## The Pursuit of Style

Life, Love, and the Pursuit of Style is an all-new, original collection of clever, charming, and often hilarious musings from American fashion's biggest designers. The book culls the best pieces of advice and insight from a survey conducted by the Council of Fashion Designers of America (CFDA) of its 400-plus members, including Diane von Furstenberg, Zac Posen, Betsey Johnson, Narciso Rodriguez, Donna Karan, and Ralph Lauren, among many others. From tips and tricks for breaking into a fashion career, to essential wardrobe items, to favorite words of wisdom, this book provides a glimpse inside the fashion world's most creative minds and offers readers an endless amount of inspiration. Illustrated by Bil Donovan, this stylish package is the must-have fashion gift book of the season

The difficulties in determining the quality of information on the Internet--in particular, the implications of wide access and questionable credibility for youth and learning. Today we have access to an almost inconceivably vast amount of information, from sources that are increasingly portable, accessible, and interactive. The Internet and the explosion of digital media content have made more information available from more sources to more people than at any other time in human history. This brings an infinite number of opportunities for learning, social connection, and entertainment. But at the same time, the origin of information, its quality, and its veracity are often difficult to assess. This volume addresses the issue of credibility--the objective and subjective components that make information believable--in the contemporary media environment. The contributors look particularly at youth audiences and experiences, considering the implications of wide access and the questionable credibility of information for youth and learning. They discuss such topics as the credibility of health information online, how to teach credibility assessment, and public policy solutions. Much research has been done on credibility and new media, but little of it focuses on users younger than college students. *Digital Media, Youth, and Credibility* fills this gap in the literature. Contributors Matthew S. Eastin, Gunther Eysenbach, Brian Hilligoss, Frances Jacobson Harris, R. David Lankes, Soo Young Rieh, S. Shyam Sundar, Fred W. Weingarten

#### Virgil, Aeneid, 4.1-299

Love and tragedy dominate book four of Virgil's most powerful work, building on the violent emotions invoked by the storms, battles, warring gods, and monster-plagued wanderings of the epic's opening. Destined to be the founder of Roman culture, Aeneas, nudged by the gods, decides to leave his beloved Dido, causing her suicide in pursuit of his historical destiny. A dark plot, in which erotic passion culminates in sex, and sex leads to tragedy and death in the human realm, unfolds within the larger horizon of a supernatural sphere, dominated by power-conscious divinities. Dido is Aeneas' most significant other, and in their encounter Virgil explores timeless themes of love and loyalty, fate and fortune, the justice of the gods, imperial ambition and its victims, and ethnic differences. This course book offers a portion of the original Latin text, study questions, a commentary, and interpretative essays. Designed to stretch and stimulate readers, Ingo Gildenhard's incisive commentary will be of particular interest to students of Latin at both A2 and undergraduate level. It extends beyond detailed linguistic analysis to encourage critical engagement with Virgil's poetry and discussion of the most recent scholarly thought.

#### Philosophy manual: a South-South perspective

"In the dark, bewildering, trap-infested jungle of misinformation and opaque riddles that is the world of investment, JL Collins is the fatherly wizard on the side of the path, offering a simple map, warm words of encouragement and the tools to forge your way through with confidence. You'll never find a wiser advisor with a bigger heart." -- Malachi Rempen: Filmmaker, cartoonist, author and self-described ruffian This book grew out of a series of letters to my daughter concerning various things--mostly about money and investing--she was not yet quite ready to hear. Since money is the single most powerful tool we have for navigating this complex world we've created, understanding it is critical. "But Dad," she once said, "I know money is important. I just don't want to spend my life thinking about it." This was eye-opening. I love this stuff. But most people have better things to do with their precious time. Bridges to build, diseases to cure, treaties to negotiate, mountains to climb, technologies to create, children to teach, businesses to run. Unfortunately, benign neglect of things financial leaves you open to the charlatans of the financial world. The people who make investing endlessly complex, because if it can be made complex it becomes more profitable for them, more expensive for us, and we are forced into their waiting arms. Here's an important truth: Complex investments exist only to profit those who create and sell them. Not only are they more costly to the investor, they are less effective. The simple approach I created for her and present now to you, is not only easy to understand and implement, it is more powerful than any other. Together we'll explore: Debt: Why you must avoid it and what to do if you have it. The importance of having F-you Money. How to think about money, and the unique way understanding this is key to building your wealth. Where traditional investing advice goes wrong and what actually works. What the stock market really is and how it really works. Why the stock market always goes up and why most people still lose money investing in it. How to invest in a raging bull, or bear, market. Specific investments to implement these strategies. The Wealth Building and Wealth Preservation phases of your investing life and why they are not always tied to your age. How your asset allocation is tied to those phases and how to choose it. How to simplify the sometimes confusing world of 401(k), 403(b), TSP, IRA and Roth accounts. TRFs (Target Retirement Funds), HSAs (Health Savings

Accounts) and RMDs (Required Minimum Distributions). What investment firm to use and why the one I recommend is so far superior to the competition. Why you should be very cautious when engaging an investment advisor and whether you need to at all. Why and how you can be conned, and how to avoid becoming prey. Why I don't recommend dollar cost averaging. What financial independence looks like and how to have your money support you. What the 4% rule is and how to use it to safely spend your wealth. The truth behind Social Security. A Case Study on how this all can be implemented in real life. Enjoy the read, and the journey!

Against the backdrop of unprecedented concern for the future of health care, 'The Cambridge History of Medicine' surveys the rise of medicine in the West from classical times to the present. Covering both the social and scientific history of medicine, this volume traces the chronology of key developments and events.

### The Cambridge History of Medicine

Richard Drake has skillfully woven together the various strands of the Appalachian experience into a sweeping whole. Touching upon folk traditions, health care, the environment, higher education, the role of blacks and women, and much more, Drake offers a compelling social history of a unique American region. The Appalachian region, extending from Alabama in the South up to the Allegheny highlands of Pennsylvania, has historically been characterized by its largely rural populations, rich natural resources that have fueled industry in other parts of the country, and the strong and wild, undeveloped land. The rugged geography of the region allowed Native American societies, especially the Cherokee, to flourish. Early white settlers tended to favor a self-sufficient approach to farming, contrary to the land grabbing and plantation building going on elsewhere in the South. The growth of a market economy and competition from other agricultural areas of the country sparked an economic decline of the region's rural population at least as early as 1830. The Civil War and the sometimes hostile legislation of Reconstruction made life even more difficult for rural Appalachians. Recent history of the region is marked by the corporate exploitation of resources. Regional oil, gas, and coal had attracted some industry even before the Civil War, but the postwar years saw an immense expansion of American industry, nearly all of which relied heavily on Appalachian fossil fuels, particularly coal. What was initially a boon to the region eventually brought financial disaster to many mountain people as unsafe working conditions and strip mining ravaged the land and its inhabitants. A History of Appalachia also examines pockets of urbanization in Appalachia. Chemical, textile, and other industries have encouraged the development of urban areas. At the same time, radio, television, and the internet provide residents direct links to cultures from all over the world. The author looks at the process of urbanization as it belies commonly held notions about the region's rural character.

## A History of Appalachia

Thomas Mann predicted that no manner or mode in literature would be so typical or so pervasive in the twentieth century as the grotesque. Assuredly he was correct. The subjects and methods of our comic literature (and much of our other literature) are regularly disturbing and often repulsive -- no laughing matter. In this ambitious study, John R. Clark seeks to elucidate the major tactics and topics deployed in modern literary dark humor. In Part I he explores the satiric strategies of authors of the grotesque, strategies that undercut conventional usage and form: the de-basement of heroes, the denigration of language and style, the disruption of normative narrative technique, and even the debunking of authors themselves. Part II surveys major recurrent themes of grotesquerie: tedium, scatology, cannibalism, dystopia, and Armageddon or the end of the world. Clearly the literature of the grotesque is obtrusive and ugly, its effect morbid and disquieting -- and deliberately meant to be so. Grotesque literature may be unpleasant, but it is patently insightful. Indeed, as Clark shows, all of the strategies and topics employed by this literature stem from age-old and spirited traditions. Critics have complained about this grim satiric literature, asserting that it is dank, cheerless, unsavory, and negative. But such an interpretation is far too simplistic. On the contrary, as Clark demonstrates, such grotesque writing, in its power and its prevalence in the past and present, is in fact conventional, controlled, imaginative, and vigorous -- no mean achievements for any body of art.

## The Modern Satiric Grotesque and Its Traditions

Democracy is struggling in America--by now this statement is almost cliché. But what if the country is no longer a democracy at all? In *Democracy Incorporated*, Sheldon Wolin considers the unthinkable: has America unwittingly morphed into a new and strange kind of political hybrid, one where economic and state powers are conjoined and virtually unbridled? Can the nation check its descent into what the author terms "inverted totalitarianism"? Wolin portrays a country where citizens are politically uninterested and submissive--and where elites are eager to keep them that way. At best the nation has become a "managed democracy" where the public is shepherded, not sovereign. At worst it is a place where corporate power no longer answers to state controls. Wolin makes clear that today's America is in no way morally or politically comparable to totalitarian states like Nazi Germany, yet he warns that unchecked economic power risks verging on total power and has its own unnerving pathologies. Wolin examines the myths and mythmaking that justify today's politics, the quest for an ever-expanding economy, and the perverse attractions of an endless war on terror. He argues passionately that democracy's best hope lies in citizens themselves learning anew to exercise power at the local level. *Democracy Incorporated* is one of the most worrying diagnoses of America's political ills to emerge in decades. It is sure to be a lightning rod for political debate for years to come. Now with a new introduction by Pulitzer Prize-winning journalist Chris Hedges, *Democracy Incorporated* remains an essential work for understanding the state of democracy in America.

## The Characters of Jean de La Bruyère

Marriage to a handsome Ghanaian architect has brought Eva far from the quiet English countryside. Alfred had made it sound heavenly but the hardship drained her of vitality and the foreign culture bewildered her. But Eva has her friends - Dahlia, Yelena and Margrit - all of them strangers in a foreign land, who rely on each other to fill the gaps left by distant relatives. When a sudden coup unnerves everyone, and Eva's relationship with Alfred begins to unravel, The Association of Foreign Spouses discover that there are dark sides to their lives and that they must scheme and deceive to protect themselves and their families. Set in Ghana in the turbulent eighties, The Association of Foreign Spouses is a story of a group of women who live in a land that at times defeats them, amongst people who often disappoint and baffle them. Yet through their trials and hardships, the women support each other, unified by their foreignness, as ultimately, they are wooed by this strange place that they come to call 'home'.

## The Association of Foreign Spouses

A firsthand account and incisive analysis of modern protest, revealing internet-fueled social movements' greatest strengths and frequent challenges To understand a thwarted Turkish coup, an anti-Wall Street

encampment, and a packed Tahrir Square, we must first comprehend the power and the weaknesses of using new technologies to mobilize large numbers of people. An incisive observer, writer, and participant in today's social movements, Zeynep Tufekci explains in this accessible and compelling book the nuanced trajectories of modern protests—how they form, how they operate differently from past protests, and why they have difficulty persisting in their long-term quests for change. Tufekci speaks from direct experience, combining on-the-ground interviews with insightful analysis. She describes how the internet helped the Zapatista uprisings in Mexico, the necessity of remote Twitter users to organize medical supplies during Arab Spring, the refusal to use bullhorns in the Occupy Movement that started in New York, and the empowering effect of tear gas in Istanbul's Gezi Park. These details from life inside social movements complete a moving investigation of authority, technology, and culture—and offer essential insights into the future of governance.

"How do writers, marginalized by the authoritarian state in which they live, intervene in the political process? They cannot do so directly because they are not politicians. Other modes of engagement are possible, however. A writer may take up arms and become a revolutionary. Or, as Max Weber did, he may try to influence politics by playing the role of constitutional advisor, or by seeking to shape the dominant language in which his contemporaries think. Weber sought to reconstitute the political and social vocabulary of his day. Part I of *Caesarism, Charisma and Fate* examines a great writer's political passions and the linguistic creativity they generated. Specially, it is an analysis of the manner in which Weber reshaped the nineteenth century idea of "Caesarism," a term traditionally associated with the authoritarian populism of Napoleon III and Bismarck, and transmuted it into a concept that was either neutral or positive. The coup de grace of this alchemy was to make Caesarism reappear as charisma. In that transformation, a highly contentious political concept, suffused with disapproval and anxiety, was naturalized into an ideal type of universal value-free sociology. Part II augments Weber's ideas for the modern age. A recurrent preoccupation of Weber's writings was human "fate," a condition that evokes the pathos of choice, the political meaning of death, and the formation of national solidarity. Peter Baehr, marrying Weber and Durkheim, fashions a new concept, "community of fate," for sociological theory. Communities of fate--such as the Warsaw Ghetto or Hong Kong dealing with the Severe Acute Respiratory Syndrome (SARS) crisis--are embattled social sites in which people face the prospect of collective death. They cohere because of an intense and broadly shared focus of attention on a common plight. Weber's work helps us grasp the nature of such communities, the mechanisms that produce them, and, not least, their dramatic consequences.

Photography does more than simply represent the world. It acts in the world, connecting people to form relationships and shaping relationships to create communities. In this beautiful book, Margaret Olin explores photography's ability to "touch" us through a series of essays that shed new light on

photography's role in the world. Olin investigates the publication of photographs in mass media and literature, the hanging of exhibitions, the posting of photocopied photographs of lost loved ones in public spaces, and the intense photographic activity of tourists at their destinations. She moves from intimate relationships between viewers and photographs to interactions around larger communities, analyzing how photography affects the way people handle cataclysmic events like 9/11. Along the way, she shows us James VanDerZee's Harlem funeral portraits, dusts off Roland Barthes's family album, takes us into Walker Evans and James Agee's photo-text *Let Us Now Praise Famous Men*, and logs onto online photo albums. With over one hundred illustrations, *Touching Photographs* is an insightful contribution to the theory of photography, visual studies, and art history.

Hosftadter and his colleagues at The Fluid Analogies Research Group have developed computer models that help describe and explain human discovery, creation and analogical thought. The key issue of perception is investigated through the exploration of playful anagrams, number puzzles, word play and fanciful alphabetical styles, and the result is a survey of cognitive processes. This text presents the results.

### Fluid Concepts and Creative Analogies

*Decolonising the Human* examines the ongoing project of constituting 'the human' in light of the durability of coloniality and the persistence of multiple oppressions. The 'human' emerges as a deeply political category, historically constructed as a scarce existential resource. Once weaponised, it allows for the social, political and economic elevation of those who are centred within its magic circle, and the degradation, marginalisation and immiseration of those excluded as the different and inferior Other, the less than human. Speaking from Africa, a key site where the category of the human has been used throughout European modernity to control, exclude and deny equality of being, the contributors use decoloniality as a potent theoretical and philosophical tool, gesturing towards a liberated, pluriversal world where human difference will be recognised as a gift, not used to police the boundaries of the human. Here is a transdisciplinary critical exploration of a wide range of subjects, including history, politics, philosophy, sociology, anthropology and decolonial studies.

### Decolonising the Human

In its comprehensive analysis of a wide range of primary and secondary sources in both Chinese and Western languages, this authoritative work stands as the definitive study of the theory, implementation and legacy of the Chinese Communist Party's thought-remolding campaign. This decades-long campaign involved the extraction of confessions from millions of Chinese citizens suspected of heterodoxy or disobedience to party dictates, along with their subjection to various forms of "re-education" and indoctrination. Hu Ping's carefully structured overview provides a valuable insider's perspective, and supersedes the previous landmark study on this vastly interesting topic.

Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his

freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

#### Twelve Years a Slave

This review aims to demonstrate that a great deal of a school's success depends on which areas of school life the educational leader chooses to spend time and attention. Section 1 describes the three interrelated, or nested, elements of leadership. Beginning from the outside and moving inward to the core these are: school context, school organisation, and the school leader. Section 2 focuses on the school context, with reference to the forces that are currently pressing on schools, and the implications these have for schools and their leaders. Section 3 examines school organisations and looks at evolving models such as communities of professional learners. Section 4 concentrates on the school leader, questioning whether one type of leader fits all and what it means to be a successful leader. It also examines issues of leader recruitment and retention; leadership in pre-retirement, or small schools, or high-poverty communities; leader autonomy and responsibility; and new shared models of leadership. Section 5 provides a range of recommendations and the challenge to school leaders that they move beyond mere technical competence and be contextually literate, organisationally savvy and leadership smart. #### A New Conception of War

The movement may have introduced affluent Americans to the pleasure of French cuisine years before Julia Child, but it was Julia's lessons that expanded the audience for gourmet dining and turned lovers of French cuisine into cooks.

#### The Leadership Challenge

In the mid-eighteenth century in France, the royal authorities launched a new campaign to sweep beggars from the streets, pinning their hopes on the creation of a uniform royal network of lock-ups in which anyone found begging might be detained. In this study, Adams probes the accomplishments and the failings of these so-called *dépôts de mendicité*, as seen by critics of the experiment (including learned judges and influential spokesmen of the provincial Estates) and as seen by those responsible for its success: the provincial intendants, the royal engineers, the doctors, the inspectors, the contractors, and various givers of advice. He shows how the debate--both internal and external--over the operation of the *dépôts* contributed to the intellectual ferment of the Enlightenment and the Revolution. The resulting web of reasoning and empirical data gave support to Montesquieu's principle that the state owes every one of its citizens "a secure subsistence, suitable food and clothing, and a manner of life that is not contrary to good health."

Advanced art education is in the process of developing research programs throughout Europe. What does the term research actually mean in the practice of art? What is the relation to the scientific methods of alpha, beta or gamma sciences, directed toward knowledge production and the development of a certain scientific domaine? What will be the influence of scientific research on the art forms?

#### Setting the Table for Julia Child

This bold collection of essays demonstrates the necessity of understanding fascism in cultural terms rather than only or even primarily in terms of political structures and events. Contributors from history, literature, film, art history, and anthropology describe a culture of fascism in Japan in the decades pre-

ceding the end of the Asia-Pacific War. In so doing, they challenge past scholarship, which has generally rejected descriptions of pre-1945 Japan as fascist. The contributors explain how a fascist ideology was diffused throughout Japanese culture via literature, popular culture, film, design, and everyday discourse. Alan Tansman's introduction places the essays in historical context and situates them in relation to previous scholarly inquiries into the existence of fascism in Japan. Several contributors examine how fascism was understood in the 1930s by, for example, influential theorists, an antifascist literary group, and leading intellectuals responding to capitalist modernization. Others explore the idea that fascism's solution to alienation and exploitation lay in efforts to beautify work, the workplace, and everyday life. Still others analyze the realization of and limits to fascist aesthetics in film, memorial design, architecture, animal imagery, a military museum, and a national exposition. Contributors also assess both manifestations of and resistance to fascist ideology in the work of renowned authors including the Nobel-prize-winning novelist and short-story writer Kawabata Yasunari and the mystery writers Edogawa Ranpo and Hamao Shirō. In the work of these final two, the tropes of sexual perversity and paranoia open a new perspective on fascist culture. This volume makes Japanese fascism available as a critical point of comparison for scholars of fascism worldwide. The concluding essay models such work by comparing Spanish and Japanese fascisms. Contributors: Noriko Aso, Michael Baskett, Kim Brandt, Nina Cornyetz, Kevin M. Doak, James Dorsey, Aaron Gerow, Harry Harootunian, Marilyn Ivy, Angus Lockyer, Jim Reichert, Jonathan Reynolds, Ellen Schattschneider, Aaron Skabelund, Akiko Takenaka, Alan Tansman, Richard Torrance, Keith Vincent, Alejandro Yarza

### Bureaucrats and Beggars

A groundbreaking essay collection that pursues the rise of geoculture as an essential framework for arts criticism, *The Planetary Turn* shows how the planet—as a territory, a sociopolitical arena, a natural space of interaction for all earthly life, and an artistic theme—is increasingly the conceptual and political dimension in which twenty-first-century writers and artists picture themselves and their work. In an introduction that comprehensively defines the planetary model of art, culture, and cultural-aesthetic interpretation, the editors explain how the living planet is emerging as distinct from older concepts of globalization, cosmopolitanism, and environmentalism and is becoming a new ground for exciting work in contemporary literature, visual and media arts, and social humanities. Written by internationally recognized scholars, the twelve essays that follow illustrate the unfolding of a new vision of potential planetary community that retools earlier models based on the nation-state or political “blocs” and reimagines cultural, political, aesthetic, and ethical relationships for the post–Cold War era.

### Artistic Research

Much has been written in the West on the history of the Soviet space program, but few Westerners have read direct first-hand accounts of the men and women who were behind the many Russian accomplishments in exploring space. The memoir of academician Boris Chertok, translated from the original Russian, fills that gap. Chertok began his career as an electrician in 1930 at an aviation factory near Moscow. Thirty years later, he was deputy to the founding figure of the Soviet space program, the mysterious “Chief Designer” Sergey Korolev. Chertok's 60-year-long career and the many successes and failures of the Soviet space program constitute the core of his memoirs, *Rockets and People*. In these writings, spread over four volumes (volumes two through four are forthcoming), academician Chertok not only describes and remembers, but also elicits and extracts profound insights from an epic story about a society's quest to explore the cosmos. This book was edited by Asif Siddiqi, a historian of Russian space exploration, and General Tom Stafford contributed a foreword touching upon his significant work with the Russians on the Apollo-Soyuz Test Project. Overall, this book is an engaging read while also contributing much new material to the literature about the Soviet space program.

*Chinese Poetry in Times of Mind, Mayhem and Money* is a groundbreaking study covering a range of contemporary authors and issues, from Haizi to Yin Lichuan and from poetic rhythm to exile-bashing. Its rigorous scholarship, literary sensitivity and lively style make it eminently fit for classroom use.

### The Culture of Japanese Fascism

These two phenomena can be seen as manifestations of a general malaise, a disorientation that may last for quite some time, and Jay Rosellini approaches his subject with the belief that it would be irresponsible to ignore these disquieting trends." "This account is recommended for the general reader

interested in international issues as well as for students and scholars of German, intellectual history, political science, and comparative sociology."--BOOK JACKET.

### The Planetary Turn

In this succinct, fact-based, insightful analysis of Hitler and his impact on the world, Sebastian Haffner displays his skills as a first-class journalist and a student of German and modern European history. A keen psychologist, he describes the man, the politician, the ideologue, the military leader, the mass-murderer, and ultimately the traitor to his own (adopted) country. "Mr Haffner ... has exposed better, and more briefly, than anyone else the clockwork of that infernal machine" — Gordon Brook-Shepherd, *Sunday Telegraph* "Lucid, informative and provocative." — Golo Mann, *Der Spiegel* "Nothing I have read on the Third Reich has been as valuable as Sebastian Haffner's *Meaning of Hitler*" — Manfred Rommel, *Stuttgarter Nachrichten* "a stimulating book, brilliant and rich in ideas; in short a masterpiece of historical essay writing." — Joachim Fest, *Frankfurter Allgemeine Zeitung* "This study ... deserves the highest praise. There is nothing of this brevity and depth to inform the younger generation and give those who lived through the era food for thought." — Peter Diehl-Thiele, *Süddeutsche Zeitung* "He circumnavigates the Hitler phenomenon in order to illuminate it from seven different viewpoints, and that in under 200 lucid and precise pages without assuming any prior knowledge." — Peter Graf Kielmansegg, *Münchener Merkur* "not one more biography but an analysis - a most penetrating analysis - of what Hitler was up to in his astonishing career" — A.L. Rowse "Sebastian Haffner's book already has received recognition ... as perhaps the best that has dealt with the phenomenon of Hitler and his impact on the 20th century. It is better than Trevor-Roper's best-seller, *The Last Days of Hitler* ... a most penetrating analysis of what Hitler was up to in his astonishing career." — *The New Republic* "Tough-minded evaluation of Hitler's career ... That this book was a best-seller in Germany [43 weeks] indicates that Haffner's countrymen welcomed this compact, lucid, hard-headed reexamination of contemporary history." — *Publishers Weekly* "Until [1991], as Sebastian Haffner wrote in his short, matchless book *The Meaning of Hitler* (1978), we had been living in the Europe which Hitler created for us: the split continent and the mutilated, divided Germany." — Neal Ascherson, *The Observer*

### Rockets and People Volume I (NASA History Series. NASA Sp-2005-4110)

*Writing as Material Practice* grapples with the issue of writing as a form of material culture in its ancient and more recent manifestations, and in the contexts of production and consumption. Fifteen case studies explore the artefactual nature of writing — the ways in which materials, techniques, colour, scale, orientation and visibility inform the creation of inscribed objects and spaces, as well as structure subsequent engagement, perception and meaning making. Covering a temporal span of some 5000 years, from c.3200 BCE to the present day, and ranging in spatial context from the Americas to the Near East, the chapters in this volume bring a variety of perspectives which contribute to both specific and broader questions of writing materialities. The authors also aim to place past graphical systems in their social contexts so they can be understood in relation to the people who created and attributed meaning to writing and associated symbolic modes through a diverse array of individual and wider social practices.

### Chinese Poetry in Times of Mind, Mayhem and Money

*Single Women in Popular Culture* demonstrates how single women continue to be figures of profound cultural anxiety. Examining a wide range of popular media forms, this is a timely, insightful and politically engaged book, exploring the ways in which postfeminism limits the representation of single women in popular culture.

### Literary Skinheads?

For several decades David Bethea has written authoritatively on the "mythopoetic thinking" that lies at the heart of classical Russian literature, especially Russian poetry. His theoretically informed essays and books have made a point of turning back to issues of intentionality and biography at a time when authorial agency seems under threat of "erasure" and the question of how writers, and poets in particular, live their lives through their art is increasingly moot. The 'lichnost' (personhood, psychic totality) of the given writer is all-important, argues Bethea, as it is that which combines the specifically biographical and the capaciously mythical in verbal units that speak simultaneously to different planes of being. Pushkin's Evgeny can be one incarnation of the poet himself and an Everyman rising up to challenge Peter's new world order; Brodsky can be, all at once, Dante and Mandelstam and himself,

the exile paying an Orphic visit to Florence (and, by ghostly association, Leningrad). This sort of metempsychosis, where the stories that constitute the Ur-texts of Russian literature are constantly reworked in the biographical myths shaping individual writers' lives, is Bethea's primary focus. This collection contains a liberal sampling of Bethea's most memorable previously published essays along with new studies prepared for this occasion.
