Daily Inspection Checklist and Preventative Maintenance Log

Track main safety checkpoints every day on each truck before employees operate fork lifts. This book prompts employees to check safety features such as fluid levels, gauges, tires, battery, lift system, plates, stickers, exhaust, belts, and hydraulic controls, and prompts employees to include their initials. There is also a signature log to record employees' printed names and examples of their initials for tracking purposes. Further, several pages at the back of the book prompt mechanics to record the dates, billing numbers, parts numbers, and a narrative of services performed for preventative maintenance on each truck. This book is meant to stay with a single truck, and there is room at the front of the book to record identification information about each individual truck.

The book first gives an overview of drug-testing policy, facilitating drug testing and treatment, challenges to drug-testing programs, and state, local, and federal legislation on drug testing. The text then defines the problem of drug abuse, including dimensions of abuse, defining the problem and the needs of employers, employing a drug abuse survey, and treatment modalities. The manuscript ponders on the development of a drug-testing policy, education of employees, and training of supervisors.
