The Bluejackets' Manual - Primary Source Edition

Based on interviews with the crew and captain of a torpedoed tanker who survived nineteen days in a lifeboat in heavy seas and scorching tropical sun—this information is incredibly useful even today. How to Abandon Ship was written during World War II to save the lives of seamen by instilling a commonsense, organized, no-panic clarity to getting off torpedoed ships safely and, perhaps more importantly, surviving later. It is a gem that can once again be used to save lives. Former schooner captain and author Twain Braden updates this solid and useful advice with a foreword addressing today's technology. Braden used How to Abandon Ship to teach crewmembers fifty years after it was written while sailing the rugged and dangerous Maine coast. The writing in How to Abandon Ship is so clear it has been used in college English composition classes. You will find vivid and pertinent information on everything from medical emergencies, thirst, and hunger to weather and morale. It pulls no punches, and its advice is strident but useful. In the words of the authors: "This manual is concerned solely with human lives. Its purpose is to aid you to get off a sinking ship and to eventual safety in the best condition possible." Skyhorse Publishing, as well as our Sports Publishing imprint, is proud to publish a broad range of books for readers interested in sports—books about baseball, pro football, college football, pro and college basketball, hockey, or soccer, we have a book about your sport or your team. In addition to books on popular team sports, we also publish books for a wide variety of athletes, including books on running, cycling, horseback riding, swimming, tennis, martial arts, golf, camping, hiking, aviation, boating, and so much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to publishing books on subjects that are sometimes overlooked by other publishers and to authors whose work might not otherwise find a home.

The Bluejackets' Manual, United States Navy, 1927, Seventh Ed., Rev. May 1927

During the 1920s Herbert O. Yardley was chief of the first peacetime cryptanalytic organization in the United States, the ancestor of today's National Security Agency. Funded by the U.S. Army and the Department of State and working out of New York, his small and highly secret unit succeeded in breaking the diplomatic codes of several nations, including Japan. The decrypts played a critical role in U.S. diplomacy. Despite its extraordinary successes, the Black Chamber, as it came to be known, was disbanded in 1929. President Hoover's new Secretary of State Henry L. Stimson refused to continue its funding with the now-famous comment, "Gentlemen do not read other people's mail." In 1931 a disappointed Yardley caused a sensation when he published this book and revealed to the world exactly what his agency had done with the secret and illegal cooperation of nearly the entire American cable industry. These revelations and Yardley's right to publish them set into motion a conflict that continues to this day: the right to freedom of expression versus national security. In addition to offering an exposé on post-World War I cryptology, the book is filled with exciting stories and personalities.

The Bluejackets' Manual

Includes Part 1, Number 1: Books and Pamphlets, Including Serials and Contributions to Periodicals (January - June)

Social Usage and Protocol Handbook

In 1902 when Lt. Ridley McLean first wrote this "sailor's bible," he described it as a manual for every person in the naval service. One hundred years later, it continues to serve as a primer for newly enlisted sailors and as a basic reference for all naval personnel--from seaman to admiral. New technology is artfully blended with ancient heritage, facts and figures are augmented by helpful advice, and the mysterious language of the sea is preserved and deciphered in a volume that has served the United States Navy for an entire century. Updated throughout, the book provides the latest Navy ratings, uniforms, ships, aircraft, and weapons as well as current Navy policies on hazing, fraternization, education, and physical fitness, and a completely new chapter explaining the Navy's mission in terms of its rich heritage.

The dramatic account of two American warships in the South Pacific, this book follows the USS Astoria (CA-34) and USS Chicago (CA-29) during the late summer of 1942, when both participated in the early days of the critical battle for Guadalcanal. Drawing on a variety of firsthand accounts, some previously unpublished, the book tells the story from the perspective of the men aboard each ship, transporting readers inside the gun turrets, behind the lookout binoculars, and below deck as the battle rages. Individual stories of heroism, sacrifice and survival unfold as both vessels meet their fates in the South Pacific.

The Chicago Manual of Style

Regardless of rank or time in service, all Coast Guard personnel find this manual to be essential to their professional development. Its value as a ready source of guidance is attested to by generations of men and women who have made it a part of their personal libraries since 1952, when the first edition was published. Today, it remains the basic training manual for the Coast Guard's newest recruits at boot camp in Cape May, New Jersey. This 11th edition is designed to bring the reader into the second decade of the 21st century. New materials and photographs fully describe the modern Coast Guard and its equipment. Updated information is offered on Coast Guard missions, organization, history, and maritime law enforcement, among other subjects. Continued emphasis is placed on safety of life, protection of national assets, and defending the homeland. The second half of the book is also ideal for members of the U.S. Coast Guard Auxiliary and civilian recreational boaters. Key chapters include ones on first aid, boating safety, fire-fighting, maintenance, swimming, and lifesaving. This volume is ideal for anyone serving in the U.S. Coast Guard.

The Bluejackets' Manual, United States Navy

In "A Measureless Peril," the historian Richard Snow captures all the drama of the merciless contest between the quickly built U.S. warships and the ever-more cunning and lethal U-boats that controlled the sea lanes of the Atlantic during WWII.

Congressional Record

Submarine duty during World War II was one of the most statistically deadly, physically demanding, and emotionally challenging assignments in the U. S. Navy. The boats had few crew comforts, and war patrols, typically thirty to sixty days in length, were so exhausting that the submarine sailors often got a month of rest after each patrol. What would motivate men to volunteer for this unmistakably difficult and dangerous job? This is the question that *The Men* will answer using the oral histories of enlisted submarine veterans, a collection of letters of one sailor who did not return, and other primary sources. These volunteers, from diverse locales and backgrounds, ignored the danger, accepted the privations, and exalted in the camaraderie. Their excitement, fear, and humble heroism is captured in their own words; the real story of the undersea war in the Pacific told by the men who fought it. A veteran of the United States Navy, Stephen Leal Jackson spent eight years in the submarine force serving on the USS Los Angeles (SSN 688) and the USS Florida (SSBN 728). Jackson's service included several Western Pacific cruises to the oceans, lands, and ports described in *The Men*. A lifelong student of American history, Jackson's ongoing research concentrates specifically on World Wars I and II. Jackson received his Master of Arts in American History from Providence College and is currently in the Ph.D. program at Salve Regina University. Jackson has served as the primary spokesperson for a major electrical utility on nuclear and environmental issues. His unique perspective as a onetime navy enlisted submariner, trained historian, and skilled communicator allows Jackson to provide clear and easy access to the fascinating experiences of the men who fought the undersea battles during World War II.
