Military Chaplains as Agents of Peace

Globally, where faith and political processes share the public space with indigenous populations, religious leaders of tolerant voice, who desire to transcend the conflict that often divides their peoples, are coming forward. Affirming and enabling these leaders is increasingly becoming the focus of the reconciliation efforts of peace builders, both internally and externally to existing conflict. By way of theoretical analysis and documented case studies from a number of countries, Military Chaplains as Agents of Peace considers Religious Leader Engagement (RLE) as an emerging domain that advances the cause of reconciliation via the religious peace building of chaplains: A construct that may be generalized to expeditionary, humanitarian, and domestic operational contexts. An overview of the benefits and limitations of RLE is offered and accompanied by a candid discussion of a number of the more perplexing questions related to such operational ministry: Influence Activities, Information Gathering for Intelligence Purposes, and the Protected (Non-Combatant) Status of Chaplains.

Military Chaplains As Peace Builders: Embracing Indigenous Religions in Stability Operations

The three researchers of "Military Chaplains as Peace Builders: Embracing Indigenous Religions in Stability Operations"-Chaplain (Col) William Sean Lee, Lt Col Christopher J. Burke, and Lt Col Zonna M. Crayne, all Air Force Fellows-make suggestions that bring the chaplain business into the twenty-first century. Religion and culture in general have been long neglected by planners, policy makers, and diplomats. Our experience in Phase IV, or the constructive phase, of Operation Iraqi Freedom has clearly exposed this inattention as a serious flaw in bringing peaceful development to Iraq. These authors suggest that military chaplains can be a part of a better solution. It is not a case of trying to proselyte; it is rather one of engaging local religious leaders to facilitate the stabilization process. Currently, US military chaplains not only provide religious and spiritual support to military personnel and their families, but also train to conduct religious area analyses and assessments, primarily for the purpose of advising the commander on indigenous religious culture and practices. The thesis of this paper is to suggest an expanded role as religious liaison, wherein the chaplains would have a direct interface with local religious groups and religious leaders. The chaplains would develop a dialogue, build relationships, promote goodwill, and even help create formal inter-religious councils. The authors recommend changes affecting doctrine, training, and assignments that are necessary to facilitate this expanded role of chaplains. Commanders often have a military lawyer and intelligence officer by their side when addressing operational decisions. Chaplains of the future should be equally important to the commander conducting stability operations. Our leadership must be comfortable in the understanding that an individual does not have to become religious in order to understand religion.

Military Chaplains as Peace Builders

Religion and culture in general have been long neglected by planners, policy makers, and diplomats. Our experience in Phase IV, or the constructive phase, of Operation Iraqi Freedom has clearly exposed this inattention as a serious flaw in bringing peaceful development to Iraq. These authors suggest that military chaplains can be a part of a better solution. It is not a case of trying to proselyte; it is rather one of engaging local religious leaders to facilitate the stabilization process. Currently, US military chaplains not only provide religious and spiritual support to military personnel and their families, but also train to conduct religious area analyses and assessments, primarily for the purpose of advising the commander on indigenous religious culture and practices. The thesis of this paper is to suggest an expanded role as religious liaison, wherein the chaplains would have a direct interface with local religious groups and religious leaders. The chaplains would develop a dialogue, build relationships, promote goodwill, and even help create formal inter-religious councils. The authors recommend changes affecting doctrine, training, and assignments that are necessary to facilitate this expanded role of chaplains. Commanders often have a military lawyer and intelligence officer by their side when addressing operational decisions. Chaplains of the future should be equally important to the commander conducting stability operations. Our leadership must be comfortable in the understanding that an individual does not have to become religious in order to understand religion.

Military Chaplains as Peace Builders

Chaplaincy highlights the need for faith and society to re-engage with vital moral questions. Military chaplains continue to operate within the dynamic tension between faith communities, the armed services and society, offering a distinct moral presence and contribution. Drawing the reader into the world of the military chaplain, this book explores insights into the complex moral issues that arise in combat (especially in Afghanistan), and in everyday military life. These include the increasing significance of the Law of Armed Conflict and the moral significance of drones. Through the unique chaplain's eye view of the significance of their experience for understanding the ethics of war, this book offers clearer understanding of chaplaincy in the context of the changing nature of international conflict (shaped around insurgency and non-state forces) and explores the response of faith communities to the role of the armed services. It makes the case for relocating understandings of just war within a theological framework and for a clear understanding of the relationship between the mission of chaplaincy and that of the military.

Military Chaplaincy in Contention

The role of military chaplains has changed over the past decade as Western militaries have deployed to highly religious environments such as East Africa, Afghanistan, and Iraq. U.S. military chaplains, who are by definition non-combatants, have been called upon by their war-fighting commanders to take on new roles beyond providing religious services to the troops. Chaplains are now also required

to engage the local citizenry and provide their commanders with assessments of the religious and cultural landscape outside the base and reach out to local civilian clerics in hostile territory in pursuit of peace and understanding. In this edited volume, practitioners and scholars chronicle the changes that have happened in the field in the twenty-first century. Using concrete examples, this volume takes a critical look at the rapidly changing role of the military chaplain, and raises issues critical to U.S. foreign and national security policy and diplomacy.

The Chaplain's Evolving Role in Peace and Humanitarian Relief Operations

Patriotism and religious belief were defining characteristics of both public and private life during the 20th century. British army chaplains were shaped by these powerful sentiments and in turn shaped and interpreted them to understand their own roles and to provide a message and ministry to soldiers and officers. Focusing on World War II, 'Chaplains at War' reveals how the army, the government and the churches responded to the challenges of war, leading to innovation that was unknown in peace time such as the appointing women as Chaplains' Assistants. Alan Robinson uses interviews with former chaplains, officers and soldiers and extensive archive research in military, government and church archives to draw together personal experience and official policy. His book will be essential reading for anyone interested in British military history, church history and religious studies.

Chaplains as Liaisons with Religious Leaders

British army chaplains have not fared well in the mythology of the First World War. Like its commanders they have often been characterized as embodiments of ineptitude and hypocrisy. Yet, just as historians have reassessed the motives and performance of British generals, this collection offers fresh insights into the war record of British chaplains. Drawing on the expertise of a dozen academic researchers, the collection offers an unprecedented analysis of the subject that embraces military, political, religious and imperial history. The volume also benefits from the professional insights of chaplains themselves, several of its contributors being serving or former members of the Royal Army Chaplains' Department. Providing the fullest and most objective study yet published, it demonstrates that much of the post-war hostility towards chaplains was driven by political, social or even denominational agendas and that their critics often overlooked the positive contribution that chaplains made to the day-to-day struggles of soldiers trying to cope with the appalling realities of industrial warfare and its aftermath. As the most complete study of the subject to date, this collection marks a major advance in the historiography of the British army, of the British churches and of British society during the First World War, and will appeal to researchers in a broad range of academic disciplines.

Confidence in Battle, Inspiration in Peace

The Centenary of the 'war to end all wars' has brought to prominence both the pain and the pride of the armed forces. But it also raises some perennial questions about such forces, the place of Christians within them, and the Christian response to commemorating the events of war. This booklet sets out to outline the place and role of armed forces and the 'Just War' theory, to look at some of the pressures under which personnel of the modern Western world's militaries serve as well as some of the moral issues surrounding the existence and the use of these same forces. It spends some time discussing the place of Christians in the military and the role of chaplains as God's servants and witnesses within it. Finally it makes some observations and suggestions about commemoration ceremonies, both of wars in general and individual battles in particular. John Neal was ordained in 1968 in Nelson, New Zealand and served in parishes in that country plus five years in the Diocese of Quebec as Priest/Pilot in their Labrador Mission. He enlisted in the RNZAF in 1986 and served for 23 years, rising to Principal Defence Chaplain of the NZ Defence Force before retiring in 2009. He is currently Priest Assistant (part time) at the Church of the Nativity, Blenheim."

Military Chaplains in Afghanistan, Iraq, and Beyond

Men of God, Men of War tells the stories of chaplains who have served in America's wars. In his exploration of military chaplaincy, author Robert Doyle poses questions about their brand of service to the United States. He examines the complexities of the chaplains' vocation—the types of services they performed, the roles they assumed in combat and as prisoners of war, and how they interacted with the military personnel they served and supported. Doyle explores the high price many paid for their commitment to their unique type of service. Doyle illuminates the histories of chaplains who did their duty selflessly to God, to their country, to the soldiers, sailors, Marines, and airmen with

whom they found themselves in very dire circumstances over the past three hundred years. Chaplains throughout American history have served bravely and selflessly at home and in the field, both under fire and “behind the wire.” Chaplains served as sources of motivation, inspiration, and peace for military personnel in times of hardship, especially in captivity. Doyle illustrates that while they are now treated as non-combatants, chaplains’ vital role as leaders cannot be underestimated or understated. Men of God, Men of War examines how chaplains performed under fire in hostile environments, beginning with the Revolutionary War through the war on terror in Iraq and Afghanistan. The chaplains of the Revolution were patriots first, soldiers second, and men of God third. From the Civil War to modern times, these men gave hope to the hopeless, absolution to those soldiers who stood before their Maker before battles, and faith in themselves and their comrades so necessary for men in combat. Doyle’s research shows that military chaplains have always remained necessary to men at war, even in a modern secular military.

Military Chaplains’ Review

Army chaplains have long played an integral part in America’s armed forces. In addition to conducting chapel activities on military installations and providing moral and spiritual support on the battlefield, they conduct memorial services for fallen soldiers, minister to survivors, offer counsel on everything from troubled marriages to military bureaucracy, and serve as families’ points of contact for wounded or deceased soldiers—all while risking the dangers of combat alongside their troops. In this thoughtful study, Anne C. Loveland examines the role of the army chaplain since World War II, revealing how the corps has evolved in the wake of cultural and religious upheaval in American society and momentous changes in U.S. strategic relations, warfare, and weaponry. From 1945 to the present, Loveland shows, army chaplains faced several crises that reshaped their roles over time. She chronicles the chaplains’ initiation of the Character Guidance program as a remedy for the soaring rate of venereal disease among soldiers in occupied Europe and Japan after World War II, as well as chaplains’ response to the challenge of increasing secularism and religious pluralism during the “culture wars” of the Vietnam Era. “Religious accommodation,” evangelism and proselytizing, public prayer, and “spiritual fitness” provoked heated controversy among chaplains as well as civilians in the ensuing decades. Then, early in the twenty-first century, chaplains themselves experienced two crisis situations: one the result of the Vietnam-era antichaplain critique, the other a consequence of increasing religious pluralism, secularization, and sectarianism within the Chaplain Corps, as well as in the army and the civilian religious community. By focusing on army chaplains’ evolving, sometimes conflict-ridden relations with military leaders and soldiers on the one hand and the civilian religious community on the other, Loveland reveals how religious trends over the past six decades have impacted the corps and, in turn, helped shape American military culture.

Chaplains at War

Excerpt from Military Chaplains' Review: Summer, 1988, Peace The Military Chaplain's Review (ISSN 0360-9693) is published quarterly by the US Army Chaplaincy Services Support Agency for the Chief of Chaplains. This professional bulletin for military chaplains is a medium for those interested in the military chaplaincy to share the product of their experience and research. We welcome articles which are directly concerned with support and strengthening chaplains professionally. Preference will be given to articles having value as reference material. Articles should be submitted in duplicate, double spaced, to the editor. Military Chaplains' Review, United States Army Chaplaincy Services Support Agency, Riddell Bldg., Suite 401, 1730 K Street, N.W., Washington, DC 20006-3868. Articles should be 12 to 20 pages long; and when appropriate, carefully documented. Detailed editorial guidelines are available from the editor. Articles appearing in this publication reflect the views of the authors and should not be interpreted as reflecting the official opinion of The Department of the Army nor of any branch, command or agency of the Department of the Army. Private subscriptions and rates are available from Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Second class official postage paid at Washington, D.C. and additional mailing offices. Postmaster; Send address changes to U.S. Army Chaplaincy Services Support Agency, Riddell Bldg., Suite 401, 1730 K Street, N.W., Washington, DC 20006-3868. Unless copyrighted, articles may be reprinted; please credit the author and the Military Chaplains' Review. Distribution restriction: Approved for public release. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. The Military Chaplaincy

Serving in the military is often a disruptive event in the lives of those who join, precipitating a reassessment of the service member's ethical sensibilities or, tragically, resulting in lasting moral injury and trauma. The military experience compels them to navigate multiple identities, from citizen to warrior and back. Their religious identity, sometimes rooted in a civilian religious community, can be altered by military participation. Through a series of inductive, in-depth qualitative interviews, Suitt explores how varied religious resources and potentially traumatic events affect the lives of post-9/11 veterans who once or currently identified as Christian. Adding to existing research on moral injury, it traces how military chaplains, ethics education, just war theory rhetoric, and formal religious practice supplied by the military alter the course of service members' moral lives. These narrative trajectories reveal how veterans use Christian faith or other systems of meaning-making to understand war and their identities as service members and veterans.

Chaplains in War and Peace

"This paper represents the start of a conversation concerning how the military chaplaincy might become a force for peace at every level of military life. The modern chaplaincy grows out of a long historical tradition that has seen very little "daylight" between religion and the military aims of nation states. While the US military chaplaincy has grown to embrace advising and spiritual programming roles, it remains a primarily reactive institution. Anchored in an understanding of praxis that originates with the Sermon on the Mount, the paper envisions how the chaplaincy might adopt a proactive program of promoting peace. It then documents the results of initial attempts to forge conversation around the idea of chaplains as active promoters of peace and describes next steps in fostering that conversation." -- Leaf [ii].

Builders of Faith

Nominated for the Royal Historical Society Whitfield Book Prize 2013 Nominated for the SAHR Templer Medal 2013 As with many other aspects of the British army the outbreak of World War One started a process of change that was to result in a radically different provision of chaplaincy care once the war was over. Nothing was ever simple with chaplaincy as a number of churches becoming involved with the army, many for the first time. The structure was already under pressure before the war with the Catholic Church insisting on new rules for chaplaincy in the first decade of the twentieth century. The creation of the Territorial Force added a new dimension after 1907, bringing new players into the mix including the Jewish community. These chaplains challenged the traditional Garrison Church

based ministry of the regulars. The book examines the muddled state of chaplaincy in August 1914 and looks at how chaplains were mobilized. It then reviews how organizational changes were often the result of pressure from the different churches. The unilateral decision of the Church of England, in July 1915, to leave the unified administration in France that had existed since August 1914 is examined in the light of the availability of the relevant volume of the diaries of Bishop Gwynne, a key participant in the change. Chapters also look at the experience of other Imperial forces and of the casualties suffered by chaplains. These all provide evidence of the expectations that various groups had of army chaplains. It is often forgotten that two chaplains were captured during the retreat from Mons in 1914. They were never far from the fighting throughout the war. The experiences of the war meant that the prewar structure needed reform. The final chapter looks at the structure that was created in 1920 and then survived virtually unchanged until 2004. Army chaplaincy has always been a mix of Church, Army and State. Such a coming together inevitably lead to confusion. Not surprisingly one of the themes was the muddle that resulted. Even so army chaplaincy ended the war with a much higher profile than the one it had in 1914. This was recognized by the addition of 'Royal' creating the RACHD. Anglicans, Catholics, Presbyterians, Methodists, and other faith groups, as well as military historians will find this book of interest as it overturns a number of myths and puts chaplaincy in its wider context.

The Clergy in Khaki

For both the Union and Confederate soldiers, religion was the greatest sustainer of morale in the Civil War, and faith was a refuge in times of need. Guarding and guiding the spiritual well-being of the fighters, the army chaplain was a voice of hope and reason in an otherwise chaotic military existence. The clerics' duties did not end after Sunday prayers; rather, many ministers could be found performing daily regimental duties, and some even found their way onto fields of battle.

Commemorating War and Praying for Peace

A survey and reassessment of the role of the army chaplain in its first 150 years. Few military or ecclesiastical figures are as controversial as the military chaplain, routinely attacked by pacifist and anticlerical commentators and too readily dismissed by religious and military historians. This highly revisionist study represents a complete reappraisal of the role of the British army chaplain and of the Royal Army Chaplains' Department in the first century and a half of its existence. Challenging old caricatures and stereotypes and drawing on a wealth of new archival material, it surveys the political, denominational and organisational development of the R.A.Ch.D., analyses the changing role and experience of the British army chaplain across the nineteenth century and the two World Wars, and addresses the wider significance of British army chaplaincy for Britain's military, religious and cultural history over the period c.1800-1950. MICHAEL SNAPE is Senior Lecturer in Modern History at the University of Birmingham. The volume has a Foreword by Richard Holmes.

Mixed Blessings

How does religion shape the modern battlefield? Ron E. Hassner proposes that religion acts as a force multiplier, both enabling and constraining military operations. This is true not only for religiously radicalized fighters but also for professional soldiers. In the last century, religion has influenced modern militaries in the timing of attacks, the selection of targets for assault, the zeal with which units execute their mission, and the ability of individual soldiers to face the challenge of war. Religious ideas have not provided the reasons why conventional militaries fight, but religious practices have influenced their ability to do so effectively. In *Religion on the Battlefield*, Hassner focuses on the everyday practice of religion in a military context: the prayers, rituals, fasts, and feasts of the religious practitioners who make up the bulk of the adversaries, bystanders, and observers during armed conflicts. To show that religious practices have influenced battlefield decision making, Hassner draws most of his examples from major wars involving Western militaries. They include British soldiers in the trenches of World War I, U.S. pilots in World War II, and U.S. Marines in Iraq and Afghanistan. Hassner shows that even modern, rational, and bureaucratized military organizations have taken—and must take—religious practice into account in the conduct of war.

Chaplains as Liaisons with Religious Leaders

Is it appropriate, or even legal, for government to provide spiritual care for its citizens? Winnifred Fallers Sullivan shows that courts and administrative agencies have, for better or for worse, already decided this question. Religious freedom in America today means government affirmatively providing

opportunities for Americans to encounter their religious selves and realize their religious commitments. How did this happen? The answer, Sullivan shows, is an emerging religious practice--the ministry offered by chaplains in secular settings, generally called a ministry of presence. In this eye-opening book, Sullivan details the legal recognition and regulation of the spiritual care delivered by governmental and quasi-governmental chaplaincies, as well as by chaplaincies within ostensibly private but regulated industries, such as hospitals and colleges. Across America today, there are chaplains in airports, fire departments, prisons, hospitals, the military, unions, and even businesses and workplaces. Chaplains operate at the intersection of the sacred and the secular, brokers responsible for ministering to the wandering souls of a globalized economy while sacralizing institutions we generally consider unmarked by any religious identity. A book with profound implications for how we understand the relationship between religion and law in contemporary America, "A Ministry of Presence" will interest readers in legal studies, religious studies, sociology, and public policy. "

Military Chaplains as Agents of Peace

Confidence in Battle, Inspiration in Peace
