Intro

The digital is dialogical communication exchange, information that is always speaking to multiple connections (networked).

Digital ethnography seeks to explore the consequences of these conditions

Multiplicity. Digital ethnographic research is always unique to the research question and challenges to which it is responding

Openness. The digital is non-static, always changing, being updated, increasing in speed, and transforming It is processual. There is no fixed method for investigating and understanding the digital.

Reflexive. The digital is always contingent on interpretation (and the self).

Unorthodox. Digital ethnography is unpredictable, and can go beyond traditional written forms of research.
