Perfect Pairs, K-2

Hands-on lessons can be fun and compelling, but when it comes to life science, they aren't always possible, practical, effective, or safe. Children can't follow a lion as it stalks a gazelle, visit the exotic kapok tree in a rain forest, or swim alongside the underwater life in a pond. But they can explore a whole world of animals, plants, and ecosystems through the pages of beautifully illustrated, science-themed picture books. Perfect Pairs, which marries fiction and nonfiction picture books focused on life science, helps educators think about and teach life science in a whole new way. Each of the twenty-two lessons in this book is built around a pair of books that introduces a critical life science concept and guides students through an inquiry-based investigative process to explore that idea;-from animal/environment interactions to the role of structure in plant and animal survival, from inheritance of traits to variation of species. Each lesson starts with a Wonder Statement- and comprises three stages. Engaging Students-features a hands-on activity that captures student interest, uncovers current thinking, and generates vocabulary. The heart of the investigative process, Exploring with Students,- spotlights the paired books as the teacher reads aloud and helps students find and organize information into data tables. Encouraging Students to Draw Conclusions- shows students how to review and analyze the information they have collected. Bringing high-quality science-themed picture books into the classroom engages a broad range of students, addresses the Performance Expectations outlined in the Next Generation Science Standards, and supports the goals of the Common Core State Standards for English Language Arts. Even if you are science shy,Perfect Pairs can help you become a more confident teacher whose classroom buzzes with curious students eager to explore their natural world.

Perfect Pairs

A teacher's guide to using fiction and nonfiction picture books to teach life sciences.

Flower Therapy is the art of working with flowers, flower essences, and angels for healing, manifestation, and abundance. With flowers as your allies, your dreams really can come true, and you'll see that nature truly has the ability to heal! In this book, Doreen Virtue and Robert Reeves give in-depth information about 88 common flowers, illustrated with gorgeous, full-color photographs. You'll find out about the flowers' energetic and healing properties, discover which angels are connected to each one, and learn to associate different species with the various chakras (beyond simply categorizing them by color). In addition, there's a loving, channeled message of guidance and support directly from each flower's energy. Doreen and Robert also share with you new and exciting ways to work with Flower Therapy: Create custom bouquets for dear friends. Gather wildflowers to heal and deepen your spirituality. Or choose the perfect blooms for your garden to enhance your connection to the angels. They discuss flower essences, picking fresh blossoms, and purchasing floral arrangements. You'll even be guided through energetic clearing methods and receive detailed instructions about how to perform a Flower Therapy reading. While flowers have an energy that must be experienced, it's not necessary for you to gather any in order to do so. The photos inside, which have been infused with healing energy, are all you need to begin your journey. So, whether you have a green thumb or not, Flower Therapy can start making a difference in your day . . . and bring blessings into your life!

The Quran is the foundation of our faith and the source of our guidance as Muslims, but many of us struggle to create or maintain a relationship with the words of Allah in our daily lives. Quran journaling is a great way to cultivate that relationship - it gives you flexibility to connect with the Quran on your terms and the ability to see how verses apply specifically to you and your individual circumstances. This journal will be your guide on that journey to connect with the Quran in a meaningful way. With relevant monthly themes and selected verses for each day, this journal will help you to get started creating that relationship, without the overwhelm of not knowing where or how to start. Make the intention that the 365 daily verses in this book will be your starting point on your lifelong journey to connect with Allah's words in ever deeper and more meaningful ways. That they will be your reminders when you feel like you have wandered off the path. That they will be your foundation and your grounding in a world that seems ever more hectic. Bismillah. - Theme and Verse Number: At the top of each page, you will find the theme for the month and the number of the verse in the Quran which you can use to look up the verse. - Arabic: Regardless of the level you are, practice Arabic writing by copying down the verse. - Translation: Write down the translation you best understand and connect with. - Tafsir: Read through and write the background, context, and explanation of each verse. The most well known authentic resource for tafsir is Tafsir Ibn Kathir. Th is can be purchased online or in many Islamic bookstores. Tafsir Ibn Kathir can also be found for free online in various places. - Application: Reflect on and apply the verse of the day to your life. How does this verse connect to you and your experiences? How does it relate to the overall theme? Are there any other verses, hadith, or quotes that this brings to mind? How does it make you feel? How can you act on it? These are some questions to get you started, but of course you can write whatever feels right. - Dua: Write a short dua to help you put your learnings about the verse into action. Ameen. May Allah accept all your efforts in better connecting with the Quran.

The sacred Flower of Life pattern, the primary geometric generator of all physical form, is explored in even more depth in this volume, the second half of the famed Flower of Life workshop. The proportions of the human body, the nuances of human consciousness, the sizes and distances of the stars, planets and moons, even the creations of humankind, are all shown to reflect their origins in this beautiful and divine image. Through an intricate and detailed geometrical mapping, Drunvalo Melchizedek shows how the seemingly simple design of the Flower of Life contains the genesis of our entire third-dimensional existence. From the pyramids and mysteries of Egypt to the new race of Indigo children, Drunvalo presents the sacred geometries of the Reality and the subtle energies that shape our world. We are led through a divinely inspired labyrinth of science and stories, logic and coincidence, on a path of remembering where we come from and the wonder and magic of who we are. Finally, for the first time in print, Drunvalo shares the instructions for the Mer-Ka-Ba meditation, step-by-step techniques for the re-creation of the energy field of the evolved human, which is the key to ascension and the next dimensional world. If done from love, this ancient process of breathing prana opens up for us a world of tantalizing possibility in this dimension, from protective powers to the healing of oneself, of others and even of the planet. Embrace the expanded vision and understanding that Drunvalo offers to the world. Coincidences abound, miracles flourish and the amazing stories of mysteries unveiled arise as the author probes the Ancient Secrets of the Flower of Life.

Creative Haven African Glamour Coloring Book

Liberty Fund's new six-volume The Collected Works of Frederic Bastiat series, of which "The Man and the Statesman" is the first volume, may be considered the most complete edition of Bastiat's works published to date, in any country, and in any language. The main source for this translation is the seven-volume "Oeuvres complètes de Frederic Bastiat," published in the 1850s and 1860s. The present volume, most of which has never before been translated into English, includes Bastiat's complete correspondence: 207 letters Bastiat wrote between 1819, when he was only 18 years old, until just a few days before his untimely death in 1850 at the age of 49. For contemporary classical liberals, Bastiat's correspondence will provide a unique window into a long-forgotten world where opposition to war and colonialism went hand-in-hand with support for free trade and deregulation. Bastiat's numerous letters to Richard Cobden, a Member of Parliament and best known today as the leader of the British Anti-Corn Law League, chronicle the profound effect the Anti-Corn League had on Bastiat. The League's success in mobilizing a popular movement in England to pressure the British government into abolishing the very protectionist "corn laws," in 1846, inspired Bastiat to emulate the League's success in France by starting his own free-trade movement. "The Man and the Statesman" also includes articles and other writings on politics and current events that showcase Bastiat's talent as a theoretician, a pamphleteer, a journalist, and a deputy (Member of Parliament) of the nascent French Second Republic. Together with the correspondence, the writings in this volume fill an important gap in our understanding of the lesser-known Bastiat, who, in just a few short years, made a profound impact on French intellectual and political life in Paris. Forthcoming titles in The Collected Works of Frederic Bastiat series include: "The Law," "The State," and Other Political Writings, 1843-1850 Economic Sophisms and "What is Seen and What is Not Seen" Miscellaneous Works on Economics: From "Jacques-Bonhomme" to Le Journal des "économistes Economic Harmonies The Struggle Against Protectionism: The English and French Free-Trade Movements " Frederic Bastiat (1801-1850) was born in the French port city of Bayonne and became one of the leading advocates of free markets and free trade in the mid-nineteenth century. A theorist of classical liberal political economy and an elected member of various French political bodies, he opposed both protectionism and the rise of socialist ideas. Jacques de Guenin is president of the Cercle Frederic Bastiat. He is a graduate of the école des Mines in Paris and holds a Master of Sciences from the University of California, Berkeley. Jean-Claude Paul-Dejean is a historian from the University of Bordeaux and a Bastiat scholar. Dennis O'Keefe is Professor of Social Science at the University of Buckingham, Buckingham, England, and is Senior Research Fellow in Education at the Institute of Economic Affairs, London. David M. Hart received a Ph.D. in history from King's College, Cambridge, and is the Director of Liberty Fund's Online Library of Liberty Project.

"As the psalms are a microcosm of the Old Testament, so the Expositions of the Psalms can be seen as a microcosm of Augustinian thought. In the Book of Psalms are to be found the history of the people of Israel, the theology and spirituality of the Old Covenant, and a treasury of human experience

expressed in prayer and poetry. So too does the work of expounding the psalms recapitulate and focus the experiences of Augustine's personal life, his theological reflections and his pastoral concerns as Bishop of Hippo."--Publisher's website.

Fertility Symbols

This is the first book by an author in the UK to take an in-depth look at colourism - the process of discrimination based on skin tone among members of the same ethnic group, whereby lighter skin is more valued than darker complexions. The African Diaspora in Britain is examined as part of a global black community with shared experiences of slavery, colonization and neo-colonialism. The author traces the evolution of colourism within African descendant communities in the USA, Jamaica, Latin America and the UK from a historical and political perspective and examines its present impact on the global African Diaspora. This book is essential reading for educators and students and will appeal to anyone with an interest in the subject of race and identity who wants to understand why colourism - a psychological legacy of slavery still impacts people of African descent in the Diaspora today.

This is the story of LSD told by a concerned yet hopeful father, organic chemist Albert Hofmann, Ph.D. He traces LSD's path from a promising psychiatric research medicine to a recreational drug sparking hysteria and prohibition. In *LSD: My Problem Child*, we follow Dr. Hofmann's trek across Mexico to discover sacred plants related to LSD, and listen in as he corresponds with other notable figures about his remarkable discovery. Underlying it all is Dr. Hofmann's powerful conclusion that mystical experiences may be our planet's best hope for survival. Whether induced by LSD, meditation, or arising spontaneously, such experiences help us to comprehend "the wonder, the mystery of the divine, in the microcosm of the atom, in the macrocosm of the spiral nebula, in the seeds of plants, in the body and soul of people." More than sixty years after the birth of Albert Hofmann's problem child, his vision of its true potential is more relevant, and more needed, than ever.

The Quran Journal: 365 Verses to Learn, Reflect Upon, and Apply

INTRODUCED BY JAN MORRIS '[This] gloriously ornate account of that epic journey is a classic'
ROBERT MACFARLANE 'The feeling of being lost in time and geography with months and years hazily sparkling ahead is a prospect of inconjecturable magic.' In 1933, aged eighteen, Patrick Leigh Fermor set out on his 'great trudge', a year-long journey by foot from the Hook of Holland to Istanbul. Three decades later he wrote *A Time of Gifts*, the sparkingly original account of the first part of this youthful adventure, which took him through the Low Countries, up the Rhine, through Germany, down the Danube, through Austria and Czechoslovakia, and as far as Hungary. Alone, carrying only a rucksack and with a small allowance of only a pound a week, Fermor had planned to sleep rough - to live 'like a tramp, a pilgrim, or a wandering scholar' - but a chance introduction in Bavaria led to comfortable stays in castles, and provided a glimpse of the old Europe of princes and peasants. Hailed as a masterpiece, *A Time of Gifts* is in part a coming-of-age memoir, but it is also a rich and compelling portrait of a continent that - despite its resplendent domes and monasteries, its great rivers and grand cities - was soon to be swept away by war, modernisation and profound social change. 'Not only is this journey one of physical adventure but of cultural awakening. Architecture, art, genealogy, quirks of history and language are all devoured -- and here passed on -- with a gusto uniquely his' COLIN THUBRON, SUNDAY TIMES 'One of the most romantic books of the twentieth century, Patrick Leigh Fermor's account of a long walk across Europe is also a literary treasure, a rich blend of action and observation' GUARDIAN

Aubrey Beardsley

Aubrey Vincent Beardsley (1872-1898) was a fashionable English illustrator and author associated with the aesthetic movement and the development of the art nouveau style. Known today and in his time as a master of black-ink line work executed with supple fluidity and slashing vigor, Beardsley veered away from Victorian convention, choosing instead to portray characters and scenes as he saw them. "Things shape themselves before my eyes just as I draw them. . . . They all seem weird and strange to me." He asserted that "the grotesque is the only alternative to the insipid commonplace." His fantastic illustrations expressed his appreciation of the unexpected, the erotic, the dark and decadent. Although he struggled with ill-health throughout his brief life-he was diagnosed with tuberculosis as a child and died of the disease at twenty-five-Beardsley was a prolific and well-known artist, and by his early twenties was the art editor of *The Yellow Book*, an avant-garde literary quarterly. His audacious style influenced artists of diverse genres, and whether despite or because of its modish affectedness, Beardsley's artwork continues to captivate audiences. This coloring book features a selection of twenty-five black-and-white illustrations published in late nineteenth- and early twentieth-century versions of literary works such as *Le Morte Darthur* by Sir Thomas Malory, *The Rape of the Lock* by Alexander Pope, and *Salomé* by Oscar Wilde.

It included decorative arts, architecture, jewelry, pottery, glass, and illustrations. Mucha became an overnight Paris sensation when he created an Art Nouveau poster of actress Sarah Bernhardt. Copies of the life-sized illustration hung all over the streets of Paris and caused an immediate stir. Alphonse Mucha went on to become the most prolific illustrator of the period. Anton Seder

At the end of the nineteenth century, German artist and professor Anton Seder was appointed founding director of Strasbourgs College of Decorative Arts. Seder (1850-1916) developed the school as an influential artistic force in the Alsace-Lorraine region, creating work that bridged French and German artistic styles and contributed to the development of Art Nouveau. Among Seder's work from this time is *Die Pflanze in Kunst und Gewerbe* (The plant in art and trade), two volumes of approximately two hundred images, stunning in their artistry and graceful depiction of nature. One hundred thirty years after its publication, this visual tour of the world's plants (and a few animals, if you look closely) represents some of the most vibrant work of the era. The illustrations in this colouring book come from a copy of *Die Pflanze* held in the collections of the British Library. One page at the back of the colouring book has been left blank, so that you can decoratively document the plant life that flourishes near you. Images
