An outstanding reference source for practicing designers, this thoroughly up-to-date guide to interior design provides a firm understanding of the products, properties, and uses of all materials. It offers a refreshing, "synergistic" approach, stressing the importance of cooperation between interior designers and architects, and mutual understanding of each others tools towards achieving a working and successful final project. It progresses from the ground up - literally - looking beyond the more decorative aspects of design to study the properties and uses of both finishing materials in the design field and structural materials in the architectural field. Threading a theme of environmental awareness throughout (i.e. recycling as ways to help cope with the growing landfill problems), it goes on to cover paints and finishes (and how these products have changed due to laws governing toxic emissions); carpets (with commercial specifications supplied by the Carpet and Rug Institute); flooring, walls, and ceilings (including their installation methods and maintenance requirements); cabinet construction; kitchens and bathrooms (featuring dynamic new materials now used in remodeling); and more. The metric system is integrated throughout, and manufacturers websites are listed for additional research.

The Buying Guide 2004

The System of Objects is a tour de force—a theoretical letter-in-a-bottle tossed into the ocean in 1968, which brilliantly communicates to us all the live ideas of the day. Pressing Freudian and Saussurean categories into the service of a basically Marxist perspective, The System of Objects offers a cultural critique of the commodity in consumer society. Baudrillard classifies the everyday objects of the “new technical order” as functional, nonfunctional and metafunctional. He contrasts “modern” and “traditional” functional objects, subjecting home furnishing and interior design to a celebrated semiological analysis. His treatment of nonfunctional or “marginal” objects focuses on antiques and the psychology of collecting, while the metafunctional category extends to the useless, the aberrant and even the “schizofunctional.” Finally, Baudrillard deals at length with the implications of credit and advertising for the commodification of everyday life. The System of Objects is a tour de force of the materialist semiotics of the early Baudrillard, who emerges in retrospect as something of a lightning rod for all the live ideas of the day: Bataille’s political economy of “expenditure” and Mauss’s theory of the gift; Reisman’s lonely crowd and the “technological society” of Jacques Ellul; the structuralism of Roland Barthes in The System of Fashion; Henri Lefebvre’s work on the social construction of space; and last, but not least, Guy Debord’s situationist critique of the spectacle.

Keep your tools in top condition: Season your pans the right way, de-stinkify silicone ice trays, and finally get that gunk off your toaster oven. Peek behind the scenes: Read all about the zany lengths Lisa, Hannah, and their team will go to for answers—from sawing coolers in half to programming knife-wielding robots. Reader's Digest Fix-it-yourself Manual

Pasta making is, at its most basic, an act of humility. It's repetitive, precise manual labor—a simple gift to the gods of gluten offered up in flour-dusted basements and prep kitchens around the world. It is ceremonious only in its utter lack of ceremony. What has always appealed to me is how the frank marriage of two ingredients—whether flour and water or flour and eggs—splinters into hundreds of variations of stuffed, rolled, extruded, dried, stamped, and hand-cut shapes; how each has its own origin story, rhythmic set of motions, and tools; and how mastery can sometimes come down to an elusive sleight of hand: the flick of a wrist, the perfect twist of the index finger away from the thumb. Movements learned only through practice. In the two years between leaving A Voce in Manhattan and opening my first restaurant, Lilia, in Brooklyn, I spent most of my days at home learning, for the first time since I was a kid, what it meant to cook not for accolades or recognition but for comfort. There was no Michelin. No New York Times. No owners. No need to prove that a Jewish kid from Connecticut with no Italian heritage had any business cooking Italian food. No longer were my thoughts, *Is this nice enough?* or *Is this cool enough?* but rather, *What kind of food do I want to eat?* or *What food do I want to cook?* and most importantly, *Why?* I was cooking pasta that paid homage to Italy's iconic regional dishes, sure, but the virtue of craveability was paramount. It's why my food at Lilia and my second restaurant, Misi, is so rooted in home cooking, and it's perhaps the only way to explain how a dish as simple as rigatoni with red sauce ended up on Lilia's opening menu, and then once again at Misi. I wanted to serve the food that I like to eat—the food I'd always been cooking, just stripped down to the studs and rebuilt with a simple mantra in mind: *quanto basta*. In Italian cookbooks, *quanto basta* is typically represented as “q.b.” It translates to “as much as is necessary,” and it appears when an ingredient is listed without an exact quantity. It's essentially the Italian version of “salt to taste,” but it has come to symbolize a shift in focus for me—one that places simplicity and comfort first and always makes me ask, *Is this really necessary?* It took me decades to get here. This book is meant as a ride-along, from red sauce to regional classics to the pastas I've made my own. At its core is a journey back to the home regions of some of my favorite pastas in an effort to understand them with new clarity—to gain a deeper knowledge of not only how they are faring in a country undergoing constant culinary evolution but also of their sense of place. Perhaps more than anything, though, this book is my love letter to pasta. What has made pasta the cornerstone of Italian culinary culture for centuries, an indelible part of so many Americans' early food memories, and a food so eminently alluring that even the gluten averse cannot resist its siren song is that it asks, first and foremost, something elemental of us: that we enjoy it.
