The Universal Access Handbook

In recent years, the field of Universal Access has made significant progress in consolidating theoretical approaches, scientific methods and technologies, as well as in exploring new application domains. Increasingly, professionals in this rapidly maturing area require a comprehensive and multidisciplinary resource that addresses current principles, methods, and tools. Written by leading international authorities from academic, research, and industrial organizations and nonmarket institutions, The Universal Access Handbook covers the unfolding scientific, methodological, technological, and policy issues involved in the process of achieving universal access in the information society. In a collection of 61 chapters, the book discusses how to systematically apply universal design principles to information technologies. It explains the various dimensions of diversity in the technological platforms and contexts of use, including trends in mobile interaction and ambient intelligence environments. The implications of Universal Access on the development life cycle of interactive applications and services are unfolded, addressing user interface architectures and related components. Novel interaction methods and techniques for Universal Access are analyzed, and a variety of applications in diverse domains are discussed. The book reflects recent developments, consolidates present knowledge, and points towards new perspectives for the future. A quick glance through the contents demonstrates not only the breadth and depth of coverage but also the caliber of the contributions. An indispensable source of information for interdisciplinary and cross-thematic study, the book provides a baseline for further in-depth studies, as well as an important educational tool in an increasingly globalized research and development environment.

Target Setting and Goal Achievement

Growth and development are born out of setting goals and therefore the continual success of an organization is all about achieving them. Goals, targets and objectives are the ideal ways to stretch individuals and realize the potential of the group at large.

Interview Questions and Answers

Training in the retail sector throughout the 12 European Community (EC) member countries was examined through in-depth case studies of 55 retail firms that were selected as representing a wide range of firm types (19 multinational, 36 national, 4 cooperative, 7 family-owned firms), forms of retailing (department stores, supermarkets, and chain and independent specialized stores), firm sizes (ranging from firms employing fewer than 100 to more than 10,000 people), and subsectors (food, nonfood, both). It was discovered that priority is still being given to training newly recruited employees, especially potential managers. A new emphasis on training as part of a global commercial strategy and concomitant new emphasis on training the whole staff were evident. Most curricula were found to be based on a modular principle. An increase in the number of training activities in retail firms and a shift toward more strategic use of training as part of firms' human resource policies were discovered. Few data on training costs and efficiency were available, and the need for more systematic collection of factual data on training in the retail sector was evident. (Appended are seven tables of statistical data and the names/addresses of the study advisory committee members.) (MN)

Along with fast-food workers, retail workers are capturing the attention of the public and the media with the Fight for \$15. Like fast-food workers, retail workers are underpaid, and fewer than five percent of them belong to unions. In *Hard Sell*, Peter Ikeler traces the low-wage, largely nonunion character of U.S. retail through the history and ultimate failure of twentieth-century retail unionism. He asks pivotal questions about twenty-first-century capitalism: Does the nature of retail work make collective action unlikely? Can working conditions improve in the absence of a union? Is worker consciousness changing in ways that might encourage or further inhibit organizing? Ikeler conducted interviews at New York City locations of two iconic department stores—Macy's and Target. Much of the book's narrative unfolds from the perspectives of these workers in America's most unequal city. When he speaks to workers,

Ikeler finds that the Macy's organization displays an adversarial relationship between workers and managers and that Target is infused with a "teamwork" message that enfolds both parties. Macy's workers identify more with their jobs and are more opposed to management, yet Target workers show greater solidarity. Both groups, however, are largely unhappy with the pay and precariousness of their jobs. Combined with workplace-generated feelings of unity and resistance, these grievances provide promising inroads to organizing that could help take the struggle against inequality beyond symbolic action to real economic power.

This volume brings together for the first time a collection of studies devoted to missionary language learning and retention. Introductory chapters provide historical perspectives on this population and on language teaching philosophy and practice in the LDS tradition. The empirical studies which follow are divided into two sections, the first examining mission language acquisition by English-speaking missionaries abroad, the second focusing on post-mission language attrition. These chapters by internationally known scholars offer cutting-edge research using a number of different target languages in addressing various issues in second language development. Finally, a comprehensive bibliography of sources on mission languages is included. The readership of this pioneering work is expected to extend beyond specialists in study abroad and missionary language training to a broader audience of applied linguists, educators, and students interested in language acquisition and attrition. In addition, the book offers useful insights to adults who want to maintain a second language.

Meeting the Challenges of Feeding America's School Children

Developing countries lose billions each year through bribery, misappropriation of funds, and other corrupt practices. Much of the proceeds of this corruption find 'safe haven' in the world's financial centers. These criminal flows are a drain on social services and economic development programs, contributing to the impoverishment of the world's poorest countries. Many developing countries have already sought to recover stolen assets. A number of successful high-profile cases with creative international cooperation has demonstrated that asset recovery is possible. However, it is highly complex, involving coordination and collaboration with domestic agencies and ministries in multiple jurisdictions, as well as the capacity to trace and secure assets and pursue various legal options—whether criminal confiscation, non-conviction based confiscation, civil actions, or other alternatives. This process can be overwhelming for even the most experienced practitioners. It is exceptionally difficult for those working in the context of failed states, widespread corruption, or limited resources. With this in mind, the Stolen Asset Recovery (StAR) Initiative has developed and updated this Asset Recovery Handbook: A Guide for Practitioners to assist those grappling with the strategic, organizational, investigative, and legal challenges of recovering stolen assets. A practitioner-led project, the Handbook provides common approaches to recovering stolen assets located in foreign jurisdictions, identifies the challenges that practitioners are likely to encounter, and introduces good practices. It includes examples of tools that can be used by practitioners, such as sample intelligence reports, applications for court orders, and mutual legal assistance requests. StAR—the Stolen Asset Recovery Initiative—is a partnership between the World Bank Group and the United Nations Office on Drugs and Crime that supports international efforts to end safe havens for corrupt funds. StAR works with developing countries and financial centers to prevent the laundering of the proceeds of corruption and to facilitate more systematic and timely return of stolen assets.
