

And that's Your Final Answer for Part a Part B Says N Is the Point Such that D Cn Is a Straight Line and Dc to Cn Equals 2 to 1 So Here's N so We Said We're Told that Dc N Is a Straight Line and the Ratio of Dc 2 to Cn Is 2 to 1 so if this Is 8a this Must Be for a Cn Must Be for a and Part B Says Show that a Mn Is a Straight Line Okay so that's the Line from a through M to N and One Way You Can Do this Is To Get the Vector for Am ...

And if We Can Show that in this They're Going in the Same Direction or that They're Multiples of each Other Then We Can State that a Min Is a Straight Line So Firstly How Can We Get from a to M Well We Can Go from a to B and Then B to M and We Have the Vector for B2 M from Part a so We Can Say that Am Is Going To Be for a Which Is a to B and Then Bm Is B plus 2a so We Can Add that On and Then Simplify this So this Is Going To Be 6 a Plus B and Also Can We Find the Vector for Emin

Q Are Straight Lines Ab Is Parallel To Qp and Dc Is Parallel to Rs 8 Equals 11 Centimeters Bc Equals 5 Centimeters Ps Equals Twenty-Seven Point Five Centimeters and Rs Equals 42 Point Five Centimeters Okay so They've Labeled all of those Distances on the Diagram Already and They've Also Labeled the Parallel Lines and We're Told that these Two Long Lines Here Are Straight Lines Okay and Part a Says Quadrilateral Abcd Is Similar to Quadrilateral Pqrs so Abcd Is this Quadrilateral Here and Pqrs Is this One Here and It Says Work Out the Length of Our Q Which Is in Here Okay so if these Two Quadrilaterals Are Similar that Means these Lengths Are Increased by some Scale Factor

So We Can Find that Scale Factor by Dividing 27 5 by 11 27 5 by 11 Well Let's Just Write that in a Calculator 27 5 Divided by 11 and that Gives Us 2 5 so the Scale Factor of these Two Quadrilaterals Is 2 5 So To Find Qr We Can Multiply Cb by 2 5 so Qr Is Going To Equal Five Times Two Point Five and that Is Twelve Point Five so the Answer There Is Twelve Point Five Centimeters Part B Says Work out the Length of Cd and that's that Line There so We Already Have the Scale Factor and that Line Is Similar to Rs so We Have the Length of Rs

And We Have a Pi on both Sides so I Can Cancel those Out and Multiply the Left-Hand Side by 3 To Get Rid of this Fraction Here so We'll Get 9 R Squared Equals 16 So R Squared Equals Now Divide this the Right-Hand Side by 9 It's Going To Be 16 over 9 and Then Square Root both Sides To Get Rid of this Exponent

And We Can Put We Can Now Plug the Radius in Which We Found from this Working Out Here into

this Formula so We'll Get 2 on 3 Pi and Then 4 on 3 Cubed Then We Get 2 over 3 X Now 4 Cubed Is 64 3 Cubed Is 27 and that's all Multiplied by Pi 2 Times 64 That's 128 3 Times 27 That's 81 Times Pi and Now We Have It in the Form of Something times Pi and in this Case We're Looking for that Value before Pi so They've Told Us To Find the Value of K

Question 20 Says Abc Is a Triangle Ac Equals Eight Point Four Meters Angle Acb Equals 40 Degrees the Area of the Triangle Equals 100 Meters Squared Workout the Length of Ab Give Your Answer Correct to Three Significant Figures You Must Show All Your Working Okay so There's Two Steps We Need To Take Here and We Need the Sign Off for the Area of a Triangle and the Cosine Rule so the Reason They Give Us this Area Is To Allow Us To Find Cb Let's Call that X in Now the Area of a Triangle Equals Half a Bc Sine C Where a and B Stands for the Sides

So because this Is Ab Squared We Need the Square Root of this Number To Get the Final Answer So Again Put the Screw in and Then We Can Use the Answer Key Again To Save Ourselves some Work Press Equals and We Get 31 Point Zero Seven Eight Eight Nine Okay So Therefore Ab Equals 31 Point Zero Seven Eight Eight Nine and the Question Says Give Your Answer Correct to Three Significant Figures

So Again Put the Screw in and Then We Can Use the Answer Key Again To Save Ourselves some Work Press Equals and We Get 31 Point Zero Seven Eight Eight Nine Okay So Therefore Ab Equals 31 Point Zero Seven Eight Eight Nine and the Question Says Give Your Answer Correct to Three Significant Figures so these Are the First Three Significant Figures Here and We Need To Look at the Next Number Which Is a Seven Is that Five or More Yes It Is so We Need To Round that Zero Up by One so Our Answer Here Is Going To Be Approximately 31 Point One Meters and that's the End of this Paper I Hope You Found that Useful Leave a like if You Did Leave a Comment Letting Me Know What You Thought or if You Had any Different Methods or any of the Questions I Really Like To Hear Your Working Out if You Had a Different Way of Doing Something and Also Subscribe if You Want To See More Content Once Again Thanks for Watching and I'll See You in the Next One Bye for Now GCSE 2022 Maths paper 1 was LEAKED ~~by~~ GCSE 2022 Maths paper 1 was LEAKED ~~by~~ Maths Coach 189,389 views 1 year ago 1 minute, 15 seconds - The Edexcel GCSE MATHS 2022 **paper**, 1 was leaked on twitter on the morning of the exam. Highlights of the book: Discussion about all the fields of Computer Aided Engineering, Finite Element Analysis Sharing of worldwide experience by more than 10 working professionals Emphasis on Practical usage and minimum mathematics Simple language, more than 1000 colour images International quality printing on specially imported paper Why this book has been written ... FEA is gaining popularity day by day & is a sought after dream career for mechanical engineers. Enthusiastic engineers and managers who want to refresh or update the knowledge on FEA are encountered with volume of published books. Often professionals realize that they are not in touch with theoretical concepts as being pre-requisite and find it too mathematical and Hi-Fi. Many a times these books just end up being decoration in their book shelves ... All the authors of this book are from IITs & IISc and after joining the industry realized gap between university education and the practical FEA. Over the years they learned it via interaction with experts from international community, sharing experience with each other and hard route of trial & error method. The basic aim of this book is to share the knowledge & practices used in the industry with experienced and in particular beginners so as to reduce the learning curve & avoid reinvention of the cycle. Emphasis is on simple language, practical usage, minimum mathematics & no pre-requisites. All basic concepts of engineering are included as & where it is required. It is hoped that this book would be helpful to beginners, experienced users, managers, group leaders and as additional reading material for university courses.

Civil Discipline-specific Review for the FE/EIT Exam

Passing the Fundamentals of Engineering Exam is the first step toward becoming a Registered, or Professional, Engineer. The P.E. designation is a prerequisite for work as a consulting engineer, as well as for engineering management positions in many industries. This book prepares applicants who are planning to take the exam in the field of "mechanical" or "other" disciplines. It includes two mini diagnostic tests (one for each discipline) plus two full-length practice examinations with questions answered and explained for both disciplines. Prospective test takers will also find valuable brush-up chapters covering all test topics: chemistry, computational tools, dynamics, kinematics and vibrations, electricity and magnetism, engineering economy, ethics and professional practices, fluid mechanics, instrumentation and data acquisition, materials science and structure, mathematics, measurements, instrumentation and controls, mechanical design and analysis, probability and statistics, mechanics of materials, safety, health, and environment, statics, and thermodynamics and heat mass and energy transfer. Additional practice questions with answer keys and explanations follow each chapter.
